The master of education in the field of elementary education degree program is designed for those with an undergraduate degree in the arts and sciences. The program includes course work for students who wish to become eligible for licensure/certification for teaching at the elementary school level (grades 1–6). Additional course work in content areas may be needed to meet specific jurisdictional requirements for licensure/certification.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/elementary-education) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits in required courses.

Required	
Foundations	
CPED 6604	Perspectives in American Education
CPED 6606	Theories of Learning and Development
CPED 6608	Development and Diversity
SPED 6290	Affective Development and Behavior Management in Special Education
Methodology	
CPED 6410	Reading Children's Literature across the Curriculum
CPED 6412	Elementary School Curriculum and Methods (Math)
CPED 6412	Elementary School Curriculum and Methods (Science)
CPED 6412	Elementary School Curriculum and Methods (Language Arts)
CPED 6412	Elementary School Curriculum and Methods (Social Studies)
CPED 6623	Foundations of Reading Development
EDUC 6114	Introduction to Quantitative Research
Internship	

CPED 6635	Professional Internship in Elementary Education (taken for 6 credits)

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF EXPERIENTIAL EDUCATION AND JEWISH CULTURAL ARTS

The Graduate School of Education and Human Development, in concert with the Columbian College of Arts and Sciences, offers an intensive, interdisciplinary, 13-month degree program combining Jewish cultural arts, experiential education, and museum education. Graduates will be prepared for leadership in Jewish museums and arts institutions, community centers, college campus organizations, summer camps, and other innovative educational and cultural settings.

Partnering theory with practice, and the classroom with fieldwork, the EE/JCA curriculum enables students to become competent, creative, and reflective professionals. The program:

- Inspires students to develop exciting and relevant programming for a range of audiences,
- Offers a year-long series of internships at cultural arts and educational institutions, and
- Develops professional skills including budgeting, grant writing, workplace collaboration, and effective communication.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/experiential-education-jewish-cultural-arts) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits in required courses.

Required

EDUC 6100	Experimental Courses (Mosaic: The Institute I (taken for 1 credit)
EDUC 6100	Experimental Courses (Mosaic: The Institute II (taken for 2 credits)
EDUC 6100	Experimental Courses (An Introduction to Experiential Jewish Education (taken for 6 credits)
JSTD 6211	Displaying Jewish Culture: Landmark Exhibitions on Judaism and the Jewish Experience
or JSTD 6001	Topics in Judaic Studies
JSTD 6298	Behind the Scenes: The Jewish Arts World in Contemporary Perspective
or JSTD 6202	Multiple Lives: The Fate of Jewish Cultural Expression
EDUC 6711	Museum as a Learning Environment
EDUC 6100	Experimental Courses (Behind the Scenes: Experiential Museum Education (taken for 3 credits)
EDUC 6100	Experimental Courses (Artful Synthesis: Experiential Jewish Education in Theory and Practice (taken for 6 credits)
EDUC 6100	Experimental Courses (Capstone Fellows Program (taken for 3 credits)

Mosaic Workshop (credits earned in Mosaic: The Institute II)

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF HIGHER EDUCATION ADMINISTRATION

The master of arts in education and human development in the field of higher education administration (M.A.Ed.&H.D) degree program is designed to provide students with the skills and knowledge for successful work in entry- and mid-career professional positions in institutions of higher education, associations, national and international government agencies, and related organizations. Students may select a concentration in general administration, student affairs administration, higher education policy and finance, and international education. The program of study includes an introduction to higher education administration, research design and analysis, the concentration (in-depth focus on a particular aspect of higher education and its administration), application electives (including internships and practicums), and leadership integration.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/higher-education-administration-0) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 12 credits in required core courses, 12 credits in one concentration (15 credits in student affairs administration), 6 credits in elective courses (3 in student affairs administration), and a capstone project.

Code	Title	Credits
Higher education administration core courses:		
EDUC 6112	Foundations of Assessment, Testing, and Measurement in Education	
EDUC 6500	Intro Stu Aff & Higher Ed	
EDUC 6510	Administration of Higher Education	
EDUC 6585	Master's Internship in Higher Education Administration	
EDUC 6590	Capstone in Higher Education Administration	
General administration concentration:		
EDUC 6540	Group and Organizational Theories	
EDUC 6560	Legal Problems in Higher Education	
EDUC 6555	Higher Education Policy	
or EDUC 6565	Financing Higher Education	
EDUC 8560	Case Studies in Higher Education Administration	
Electives		
6 credits in elective courses to be selected in consultation with the advisor.		
Higher education policy and finance concentration:		
EDUC 6555	Higher Education Policy	
EDUC 6565	Financing Higher Education	
EDUC 6560	Legal Problems in Higher Education	
EDUC 8540	History of Higher Ed	
Electives		
6 credits in elective courses to be selected in consultation with the advisor.		
International education concentration:		
EDUC 6602	Regional Studies in International Education	
or EDUC 6615	Internationalizing U.S. Schools	
or EDUC 6630	International Experiences	
EDUC 6610	Programs and Policies in International Education

EDUC 8560	Case Studies in Higher Education Administration	
Electives		
6 credits in elective courses to be selected in consultation with the advisor.		
Student affairs administration concentration:		
EDUC 6520	Foundations of College Student Development	
EDUC 6525	Managing College Student Services Programs	
EDUC 6530	Intercultural Campus Ldrshp	
EDUC 6540	Group and Organizational Theories	
EDUC 6585	Master's Internship in Higher Education Administration	
Electives		
3 credits in elective courses to be selected in consultation with the advisor.		

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT - INDIVIDUALIZED PROGRAM

The master of art in education and human development individualized degree program provides students with an opportunity to develop a program of study that cuts across existing fields, both within the Graduate School of Education and Human Development and between the School and other schools and departments of the University and the Consortium. It is designed to meet specific career and professional objectives of applicants who have unique needs. The flexible program structure can be tailored to prepare for new and emerging fields in education and human development. This program is available within or across the five departments of the Graduate School of Education and Human Development.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

REQUIREMENTS

The following requirements must be fulfilled: 30 credits distributed as outlined below:

Code	Title	Credits
Required		
12 credits of core foundation curriculum courses in human development, social/historical/philosophical foundations in education, and curriculum		
12 credits of courses that meet student's program goals and objectives		
Minimum of 6 credits of fieldwork or the equivalent		
All work toward the degree must be specified at the time the initial program is developed.		

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF INTERNATIONAL EDUCATION

The master of arts in education and human development in the field of international education degree program is designed for individuals who are entering or advancing in positions associated with training, education, adult learning, and development activities in diverse settings that require international understanding. Students acquire knowledge of other countries and cultures, using the education system as a means of interpreting and translating knowledge across cultures, and analysis of the formal and non-formal school systems as they reflect history, culture, development, values, contemporary concerns, and future trends. In addition, students acquire tools, methods, and habits of analysis that enable them to play a variety of roles as leaders and change agents.

Students in this program can also enroll in and receive a graduate certificate in Incorporating International Perspectives in Education.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/international-education) for additional information.

REQUIREMENTS

Required: 36 credits, including 18 credits in required courses, 9 credits in courses in a specialization, and 9 credits in elective courses.

Required		
EDUC 6114	Introduction to Quantitative Research	
or EDUC 6116	Introduction to Educational Statistics	
And five of the following:		
EDUC 6601	International and Comparative Education	
EDUC 6602	Regional Studies in International Education	
EDUC 6610	Programs and Policies in International Education	
EDUC 6615	Internationalizing U.S. Schools	
EDUC 6620	Strategies and Analysis in International Education	
EDUC 6630	International Experiences	
EDUC 6660	Capstone in International Education	
EDUC 6631	Internship: International Education	
EDUC 6640	Selected Topics in International Education	
EDUC 6650	Education and National Development	
Specialization		
9 credits in a professional, academic, or regional specialization selected in consultation with the program advisor.		
Elective		
9 credits of approved electives selected in consultation with the program advisor.		

Up to 6 additional credit hours of internship may be required for students who do not have international education related experience.

MASTER OF ARTS IN TEACHING IN THE FIELD OF MUSEUM EDUCATION

The master of arts in teaching (M.A.T.) in the field of museum education degree program is an intensive, interdisciplinary program designed to prepare graduates for work fulfilling the educational mission of art, history or science museums; zoos, aquaria, or nature centers; and historical societies or sites. Graduates also qualify to serve as liaisons between schools and museums and as professionals in museum-related private and public agencies.

Students interested in museum studies more generally should refer to Museum Studies (p. 304).

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/museum-education) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits, including 27 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Required		
EDUC 6701	Museums as Institutions I: Fundamentals	
EDUC 6702	Facilitating Museum Learning I: Fundamentals	
EDUC 6703	Museum Audiences	
EDUC 6704	Facilitating Museum Learning II: Field Placement and Seminar (taken for 6 credits)	
EDUC 6705	Museums as Institutions II: Field Placement and Seminar (taken for 6 credits)	
EDUC 6706	Evaluating Museum Learning	
EDUC 6707	Museum Proposal Writing	
Electives		
6 credits in elective courses.		

Elective courses should be selected in consultation with the program advisor.

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF ORGANIZATIONAL LEADERSHIP AND LEARNING

The master of arts in education and human development in the field of organizational leadership and learning degree program is designed for individuals entering or advancing in positions associated with learning in organizational settings in all sectors of society. Typical careers are in organizational development, internal and external consulting, and training and development. The program is interdisciplinary, and students are encouraged to tailor their programs to individual career needs and objectives.

The required courses in the 30-credit program cover human behavior in organizations, adult learning, group dynamics, research methods, organizational change, strategic change, global leadership, leadership development, and assessing the impact of change efforts. Project work in Washington-area business, industry, government, and community organizations may be a part of the learning experience.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/organizational-leadership-learning) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 21 credits in required courses and 9 credits in elective courses.

Code	Title	Credits
Required		
EDUC 6112	Foundations of Assessment, Testing, and Measurement in Education	
HOL 6700	Human Behavior and Learning in Organizations	
HOL 6701	Adult Learning	
HOL 6702	Organizational Change I	
HOL 6703	Organizational Change II	
HOL 6704	Leadership in Organizations	
HOL 6746	Work Groups and Teams in Organizations	
Elective		
Any combination of 3 courses from the following tracks for a broader competency or 3 courses from any one track for a more in-depth competency		
Leadership Track		
HOL 6706	Current Issues in Organizational Leadership	
HOL 6708	Global Leadership	
HOL 6709	Leadership Development	
HOL 6101	Research and Independent Study	
HOL 6725	Internship in Human Resource Development	
Learning Track		
HOL 6101	Research and Independent Study	
HOL 6707	Organizational Learning	

HOL 6724	Increasing the Capacity to Learn
HOL 6725	Internship in Human Resource Development
HOL 6742	Design of Adult Learning Interventions
HOL 6743	Action Learning
Change Track	
HOL 6101	Research and Independent Study
HOL 6705	Strategic Change
HOL 6721	Assessing the Impact of Organizational Change
HOL 6725	Internship in Human Resource Development
HOL 6744	Meaningful Workplaces
Globalization Track	
HOL 6100	Special Workshop (Global Mindset)
HOL 6100	Special Workshop (Globalization, Change and Learning)
HOL 6101	Research and Independent Study
HOL 6725	Internship in Human Resource Development
HOL 6747	International and Multicultural Issues in Organizations

Note: Internship and research/independent study courses might be used as electives in a track, provided the subject matter of the work is relevant. For example, a research project in leadership could qualify for 3 elective credits in the Leadership Track.

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF REHABILITATION COUNSELING

The master of arts in education and human development (M.A. Ed.&H.D.) in the field of rehabilitation counseling degree program prepares highly knowledgeable students to become professional practitioners assisting persons who are physically, mentally, emotionally, or socially disabled to become empowered and to assume or to resume their place in society. This program leads to licensure and public and private employment opportunities.

Areas of concentration include autism spectrum disorder, traumatic brain injury, and psychiatric disabilities and substance abuse.

Specific admission requirements are shown on the Graduate Program (http://www.gwu.edu/all-graduate-programs)Finder.

Visit the program website (http://gsehd.gwu.edu/programs/rehabilitation-counseling) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: A minimum of 48 credits or 50 credits for the specialization in the rehabilitation of individuals who are mentally ill.

Regular program

Required	
CNSL 6130	Vocational Assessment of Individuals with Disabilities
or CNSL 6157	Individual Assessment in Counseling
CNSL 6151	Professional and Ethical Orientation to Counseling
CNSL 6153	Counseling Interview Skills
CNSL 6154	Theories and Techniques of Counseling
CNSL 6155	Career Counseling
CNSL 6161	Group Counseling
CNSL 6163	Social/Cultural Dimensions-Cns
CNSL 6185	Practicum/Internship in Counseling
CNSL 6186	Advanced Internship in Counseling
CNSL 6376	Foundations/Practicum: Rehabilitation and Case Management
CNSL 6378	Disability Management and Psychosocial Rehabilitation
CNSL 6380	Job Placement and Supported Employment
CNSL 6381	Medical and Psychosocial Aspects of Disabilities
EDUC 6114	Introduction to Quantitative Research
or EDUC 6116	Introduction to Educational Statistics
Electives	

Six credits of electives selected in consultation with advisor

Optional concentrations are available in autism and spectrum disorders, substance abuse and psychiatric disabilities, and traumatic brain injury.

Specialization in the rehabilitation of individuals who are mentally ill

Students who are admitted to the program with a specialization in the rehabilitation of individuals who are mentally ill must complete 50 credits of the following:

EDUC 6114	Introduction to Quantitative Research
CNSL 6100	Special Workshop
CNSL 6101	Research and Independent Study
CNSL 6130	Vocational Assessment of Individuals with Disabilities
CNSL 6151	Professional and Ethical Orientation to Counseling
CNSL 6153	Counseling Interview Skills
CNSL 6154	Theories and Techniques of Counseling
CNSL 6155	Career Counseling
CNSL 6161	Group Counseling
CNSL 6163	Social/Cultural Dimensions-Cns
CNSL 6173	Diagnosis and Treatment Planning
CNSL 6185	Practicum/Internship in Counseling
CNSL 6186	Advanced Internship in Counseling
CNSL 6376	Foundations/Practicum: Rehabilitation and Case Management
CNSL 6378	Disability Management and Psychosocial Rehabilitation
CNSL 6380	Job Placement and Supported Employment
CNSL 6381	Medical and Psychosocial Aspects of Disabilities

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF SCHOOL COUNSELING

The master of arts in education and human development (M.A.Ed.&H.D.) in the field of school counseling degree program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP) and provides professional preparation for individuals who wish to become certified as counselors in public and private schools. The program is designed to equip students with the requisite knowledge and skills to provide professional counseling, assessment, consultation, and guidance services in a school setting.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/school-counseling) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits, including 42 credits in required courses and 6 credits in elective courses:

Required	
EDUC 6114	Introduction to Quantitative Research
or EDUC 6116	Introduction to Educational Statistics
CNSL 6151	Professional and Ethical Orientation to Counseling
CNSL 6153	Counseling Interview Skills
CNSL 6154	Theories and Techniques of Counseling
CNSL 6155	Career Counseling
CNSL 6157	Individual Assessment in Counseling
CNSL 6159	Psychosocial Adaptation
CNSL 6161	Group Counseling
CNSL 6163	Social/Cultural Dimensions-Cns
CNSL 6185	Practicum/Internship in Counseling
CNSL 6186	Advanced Internship in Counseling
CNSL 6466	Foundations of School Counseling K–12
HDEV 6108	Life Span Human Development
HDEV 6109	Child Development
or HDEV 6110	Adolescent Development
Elective	
6 credits of approved electives	
The remaining credits should be selected in consultation with the program advisor.	

Counseling students are required to complete 600 hours as part of their internships (300 hours per course) and 100 hours as part of their practicum.

MASTER OF EDUCATION IN THE FIELD OF SECONDARY EDUCATION

The master of education (M.Ed.) in the field of secondary education degree program is designed for those individuals with an undergraduate degree in the arts and sciences, or equivalent. Degree candidates may specialize in English, English as a second language, foreign languages (Arabic, Chinese, French, German, Italian, Latin, Russian, and Spanish), mathematics, science (biology, chemistry, general science, and physics), or social studies. Required program course work includes credits leading to eligibility for teacher licensure/certification; specific course work in the subject area to be taught may be needed to meet jurisdictional requirements for licensure/certification.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/secondary-education) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits (36 credits for the ESL concentration), all required core courses, and all courses and elective credits indicated in one of the concentrations.

In addition, all students are required to complete a comprehensive examination and the relevant teacher licensure assessments, the latter of which are required by the District of Columbia Educator Licensure Services Office.

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF SECONDARY SPECIAL EDUCATION AND TRANSITION SERVICES

This interdisciplinary master of arts in education and human development (M.A.Ed.&H.D.) degree program prepares educators and support personnel to address the needs of youth and young adults with special needs for careers and transition from school to postsecondary education, employment, and independent living and community participation. Several programs offer teacher licensure certification preparation in categorical learning, emotional, and behavioral disabilities, or noncategorical special education. Other programs are non-teacher licensure and focus on development of interdisciplinary transition knowledge, competencies, and skills.

The curriculum integrates the roles of relevant disciplines and service agencies, including postsecondary planning, evidence-based practices, instructional and curriculum strategies, service delivery models, and accommodations and supports from the classroom to postsecondary education. The program includes traditional course work, practicum, and internship, as well as field-based professional practice and research. Students can plan their programs to emphasize interdisciplinary secondary and career programming, learning disabilities, traumatic brain injury, and culturally and linguistically diverse learners.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/secondary-special-education-and-transition-services) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: a minimum of 39 credits, including 15 credits in core courses, 24 to 27 credits within a concentration, and successful completion of the master's comprehensive examination.

Students in concentrations other than **brain injury specialist (without licensure) and interdisciplinary transition services (without licensure) also must complete** the relevant teacher licensure assessments (i.e., PRAXIS) required by the District of Columbia Educator Licensure Services Office.

Requirements for completion of the comprehensive examination and for teacher licensure assessments vary by concentration.

Secondary special education and transition services required core courses:

EDUC 6114	Introduction to Quantitative Research
SPED 6222	Legal Issues and Public Policy for Individuals With Disabilities
SPED 6233	Curriculum in Secondary Special Education and Transition
SPED 6236	Introduction to Career and Career–Technical Education and Transition Services

SPED 6280	Developmental Assessment of Adolescents

Adolescents with Emotional and Behavioral Disabilities Concentration

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF SPECIAL EDUCATION FOR CHILDREN WITH EMOTIONAL AND BEHAVIORAL DISABILITIES

The master of arts in education and human development (M.A.Ed.&H.D.) in the field of special education for children with emotional and behavioral disabilities (EBD) is an intensive degree program that prepares its graduates to work with learning and emotional problems of students in grades K-8. The program is designed to develop competencies in the nature and needs of troubled children; assessment, programming, and teaching; and working effectively as an interdisciplinary and interagency team member. Graduate students have the opportunity to work intensively with students with disabilities in a therapeutic school setting, applying their course work directly to practice while being mentored by school-based cooperating teachers and University faculty and staff.

The program is nationally recognized by the Council for Exceptional Children, is accredited by the Council for the Accreditation of Educator Preparation (CAEP), and has been training exemplary special educators for twenty years.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/special-education-children-emotional-behavioral-disorders) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 39 credits in required courses, successful completion of the master of arts in education and human development comprehensive examination, and completion of the relevant teacher licensure assessments (see below).

Required	
CPED 6224	Diagnostic Teaching of Reading: K–6
CPED 6236	Analysis of Teaching
CPED 6411	Elementary School Curriculum and Methods (in subject matter Social Studies, Mathematics, Science, or Language Arts)
CPED 6411	Elementary School Curriculum and Methods (in subject matter Social Studies, Mathematics, Science, or Language Arts)
EDUC 6114	Introduction to Quantitative Research
SPED 6201	Introduction to Special Education
SPED 6238	Issues in Educating Individuals with Learning, Emotional, and Intellectual Disabilities
SPED 6239	Collaboration for Professionals Working with Students with Disabilities
SPED 6260	Developmental Assessment in Special Education
SPED 6288	Characteristics of Individuals with Learning, Emotional, and Intellectual Disabilities
SPED 6290	Affective Development and Behavior Management in Special Education
SPED 6990	Internship in Teaching Children with Emotional and Behavioral Disabilities: Assistant Teacher
SPED 6991	Internship in Teaching Children with Emotional and Behavioral Disabilities: Co-Teacher

Master of Arts in Education and Human Development comprehensive exam

Completion of the relevant teacher licensure assessments (i.e., PRAXIS) required by the District of Columbia Educator Licensure Services Office

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF SPECIAL EDUCATION FOR CULTURALLY AND LINGUISTICALLY DIVERSE LEARNERS

This master of arts in education and human development (M.A.Ed. & H.D.) degree program equips current educators with the knowledge and skills needed to understand and address the cultural, linguistic, social, and learning needs of students—including those with special needs—whose diversity impacts their school success. The program is designed for licensed teachers and educators who wish to expand their knowledge to address the changing demographics of the modern classroom. Program course work and field experiences are built around competencies in the areas of assessment, lesson planning, and teaching, with a focus on culturally and linguistically diverse students. Master's degree students develop a professional portfolio and sit for the ESOL PRAXIS, and SPED PRAXIS exams at the end of the program. Graduates are prepared to work with students who have disabilities and those in the process of second language acquisition. Course work is offered in both distance learning and on-campus formats.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/special-education-culturally-linguistically-diverse-learners) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits in required courses; and successful completion of the master of arts in education and human development comprehensive examination; and completion of the relevant teacher licensure assessments (see below).

Code	Title	Credits
Required		
CPED 6551	Second Language Instructional Methods	
CPED 6556	Linguistic Applications in English as a Second Language	
CPED 6627	Teaching Second Language Reading and Writing	
EDUC 6114	Introduction to Quantitative Research	
SPED 6266	The Development of Language and Literacy	
SPED 6268	Development of Children and Youth with Disabilities	
SPED 6275	The Culturally and Linguistically Diverse Student with Disabilities: Policy, Research, and Trends	
SPED 6276	Academic and Psychosocial Assessment of the Culturally and Linguistically Diverse Student (taken twice)	
SPED 6277	Teaching Culturally and Linguistically Diverse Students with Disabilities	
SPED 6997	Internship in Teaching Culturally and Linguistically Diverse Students with Disabilities (taken for 3 credits)	

Master of Arts in Education and Human Development comprehensive exam required

Completion of the relevant teacher licensure assessments (i.e., PRAXIS) required by the District of Columbia Educator Licensure Services Office

.

EDUCATION SPECIALIST PROGRAMS

The Degree of Education Specialist

The program of advanced study leading to the degree of education specialist (Ed.S.) is for students with a master's degree in education who seek further professional preparation. The program is available in the fields of educational leadership and administration, counseling, curriculum and instruction, higher education administration, human and organizational learning, and special education.

Admission Requirements

The following are required for entrance to an education specialist program: an undergraduate degree and a master of arts in education and human development (M.A.Ed.&H.D.) or its equivalent from a regionally accredited institution, two years of pertinent experience in an education or human development field, and a graduate scholastic average of at least 3.3 and, in some programs, an acceptable score on either the Graduate Record Examination or Miller Analogies Test. Two letters of

recommendation, one from a professional supervisor and one from the most recent graduate faculty advisor, are required, along with a statement of professional goals. Each applicant must be interviewed and recommended by a faculty advisor in the major field.

Programs of Study and Degree Requirements

Individual programs are developed, through a plan of study worked out with a faculty advisor, to fit the candidate's skills, interests, and career goals. A minimum of 30 credits beyond the requirements for an M.A.Ed.&H.D. degree is required. At least 21 credits of this work must be taken in residence at GW. A maximum of five calendar years is allowed for completion of the program.

At least 12 of the required 30 credits must be in appropriate graduate courses in education selected from the following areas: (1) foundations and cognate study, (2) background and general principles of the field of study, and (3) an area of specialization. A graduate-level research methods course must be included in the program if it was not completed in previous graduate work.

The Comprehensive Examination

Successful completion of a six-hour written or oral examination or its equivalent, at the option of the major field advisor, is required. Candidates taking the examination must be registered for at least 1 credit in the semester it is to be taken and submit an online comprehensive examination application by the published deadline.

Education Specialist Programs

- Education Specialist in the field of educational leadership and administration (p. 539)
- Education Specialist in the field of special education (p. 539)

EDUCATION SPECIALIST IN THE FIELD OF EDUCATIONAL LEADERSHIP AND ADMINISTRATION

The education specialist in the field of educational leadership and administration degree program is designed for students who have at least one year of instructional experience and seek further professional preparation for specific objectives, including leadership and promotion of high-quality student achievement at the district, sub-district, or school-wide level. This post-master's program can be pursued either in the classroom or in a distance learning format. Graduates are prepared with the skills to become PK-12 leaders who understand curriculum design, instructional excellence, motivation and support of classroom professionals, and the needs of diverse learning communities. Evidence-based course work emphasizes leadership and management, change, communication, administrative and legal issues, human relations, supervision of instruction, and curriculum analysis.

The Ed.S. program is nationally recognized by the Council for the Accreditation of Educator Preparation (CAEP) the National Council for Teacher Education (NCATE), and the Educational Leadership Constituent Council (ELCC).

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/education-specialist-educational-leadership-and-administration) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits in required courses.

Code	Title	Credits
Required		
EDUC 6100	Experimental Courses (Leading Evidence-Based Action Research for School Improvement)	
EDUC 6232	Supervision and Evaluation of Instruction	
EDUC 6234	Site-Based Leadership: K-12	
EDUC 6236	School Law and Policy	
EDUC 6240	Fundamentals of Educational Leadership and the Change Process	
EDUC 6244	School-Community Relations	
EDUC 6246	Seminar: Applied Educational Administration	
EDUC 6287	Internship: Administration (taken twice)	
EDUC 6422	Instructional Needs Analysis	

EDUCATION SPECIALIST IN THE FIELD OF SPECIAL EDUCATION

The educational specialist (Ed.S.) in the field of special education degree program offers advanced study for students with master's degrees in education who seek further professional preparation in the various subfields of special education and disability studies. Specific programs are developed in concert with faculty advisors and consist of a minimum of 30 graduate credits.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits in a program developed in consultation with the advisor. This program must include at least 12 credits in graduate courses in the following general areas:

- background and general principles of the field of study
- an area of specialization
- research methods
- professional internship

DOCTORAL PROGRAMS

The Degree of Doctor of Philosophy

A Ph.D. in the field of counseling is accredited by the Council for Accreditation of Counseling and Related Educational Programs.

The Ph.D. in the field of educational science is designed to create opportunities for cross-disciplinary education research by concentrating on critical national and global problems in which education and human development play a significant role. To adequately address such critical national and global problems, scholars require both a strong foundation in educational science as well as theoretical and disciplinary grounding in multiple disciplines. The Ph.D. program is distinguished by four characteristics: (a) candidates apply to a cross-disciplinary research team (CRT) that is focused on a critical problem related to education, (b) approaches to the research problems require a cross-disciplinary lens, (c) students engage in research throughout their program, and (d) candidates aspire to careers in which the production of research is paramount.

Admission Requirements

A master's degree from a regionally accredited institution is required. Materials to be submitted include: official transcripts, GRE scores, TOEFL scores (for international applicants), three letters of recommendation, and a statement of purpose. Each program has more specific details about these materials and additional requirements. Selection is competitive and is based on the applicant's past achievements, perceived potential, and fit to the goals and mission of the program.

The Degree of Doctor of Education

The Graduate School of Education and Human Development offers programs of advanced study leading to the degree of Doctor of Education (Ed.D.). These programs provide major fields of study in curriculum and instruction, special education, educational administration and policy studies, human and organizational learning, and higher education administration. Supporting fields are available in educational administration, higher education administration, counseling, curriculum and instruction, education policy, elementary education, human development, human and organizational learning, international education, program evaluation, secondary education, special education, supervision, and teacher education. With the approval of a student's program planning committee, course work may be taken in or from other departments of the University and through the Consortium. All programs require a doctoral dissertation in the major field of study.

All doctoral programs are designed to accommodate the needs of full-time students as well as working professionals who must pursue their studies on a part-time basis. Required graduate courses, with few exceptions, are offered in the late afternoon and evening. In some programs, courses are offered at off-campus locations.

Admission Requirements

The applicant must have adequate preparation for advanced study, including the undergraduate degree and graduate work from a regionally accredited institution in the content area that supports his or her objective. This graduate work must be comparable to that required for the degree of Master of Arts in Education and Human Development at this University. Students with a master's degree in a field other than education may be considered for doctoral study provided that the degree and previous experience are judged relevant by the major field program faculty.

For an application to be considered by the major field program faculty, an applicant must have a minimum graduate scholastic average of 3.3 on a scale of 4.0 and an acceptable score on the Miller Analogies Test or Graduate Record Examination. In the field of human organizational learning, the Graduate Management Admissions Test is acceptable as well. Programs often set higher admissions standards, and the number of new doctoral students in each program is limited. All applicants must have an interview with faculty members in the major field. Students receiving favorable recommendations from the major field faculty are admitted to precandidacy for the degree.

Precandidacy and Candidacy

The Doctor of Education program is divided into two stages: precandidacy and candidacy. In general, the degree program requires three or more years of full-time study beyond the master's degree or the equivalent in part-time study. Course work and the comprehensive examination must be completed within five years, and the entire program must be completed within eight years. The minimum residency requirement in degree status for the Ed.D. is 36 credits of course work in the precandidacy stage and 12 to 24 credits of dissertation research in the candidacy stage. In most cases, course work beyond the minimum is required.

In the precandidacy stage, all course work in the program must be completed and the comprehensive examination passed. Course work toward the doctorate is established on the basis of a framework of seven domains: knowledge of foundations; critical literature review; research methods; clarity of thought, as expressed both in speech and in writing; professional development; technological skills; and depth of knowledge of the specialty area. A program plan of study is developed

between the doctoral student and a doctoral study advising team, generally consisting of two members of the program faculty.

The comprehensive examination is generally a two-day examination held each semester and taken upon completion of all precandidacy course work. Students taking the examination must be registered for at least 1 credit in the semester it is to be taken and must file an online application in the dean's office by the published deadline.

The candidacy stage of doctoral study begins after successful completion of the content course work *and* the comprehensive examination. A doctoral research dissertation committee is established and the candidate develops a dissertation proposal (this may be while registered in Pre-Dissertation Seminar). Upon successful completion of course work listed on the approved program plan of study, students must register for dissertation research at the rate of 3 or 6 credits each fall and spring semester. A minimum of 12 dissertation research credits are required for graduation. Students who have not defended their dissertation after 12 credits continue to register at the rate of 3 or 6 credits until they have reached 24 credits of dissertation research. Once they have reached their 24 credit maximum, they must register each subsequent fall and spring semester for 1 credit of Continuing Research until completion of their degree program with the successful defense of the dissertation to the Dissertation Oral Examination Committee. The accepted dissertation is submitted electronically, with a processing fee paid directly to Proquest/UMI.

Detailed information on the Ed.D. program and its administration is available in the GSEHD Doctoral Student Handbook (http://gsehd.gwu.edu/sites/default/files/2014%20-%202015%20Doctoral%20Handbook.pdf). Students completing their degree program should refer to the section on Graduation Requirements, Participating in the Commencement Ceremony, under University Regulations.

Doctoral programs

- Doctor of Education in the field of curriculum and instruction (p. 541)
- Doctor of Education in the field of educational administration and policy studies (p. 542)
- Doctor of Education in the field of higher education administration (p. 544)
- Doctor of Education in the field of human and organizational learning (p. 545)

- Doctor of Philosophy in the field of educational science (p. 549)

DOCTOR OF EDUCATION IN THE FIELD OF CURRICULUM AND INSTRUCTION

The doctor of education in curriculum and instruction degree program prepares education leaders whose objective is to improve pre-K through 16+ education in local, national, and international settings. The program encourages critical thought and creative work through course work focusing on curriculum, instruction, research, and other learning opportunities that intentionally link teaching and learning, policy, and evaluation to students' prior experiences.

The program focuses on understanding how curriculum and instruction can be constructed and applied to educational reform and diverse student populations. Doctoral students become part of a community that links scholars with practicing professionals, policy makers, and educational organizations in Washington, D.C., and beyond. Students can also use the program to expand their content knowledge or delve into other fields through linkages with Columbian College of Arts and Sciences or other schools at GW.

Graduates of the program can be found working in government agencies, teaching in university settings, or running informal education organizations. They may be curriculum supervisors in school systems or master teacher leaders in schools.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/curriculum-instruction) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

Requirements for the doctor of education program (p. 540).

A minimum of 66 credits.

Code	Title	Credits
Required		
CPED 6305	Foundations of Curriculum Theory	
CPED 8325	Advanced Ideas in Curriculum Theory	
CPED 8330	Paradigms of Instruction and Assessment	
CPED 8331	Seminar in Instruction	
CPED 8334	Seminar in Research in Curriculum and Instruction I	

EDUC 8110	Advanced Study: Ideas, Issues, and Practices in Education
Policy and evaluation	
CPED 8340	Education Policy, Reform & Teacher Leadership
CPED 8341	Evaluation in Curriculum & Instruction

Dissertation	
CPED 8998	Doctoral Seminar in Curriculum and Instruction (taken for 3 credits)
CPED 8999	Dissertation Research (minimum 12 credits needed to complete requirement)
Approved dissertation proposal required	
Comprehensive Examination	
Successful completion of a comprehensive examination is required.	

*Prerequisite statistics courses must be taken during the master's degree or must be completed prior to taking required advanced courses. For students who have not had an introductory statistics course or do not feel confident in their understanding and application of basic statistical techniques (i.e. through one way analysis of variance), EDUC 6116 Introduction to Educational Statistics, should be completed prior to enrolling in EDUC 8120 Group Comparison Designs and Analyses.

DOCTOR OF EDUCATION IN THE FIELD OF EDUCATIONAL ADMINISTRATION AND POLICY STUDIES

The doctor of education (Ed.D.) in educational administration and policy studies degree program provides students with the skill and knowledge they need either to excel within policy research and analysis or achieve high-level success in a K-12 school setting. Though the education administration and policy studies specialties are offered under the same degree title, they are offered at different campus locations with entirely different curricula.

Education Administration Specialty
The education administration specialty is offered at three GW campus locations—the Virginia Science and Technology Campus, in Herndon, Virginia; Alexandria Graduate Center in Alexandria, Virginia; and Hampton Roads Center in Hampton Roads, Virginia. This academically rigorous program prepares students for leadership responsibilities within all facets of the educational arena. Researchers and practitioners who aspire to high levels of responsibility in educational organizations will develop leadership skills through course work, seminars, research associations with faculty, and self-directed activities.

Please visit the Doctorate in Education Administration website (http://gsehd.gwu.edu/programs/doctorate-education-administration) for more information.

Education Policy Specialty
The Education Policy specialty is offered at GW's Foggy Bottom campus in downtown Washington, D.C. The interdisciplinary program relies on approaches and methods from various fields to help students develop the skills needed to examine and assess education problems in the context of their social environments. The program is designed for students who wish to develop skills in policy research, program evaluation, and the technical, political aspects of education policy. Emphasis is placed on developing both an understanding of the political, economic, and social environments affecting education policy and the competencies needed to apply research to analyze and effectively implement them or to evaluate their impact. Topics

covered in this field include school reform, urban education problems, student achievement, school finance and its equity, teacher quality and effectiveness, equal opportunity, access to higher education, and accountability.

Please visit the Doctorate in Education Policy website (http://gsehd.gwu.edu/programs/doctorate-education-policy) for more information.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The degree is offered in two specialized areas. All requirements in one specialized area must be fulfilled:

Educational administration specialty—a minimum of 48 credits, including 27 credits in required courses, a 3-credit research course, 18 credits in dissertation courses, and successful completion of the comprehensive examination.

Education policy specialty—a minimum of 54 credits, including 12 credits in required courses, 12 credits in research courses, 15 credits in dissertation courses, 15 credits in elective courses, and successful completion of the comprehensive examination. Six additional credits in prerequisite courses may be required.

Fulfillment of the requirements for the Doctor of Education programs (p. 540) is required for both specialties.

Successful completion of comprehensive exam required	

DOCTOR OF EDUCATION IN THE FIELD OF HIGHER EDUCATION ADMINISTRATION

The mission of the doctor of education in higher education administration degree program is to prepare exceptional leaders for administrative, academic, and research positions in two- and four-year higher education institutions, national and international associations, government agencies, and other post-secondary educational settings. The degree provides students with opportunities to integrate theory and research seamlessly with practice.

Program graduates rise rapidly within administrative and scholarly ranks based on their knowledge of critical issues in the field of higher education, ability to conduct independent primary research, and possession of the skills necessary for academic and administrative career development.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/higher-education-administration) for additional information.

DOCTOR OF EDUCATION IN THE FIELD OF HUMAN AND ORGANIZATIONAL LEARNING

The Doctor of Education (Ed.D.) in Human and Organizational Learning is designed to provide professionals with a foundation in relevant theories, concepts, and practices towards facilitating change initiatives and in becoming more effective leaders and decision makers.

The program is offered with two distinct focuses at different GW campuses.

Foggy Bottom Campus-Based Program

The Foggy Bottom campus offers working professionals evening courses on weeknights. The curriculum focuses on organizational issues such as strategic change, transformational leadership, individual and group learning processes, organizational development, global and international issues, the humane organization, virtual organizations, meaning of work, and self-directed learning. In addition to completing the required course work, students work with an advisor to create an individually designed program around the student's area of interest. All classes at the Foggy Bottom campus are offered on weeknights.

Virginia Science and Technology Campus-Based Program: Executive Leadership

The Virginia Science and Technology campus cohort focuses on the interrelationships among people, organizations, and learning, while using systemic change processes. The program encourages students to challenge assumptions through critical reflection and fosters group and self-directed learning. Program students come from a variety of professions including business, health care, the military, education, federal agencies, information technology, and manufacturing, and have a variety of academic backgrounds with degrees in fields such as engineering, psychology, health and medical sciences, the humanities, and business. This diverse population enriches the learning experience for fellow students and provides both local and global networking opportunities. All classes at the Virginia Science and Technology campus are offered over a two-day period—Friday and Saturday—once per month, enabling students to continue working full time while pursuing the degree. In addition to the general requirements for admission to the Ed.D., applicants must have at least five years of full-time experience in a field related to human and organizational learning.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/human-organizational-learning)for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

Requirements for the Doctor of Education program (p. 540).

The doctoral (Ed.D.) program is available in two formats, each totaling 69 credits.

Main Campus Program

Code	Title	Credits
Required		
EDUC 8110	Advanced Study: Ideas, Issues, and Practices in Education (or equivalent, with on-campus program coordinator approval)	
HOL 8700	Foundations of Human and Organizational Learning	
HOL 8701	Theory, Research, and Practice in Adult Learning and Development	
HOL 8702	Theory and Design of Organizational Diagnosis and Development	
HOL 8703	Human Systems Change	
HOL 8704	Leadership Theory, Research, and Practice	
HOL 8706	Interdisciplinary Readings in Human and Organizational Learning

Dissertation		
HOL 8998	Predissertation Seminar	

HOL 8999	Dissertation Research (minimum 12 credits needed to complete requirement)
Approved dissertation proposal is required.	
Successful completion of a comprehensive examination is required.	
Electives	
3 credits in an elective course selected in consultation with advisor.	

DOCTOR OF EDUCATION IN THE FIELD OF SPECIAL EDUCATION

The doctor of education in the field of special education degree program advances students' understanding of the relationship between structural and functional changes in the brain across time and experiences, examines cognitive processing, and considers the implications of these findings for teaching, learning, and educational policy. The program also addresses the challenging demands of disability in society and institutional improvements essential to supporting individuals with disabilities. The curriculum includes leadership, policy, and research courses, as well as foundational courses in brain development from early childhood through adulthood. The program works closely with Graduate School of Education and Human Development's Center for Applied Developmental Science and Neuroeducation (http://gsehd.gwu.edu/center-applied-developmental-science-and-neuroeducation) to provide research and internship opportunities for students to translate and apply research related to learning for diverse populations. Graduates leave prepared to have an impact through leadership in academic settings, research communities, policy institutions, and advocacy organizations.

Specific admission requirements are shown on the Graduate Program Finder.

Visit the program website for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

The requirements for the Doctor of Education programs (p. 540).

66 credits, including 27 credits in required courses, a minimum 12 credits in research courses including 3 credits in advanced research, 6 credits in internship courses, a minimum 15 credits in dissertation courses, 6 credits in elective courses, and successful completion of a comprehensive examination.

Required	
SPED 8305	Foundations of Neuroscience in Special Education
SPED 8306	Advanced Study in Development Science and Variance I: The Early Years
SPED 8310	Advanced Study in Development Science and Variance II: The Later Years
SPED 8311	Proseminar in Special Education: The Interdisciplinary Foundations
EDUC 8110	Advanced Study: Ideas, Issues, and Practices in Education

DOCTOR OF PHILOSOPHY IN THE FIELD OF COUNSELING

The doctor of philosophy. in counseling degree program balances rigorous research with clinical work to graduate scholar practitioners. Graduates are prepared for a number of roles, such as teaching in universities, practicing in a variety of settings from directing high school counseling departments to leading county mental health treatment programs. The program offers challenging course work, practical experience at mental health sites, and the opportunity to train as supervisors at the Graduate School of Education and Human Development's Community Counseling Service Center. Designed to be completed in four to five years, the program is unique in building students' knowledge and capacity to conduct research, publish, provide clinical services, and educate at the graduate level. Instruction is provided in areas including trauma, human sexuality, child and adolescent development, grief and loss, substance abuse, multicultural counseling, as well as a deep knowledge of diagnosis, assessments, interventions, and treatment approaches. The program is accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP).

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/counseling) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

A minimum of 69 credits, including 24 credits in core courses, 15 credits in research courses, 6 credits in human development courses, 9 credits in an area of specialization, 15 credits in dissertation courses, and successful completion of the comprehensive examination.

Requirements of the Doctor of Philosophy (p. 540) program.

*Prerequisite statistics courses must be taken during the master's degree or must be completed prior to taking the following required advanced courses. For students who have not had an introductory statistics course, have not had one in a long time, or do not feel confident in their understanding and application of basic statistical techniques (i.e. through one way analysis of variance), EDUC 6116, Introduction to Educational Statistics, should be completed prior to enrolling in EDUC 8120, Group Comparison Designs and Analyses.

DOCTOR OF PHILOSOPHY IN THE FIELD OF EDUCATIONAL SCIENCE

The doctor of philosophy (Ph.D.). in educational science degree program is designed to create opportunities for cross-disciplinary education research by concentrating on critical national and global problems in which education and human development play a significant role. To adequately address such critical national and global problems, scholars require both a strong foundation in educational science as well as theoretical and disciplinary grounding in multiple disciplines. The Ph.D. program is distinguished by four characteristics: (1) candidates apply to a cross-disciplinary research team (CRT) that is focused on a critical problem related to education, (2) approaches to the research problems require a cross-disciplinary lens, (3) students engage in research throughout their program, and (4) candidates aspire to careers in which the production of research is paramount.

REQUIREMENTS

The following requirements must be fulfilled:

Requirements of the Doctor of Philosophy (p. 540) program

Code	Title	Credits
Required		
Educational foundations		
EDUC 8100	Experimental Courses (taken four times for 3 credits each time)	
Research methods		
EDUC 8120	Group Comparison Designs and Analyses	
EDUC 8122	Qualitative Research Methods	
6 credits from the following:		
EDUC 8130	Survey Research Methods	
EDUC 8131	Case Study Research Methods	
EDUC 8140	Ethnographic Research Methods	
EDUC 8142	Phenomenological Research Methods	
EDUC 8144	Discourse Analysis	
EDUC 8170	Educational Measurement

EDUC 8173	Structural Equation Modeling	
EDUC 8100	Experimental Courses	
Cross-disciplinary concentration		
24 credits in graduate-level courses determined in consultation with the advisor at the time of admission. Course selections are determined by the focus of the cross-disciplinary research team and the specific interests of the student.		
Dissertation		
EDUC 8999	Dissertation Research (taken for a minimum of 12 credits)	
An approved dissertation proposal is required.		

The successful completion of a comprehensive examination required.

JURIS DOCTOR AND MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF EDUCATION POLICY STUDIES

Students must be admitted to the master of arts in education and human development in the field of education policy studies (http://bulletin.gwu.edu/education-human-development/masters-program/education-human-development-education-policy-studies) (M.A.Ed.&H.D.) degree program and, separately, to the juris doctor (http://www.law.gwu.edu/Admissions/JD/Pages/Default.aspx) degree program. Each school separately must approve a student's application to pursue the joint degree.

Once a student has been admitted to both schools as a joint degree candidate, the first year of study must be devoted exclusively to the prescribed law curriculum. Subsequently, any combination of law and master's degree courses may be taken in any semester.

Under Law School regulations, the grade of Credit (*CR*) or No Credit (*NC*) is recorded for courses taken at any other GW school, and a student must receive a grade of at least *B-* to receive a grade of *CR*. Grades of *CR* and *NC* resulting from courses taken outside of the Law School count toward the total of 17 credits allowed under the School's Credit/No Credit (*CR/NC*) option. Law students receive 1 credit for each 700 minutes of scheduled class time in a semester; therefore, a law student may in some cases earn only 2 credits for a course offered by another school of the University for 3 credits.

The joint degrees must be conferred simultaneously and only after all requirements for both degrees have been met. The Law School Records Office and Dean of Students Office work in consultation to transfer 12 credits earned as part of the M.A.Ed.&H.D. degree to the J.D. degree transcript in the final month before graduation. It is the responsibility of each joint degree student to ensure that grades from their final semester or summer session of study are transferred to the Law School for credit to qualify for graduation. Capstone projects, language requirements, and/or any other requirements for the M.A.Ed.&H.D. must be fully met before the law degree will be conferred.

A number of other regulations govern the joint degree programs. Students interested in entering one of these programs should consult with both admissions offices, and, in the Law School, the Dean of Students Office.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

GSEHD course requirements

EDUC 6116	Introduction to Educational Statistics
EDUC 6314	History of American Education Reform
EDUC 6368	Leadership and Education
EDUC 6371	Education Policy
EDUC 6381	Program Evaluation: Theory and Practice
EDUC 6388	Analysis of Education Policy Issues
EDUC 8122	Qualitative Research Methods

EDUC 6601	International and Comparative Education
EDUC 6602	Regional Studies in International Education
EDUC 6610	Programs and Policies in International Education
EDUC 6650	Education and National Development
Electives	

12 credits in approved electives taken through the Law School or GSEHD. Joint degree students must seek prior approval from their GSEHD faculty advisor to ensure that any course taken will be considered toward M.A.Ed. and H.D. electives. The Law School Dean of Students should approve credit for additional GSEHD courses that are law-related and develop policy analysis skills.

GRADUATE CERTIFICATE PROGRAMS

The Graduate School of Education and Human Development offers the following graduate certificate programs. Graduate certificates do not constitute eligibility for an initial license or assure admission to a subsequent degree program. Courses taken as part of a certificate program may be applied toward advanced credentials or endorsements added to an initial license.

Graduate Certificates

- Assessment, Testing, and Measurement in Education (p. 551)
- Autism Spectrum Disorders (p. 551)
- Brain Injury: Educational and Transition Services (p. 552)
- Counseling and Life Transitions (p. 552)
- Design and Assessment of Adult Learning (p. 553)
- E-Learning (p. 554)
- Global Leadership in Teams and Organizations (p. 554)

- Incorporating International Perspectives in Education (p. 554)
- Instructional Design (p. 555)
- Integrating Technology into Education (p. 555)
- Job Development and Placement (p. 556)
- Leadership Development (p. 556)
- Leadership in Educational Technology (p. 556)
- Multimedia Development (p. 557)
- Organizational Learning and Change (p. 557)
- Secondary Special Education and Transition Services (p. 557)
- Special Education for Culturally and Linguistically Diverse Learners (p. 558)
- STEM Master Teacher (p. 558)
- Teaching English to Speakers of Other Languages (p. 559)
- Training and Educational Technology (p. 559)

Post-Master's Certificates

- Counseling (p. 552)
- Educational Leadership and Administration (p. 553)

Visit the G (http://gsehd.gwu.edu/home)raduate School of Education and Human Development website (http://gsehd.gwu.edu/home) for more information.

GRADUATE CERTIFICATE IN ASSESSMENT, MEASUREMENT, AND TEACHING IN EDUCATION

Assessment, Testing, and Measurement (ATM) is a specialization within education and human development that combines statistical analysis, testing theory, and the study of human behavior, educational measurement, and evaluation. This 18-credit graduate certificate program is designed for individuals who are entering or advancing in positions associated with ATM in diverse settings as well as those who are preparing for admission to a master's or Ph.D. program in the field.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/graduate-certificate-assessment-testing-and-measurement-education) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Required:

EDUC 6112	Foundations of Assessment, Testing, and Measurement in Education
EDUC 8170	Educational Measurement
EDUC 8171	Predictive Designs and Analyses
EDUC 8175	Item Response Theory
EDUC 8177	Assessment Engineering
EDUC 8179	Capstone Project in Assessment,Testing, and Measurement in Education

GRADUATE CERTIFICATE IN AUTISM SPECTRUM DISORDERS

The graduate certificate in autism spectrum disorders prepares students to more effectively address the following issues in working with children with autism spectrum disorders: (1) academic achievement and study skills commensurate with their cognitive strength; this will provide the widest range of options for college and career choices, (2) social skills for navigating all of the environments in which they live, work, and play, and (3) problem-solving strategies that enable them to respond flexibly and successfully in challenging situations.

The certificate program is designed for individuals with a bachelor's or master's degree who are interested in focusing on a multi-intervention approach to instructing students with autism spectrum disorders.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 15 credits in required courses.

Code	Title	Credits
Required		
SPED 6240	Family Support and Guidance in Special Education	
SPED 6253	Introduction to Autism Spectrum Disorders	
SPED 6260	Developmental Assessment in Special Education	
SPED 6261	Practicum: Methods and Materials for Young Children with Disabilities (3 credits)	

SPED 6290	Affective Development and Behavior Management in Special Education

GRADUATE CERTIFICATE IN BRAIN INJURY: EDUCATIONAL AND TRANSITION SERVICES

The graduate certificate in brain injury: educational and transition services is offered through an interdisciplinary program that prepares educators and support personnel to address the needs of youth and young adults with brain injury as they transition from school to postsecondary education, employment, and independent self-adjustment. The program integrates the roles of relevant disciplines and service agencies, including postsecondary planning, alternative service models, and extended career support and adjustment to independent living.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 15 credits in required courses.

Code	Title	Credits
Required		
SPED 6223	Introduction to Brain Injury: Programs, Policies, and Resources	
SPED 6224	Brain Function and Impact of Brain Injury on Learning and Education	
SPED 6231	Instructional Methods in Secondary Special Education and Transition	
SPED 6240	Family Support and Guidance in Special Education	
SPED 6255	Collaboration with Systems and Families	

POST-MASTER'S CERTIFICATE IN COUNSELING

The post-master's certificate in counseling is designed for students who have a 48-credit master's degree in counseling and wish to earn the additional credits needed for licensure.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Please visit the program website (http://gsehd.gwu.edu/programs/post-masters-certificate-counseling) for more information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
Required		
CNSL 6169	Counseling Substance Abusers	
CNSL 6171	Family Counseling	
CNSL 6175	Living and Dying: A Counseling Perspective	
CNSL 6190	Advanced Career Counseling	

GRADUATE CERTIFICATE IN COUNSELING AND LIFE TRANSITIONS

The graduate certificate in counseling and life transitions prepares counselors with the knowledge to effectively and compassionately counsel the chronically ill and dying, their caregivers, and bereaved loved ones, or work with others facing difficult life transitions, such as unemployment. This specialized program is ideal for counselors, social workers, clergy, and other professionals who work with those facing loss and life transitions.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://gsehd.gwu.edu/programs/graduate-certificate-counseling-and-life-transitions) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 3 credits in a required course and 9 credits in elective courses.

Code	Title	Credits
Required		
HDEV 6108	Life Span Human Development	
Electives		
Three elective courses selected in consultation with the advisor to be taken in one of the following specializations:		
Grief, loss, and life transitions		

CNSL 6100	Special Workshop (Grief, Loss, and Life Transitions Focus)
CNSL 6170	Grief and Loss
CNSL 6175	Living and Dying: A Counseling Perspective
CNSL 6177	Spirituality and Loss
CNSL 6179	Children and Loss
Career and workforce development	
CNSL 6155	Career Counseling
CNSL 6190	Advanced Career Counseling
CNSL 6188	Systems in Career Counseling Development
CNSL 6189	Career Development and the Contemporary Workforce
CNSL 8253	Work, Identity, and Adult Development
or HDEV 8253	Work, Identity, and Adult Development
CNSL 6100	Special Workshop (Career Counseling Focus)
Human development	
CNSL 6161	Group Counseling
CNSL 8253	Work, Identity, and Adult Development
CNSL 6154	Theories and Techniques of Counseling
CNSL 6155	Career Counseling
CNSL 6170	Grief and Loss
CNSL 6179	Children and Loss
HDEV 6109	Child Development
HDEV 6110	Adolescent Development
HDEV 6701	Adult Learning

GRADUATE CERTIFICATE IN DESIGN AND ASSESSMENT OF ADULT LEARNING

The graduate certificate in design and assessment of adult learning provides the theoretical foundation and the practical tools to determine when training and education solutions are appropriate for the workplace. Students obtain skills in designing, developing, delivering, and evaluating workplace educational interventions.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/graduate-certificate-design-and-assessment-adult-learning) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 9 credits in required courses and one 3-credit elective course.

Code	Title	Credits
Required		
HOL 6701	Adult Learning	
HOL 6721	Assessing the Impact of Organizational Change	
HOL 6742	Design of Adult Learning Interventions	
Electives		
One 3-credit elective course selected in consultation with the advisor.		

POST MASTER'S CERTIFICATE IN EDUCATIONAL LEADERSHIP AND ADMINISTRATION

The graduate certificate in educational leadership and administration is designed for students who hold a master's degree and have at least one year of PreK-12 instructional experience. Students are prepared to promote high-quality student achievement and become a leader in various public school-based and central office positions. The academic program includes courses and PK-12 field experiences designed to meet administrative certification requirements in the District of Columbia, Maryland, Virginia, North Carolina, and other states that honor interstate compact agreements.

This accelerated program can be pursued either in the classroom or in an online, distance learning format and is nationally recognized by the Council for the Accreditation of Educator Preparation (CAEP), the National Council for Teacher Education (NCATE), and the Educational Leadership Constituent Council (ELCC).

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/post-masters-certificate-educational-leadership-and-administration) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Code	Title	Credits
Required		
EDUC 6232	Supervision and Evaluation of Instruction	
EDUC 6234	Site-Based Leadership: K-12	
EDUC 6236	School Law and Policy	
EDUC 6287	Internship: Administration (taken twice for 3 credits each time)	
EDUC 6422	Instructional Needs Analysis	

GRADUATE CERTIFICATE IN E-LEARNING

The graduate certificate in e-learning—offered exclusively online—is ideal for individuals involved in instructional aspects of distance learning, including instructors currently teaching at a distance and those who wish to develop the skills to do so. The program helps students to acquire the skills needed to be successful e-teachers and e-learners. The program prepares students to apply the theories, principles, models, tools, and techniques associated with e-learning in diverse organizational settings.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/graduate-certificate-e-learning) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Code	Title	Credits
Required		
EDUC 6401	Applying Educational Media and Technology	
EDUC 6405	Developing Multimedia Materials	
EDUC 6406	Instructional Design	
EDUC 6421	Critical Issues in Distance Education	
EDUC 6424	Learning Technologies and Organizations	
EDUC 6426	Computer Interface Design for Learning	

GRADUATE CERTIFICATE IN GLOBAL LEADERSHIP IN TEAMS AND ORGANIZATIONS

The graduate certificate in global leadership in teams and organizations is designed to explore the impact of culture and globalization on the lives of individuals, organizations, and societies. It examines models and conceptual frameworks of culture to understand the nature of learning, change, and leadership across cultures. The program of study includes international company site visits, cultural exchanges, and world-renowned faculty and guest speakers.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
Required		
HOL 6704	Leadership in Organizations	
HOL 6706	Current Issues in Organizational Leadership	
HOL 6746	Work Groups and Teams in Organizations	
HOL 6747	International and Multicultural Issues in Organizations	

GRADUATE CERTIFICATE IN INCORPORATING INTERNATIONAL PERSPECTIVES IN EDUCATION

The 12-credit incorporating international perspectives in education certificate is designed for individuals with either a bachelor's or master's degree who are interested in introducing global perspectives into curriculum, pedagogy, and school policy and practice. The curriculum of two required and two elective courses allows students to pursue individual interests while providing a foundation in internationalization as

it relates to school systems and the development of curriculum in K-12 settings.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 6 credits in required courses and 6 credits in elective courses.

Required	
CPED 6305	Foundations of Curriculum Theory
EDUC 6615	Internationalizing U.S. Schools
Elective	
6 credits from the following:	
CPED 6225	Introduction to International Curricula
CPED 6557	Second Language Acquisition
CPED 6608	Development and Diversity
CPED 6627	Teaching Second Language Reading and Writing
EDUC 6602	Regional Studies in International Education (Comparative Solutions to Common Educational Problems)
EDUC 6602	Regional Studies in International Education (Education and Modernization in Asia)
EDUC 6602	Regional Studies in International Education (Education and Transition in Eastern Europe and the former Soviet Union)
EDUC 6602	Regional Studies in International Education (Education and Equality in Latin America and the Caribbean)
EDUC 6602	Regional Studies in International Education (Education and Tradition in Islamic Societies)
EDUC 6602	Regional Studies in International Education (Education and Diversity in Europe and the EU)
EDUC 6640	Selected Topics in International Education (Citizen, Culture, Language and Nation-building in the Global Era)

GRADUATE CERTIFICATE IN INSTRUCTIONAL DESIGN

The graduate certificate in instructional design—offered exclusively online—prepares students to apply the theories, principles, models, tools, and techniques of systematic instructional design in diverse organizational settings. Students have numerous opportunities to integrate their professional experiences into their learning, to apply their course assignments to their current professional activities, and to actively engage with other professionals in the development of valued instructional design proficiencies.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Code	Title	Credits
Required		
EDUC 6401	Applying Educational Media and Technology	
EDUC 6405	Developing Multimedia Materials	
EDUC 6406	Instructional Design	
EDUC 6422	Instructional Needs Analysis	
EDUC 6426	Computer Interface Design for Learning	
EDUC 6427	Advanced Instructional Design	

GRADUATE CERTIFICATE IN INTEGRATING TECHNOLOGY INTO EDUCATION

The graduate certificate in integrating technology into education—offered exclusively online—provides students from varied professional educational backgrounds (including public and private sectors, K-12, and higher education) with the foundational knowledge and skills required to integrate technology effectively into their instruction. The curriculum, which is taught in a distance learning format, prepares students to apply, manage, and evaluate theories, standards, technologies, and techniques for integrating technology within their professional educational settings. Students integrate their professional experiences into their learning, apply their course assignments to their current professional activities, and actively engage with other professionals.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Required	
EDUC 6368	Power, Leadership & Education
EDUC 6401	Applying Educational Media and Technology
EDUC 6402	Computers in Education and Human Development
EDUC 6404	Managing Computer Applications
EDUC 6405	Developing Multimedia Materials
EDUC 6406	Instructional Design

GRADUATE CERTIFICATE IN JOB DEVELOPMENT AND PLACEMENT

The graduate certificate in job development and placement is ideal for a variety of professionals in state, federal, nonprofit, and community-based rehabilitation. Students delve into the social and cultural dimensions of rehabilitation counseling, as well as job development and job placement methods and techniques. The curriculum provides specialized experiential learning opportunities by integrating classroom course work with hands-on experience through a required 50-hour practicum.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Required:

CNSL 6130	Vocational Assessment of Individuals with Disabilities
or SPED 6230	Vocational Assessment of Individuals with Disabilities
CNSL 6163	Social/Cultural Dimensions-Cns
CNSL 6376	Foundations/Practicum: Rehabilitation and Case Management
CNSL 6380	Job Placement and Supported Employment

In addition to the required coursework, students are required to complete a 50-hour supervised practicum in a vocational rehabilitation agency (public or community partner program) to gain job development and job placement experience. The practicum must be completed within one year from date of entry to the program in order for the student to complete all requirements in the allowed period and receive the certificate. Students should consult with the program coordinator and/or academic advisor prior to beginning the practicum.

GRADUATE CERTIFICATE IN LEADERSHIP DEVELOPMENT

The graduate certificate in leadership development provides in-depth understanding of organizations as human systems and the practical knowledge required to improve organizational effectiveness through leadership and training. Students acquire knowledge and skills in the areas of adult learning, group processes, organizational diagnosis, and consulting strategies.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 6 credits in required courses, and 12 credits in elective courses chosen on consultation with Master's coordinator.

Code	Title	Credits
Required		
HOL 6700	Human Behavior and Learning in Organizations	
HOL 6704	Leadership in Organizations	
Electives		
12 credits chosen in consultation with Master's coordinator		

GRADUATE CERTIFICATE IN LEADERSHIP IN EDUCATIONAL TECHNOLOGY

The graduate certificate in leadership in educational technology—offered exclusively online—provides students with the foundational knowledge and skills required to be effective leaders in an educational technology environment. Students acquire leadership skills. They also learn how technology can be effectively applied in their organizations. In this vein, they will be exposed to everything from software and hardware systems to the evaluation of sound educational technology software and implementation plans.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Code	Title	Credits
Required		
EDUC 6368	Leadership and Education	
EDUC 6371	Education Policy	
EDUC 6401	Applying Educational Media and Technology	
EDUC 6403	Educational Hardware Systems	
EDUC 6404	Managing Computer Applications	
EDUC 6424	Learning Technologies and Organizations	

GRADUATE CERTIFICATE IN MULTIMEDIA DEVELOPMENT

The graduate certificate in multimedia development—offered exclusively online—provides students from varied professional backgrounds the knowledge and foundational skills required to plan, design, develop, implement, and evaluate multimedia materials for instructional use. Students will have the opportunity to create a portfolio that demonstrates their skills in multimedia development.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Code	Title	Credits
Required		
EDUC 6402	Computers in Education and Human Development	
EDUC 6405	Developing Multimedia Materials	
EDUC 6406	Instructional Design	
EDUC 6426	Computer Interface Design for Learning	
EDUC 6427	Advanced Instructional Design	
EDUC 6428	Developing Digital Professional Portfolios	

GRADUATE CERTIFICATE IN ORGANIZATIONAL LEARNING AND CHANGE

The graduate certificate in organization**al** learning and change provides an in-depth understanding of how a learning focus helps organizations improve their performance and create sustainable change. Students acquire the practical knowledge and skills necessary to assess organizational performance, and help design and lead effective change initiatives.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/graduate-certificate-organizational-learning-and-change) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
Required		
HOL 6702	Organizational Change I	
HOL 6703	Organizational Change II	
HOL 6704	Leadership in Organizations	
HOL 6707	Organizational Learning	

GRADUATE CERTIFICATE IN SECONDARY SPECIAL EDUCATION AND TRANSITION SERVICES

The graduate certificate in secondary special education and transition services is offered through an interdisciplinary program that prepares educators and support personnel to address the needs of youth and young adults with special needs in their transition from school to postsecondary education, employment, and independent self-adjustment. This program integrates the roles of relevant disciplines and service agencies, including postsecondary planning, alternative service models, and extended career support and adjustment to independent living.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
Required		
SPED 6230	Vocational Assessment of Individuals with Disabilities (taken for 3 credits)	
SPED 6235	Employment Models for Individuals with Disabilities	
or SPED 6231	Instructional Methods in Secondary Special Education and Transition	
SPED 6236	Introduction to Career and Career-Technical Education and Transition Services (taken for 3 credits)	
SPED 6255	Collaboration with Systems and Families	
SPED 6277	Teaching Culturally and Linguistically Diverse Students with Disabilities	
Electives		
12 credits from the following:		
CPED 6221	Developmental Reading: Emergent Literacy	
CPED 6551	Second Language Instructional Methods	
CPED 6556	Linguistic Applications in English as a Second Language	
CPED 6627	Teaching Second Language Reading and Writing	
SPED 6266	The Development of Language and Literacy	
SPED 6268	Development of Children and Youth with Disabilities	
SPED 6272	Strategies for Inclusion: Addressing the Needs of Diverse Learners	
SPED 6275	The Culturally and Linguistically Diverse Student with Disabilities: Policy, Research, and Trends	

GRADUATE CERTIFICATE IN SPECIAL EDUCATION FOR CULTURALLY AND LINGUISTICALLY DIVERSE LEARNERS

The graduate certificate in special education for culturally and linguistically diverse learners is designed to enhance skills to meet the needs of students with diverse cultural and linguistic backgrounds and those with varying social and learning abilities. Students focus on the inter-relationships of school, home, and community to improve the quality of education for children with diverse needs. A holistic approach to the curriculum utilizes the latest research, theory, and data-driven best practices to prepare you to empower and improve the quality of learning for children with diverse needs.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 6 credits in required courses and 12 credits in electives.

Code	Title	Credits
Required		
SPED 6276	Academic and Psychosocial Assessment of the Culturally and Linguistically Diverse Student	

GRADUATE CERTIFICATE IN STEM MASTER TEACHER

The graduate certificate in STEM master teacher provides licensed K-12 educators with an opportunity to expand their skills and methods for engaging students in rich, powerful STEM (science, technology, engineering, and mathematics) learning experiences. The establishment of this 12-credit certificate coincides with adoption of the Next Generation Science Standards and Common Core State Standards for Mathematics and addresses the anticipated professional development needs of school districts adopting these new standards.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/graduate-certificate-stem-teaching) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 9 credits in required courses and a 3-credit elective course.

Required

CPED 6701	Arts in the STEM Curriculum
CPED 6702	Integrating Engineering in the Math and Science Classroom
CPED 6703	Advanced STEM Teaching Methods
Elective	
One of the following:	
CPED 6367	Perspectives and Research in Teaching Science
CPED 6370	Perspectives and Research in Teaching Mathematics
CPED 8309	Supervising Preservice Clinical Experience

Students may apply courses toward the Master of Arts in Education and Human Development in the field of Curriculum and Instruction.

GRADUATE CERTIFICATE IN TEACHING ENGLISH TO SPEAKERS OF OTHER LANGUAGES

The graduate certificate in teaching English to speakers of other languages is ideal for prospective teachers in both ESL and content areas who wish to teach in the United States and abroad. Students learn to identify and interpret the characteristics and needs of English learners and apply knowledge in the practice of instructional methodology and assessment that develops academic and social English proficiency. The four courses in the TESOL graduate certificate count towards most state licensure or add-on endorsement requirements and provide students with knowledge and skills needed to achieve on the English for Speakers of Other Languages Praxis Test.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gsehd.gwu.edu/programs/teaching-english-language-learners-graduate-certificate) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

All courses must be completed with a minimum grade of *B*.

The proposed TESOL Graduate Certificate Program will require completion of the following courses with grades B or above:

1. CPED 6557: Second Language Acquisition
2. CPED 6551: Second Language Instruction (Methods)
3. CPED 6627: Teaching Second Language Reading and Writing
4. CPED 6556: Linguistic Applications in English as a Second Language (ESL)

The recommended sequence of courses is:

- Fall Semester (6 credits): CPED 6551: *Second Language Instruction* and CPED 6557: *Second Language Acquisition*
- Spring Semester (3 credits): CPED 6627: *Teaching Second Language Reading and Writing*
- Summer Semester: CPED 6556 (3 credits): *Linguistic Applications in ESL* (online)

Students can complete the proposed TESOL Graduate Certificate Program in two semesters and a summer, or approximately 11 months. Offering the final course in the sequence online will accommodate students who move outside the GW area as they complete the program.

Students also have the option of completing the certificate in four semesters by enrolling in 3 credits each semester. It is recommended that students in the four-semester option would take CPED 6551: *Second Language Instruction* during the first semester (Fall I) and CPED 6557: *Second Language Acquisition* during the fourth semester (Fall II).

GRADUATE CERTIFICATE IN TRAINING AND EDUCATIONAL TECHNOLOGY

The graduate certificate in training and educational technology —offered exclusively online—prepares students to apply the theories, principles, models, and tools of instructional technology and distance education in diverse organizational learning activities and settings. Skills and experiences acquired range from conducting a needs analysis to applying the systematic design of instruction to evaluating the role of technology in leadership development and the assessment of distance education (or e-learning) opportunities.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Code	Title	Credits
Required		
EDUC 6368	Leadership and Education	
EDUC 6404	Managing Computer Applications	

EDUC 6406	Instructional Design
EDUC 6422	Instructional Needs Analysis
EDUC 6424	Learning Technologies and Organizations
EDUC 6425	Developing Effective Training with Technology

COUNSELING AND HUMAN DEVELOPMENT

GRADUATE

Master's programs

- Master of Arts in Education and Human Development in the field of clinical mental health counseling (p. 521)
- Master of Arts in Education and Human Development in the field of clinical rehabilitation counseling (p. 521)
- Master of Arts in Education and Human Development in the field of rehabilitation counseling (p. 532)
- Master of Arts in Education and Human Development in the field of school counseling (p. 533)
- Master of Arts in Education and Human Development individualized program (p. 529)

Doctoral program

- Doctor of Philosophy in the field of counseling (p. 548)

FACULTY

Professors J. Garcia, K.C. Hergenrather, C.H. Hoare, S.A. Marotta-Walters

Associate Professors R. Lanthier (*Chair*), M.C. McGuire-Kuletz, M.M. Megivern, S. Steen

Assistant Professors S. Beveridge, S.C. Kim, R.M. Dedmond, D.M. Pittman

Professorial Lecturers O. Madison, R.J. Pasi, B.J. Thompson, R.C. Windham

Lecturers E. Rhymers, P. Tschudi

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Programs in counseling are offered at the graduate level by the Graduate School of Education and Human Development (http://gsehd.gwu.edu) through its Department of Counseling and Human Development (http://gsehd.gwu.edu/content/department-counseling-and-human-development).

CNSL 0920. Continuing Research - Masters. 1 Credit.

CNSL 0940. Cont Research - Doctoral. 1 Credit.

CNSL 2102. Foundations of Counseling. 3 Credits.

CNSL 2162. Professional and Ethical Orientation to Counseling. 3 Credits.
The roles and functions of a professional counselor and the ethical standards that govern the profession.

CNSL 2163. Psychosocial Adjustment. 3 Credits.
Mental health problems; emphasis on needs of counselors, teachers, and others working with children and adolescents.

CNSL 2376. Introduction to Rehabilitation Counseling. 3 Credits.
Overview of rehabilitation profession, including philosophy, history, ethics, theory, legislation, settings, and practice.

CNSL 2378. Disability Management and Psychosocial Rehabilitation. 3 Credits.
Case management services for persons with physical, mental, and emotional disabilities.

CNSL 2381. Medical and Psychosocial Aspects of Disabilities. 3 Credits.
Chronic and traumatic disorders; rehabilitation and psychosocial implications.

CNSL 6100. Special Workshop. 1-12 Credits.
Topics to be announced in the Schedule of Classes. May be repeated for credit.

CNSL 6101. Research and Independent Study. 1-3 Credits.
Individual research under guidance of a staff member. Program and conferences arranged with an instructor.

CNSL 6103. Thesis Research. 3 Credits.

CNSL 6104. Thesis Research. 3 Credits.

CNSL 6130. Vocational Assessment of Individuals with Disabilities. 3 Credits.
Investigation of vocational appraisal processes and techniques for individuals with disabilities. Includes assessment for transition using field-based assignments. Three credits of practicum experience for students specializing in vocational evaluation. Material fee. Same as SPED 6230.

CNSL 6151. Professional and Ethical Orientation to Counseling. 3 Credits.
The roles and functions of a professional counselor and the ethical standards that govern the profession.

CNSL 6153. Counseling Interview Skills. 3 Credits.
Acquisition of counseling skills common to all theories through lectures, demonstrations by faculty, role playing, and videotaping. Prerequisite or concurrent registration: CNSL 6151 (for counseling majors); permission of instructor is required for others. Material fee.

CNSL 6154. Theories and Techniques of Counseling. 3 Credits.
An introduction to basic counseling and psychotherapeutic theories and associated techniques. Prerequisite or concurrent registration: CNSL 6151 (for counseling majors); permission of instructor is required for others.

CNSL 6155. Career Counseling. 3 Credits.
A consideration of theory, practice, and the body of information related to career counseling, choice, and development over the life span. Prerequisite: CNSL 6153, EDUC 6114 for counseling majors; permission of instructor is required for others. Material fee.

CNSL 6157. Individual Assessment in Counseling. 3 Credits.
Detailed study of individual analysis and appraisal techniques. Development of systematic case study. Prerequisite: CNSL 6153, EDUC 6114 for counseling majors; permission of instructor is required for others. Material fee.

CNSL 6159. Psychosocial Adaptation. 3 Credits.
Mental health problems; emphasis on needs of counselors, teachers, and others working with children, adolescents, and adults.

CNSL 6161. Group Counseling. 3 Credits.
Principles of group dynamics as related to interaction within groups. Techniques and practice in group counseling. Prerequisite or concurrent registration: CNSL 6151 (for counseling majors); permission of instructor is required for others.

CNSL 6163. Social/Cultural Dimensions-Cns. 3 Credits.
Basic sociocultural concepts in counseling theory and how they apply to the practice of the counseling profession. Prerequisite or concurrent registration: CNSL 6153 (for counseling majors); permission of instructor is required for others.

CNSL 6164. Values, Spiritual, and Religious Issues in Counseling. 3 Credits.
The theoretical and practical intersection of counseling, psychotherapy, and mental health considerations with religion and spirituality. The clinically effective and ethically responsible integration of religion and spirituality into counseling. Prerequisite or concurrent registration: CNSL 6151 (for counseling majors); permission of instructor is required for others.

CNSL 6169. Counseling Substance Abusers. 3 Credits.
Individual, group, family, and self-help counseling applied to substance abusers. Prerequisite or concurrent registration: CNSL 6153 (for counseling majors); permission of instructor is required for others.

CNSL 6170. Grief and Loss. 3 Credits.
Exploration and discussion of grief and loss from theoretical, practical, cross-cultural, and personal perspectives; implications for counselors within a multidisciplinary environment.

CNSL 6171. Family Counseling. 3 Credits.
The family as a system: how it affects the client and how the client affects it. Didactic presentations, role playing, and work with simulated families. Prerequisite or concurrent registration: CNSL 6153 (for counseling majors); permission of instructor is required for others.

CNSL 6172. Human Sexuality for Counselors. 3 Credits.
Issues of sexuality as related to counseling in contemporary society. Prerequisite or concurrent registration: CNSL 6153 (for counseling majors); permission of instructor is required for others.

CNSL 6173. Diagnosis and Treatment Planning. 3 Credits.
For counselors and mental health practitioners. Symptoms and treatment of various mental disorders. The process of making psychiatric diagnoses. A variety of treatment strategies are covered, along with their application to various disorders. Prerequisite: CNSL 6153.

CNSL 6174. Trauma and Crisis Intervention. 3 Credits.
This course provides the counseling student with an introduction to research, theory, and practices within the field of traumatology. The course will cover the historical evolution of the field; biopsychosocial underpinnings of trauma and trauma spectrum disorders; issues in diagnosis, assessment, and intervention from a culturally diverse framework; and a synthesis of best practices as they are currently evolving. Using a developmental and systemic approach, the course will provide a counseling perspective on the knowledge base from the multiple disciplines that contribute to the field of traumatology.

CNSL 6175. Living and Dying: A Counseling Perspective. 3 Credits.
Survey of fundamental psychosocial issues surrounding grief, loss, and life-threatening illness. Topics include AIDS, suicide, multiple loss, caregiver's grief, spirituality, and cross-cultural issues.

CNSL 6177. Spirituality and Loss. 3 Credits.
Exploration of how spiritual beliefs, faith traditions, and life philosophy affect the process of dying, bereavement, and grieving. Effective counseling approaches.

CNSL 6179. Children and Loss. 3 Credits.
The process of grief, loss, and death as experienced by children and adolescents from theoretical, moral, spiritual, and developmental perspectives. Development of effective and sensitive skills and competencies to meet the needs of children and their families as they face life-challenging transitions.

CNSL 6185. Practicum/Internship in Counseling. 3 Credits.
Part of a two-semester clinical experience for degree and certificate candidates in counseling. Includes 100 hours of supervised practicum in a counseling setting. Material fee.

CNSL 6186. Advanced Internship in Counseling. 3-6 Credits.
Part of a two-semester clinical experience for degree and certificate candidates in counseling. Material fee. Prerequisite: CNSL 6185.

CNSL 6188. Systems in Career Counseling Development. 3 Credits.
The complex role of systems in career counseling and development. Class and work experience in the areas of career assessment, computerized career planning, and the design and evaluation of career counseling systems.

CNSL 6189. Career Development and the Contemporary Workforce. 3 Credits.
Through case studies, simulations, and group work, the demographics and challenges of the workforce in the United States are examined. The knowledge, skills, and competencies necessary to respond to current trends and projected changes in the global workforce.

CNSL 6190. Advanced Career Counseling. 3 Credits.
Expansion of career development theory, concepts, and practice: the helping relationship, delivery systems, current market and economic information, and available resources. Prerequisite: CNSL 6155 (for counseling majors); permission of instructor is required for others. Material fee.

CNSL 6268. Foundations/Practicum: Clinical Mental Health Counseling. 3 Credits.
Description of community counseling settings, problems clients present, and a consideration of appropriate intervention strategies.

CNSL 6376. Foundations/Practicum: Rehabilitation and Case Management. 3 Credits.
Survey of history, philosophy, basic principles, legislation, roles, and services.

CNSL 6378. Disability Management and Psychosocial Rehabilitation. 3 Credits.
Disability management services; psychosocial aspects of disability; rehabilitation services for persons with psychiatric disabilities.

CNSL 6380. Job Placement and Supported Employment. 3 Credits.
Job development and modification: placement of persons with disabilities.

CNSL 6381. Medical and Psychosocial Aspects of Disabilities. 3 Credits.
Chronic and traumatic disorders with rehabilitation and psychosocial implications.

CNSL 6395. Foundations of Forensic Rehabilitation Counseling I. 3 Credits.
Overview of the roles and functions of professionals who provide forensic rehabilitation services in matters of litigation. Vocational assessments, labor market issues, transferable skills analysis, job analyses. Instruments utilized in forensic rehabilitation.

CNSL 6396. Foundations of Forensic Rehabilitation Counseling II. 3 Credits.
Workers' compensation, personal injury, medical/professional malpractice, catastrophic injury, loss of earnings capacity, and life care planning. Ethical standards, practices, federal court rules, and common situations found in the litigation process.

CNSL 6397. Law and the Rehabilitation Consultant. 3 Credits.
Overview of law and court procedures for forensic rehabilitation professionals. Qualification of forensic experts, roles and functions of expert witnesses, discovery, work product, hearsay, direct and cross-examination, admissibility of evidence, and opinions in state and federal venues.

CNSL 6398. Psychopharmacology. 3 Credits.

CNSL 6466. Foundations of School Counseling K–12. 3 Credits.
Study of the environmental and specialty elements for school counseling, with special attention to the principles and practices of school counseling.

CNSL 8100. Special Workshop. 1-12 Credits.
Topics to be announced in the Schedule of Classes. May be repeated for credit.

CNSL 8101. Research and Independent Study. 1-3 Credits.
Guided individual research. Program and conferences arranged with an instructor.

CNSL 8244. Advanced Group Counseling. 3-6 Credits.
A post-master's course on interpersonal process groups, with didactic, experiential, and supervisory components. Prerequisite: CNSL 6161 ; permission of instructor is required.

CNSL 8252. Advanced Leadership and Advocacy in Counseling. 3 Credits.
Theory and practice of consultation and administration, with focus on school, community, and rehabilitation settings. Research issues. Admission by permission of instructor.

CNSL 8253. Work, Identity, and Adult Development. 3 Credits.
The influence of work on identity, intellectual and personality development, and other developmental attributes. Same as HDEV 8253/HOL 8742.

CNSL 8254. Advanced Multicultural Counseling. 3 Credits.
Recent research addressing key aspects of multicultural counseling. Practical knowledge about effective skills practice in the provision of services to clients from different cultural backgrounds, with emphasis on experiential and cognitive/behavioral approaches. Restricted to Admission by permission of instructor. Prerequisites: CNSL6163 Social and Cultural Dimensions of Counseling. Recommended background: PhD degree student in the field of counseling; completed a master's degree in counseling.

CNSL 8255. Advanced Supervision in Counseling. 3 Credits.
Theory and practice of clinical supervision and consultation for preparation to enter supervisory positions in the field of counselor education. Current thinking regarding supervisory theory/models, practice, research, and ethics. Restricted to Admission by permission of instructor. Recommended background: For PhD degree students.

CNSL 8257. Doctoral Practicum in Counseling. 3 Credits.
Experiential learning of advanced counseling and counseling-related competencies through direct, supervised participation in group work, research, teaching, and/or consultation. Admission by permission of instructor.

CNSL 8258. Advanced Theories of Counseling. 3 Credits.
Current research on counseling and psychotherapy process and outcome; critical analysis of theory with applications for practice and research. For Ed.S. and Ph.D. degree candidates in the field of counseling. Admission by permission of instructor.

CNSL 8259. Doctoral Internship in Counseling and Counselor Supervision I. 3 Credits.

CNSL 8260. Doctoral Internship in Counseling and Counselor Supervision II. 3 Credits.

CNSL 8961. Seminar: Counseling. 1-12 Credits.

CNSL 8998. Predissertation Seminar. 3 Credits.

CNSL 8999. Dissertation Research. 3,6 Credits.
Prerequisite: CNSL 8998/ EDUC 8998.

HDEV 6108. Life Span Human Development. 3 Credits.
Continuity and change in developmental attributes. The developing person in relation to social norms, roles, and stage-graded expectations from birth to death. Interaction between biogenetics and environment.

HDEV 6109. Child Development. 3 Credits.
Typical development and the familial and social antecedents of developmental risk. Environments that foster competent children and developmental sequelae of childhood vulnerability and trauma. For graduate students in counseling, psychology, and related disciplines.

HDEV 6110. Adolescent Development. 3 Credits.
Key attributes and problems in adolescent development. Typical adolescent development and contemporary social problems in relation to stress, risk, and resilience. For graduate students in counseling, psychology, and related areas.

HDEV 6129. Cultural Effects on Human Development. 3 Credits.
Effects of culture on the experience and expression of self, others, space, time, faith systems, norms, and other attributes. Egocentric and sociocentric effects, primitive and technological effects. Group immersion as the basis for prejudice. Developmental consequences as a consequence of cultural context.

HDEV 6161. Practicum in Human Development. 3 Credits.
Admission by permission of instructor.

HDEV 6162. Internship in Human Development. 3 Credits.
Admission by permission of instructor.

HDEV 6701. Adult Learning. 3 Credits.
Same as HOL 6701.

HDEV 8100. Issues and Special Topics in Human Development. 3-6 Credits.
Issues and special contemporary topics related to child, adolescent, and adult development. Applications for professional roles.

HDEV 8241. Emotional and Cognitive Dev. 3 Credits.
Emotional and cognitive development as related to self-esteem, social cognition, and interpersonal skills. Relationships among cognitive development, intellectual reasoning, insight, and social development.

HDEV 8244. Adult and Aging Development. 3 Credits.
Theories and research on personality and intelligence in adulthood. Research designs and methods. Implications of developmental data for counseling and selected professional roles.

HDEV 8253. Work, Identity, and Adult Development. 3 Credits.
The influence of work on identity, intellectual and personality development, and other developmental attributes. Same as CNSL 8253/ HOL 8742.

CURRICULUM AND PEDAGOGY

GRADUATE

Master's programs

- Master of Arts in Education and Human Development in the field of curriculum and instruction (p. 522)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in elementary education (p. 522)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in interdisciplinary studies of literacy and reading education (p. 523)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in secondary education (p. 524)
- Master of Arts in Education and Human Development individualized program (p. 529)
- Master of Education in the field of elementary education (p. 527)
- Master of Education in the field of secondary education (p. 534)

Doctoral program

- Doctor of Education in the field of curriculum and instruction (p. 541)

FACULTY

Professors S.J. Lynch

Associate Professors S.S. Beck, B. Casemore (*Chair*), J. Eakle, C. Green, C.L. Pyke, P.S. Tate

Assistant Professors J. Grooms, M.G. Sheppard, T. Sikorski

Research Instructors A.M. Bitler, M.M. Hollibaugh Baker

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CPED 0920. Continuing Research - Masters. 1 Credit.

CPED 0940. Continuing Research - Doctoral. 1 Credit.

CPED 6100. Special Topics. 1-12 Credits.
Topics and fees announced in the Schedule of Classes.

CPED 6100W. Special Topics. 1-12 Credits.

CPED 6101. Research and Independent Study. 1-3 Credits.
Individual research under the guidance of a staff member; program and conferences arranged with an instructor.

CPED 6172. Strategies for Inclusion: Addressing the Needs of Diverse Learners. 3 Credits.
Strategies by which teachers can more effectively assume the responsibility to serve all children in an inclusionary setting, including those who are second language learners and students with disabilities. Same as SPED 6272.

CPED 6175. The Culturally and Linguistically Diverse Student with Special Needs: Policy, Research, and Trends. 3 Credits.
Educational service delivery for the culturally and linguistically diverse student. National, state, and local policies; current research in bilingual education, special education, and bilingual special education. Material fee. Same as SPED 6275.

CPED 6176. Academic and Psychosocial Assessment of the Culturally and Linguistically Diverse Student. 3 Credits.
Issues in academic and psychosocial assessment of second language learners. The impact of second language acquisition and culture on the assessment process; differentiation between language difference and disability; IEP development; the use of interpreters and translators; the involvement of family and communities; standardized and alternative assessments; and legislative mandates. Material fee. Same as SPED 6276.

CPED 6199. Federal Education Policy Institute. 3 Credits.
The federal role in education policymaking in the context of national, state, and local efforts to create school environments for effective learning and the promotion of social and emotional health in children and youth. Same as SPED 6299.

CPED 6221. Developmental Reading: Emergent Literacy. 3 Credits.
The components of a balanced literacy program for emergent, beginning, and early-instructional-level readers. Incorporation of phonological awareness, phonics, fluency, reading comprehension, and writing lessons into a balanced reading–literacy program.

CPED 6223. Interdisciplinary Elementary School Literacies. 3 Credits.
Theory and practice of interdisciplinary elementary school studied in the context of the interactions between the domain-specific and strategic processes involved in teaching and learning from printed text and other media in science, literature, mathematics, social studies, and the arts.

CPED 6224. Diagnostic Teaching of Reading: K–6. 3 Credits.
Collection of diagnostic data; construction of informal traditional and non-traditional reading and writing tests; other instruments of evaluation; selecting and planning activities suitable to specific problems. Prerequisite: at least one previous course in reading.

CPED 6225. Introduction to International Curricula. 3 Credits.

CPED 6229. Current Issues in Elementary Education. 3 Credits.
Identification, definition, and analysis of some of the most important problems facing the contemporary American elementary school.

CPED 6236. Analysis of Teaching. 3 Credits.
Teaching viewed as a system; component aspects are examined with a view toward developing a critical method of analysis. Material fee.

CPED 6239. Practicum in Curriculum and Instruction. 3-6 Credits.
Supervised field experience in curriculum and instruction. Admission by permission of instructor.

CPED 6289. New Literacies Coach and Reading Specialist. 3 Credits.
Contemporary issues and conditions influencing literacy/reading leadership roles and the expanded roles of the new literacy reading coach and reading specialist. Topics include designing and evaluating interdisciplinary literacy education environments. Students work with educators on instructional and professional development activities to meet the literacy education needs of children. Prerequisites: CPED 6224 and departmental approval.

CPED 6292. Practicum 2: Leadership in Interdisciplinary Literacies. 3-6 Credits.
Drawing on prior program experiences in leadership and interdisciplinary literacies, students develop and refine effective interdisciplinary literacy education leadership qualities and skills, facilitate change in school communities, and foster teacher growth and student achievement. Students demonstrate lessons and provide assistance with lesson planning to teachers in, across, and between subject area disciplines and conduct professional development workshops in school settings. Prerequisite: CPED 6289.

CPED 6305. Foundations of Curriculum Theory. 3 Credits.
Examination of the educational ideas of individuals and groups that have influenced American and international curriculum development and practice during the 20th and 21st centuries. Comparisons of the issues, models, and principles that have guided curricular thought, development, and innovation.

CPED 6340. Teacher Leadership in Education. 3 Credits.
From the perspectives of educational theory and practice, the ideals and realities of contemporary public school teaching are viewed within a system of local, state, and federal organizations, with the goal of enhancing the role of teachers as knowledgeable and effective leaders in their profession. Material fee.

CPED 6353. Post-Master's Internship in Curriculum and Instruction. 3-6 Credits.
Supervised professional internship in curriculum, instruction, teaching, research, or policymaking. Internships are individually arranged. (Same as SPED 8353).

CPED 6365. Perspectives and Research in Teaching Computer Science. 3 Credits.

CPED 6366. Perspectives and Research in Teaching English. 3 Credits.
Prerequisite: the appropriate subject content course from CPED 6545 through CPED 6550.

CPED 6367. Perspectives and Research in Teaching Science. 3 Credits.
Significant trends, findings, and perspectives in science education in the United States from the early 19th century to the present.

CPED 6368. Perspectives and Research in Teaching Social Studies. 3 Credits.
Deepens students' understanding of the social studies curriculum through analysis of current research, theory, and practice, and application of this knowledge to instructional planning.

CPED 6370. Perspectives and Research in Teaching Mathematics. 3 Credits.
Survey of the history of mathematics, mathematics education research, instructional design, and the teaching of science, technology, engineering, and mathematics (STEM) curriculum standards. The impact of history in the field and research on teaching.

CPED 6410. Reading Children's Literature across the Curriculum. 2,3 Credits.
Participants read and analyze multicultural children's literature (from folktale to nonfiction) while simultaneously practicing discussion, dramatization, art, and writing response strategies suitable for involving all students and integrating literature across the school curriculum.

CPED 6411. Elementary School Curriculum and Methods. 3 Credits.
A comprehensive block course with subsections in mathematics, science, language arts, and social studies. Integrated with CPED 6635. May be repeated for up to 15 credits; with permission, up to four blocks (to a total of 12 credits) may be taken in one semester. Admission by permission of advisor. Material fee.

CPED 6412. Elementary School Curriculum and Methods. 2 Credits.
A comprehensive block course with sections in mathematics, science, language arts, and social studies. Integrated with CPED 6635. Pre-service teachers taking the four sections learn to be successful teachers of elementary methods in all content areas, including how to incorporate content and pedagogy into practice at their internships. May be repeated for up to 8 credits; with permission, up to four blocks (to a total of 8 credits) may be taken in one semester. Restricted to Admission by permission of advisor.

CPED 6507. Instructional Models and Classroom Management. 3 Credits.
The interconnections between effective instruction and positive classroom management. Through planning, implementing, and evaluating learning activities that apply research-based practices, students link instructional and management strategies to specific content and thinking goals. Microteaching lab. Material fee.

CPED 6530. Assessment in the Secondary Classroom. 3 Credits.
Key concepts and principles in the field of educational assessment, with emphasis on practical applications for classroom teachers. Students design and evaluate a range of assessment tools in their content areas.

CPED 6532. Professional Internship in Middle School Education. 3-6 Credits.
Supervised internship in middle schools; required seminar. Admission by permission of instructor. Material fee.

CPED 6534. Professional Internship in Secondary Education. 3-6 Credits.
Supervised internship; required seminar. Admission by permission of instructor. Material fee.

CPED 6544. Educational Technology and Computer Literacy Methods. 3 Credits.
Computers and related technologies in educational settings. Using national technology standards for teachers as a framework, the course combines discussion of key issues related to technology in education, demonstration of technology-related instructional methods, and hands-on computer use and materials development. Material fee.

CPED 6545. Teaching Computer Science in Secondary Schools. 3 Credits.
Theoretical, curricular, and practical considerations. Thirty hours of field experience in a secondary classroom is required. Material fee.

CPED 6546. Teaching English in Secondary Schools. 3 Credits.
Offers theoretical, curricular, and practical considerations for teaching the content area concerned. Requires a 30-hour field experience in a secondary classroom. Prerequisite: CPED 6606 and CPED 6507 and the approved certification course work in the content area. Material fee.

CPED 6547. Teaching Science in Secondary Schools. 3 Credits.
Offers theoretical, curricular, and practical considerations for teaching the content area concerned. Requires a 30-hour field experience in a secondary classroom. Prerequisite: CPED 6606 and CPED 6507 and the approved certification course work in the content area. Material fee.

CPED 6548. Teaching Social Studies in Secondary Schools. 3 Credits.
Theoretical, curricular, and practical considerations. 30-hour field experience in a secondary classroom is required. Material fee. Prerequisites: CPED 6606, CPED 6507.

CPED 6549. Teaching Art in Secondary Schools. 3 Credits.
Theoretical, curricular, and practical considerations. Material fee.

CPED 6550. Teaching Mathematics in Secondary Schools. 3 Credits.
Introductory course in mathematics teaching that derives its goals from pedagogy standards for secondary mathematics developed in collaboration with the National Council of Teachers of Mathematics (NCTM). Focus on developing and understanding middle and high school curriculum standards. Material fee.

CPED 6551. Second Language Instructional Methods. 3 Credits.
Knowledge and skills related to the instruction and assessment of language students in ESL/FL and FL settings. Past second language teaching methods, contemporary instructional approaches and materials, and other considerations in developing academic and social language proficiency. Materials fee. Prerequisites: CPED 6507 and CPED 6606 and the approved certification coursework in the content area.

CPED 6554. Issues, Study & Practices-ESL. 3 Credits.
A critical review of scholarship and research findings in English as a second language. Major policy issues and implications that relate to ESL practice.

CPED 6555. Educating Language Minorities. 3 Credits.
A study of federal, state, and local policies and issues affecting the education of linguistically diverse populations. Resources for use with specific linguistically diverse groups.

CPED 6556. Linguistic Applications in English as a Second Language. 3 Credits.
The science of language and how its different branches may be used for English as a Second Language (ESL) teacher training, classroom instruction, material development, evaluation, research, and policy development.

CPED 6557. Second Language Acquisition. 3 Credits.
The nature of first and second language acquisition and development; emphasis on sociolinguistics and psycholinguistics most pertinent to educational settings.

CPED 6604. Perspectives in American Education. 3 Credits.
Historical and social development of education in the United States; evolution of American education related to the growth of the nation and the changing social order; examination of selected issues in contemporary education.

CPED 6606. Theories of Learning and Development. 3 Credits.
A comprehensive investigation of the complex relationship between teaching and learning. How learning takes place, how it is motivated, and how it is influenced. Material fee.

CPED 6608. Development and Diversity. 3 Credits.
Student diversity in relation to theories of human growth and development. Diverse student strengths and needs; the special needs population; dynamics of inclusion; and intercultural issues related to the teaching/learning process. Material fee.

CPED 6623. Foundations of Reading Development. 2 Credits.
Basic theories and processes of reading acquisition and assessment; linguistic, cognitive, developmental, social, and affective bases of reading; influences of media, instructional strategies, including formal and informal assessment. Design and implementation of instruction in critical literacy.

CPED 6624. Foundations and Research of Literacy and Reading Education. 3 Credits.
Study of the scholarship on foundational and new literacy knowledge, concepts, and practices. Topics include models of literacy, theories and relations of multimodal and printed text reading (e.g., linguistic, psychological, and sociocultural), and the uses of these theories for the teaching and learning of literacies.

CPED 6626. Practicum 1: Reading Diagnosis, Assessment and Solutions. 3 Credits.
Candidates learn advanced diagnostic and assessment procedures to determine specific difficulties associated with printed-text reading, generate diagnostic profiles, and make instructional recommendations. Data are collected from children who struggle with printed texts; and, from those data, case studies are developed with implications for instruction.

CPED 6627. Teaching Second Language Reading and Writing. 3 Credits.
Literacy development for language learners; theories of literacy development in a second or foreign language, strengths and needs of language learners, reading and writing instructional strategies for language and content classrooms. Appropriate for students interested in teaching ESL, foreign languages, or content areas in elementary or secondary schools. Materials fee.

CPED 6628. Literacies in Informal Learning Environments. 3 Credits.
How culture, language, and out-of-school literacy experiences, particularly those in museums, influence attitude, learning, affective and interdisciplinary knowledge, and teaching practices. New literacy research, curriculum, and literature, and how social and cultural factors contribute to the literacies of everyday life.

CPED 6635. Professional Internship in Elementary Education. 3-6 Credits.
Supervised internship; required seminar. Admission by permission of instructor. Material fee.

CPED 6691. Interdisciplinary Adolescent Literacies. 3 Credits.
Theory and practice of interdisciplinary adolescent literacies studied in the context of the interactions between the domain-specific and strategic processes involved in teaching and learning from printed text and other media in science, literature, mathematics, social studies, and the arts.

CPED 6701. Arts in the STEM Curriculum. 3 Credits.
In-depth coverage of approaches to integrating arts and design into STEM curricula ("STEAM") for student learning; criteria and approaches for assessing student learning in arts-integrated STEM curricula; building a culture of craftsmanship; and collaborating with arts and design professionals.

CPED 6702. Integrating Engineering in the Math and Science Classroom. 3 Credits.
Approaches to integrating engineering and design into K-12 math and science classrooms. Students develop competencies by engaging in various forms of engineering and design, from small "design challenges" to more complex, semester-long engineering projects.

CPED 6703. Advanced STEM Teaching Methods. 3 Credits.
Advanced approaches for integrating science, technology, engineering, and mathematics into the K-12 classroom.

CPED 8100. Special Topics. 1-12 Credits.
Topics and fees announced in the Schedule of Classes.

CPED 8101. Research and Independent Study. 1-3 Credits.
Individual research under guidance of a faculty member. Program and conferences arranged with an instructor.

CPED 8199. Federal Educ Policy Institute. 3 Credits.

CPED 8309. Supervising Preservice Clinical Experience. 1-3 Credits.
.

CPED 8325. Advanced Ideas in Curriculum Theory. 3 Credits.
Examination of reviews and research studies on curriculum theory. Focus on trends, values, interpretations, design systems, and evaluation. Prerequisite: CPED 6305.

CPED 8330. Paradigms of Instruction and Assessment. 3 Credits.
A foundation of theory, models, and variables that have contributed to the fields of instruction and assessment. The major paradigms of instruction and assessment. Material fee.

CPED 8331. Seminar in Instruction. 3 Credits.
Analysis of alternative models of instruction and the factors that influence the instructional process in schools. Connections among learning, instructional theory, research, and practice. Material fee.

CPED 8332. Search of the Literature in Curriculum and Instruction. 3 Credits.
Analysis of types of literature reviews in the field of curriculum and instruction and development of a literature review; the relationship of theory building to review of literature, and how research questions arise from extant theory and related literature. For doctoral students in curriculum and instruction, to precede CPED 8998. Material fee.

CPED 8333. School Reform through Professional Development. 3 Credits.
Fundamental perspectives of school reform through professional development of educators (K–12); evolution of contemporary professional development models and trends: examination of interactive modules using selected professional development activities. Material fee.

CPED 8334. Seminar in Research in Curriculum and Instruction I. 1-3 Credits.
Models of curriculum and instruction research that span various research methods.

CPED 8335. Seminar in Research in Curriculum and Instruction II. 1-3 Credits.
Development of initial research proposal ideas for the dissertation.

CPED 8340. Education Policy, Reform & Teacher Leadership. 3 Credits.
This online course will engage students in the study of education policies and reforms that specifically focus on teaching and teachers. Further, this course will examine teacher leadership as it impacts school reform through professional development initiatives that sustain change efforts. Four areas of study ground the focus of this course: education policy, change theories and school reform, teacher leadership, and professional development. Restricted to Doctoral level course; masters students by permission of instructor. Prerequisites: None.

CPED 8341. Evaluation in Curriculum & Instruction. 3 Credits.
This course will teach doctoral and masters' students about evaluating curriculum and instruction related programs, projects, or policies. This course provides students with the theoretical grounding and practical experiences they need to develop and implement evaluation research. Students in the course are required to: 1) read current literature that covers the breadth of theories and models applied in the field of evaluation, 2) participate in live online discussions and instructor presentations and, 3) design, implement and report on a targeted evaluation of a curriculum and instruction related program, project or policy. Restricted to doctoral students; masters students with approval of instructor.

CPED 8354. Doctoral Internship: Teacher Education. 3-6 Credits.
Supervised professional internship in college teaching, administration, supervision, research, policymaking, or private agency function. Admission by permission of advisor.

CPED 8998. Doctoral Seminar in Curriculum and Instruction. 3-6 Credits.
Review of literature; preparation of a dissertation proposal and a manuscript of publishable quality. Admission by permission of instructor and approval of major advisor. Material fee.

CPED 8999. Dissertation Research. 3-6 Credits.
Prerequisite: CPED 8998.

EDUCATIONAL LEADERSHIP

GRADUATE

Master's programs

- Master of Arts in Education and Human Development in the field of assessment, testing, and measurement in education (p. 520)
- Master of Arts in Education and Human Development in the field of education policy studies (p. 525)
- Master of Arts in Education and Human Development in the field of educational leadership and administration (p. 526)
- Master of Arts in Education and Human Development in the field of educational technology leadership (p. 526)
- Master of Arts in Education and Human Development in the field of experiential education and Jewish cultural arts (p. 528)
- Master of Arts in Education and Human Development in the field of higher education administration (p. 528)
- Master of Arts in Education and Human Development in the field of international education (p. 530)
- Master of Arts in Education and Human Development individualized program (p. 529)
- Master of Arts in Teaching in the field of museum education (p. 530)

Post-master's program

- Education Specialist (p. 517)

Doctoral programs

- Doctor of Education in the field of educational administration and policy studies (p. 542)
- Doctor of Education in the field of higher education administration (p. 544)

FACULTY

Professors M.J. Feuer, M. H. Futrell, N.B. Paley, I.C. Rotberg (*Research*), R. Whitaker

Associate Professors R.A. Chernak, J. Choi, M.D. Corry, S.A. Dannels, J.L. Glazer, J. Gomez (*Chair*), M. Kim, L. Lemasters, N.B. Milman, Y. Nakib, C.B. Stapp, S. Swayze, A.A. Tekleselassie, R.R. Watkins, J.H. Williams

Assistant Professors A.A. Ali, J.K. Clayton, A.J. Collins, W.R. Dardick, L.C. Engel, S.A. Harris *(Research),* L.C. Howard, R.C. Jakeman, D. Klasik, L. Malcom-Piqueux, M.A. Robinson, K.A. Sherrill, B.T. Streitweiser,R.A. Thessin, B.A. Weiss

Lecturers B. Bowers, L. Lent, J.A. Washburn

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

EDUC 0920. Continuing Research - Masters. 1 Credit.

EDUC 0940. Cont Research: Doctoral. 1 Credit.

EDUC 2701. Museums as Cultural and Educational Resources. 3 Credits.
A general introduction to museums as institutions, sources of information, and places for enjoyment. Classes take place on campus and at museums in the metropolitan area. Admission by permission of instructor.

EDUC 3002. Special Workshops. 3 Credits.

EDUC 6100. Experimental Courses. 1-12 Credits.
Topic to be announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

EDUC 6101. Research and Independent Study. 1-3 Credits.
Individual research under guidance of a staff member. Program and conferences arranged with a program advisor.

EDUC 6112. Foundations of Assessment, Testing, and Measurement in Education. 3 Credits.
Foundations of assessment, testing, and measurement with a focus on basic statistical concepts for assessment data literacy, research design issues for assessments, a review of other educational assessments (IQ and psychological, personality and diagnostic), and other issues with assessment and testing including technology, ethical, and legal issues.

EDUC 6114. Introduction to Quantitative Research. 3 Credits.
Development of a conceptual understanding of research design and quantitative analysis options for the consumer of research. Appropriate use of vocabulary and interpretation of research findings. Critique of research articles and/or development of a small-scale proposal.

EDUC 6116. Introduction to Educational Statistics. 3 Credits.
Fundamentals of descriptive statistics and hypothesis testing; introduction to inferential statistics and research design, distinguishing between nonexperimental, quasi-experimental, and true experimental designs. Designed for those with little preparation in quantitative methods or who are not prepared for Educ 8120.

EDUC 6232. Supervision and Evaluation of Instruction. 3 Credits.
The roles and functions of educational leaders in the areas of curriculum, staff development, instructional supervision, and evaluation of personnel. Theory and practice to increase teacher effectiveness and improve student learning through supervisory strategies.

EDUC 6234. Site-Based Leadership: K-12. 3 Credits.
A general introduction to the principalship. Stresses leadership theory, roles, and management tasks in instruction, curriculum, budget, staff development, supervision, interagency services, student learning, and policy considerations. Site-based management and communication within a changing and diverse school environment.

EDUC 6236. School Law and Policy. 3 Credits.
The legal basis of education and public schools in the United States. Constitutional provisions and federal statutes that guide school law. Legal factors that influence school policy. Consideration of practical school situations for legal implications, development of skills to research legal issues affecting schools, and preventive law measures.

EDUC 6240. Fundamentals of Educational Leadership and the Change Process. 3 Credits.
Current leadership theory and systems behavior in the context of administrative practice in educational settings. Key elements of leadership and management. The impact of context, culture, power, politics, change, communications, and organizational learning on administration.

EDUC 6242. Administrative Issues in Education. 3 Credits.
The impact of major social, political, economic, and education issues on the role of school leaders and the delivery and quality of programs and services.

EDUC 6244. School-Community Relations. 3 Credits.
The purpose, scope, essential elements, and impact of a successful school–community relations program. Community power structures, the roles of policy and leadership, communication techniques for interacting with various audiences and the media, evaluation of public relations and marketing for educational institutions.

EDUC 6246. Seminar: Applied Educational Administration. 3-6 Credits.
Application of the theories and principles of administration to public and private schools. Field experience in a phase of administration and supervision. Admission by permission of instructor.

EDUC 6252. Human Relations Diversity. 3 Credits.
Application of current theory and research findings in human relations to staff motivation, change, conflict management, and communication techniques for working with individuals and groups within organizations.

EDUC 6256. School Business Management. 3 Credits.
Management and control of the business functions of school districts. Assessing, planning, developing, and presenting educational budgets; the legal contexts affecting school business management. Risk management and school-site budgeting.

EDUC 6258. School Finance. 3 Credits.
The financing of public elementary and secondary education in the United States; current revenue sources, distribution decisions, and trends in the fiscal operations of schools. Litigation, finance policies, and equitable investments of public monies.

EDUC 6260. Practicum in Supervision. 3-6 Credits.
Practical experience in supervision of instruction. Admission by permission of instructor.

EDUC 6262. Internship in Supervision and Instructional Leadership. 3-6 Credits.
Service in a school situation directed by the University's faculty and school systems; integration of theory and practice.

EDUC 6264. Problems and Practices in Staff. 3 Credits.
Application of principles and practices concerned with change and evaluation of educational administration.

EDUC 6287. Internship: Administration. 3-6 Credits.
Service in an educational institution or education-related program directed by the University's faculty.

EDUC 6314. History of American Education Reform. 3 Credits.
An examination of how evolving social, economic, and political forces have propelled and opposed American education reform efforts throughout history.

EDUC 6368. Leadership and Education. 3 Credits.
A general introduction to issues of leadership applicable to education settings and to key features of educational organizations; leadership as a process and a set of skills and how its styles interact with organizational contexts.

EDUC 6371. Education Policy. 3 Credits.
An introduction to the development, implementation, and assessment of education policies at national, state, and local levels.

EDUC 6381. Program Evaluation: Theory and Practice. 3 Credits.
Introduction to the theory of social program evaluation, alternative evaluation models and methodologies, and the political and social contexts of evaluation.

EDUC 6388. Analysis of Education Policy Issues. 3 Credits.
Covers a range of education policy options, assessing their advantages and disadvantages based on evidence, and drawing implications for policy formulation. A critical approach is applied to the assigned readings, questioning the sources of evidence, appropriateness of analysis, and validity of the findings. Prerequisite: EDUC 6371, EDUC 6114, or permission of instructor.

EDUC 6392. Practicum in Educational Policy Program Evaluation. 3-6 Credits.
Supervised practical experience in field placements. Admission by permission of instructor. Prerequisite: EDUC 6381.

EDUC 6401. Applying Educational Media and Technology. 3 Credits.
Theory and practice of educational technology. Key characteristics of different media, principles of application, and issues concerning their appropriate use.

EDUC 6402. Computers in Education and Human Development. 3 Credits.
The research and practice surrounding the use of computers in educational and training settings. Students will acquire the practical knowledge necessary to the development and evaluation of computer-related curricula through projects and case studies.

EDUC 6403. Educational Hardware Systems. 3 Credits.
Design and implementation of educational hardware systems, including computers and computer networks.

EDUC 6404. Managing Computer Applications. 3 Credits.
For managers and prospective managers in education and human services who are concerned with the automation of their operations. Basic principles needed to design, implement, and manage an information system. Admission by permission of instructor.

EDUC 6405. Developing Multimedia Materials. 3 Credits.
The design, development, integration, and use of multimedia resources in education and training settings. Students examine and critique multimedia technologies, develop instructional materials, and create a unit or module that applies instructional design theory.

EDUC 6406. Instructional Design. 3 Credits.
Designing, implementing, and evaluating instructional strategies for learners. Assessing needs, writing objectives, selecting curriculum/content, selecting and implementing methods and techniques, selecting appropriate devices and evaluating instruction.

EDUC 6407. Design and Implementation of Educational Software. 3 Credits.
Theory and practice of creating educational software; psychological basis of using software in learning; instructional programs; authoring tools; artificial intelligence applications; interactive media. Students design and evaluate an educational program. Prerequisite: EDUC 6401 or permission of instructor.

EDUC 6421. Critical Issues in Distance Education. 3 Credits.
Historical, conceptual, theoretical, and practical issues associated with distance education as a foundation for research and practice in the domain of distance education as well as adult learning, educational systems design, and school administration and policy.

EDUC 6422. Instructional Needs Analysis. 3 Credits.
An introduction to the role of instructional needs analysis and assessment. The design and development of instruction. Key elements of the instructional design cycle, including data analysis.

EDUC 6423. Technology and Disabilities. 3 Credits.
Assistive technology as it impacts the lives of people with disabilities, including the performance of tasks related to employment, education, and activities of daily living.

EDUC 6424. Learning Technologies and Organizations. 3 Credits.
The role of learning technology in organizations, learning in the workplace, and knowledge management in corporations, schools, and universities.

EDUC 6425. Developing Effective Training with Technology. 3 Credits.
Development of skills in planning and producing effective technology-rich training that meets institutional and organizational needs.

EDUC 6426. Computer Interface Design for Learning. 3 Credits.
Human-computer interaction, both in general and with emphasis on issues in education. General design aspects; theories, principles, and guidelines related to human-computer interaction.

EDUC 6427. Advanced Instructional Design. 3 Credits.
Development of a prototype instructional design project and documentation report requiring rapid design and development strategies. Prerequisites: EDUC 6406.

EDUC 6428. Developing Digital Professional Portfolios. 3 Credits.
Students create a digital professional portfolio, using advanced skills in the design, development, integration, and use of multimedia resources.

EDUC 6441. Internship in Educational Technology Leadership. 3 Credits.
Students are assigned to a cooperating agency and work in consultation under the guidance of the course instructor. Admission by permission of instructor.

EDUC 6442. Educational Technology Leadership Master's Project. 1-6 Credits.
Students design, develop, implement, and evaluate an individual project. Admission by permission of instructor.

EDUC 6500. Intro Stu Aff & Higher Ed. 3 Credits.
Introduction to the study of higher education and the student affairs profession, including the ways in which broader aspects of higher education research, theory and policy inform the work of student affairs practitioners. Historical and current contexts of American higher education, the academic community, and existing issues and emerging challenges surrounding the practice of student affairs in the current higher education landscape.

EDUC 6510. Administration of Higher Education. 3 Credits.
Government, organization, and administration of colleges and universities; duties of trustees and administrators.

EDUC 6520. Foundations of College Student Development. 3 Credits.
College student development theories, practices, and problems, including historical overview and human development theories related to college students.

EDUC 6525. Managing College Student Services Programs. 3 Credits.
An overview of student affairs administrative practices, including planning models, budgeting, policy development, program development, facility management, and team building. Admission by permission of instructor.

EDUC 6530. Intercultural Campus Ldrshp. 3 Credits.
This course is designed to explore intercultural leadership skills through the lens of understanding group identity differences, multicultural competence, and the foundations of effective advocacy for social justice. Lectures, readings, class discussions, written assignments, and experiential activities are used to promote an understanding of intercultural leadership skills to help create inclusive learning environments. The course will explore how oppression and privilege relate to differences based on gender, race and ethnicity, sexual orientation, and (dis)ability. Students will also study how these identities intersect with each other.

EDUC 6540. Group and Organizational Theories. 3 Credits.
Review of major organizational theories inside and outside higher education, including systems, institutional, cultural, cognitive, environmental, ecological, as well as power and influence.

EDUC 6550. Assessment in Higher Ed. 3 Credits.
Key concepts in the assessment of outcomes in higher education and in student affairs. History of the assessment movement in higher education, strategies and methods for measuring outcomes of the college experience, identifying the limitations of operational processes that can be improved, and current issues in measuring student success in higher education.

EDUC 6555. Higher Education Policy. 3 Credits.
Assessment of policies that impact higher education, including the relationship of K–12 policy to higher education. Policy networks and mechanisms of policymaking. Policy development and assessment.

EDUC 6560. Legal Problems in Higher Education. 3 Credits.
Investigation of legal problems in higher education related to the legal structure of higher education, religious concerns, students, faculty, and academic programs.

EDUC 6565. Financing Higher Education. 3 Credits.
Analysis of private, state, federal, and other revenue sources; strategic planning, program budgets, and financial methods and practices.

EDUC 6570. Educational Planning. 3 Credits.
An examination of the planning movement in education: its historical development and the recent shift in premises, context, and expectations. Different approaches to the planning process; its role in research; and overview of main analytical techniques currently in use.

EDUC 6572. Dynamics of Change. 3 Credits.
An analysis of the process of change, particularly as it relates to educational policy. Comparison of theories; analytical tools; historical precedents; examples of federal education policies.

EDUC 6575. Personnel Administration. 3 Credits.
Human resource management: planning, recruitment, selection, placement and induction, staff development, rewards, and negotiations. Issues and legislation that influence personnel functions and policy; communication skills for human resource leadership.

EDUC 6579. Managing Multicultural Environments. 3 Credits.
Application of multicultural research in identifying key elements for managing diverse environments, communicating with families, planning professional development activities, and increasing student learning.

EDUC 6585. Master's Internship in Higher Education Administration. 3-6 Credits.
Supervised field experience in higher education settings. Admission by permission of instructor.

EDUC 6601. International and Comparative Education. 3 Credits.
Theoretical foundations of comparative and international education; systematic investigation of the structure and practices of selected representative school systems in different parts of the world. Emphasis on development of methodologies for comparative study.

EDUC 6602. Regional Studies in International Education. 3 Credits.
In-depth study of education in a selected region of the world. Structures and issues facing education systems in social, political, economic, cultural, and historical context. Prospects of education for human national development. May be repeated for credit provided the region differs.

EDUC 6610. Programs and Policies in International Education. 3 Credits.
Overview of policies and programmatic responses to issues in international education. Topics include education and development, international higher education and student services, and education and marginalized people. May be repeated for credit provided the topic differs.

EDUC 6615. Internationalizing U.S. Schools. 3 Credits.

EDUC 6620. Strategies and Analysis in International Education. 3 Credits.
Strategies for improving education in international contexts. Topics include education and development, international higher education and student services, or education and marginalized people. May be repeated for credit provided the topic differs.

EDUC 6630. International Experiences. 1-6 Credits.
Study and research in a foreign country as part of a group program. Admission may require permission of the instructor.

EDUC 6631. Internship: International Education. 1-6 Credits.
Service in an international education institution or related individually designed program planned to enable the student to connect theory to practice. Admission may require permission of instructor. May be repeated for credit.

EDUC 6640. Selected Topics in International Education. 3 Credits.
Current trends, themes, and issues in international education. May be repeated for credit provided the topic differs.

EDUC 6650. Education and National Development. 3 Credits.
In terms of the basic assumption that education contributes to national development, the course examines the role education plays in the process of national development in advanced industrial societies and societies moving to industrialism.

EDUC 6660. Capstone in International Education. 3 Credits.
Review of core topics in international education and completion of major supervised project or paper. Taken near the end of the master's program in lieu of the Comprehensive Examination.

EDUC 6701. Museums as Institutions I: Fundamentals. 3 Credits.
An overview of the museum as an environment for learning, considering the influence of institutional history and organizational structure on the museum's mission of serving the public.

EDUC 6702. Facilitating Museum Learning I: Fundamentals. 3 Credits.
Theory of and practice in the development of communication skills in the museum. Educational concepts; teaching strategies and techniques; institutional liaison and group process.

EDUC 6703. Museum Audiences. 3 Credits.
A survey of the museum's diverse audience, emphasizing implications for effective programming, with attention to audience research.

EDUC 6704. Facilitating Museum Learning II: Field Placement and Seminar. 3-6 Credits.
Sixteen-hours per week placement in local educational institutions supervised by GW faculty. On-campus seminar focuses on human development and learning theory.

EDUC 6705. Museums as Institutions II: Field Placement and Seminar. 6 Credits.
Thirty-two hours-per-week supervised placement in education departments in area museums; students carry out projects in cooperation with the site. On-campus seminar includes presentations by leading practitioners.

EDUC 6706. Evaluating Museum Learning. 3 Credits.
Evaluation and research methods appropriate to the museum setting. Review of research on museum audiences; designing exhibition and program evaluations.

EDUC 6707. Museum Proposal Writing. 3 Credits.
Preparation of proposals for museums seeking support from public and private funders. Proposals are developed in cooperation with local museums.

EDUC 6709. Interpretation in the Historic House Museum. 3 Credits.
Seminar integrating advanced practices of museum education with current scholarship in architectural history, material culture, and social history. Extensive use of Washington museum resources. Same as AMST 6709. Admission by permission of instructor.

EDUC 6710. Museums and Technology. 3 Credits.
Applications of technology that link the public with the museum: Internet exhibitions, interactive computer programs, video conferencing, the electronic classroom. Guest lectures, field trips, and group projects.

EDUC 6711. Museum as a Learning Environment. 3 Credits.
Exploration of why visitors frequent museums and how they create personal meaning. Approaches to support the audience's engagement with the museum's resources.

EDUC 6998. Thesis Research. 3 Credits.
Thesis research.

EDUC 6999. Thesis Research. 3 Credits.

EDUC 8100. Experimental Courses. 1-12 Credits.
Topic to be announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

EDUC 8101. Research and Independent Study. 1-3 Credits.
Review of literature. Preparation of a dissertation proposal and a manuscript of publishable quality.

EDUC 8110. Advanced Study: Ideas, Issues, and Practices in Education. 3 Credits.
For precandidates for the Ed.D. Alternative means of responding to the complexities of the educational process. Topics vary but concern education as an individual process and as sociocultural preservation and renewal. May be repeated for credit.

EDUC 8120. Group Comparison Designs and Analyses. 3 Credits.
Designs and analyses to assess differences for more than two groups when compared on one dependent variable. Fixed, random, and mixed effects ANOVA and ANCOVA models within factoral design, multiple comparison tests, and introduction to regression analysis. Prerequisites: EDUC 6116.

EDUC 8122. Qualitative Research Methods. 3 Credits.
A general introduction to several major qualitative research traditions (e.g., biography, grounded theory, ethnography, phenomenology, and case study). Application of qualitative research design and procedures, including preliminary data collection, analysis, and writing.

EDUC 8130. Survey Research Methods. 3 Credits.
Techniques used to collect an array of information from a large number of people through structured interviews and mailed, e-mailed, or web-based questionnaires. Defining the research question and design; sampling, survey development, data collection procedures, pretesting, and data handling. Prerequisite: EDUC 8120, EDUC 8122.

EDUC 8131. Case Study Research Methods. 3 Credits.
Techniques used to examine one or a few complex cases, collecting data from several types of sources and by several methods. The course covers design, data collection, and data analysis/integration. Prerequisite: EDUC 8122.

EDUC 8140. Ethnographic Research Methods. 3 Credits.
Techniques used to examine systematically the contemporary daily life of a given group in its natural setting, focusing on culture—the recurring patterns of thought and social relations. Issues of research design and data collection and analysis. Prerequisite: EDUC 8122.

EDUC 8142. Phenomenological Research Methods. 3 Credits.
Techniques used to elicit and recognize perceptions, interpretations, motives, expectations, and imaginations. The framing of appropriate research questions, data collection and analysis, and the statement of conclusions. Prerequisite: EDUC 8122.

EDUC 8144. Discourse Analysis. 3 Credits.
Techniques used to examine verbal and nonverbal communication to understand identity, beliefs, intentions, relationships, and culture. The framing of appropriate research questions; data collection and analysis. Prerequisite: EDUC 8122.

EDUC 8170. Educational Measurement. 3 Credits.
Classical and modern measurement theory, item response theory, and factor analysis. Educational and psychological instrument development and validation. Interpretation of scale scores and assessment of instrument adequacy. Prerequisites: EDUC 8120. Recommended background: EDUC 6112 or equivalent.

EDUC 8171. Predictive Designs and Analyses. 3 Credits.
Techniques used to assess how independent variables are related to one dependent variable. Multiple linear regression, logistic regression, ordinal regression, and non-linear regression. Appropriate research questions, data interpretation, and design within generalized linear modeling. Prerequisites: EDUC 8120.

EDUC 8172. Multivariate Analysis. 3 Credits.
Techniques for assessment of relationships among multiple independent variables and dependent variables. Multivariate analysis of variance (MANOVA), multivariate analysis of covariance (MANCOVA), discriminant analysis, and exploratory factor analysis. Prerequisite: EDUC 8171.

EDUC 8173. Structural Equation Modeling. 3 Credits.
Multivariate techniques used for assessment of structural (causal) relations among latent (unobserved) variables with multiple observed indicators: observed and latent variable path analysis and confirmatory factor analysis. Latent means analysis and latent growth modeling. Prerequisite: EDUC 8171.

EDUC 8174. Hierarchical Linear Modeling. 3 Credits.
Techniques appropriate for analyses of hierarchically structured data. Theoretical concepts of hierarchical linear models (HLM); social and behavioral research; popular HLM software such as HLMwin; and large scale datasets. Prerequisites: EDUC 8171.

EDUC 8175. Item Response Theory. 3 Credits.
Conceptual, mathematical, and applied issues in item response theory. Dichotomous models, item response theory software used for estimation and model fit, test construction, differential item functioning, and item response theory equating. Prerequisites: EDUC 8170.

EDUC 8177. Assessment Engineering. 3 Credits.
In-depth coverage of topics related to assessment engineering, including cognitive model development using cognitive diagnostic assessment and formative assessment modeling, item model development using auto item generation, and automated test assembly and psychometric model development using computer adaptive testing. Introduction to current assessment engineering and educational big-data analytic applications. Prerequisites: EDUC 8170.

EDUC 8179. Capstone Project in Assessment,Testing, and Measurement in Education. 3,6 Credits.
Multifaceted assessment that serves as a culminating academic and intellectual experience for students during the end of their academic program. The capstone project is similar to a thesis or dissertation but may take a variety of forms. Restricted to Permission of instructor. Prerequisites: EDUC 8170.

EDUC 8276. Seminar: Administration and Supervision. 1-12 Credits.

EDUC 8277. Advanced Instructional Leadership for School Improvement. 3 Credits.
Introduction to the role of the instructional leader from school and district perspectives. Students gain theoretical and practical skills and knowledge in areas including instructional improvement; education reform; accountability; conditions for improvement; and planning and sustaining change.

EDUC 8280. Critical Review of Educational Leadership Literature. 1,3 Credit.
The techniques, tools, and presentation of critical reviews and syntheses of educational literature used to inform forthcoming research. Systematic mapping of what is known and deriving research questions, conceptual frameworks, and applicable methods. Prerequisite: an approved dissertation topic or permission of instructor.

EDUC 8320. The Politics of Education. 3 Credits.
Examination of the contextual factors (political, economic, and historical) and the nature of political decision making on education issues, primarily at the state and local level. Prerequisite: EDUC 6371.

EDUC 8321. Economics of Education. 3 Credits.
Application of economic theory and analysis to education problems and policies. Contemporary education reforms that are adopted to improve educational outcomes are analyzed with emphasis on their complexities. Prerequisites: EDUC 6371, EDUC 8120.

EDUC 8322. Education Policy Implementation. 3 Credits.
The evolution and implementation of education policies. Analysis of policy implementation at varying governance levels and types of educational systems. Policy is analyzed as a process and as it interacts with organizational, social, economic, and political factors. Prerequisites: EDUC 6371.

EDUC 8323. Policies of Education Equity. 3 Credits.
Analysis of the development, implementation, and evaluation of education equity policies, with consideration of their context, formulation, and application. Prerequisite: EDUC 6371.

EDUC 8325. Policy Design: Accountability in Education. 3 Credits.
Issues of policy design that underlie the push for greater accountability in education. Students review research articles and conceptual argument, discuss evidence on actual practice, and identify strengths and weaknesses of a range of policy tools. Prerequisite: EDUC 6371.

EDUC 8329. Seminar in Program Evaluation. 3 Credits.
Contemporary problems and issues in evaluation of social programs: design, implementation, analysis, and utilization. Prerequisite: EDUC 6381 and approval of instructor.

EDUC 8334. Doctoral Internship in Educational Policy. 3-6 Credits.
Methods of analysis used in the study of educational policy issues. Case studies on a range of policy issues and trends, including testing and accountability, school finance, school choice, and the federal role. Prerequisite: EDUC 6371, EDUC 6114, or permission of instructor.

EDUC 8340. Methods of Policy Analysis in Education. 3 Credits.
Methods of analysis used in the study of educational policy issues. Case studies on a range of policy issues and trends, including testing and accountability, school finance, school choice, and the federal role. Prerequisite: EDUC 6371, EDUC 6114, or permission of instructor.

EDUC 8345. Advanced Studies in Educational Policy Analysis. 1-12 Credits.
The process by which education policies are designed, adopted, and implemented by education systems. Case studies of specific policies, examining their assumptions and objectives, the criteria for assessing their effectiveness, and their governance at federal, state, and local levels. Prerequisite: EDUC 6371, EDUC 8120, or permission of instructor.

EDUC 8505. Seminar: Higher Education Administration. 1-12 Credits.

EDUC 8525. College and University Curriculum. 3 Credits.
Development, patterns, creative design, issues, problems, evaluation, and trends in the higher education curriculum.

EDUC 8530. Leadership in Higher Education. 3 Credits.
Cognitive leadership theory as articulated in higher education: what leadership is, how it works, how it is practiced, how it is considered by scholars and practitioners, and how it is researched.

EDUC 8540. History of Higher Ed. 3 Credits.
History, philosophy, scope, purpose, present status, programs, and trends in higher education in the United States.

EDUC 8560. Case Studies in Higher Education Administration. 3 Credits.
An analysis of case studies related to administrative functions in colleges and universities.

EDUC 8565. College and University Governance. 3 Credits.
Organizational and administrative structures, patterns, and relationships in higher education.

EDUC 8580. The Community/Junior College. 3 Credits.
The two-year college as it relates to secondary education, four-year colleges, and universities. Objectives, curricula, students, faculty, legal concerns, and special problems of two-year colleges.

EDUC 8582. Administration and Governance of Two-Year Colleges. 3 Credits.
A study of the community/junior college, focusing on administrative and governance patterns and national, regional, state, and local influences, as well as the theory and structure of two-year college organization.

EDUC 8585. Doctoral Internship in Higher Education Administration. 3-6 Credits.
Service in a higher education situation directed by the University and the cooperating institution to integrate theory and practice. Admission by permission of instructor.

EDUC 8594. Current Issues in Higher Education. 3 Credits.
Analysis of contemporary issues in higher education practice and scholarship.

EDUC 8998. Pre-Dissertation Seminar. 3-6 Credits.
Required of all departmental Ed.D. degree candidates. Approval of the dissertation research proposal by the dissertation committee is necessary for successful completion of the seminar. Admission by permission of instructor.

EDUC 8999. Dissertation Research. 3,6 Credits.
Prerequisite: EDUC 8998.

HUMAN AND ORGANIZATIONAL LEARNING

GRADUATE

Master's programs

- Master of Arts in Education and Human Development in the field of organizational leadership and learning (p. 531)
- Master of Arts in Education and Human Development individualized program (p. 529)

Doctoral program

- Doctor of Education in the field of human and organizational learning (p. 545)

FACULTY

Professors D. Burley, S. Khilji, M. Marquardt, D.R. Schwandt

Associate Professors A.J. Casey, N.E. Chalofsky (Chair), M. Cseh, E. Goldman, R.B. Morgan, E.M. Scully-Russ, J. Storberg-Walker

Assistant Professors S.L. Campbell *(Teaching)*

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

HOL 0920. Continuing Research - Master's. 1 Credit.

HOL 0940. Cont. Res. - Doctoral. 1 Credit.

HOL 6100. Special Workshop. 1-12 Credits.
Topics to be announced in the Schedule of Classes. May be repeated for credit.

HOL 6101. Research and Independent Study. 1-3 Credits.
Preparation of an in-depth project under the guidance of a faculty member. The course is arranged individually with the program advisor.

HOL 6700. Human Behavior and Learning in Organizations. 3 Credits.
How individuals and groups learn and interact within organizations and how organizations function and learn. Motivation, group dynamics, leadership, systems theory, organizational culture, and change.

HOL 6701. Adult Learning. 3 Credits.
Premises and theories used to meet learning needs of adults. Overview of various learning theories and the impact of various stages of adult development on learners. Topics including self-directed learning, accommodating individual learning needs, and creation of effective learning techniques. Same as HDEV 6701.

HOL 6702. Organizational Change I. 3 Credits.
The assessment of organizational conditions, including collection and interpretation of information, operations, and problems (human, structural, and systemic). Course participants collect and analyze data to provide solutions to enhance organizational effectiveness.

HOL 6703. Organizational Change II. 3 Credits.
Introduction to the concepts, methods, and skills required for effective consultation in organizations, as either an internal or an external consultant. Meeting the human needs in organizations, while improving performance and productivity. Students undertake a consulting project in an organization.

HOL 6704. Leadership in Organizations. 3 Credits.
Developments in theory and research centered on organizational leadership. Emphasis on various types of leadership including transformational, responsible, authentic, and ethical.

HOL 6705. Strategic Change. 3 Credits.
Overview of best practices for organizing and managing people and organizations to compete successfully. Leading an organization through a process of self-examination, redesign, and change that results in sustained effectiveness, learning, and high performance.

HOL 6706. Current Issues in Organizational Leadership. 3 Credits.
Current issues and future trends in organizational leadership. Students gather data and analyze key topics associated with areas such as talent management, leading through demographic shifts, leadership in a globalized world, leading global change, and developing new forms of leadership, ethics, and sustainability.

HOL 6707. Organizational Learning. 3 Credits.
Learning in an organizational context. Processes through which the organization as a system learns, unlearns, changes, and disseminates information. Organizational learning theories address the processes and barriers of gathering, using, developing, and retaining knowledge in organizations.

HOL 6708. Global Leadership. 3 Credits.
The changes taking place in organizations due to the process of globalization and the requirements for leadership. The changing global environment, how those changes influence operational and strategic issues within global organizations, and how a leader can better understand the global environment to help organizations meet these new challenges.

HOL 6709. Leadership Development. 3 Credits.
The processes employed to develop leaders/leadership and how individuals change as a result of the process. Examination of the context within which leadership is developed. Prerequisites: HOL 6704.

HOL 6710. Globalization, Change, and Learning. 3 Credits.
With learning as the coping strategy, focus on how policymakers and global leaders can be helped to take advantage of the opportunities and address the challenges that globalization presents.

HOL 6720. Advanced Strategies for Adult Learning. 3 Credits.
Theoretical and practical strategies of adult learning in various settings, including corporate environments. Learning strategies, such as creative thinking and self-directed learning. Critical adult learning issues.

HOL 6721. Assessing the Impact of Organizational Change. 3 Credits.
Knowledge and skills needed to evaluate the impact and return on investment of change efforts. Focus on how to plan and conduct systematic evaluations of change efforts, including the choice, development, and use of various tools for measuring individual, group, and organizational change. Assessing the success of the planned change.

HOL 6724. Increasing the Capacity to Learn. 3 Credits.
Identification of actions that can help increase the capacity to learn. Emphasis on experimental learning and critical reflection.

HOL 6725. Internship in Human Resource Development. 3-6 Credits.
Supervised experience in selected areas of human resource development and adult education. Admission by permission of the program advisor.

HOL 6742. Design of Adult Learning Interventions. 3 Credits.
Designing and implementing adult learning programs. Topics include instructional design techniques, designing effective programs, program planning and marketing techniques, and conducting needs assessments and evaluations of adult learning programs.

HOL 6743. Action Learning. 3 Credits.
Processes, principles, and skills necessary to participate in and lead both single- and multiple-problem action learning sets. The six dimensions of action learning; educational psychological, political, sociological, and management theories underlying action learning.

HOL 6744. Meaningful Workplaces. 3 Credits.
Characteristics of the humane organization and of meaningful work. Intrinsic motivation, work–life balance, and the workplace community.

HOL 6745. Technology and Human Resource Development. 3 Credits.
How technology can best be utilized in the HRD environment. Discussion of CBT, use of the Internet for instruction, and distance learning techniques.

HOL 6746. Work Groups and Teams in Organizations. 3 Credits.
Exploration of the nature of work groups and teams as they are utilized in organizational settings. Group and team dynamics, facilitating and leading skills, and group roles and culture.

HOL 6747. International and Multicultural Issues in Organizations. 3 Credits.
The impact of culture and globalization on U.S. and international human and organizational learning programs and practices. Adult learning and organizational change approaches that develop and utilize the synergy of a global workforce.

HOL 6998. Thesis Research. 3 Credits.
Thesis research.

HOL 6999. Thesis Research. 3 Credits.
Thesis research.

HOL 8100. Special Topics in Human and Organizational Learning - Doctoral Studies. 3 Credits.
Topics to be announced in the Schedule of Classes. May be repeated for credit.

HOL 8101. Research and Independent Study. 1-3 Credits.

HOL 8700. Foundations of Human and Organizational Learning. 3 Credits.
The study of individuals and their interactions within an organizational context. Overview of key theories in leadership, systems theory, group dynamics, learning, organizational culture, and motivational theory. The use of research in human and organizational learning.

HOL 8701. Theory, Research, and Practice in Adult Learning and Development. 3 Credits.
Learning theories as applied to adults in individual and group learning transactions; effect of age on learning; psychological, physical, and social environments in adult education situations.

HOL 8702. Theory and Design of Organizational Diagnosis and Development. 3 Credits.
Focus on various paradigms through which organizations and their functions may be viewed; a variety of analytical models of organizations; techniques for assessing systems; application of analysis techniques.

HOL 8703. Human Systems Change. 3 Credits.
The classical and contemporary ideas related to social systems change; the relation of these ideas to current issues in organizations.

HOL 8704. Leadership Theory, Research, and Practice. 3 Credits.
Leadership in organizations with a focus on transformational leadership. Historical review of leadership theory and research; current developments in understanding leadership. Students examine their own leadership style and plan for continued development as a leader.

HOL 8705. Organizational Culture. 3 Credits.
Theory and research on organizational culture, from the multidisciplinary seminal works in anthropology, psychology, sociology, and management to current day theorizing and empirical research on culture. The rituals, values, and behaviors that differentiate cultural groups and the way cultural identities manifest themselves in organizational practices; and how organizational culture evolves and its relationship to other organizational phenomena such as innovation, strategy, sensemaking, and performance. Current trends in organizational culture theorizing.

HOL 8706. Interdisciplinary Readings in Human and Organizational Learning. 3 Credits.
Seminal works from various disciplines related to current research and practice.

HOL 8707. Advanced Organizational Learning. 3 Credits.
The psychological and sociological paradigms associated with the learning of a collective whole.

HOL 8708. Introduction to Doctoral Research. 3 Credits.
An introduction to scholarly inquiry for doctoral students. The role of the scholar-practitioner; types of scholarly inquiry and their components; diverse paradigms used to frame scholarly inquiry; and critical thinking skills for evaluating research in human and organizational learning.

HOL 8720. Seminar: Applied Research in Human and Organizational Learning. 3 Credits.
Identification of initial constructs and theories that support the identified research interest, with a problem statement and critical analysis of research reports and review of research literature.

HOL 8721. Practicum in Human and Organizational Learning. 3-6 Credits.

HOL 8722. Seminar: Advanced Issues in Human and Organizational Learning. 1-12 Credits.
Forum in which candidates critically examine relevant classic and contemporary literature, with analysis and synthesis to defend their research questions and conceptual frameworks.

HOL 8723. Organizations and Strategy in Human Resource Systems. 3 Credits.
Overview of paradigms, theories, models, and constructs of organizations and strategy to understand organizations and their environments.

HOL 8724. Creating and Planning Doctoral Research. 3 Credits.
This course helps to ensure that your research is translational, i.e that it leads to practical applications that enhance the wellbeing and productivity of humans and organizations. It helps you ensure that all of the components of your research study are aligned, e.g., your chosen paradigm and related theories and constructs, research question(s), and design elements such as data collection and analysis techniques. Finally, it will help you ensure that you complete your dissertation. You will develop a project plan that specifies your goals, deliverables, schedule and budget. In sum, this course makes certain that your research is applicable, properly designed, and well planned. Prerequisite: none. Recommended background: Students learn to develop an evidence-based problem statement, design a conceptual framework, craft a research question, and conduct a literature review. Fundamental principles of both qualitative and quantitative research and various research strategies and designs.

HOL 8741. Managerial and Organizational Cognition. 3 Credits.
The emerging field of collective cognition in organizations, including theoretical foundations and seminal and current literature on knowledge structures and their role in strategy formation, organizational change, and sensemaking.

HOL 8742. Work, Identity, and Adult Development. 3 Credits.
The influence of work on identity, intellectual and personality development, and other developmental attributes. Same as CNSL 8253/HDEV 8253.

HOL 8746. Work Groups and Teams in Organizations. 3 Credits.
Theoretical understanding and practical considerations of working with groups and teams. Group dynamics, facilitating and leading groups, and member roles. Group facilitation techniques across different group settings and environments.

HOL 8997. Preparation and Delivery of Doctoral Research. 3 Credits.
Students develop and present a mock dissertation proposal, receiving feedback from faculty and colleagues in order to refine their proposal. Prerequisites: none. Recommended background: Students are expected to have developed a literature review, conceptual framework, and research question for their dissertation research prior to enrolling in this class.

HOL 8998. Predissertation Seminar. 3-6 Credits.
Platform for further development of the dissertation proposal.

HOL 8999. Dissertation Research. 3,6 Credits.
Prerequisite: HOL 8998.

SPECIAL EDUCATION AND DISABILITY STUDIES

GRADUATE

Master's programs

- Master of Arts in Education and Human Development in the field of early childhood special education (p. 524)
- Master of Arts in Education and Human Development in the field of secondary special education and transition services (p. 535)
- Master of Arts in Education and Human Development in the field of special education for children with emotional and behavioral disabilities (p. 537)
- Master of Arts in Education and Human Development in the field of special education for culturally and linguistically diverse learners (p. 538)
- Master of Arts in Education and Human Development individualized program (p. 529)

Doctoral program

- Doctor of Education in the field of special education (p. 547)

FACULTY

Professors M.S. Castleberry, M.B. Freund, C.A. Kochhar-Bryant, J.M. Taymans

Associate Professor E.K. Rice (*Chair*)

Assistant Professors J.R. Frey, K. Ihrig, P. Peng, E. Tuckwiller

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

SPED 0920. Continuing Research - Masters. 1 Credit.

SPED 0940. Cont Research - Doctoral. 1 Credit.

SPED 6100. Selected Topics. 1-12 Credits.
Topics and fees announced in the Schedule of Classes.

SPED 6101. Research and Independent Study. 1-3 Credits.
Individual study or research under guidance of staff member. Admission by permission of advisor. May be repeated for credit.

SPED 6201. Introduction to Special Education. 3 Credits.
Survey course to acquaint prospective teachers with special education and to help them become aware of the various educational modifications necessary to accommodate children with special needs in a school program.

SPED 6210. Universal Design for Learning and Assessment. 3 Credits.
Overview and introduction to universal design for learning, including contemporary issues, applications of digital and assistive technologies, and tools for developing a comprehensive plan for implementation. Same as CPED 6110.

SPED 6221. Accessing Community Systems for Individuals with Disabilities. 3 Credits.
Overview of access to community systems and service delivery for individuals with special needs and their families. Material fee.

SPED 6222. Legal Issues and Public Policy for Individuals With Disabilities. 3 Credits.
Examination, interpretation, and analysis of legislation and policies affecting the education and career development of individuals with disabilities. Emphasis on federal legislation in the context of national policy reform in disability services. Material fee.

SPED 6223. Introduction to Brain Injury: Programs, Policies, and Resources. 3 Credits.
An overview of acquired brain injury and its effects; current trends in the field, related policy, research, and development of new resources.

SPED 6224. Brain Function and Impact of Brain Injury on Learning and Education. 3 Credits.
Provides an in-depth understanding of neuroanatomy related to the impact of brain injury on child and adolescent development and learning to prepare educators to participate in educational assessment and planning.

SPED 6227. Technology in Vocational Evaluation. 3 Credits.
Introduction to an array of assistive technology services and products facilitating professional interventions and vocational evaluation procedures; application to the assessment of persons with disabilities. Material fee.

SPED 6228. Community-Based Assessment and Work Sample Development. 3 Credits.
Introduction to community-based vocational appraisal methods; development of job training analysis skills, labor market surveys, work samples; requirements of The Americans with Disabilities Act; incorporation of assistive technology; classroom theory and field work. Material fee.

SPED 6229. Interpretation and Application of Academic and Vocational Assessment Information. 3 Credits.
Specific strategies and techniques to analyze, interpret, and synthesize assessment information for the development of comprehensive academic/vocational profiles for adolescents and adults with disabilities. Observation and recording procedures, report development, and postassessment conferencing are emphasized. Material fee.

SPED 6230. Vocational Assessment of Individuals with Disabilities. 3-6 Credits.
Investigation of vocational appraisal processes and techniques for individuals with disabilities. Includes assessment for transition using field-based assignments. Three credits of practicum experience for students specializing in vocational evaluation. Material fee. Same as CNSL 6130.

SPED 6231. Instructional Methods in Secondary Special Education and Transition. 3 Credits.
Techniques and processes used in programming for the needs of individuals with disabilities as they prepare for transition to postsecondary programs and employment. Emphasis on skills related to professional liaison and support roles in the design of instructional arrangements and cooperative training. Material fee.

SPED 6232. Foundations in Special Education, Career Development, and Transition. 3 Credits.
Overview of historical, theoretical, and philosophical foundations of career development and transition. Explores directions for career development/transition practices in the context of educational reform and social and political change. Material fee.

SPED 6233. Curriculum in Special Education. 3 Credits.
Theory and practice in planning, implementing, and evaluating curriculum for individuals with disabilities. Emphasis on techniques for modifying curriculum and materials for individualized programming. Requires field-site curriculum implementation. Materials fee.

SPED 6234. Seminar in Advanced Writing and Professional Presentation. 3-6 Credits.
Analysis and development of advanced professional writing skills, including literature synthesis, persuasive writing, and proposal writing. Material fee.

SPED 6235. Employment Models for Individuals with Disabilities. 3 Credits.
Rationale, occupational resources, and programming strategies for job placement and the development and coordination of employment programs for individuals with disabilities. Material fee.

SPED 6236. Introduction to Career and Career–Technical Education and Transition Services. 3-6 Credits.
Introduction to programs and services that provide career development and transition planning for individuals with disabilities. Material fee.

SPED 6237. Learning Strategies, Assessment, and Instruction for Individuals with Learning Disabilities. 3-6 Credits.
Theory and practice in evidence-based reading interventions. Learning strategies; content enhancement focused on literacy and self-determination. Material fee.

SPED 6238. Issues in Educating Individuals with Learning, Emotional, and Intellectual Disabilities. 3 Credits.
Introduction to the academic, cognitive, social, and emotional characteristics of individuals with learning disabilities; etiological theories; educational service delivery models, with particular emphasis on the adolescent with learning disabilities. Policy issues, continuum of services, and the transition from school to post-school environments. Material fee.

SPED 6239. Collaboration for Professionals Working with Students with Disabilities. 3 Credits.
Exploration of attitudes and beliefs about team teaching, collaboration and inclusionary environments. Development of knowledge and skills related to collaborative consultation and team teaching; interpersonal communication; the dynamics of collaborative teams; examination of the variety of environments in which special educators work. Material fee.

SPED 6240. Family Support and Guidance in Special Education. 3 Credits.
The developmental process of parenting and how that process is affected by having a child with developmental delay or disability. Family systems theory, stress and coping mechanisms, and communication and support strategies. Material fee.

SPED 6242. Neurodevelopmental Assessment and Programming for Infants and Toddlers with Disabilities. 3 Credits.
Application of the neurodevelopmental model to techniques for developing and implementing educational programs for infants and toddlers with disabilities. Prerequisite or concurrent registration: SPED 6263 or SPED 6268 or permission of instructor. Material fee.

SPED 6243. Developmental Assessment of Infants. 3 Credits.
Theory and current practice in the assessment of infants with or at risk for developmental disabilities. Material fee.

SPED 6244. Ethical Considerations in Neonatal and Infant Intervention. 3 Credits.
Overview of the major ethical issues involved in neonatal and infant intervention. The impact of recent and emerging technological innovations considered from medical, legal, ethical, and psychosocial perspectives. Material fee.

SPED 6245. Developmental Implications of Prematurity and Risk. 3 Credits.
Causes of prematurity. Conditions that place children at developmental and educational risk.

SPED 6253. Introduction to Autism Spectrum Disorders. 3 Credits.
Overview of autism spectrum disorders with a focus on etiology, characteristics, and evidence-based practices. Topics include defining, assessing, accommodating, and instructing students with autism spectrum disorders.

SPED 6254. Autism Spectrum Disorders and Transition to Employment and Post-Secondary Life. 3 Credits.
The policies, principles, models, and processes involved in job development, job accommodations and modifications, and employment and post-secondary placement services for individuals with autism and related disabilities. Legislation is reviewed in terms of its impact on placement of persons with autism who will transition into the workplace and/or post-secondary education.

SPED 6255. Collaboration with Systems and Families. 3 Credits.
Overview of models and strategies for coordinating services across disciplines and among school and community agencies for special populations. Emphasis on interdisciplinary team coordination, communication, decision making, planning, and follow-up for individuals with disabilities. Material fee.

SPED 6260. Developmental Assessment in Special Education. 3 Credits.
Examination of formal psychoeducational tests used with preschool and elementary-school-aged children. Development of formal and informal assessment techniques. Introduction to the skills necessary to write psychoeducational reports. Material fee.

SPED 6261. Practicum: Methods and Materials for Young Children with Disabilities. 3,6 Credits.
Implementation of educational strategies and materials, including designing and developing teaching materials, classroom teaching, feedback and evaluation with professor. A seminar accompanies this clinical experience.

SPED 6262. Formal Assessment of Young Children with Disabilities. 3 Credits.
Weekly seminar designed to prepare early childhood special educators to translate formal assessment data into instructional programming. Requires fieldwork with children. Material fee. Prerequisite: SPED 6260 .

SPED 6263. Development of the Infant with Special Needs. 3 Credits.
The processes of normal infant development and interrelationships among areas of development; relationship of these processes to the growth and development of infants with or at risk for developmental disabilities. Material fee.

SPED 6264. Medical and Genetic Conditions of Infants and Children with Developmental Disabilities. 3 Credits.
Introduction to medical and genetic conditions that affect the cognitive, language, and social development of infants and children with developmental disabilities.

SPED 6266. The Development of Language and Literacy. 3 Credits.
Within the context of typical and atypical development, the impact of various disabilities on language and literacy development. Material fee.

SPED 6267. Instructional and Assistive Technology in Early Childhood Special Education. 2,3 Credits.
Instructional strategies and assistive technology and their implications and uses for young children (0–5 yrs) in a wide variety of environments. Lectures, laboratory, and demonstrations. Material fee.

SPED 6268. Development of Children and Youth with Disabilities. 3 Credits.
Theories of human growth and development are considered as a framework for examination of typical and atypical development of children and youth. Material fee.

SPED 6269. Etiology, Symptomatology, and Approaches to Intervention with Children with Disabilities. 3 Credits.
An in-depth examination of the causes and characteristics of various disabilities. Current principles and approaches to intervention are examined. Material fee.

SPED 6272. Strategies for Inclusion: Addressing the Needs of Diverse Learners. 3 Credits.
Strategies by which teachers can more effectively assume the responsibility to serve all children in an inclusionary setting, including those who are second language learners and students with disabilities. Same as CPED 6172. Material fee.

SPED 6273. Impact of Culture on Education. 3 Credits.
The impact of culture and ethnicity on educational experiences. The relationship between school culture in the United States, one's own culture(s), and the cultures of diverse populations existing within our schools. Values, norms, rules, ethics, beliefs, attitudes, expectations, and assumptions of various cultures. Material fee.

SPED 6274. In-Service Planning/Programmng. 3 Credits.

SPED 6275. The Culturally and Linguistically Diverse Student with Disabilities: Policy, Research, and Trends. 3 Credits.
Educational service delivery for the culturally and linguistically diverse student. National, state, and local policies; current research in bilingual education, special education, and bilingual special education. Same as CPED 6175. Material fee.

SPED 6276. Academic and Psychosocial Assessment of the Culturally and Linguistically Diverse Student. 3 Credits.
Issues in academic and psychosocial assessment of second language learners. The impact of second language acquisition and culture on the assessment process; differentiation between language difference and disability; IEP development; the use of interpreters and translators; the involvement of family and communities; standardized and alternative assessments; and legislative mandates. Same as CPED 6176. Material fee.

SPED 6277. Teaching Culturally and Linguistically Diverse Students with Disabilities. 3 Credits.
Methods and materials for teaching students with disabilities who are English language learners. Classroom management, instructional and assessment strategies, materials and curricula, and collaborating with families and communities to meet the cultural, linguistic, academic, social, and emotional needs of students in various settings. Material fee.

SPED 6280. Developmental Assessment of Adolescents. 3 Credits.
Formal and informal psychoeducational assessment; assessment instruments commonly used with upper-elementary, junior, and senior high school students; the writing of psychoeducational reports. Material fee.

SPED 6283. The Urban Impact on Children and Youth with Disabilities. 3 Credits.
Effects of the total environment in which inner-city children live on their ability to learn and their cognitive, social–behavioral, and physical/health development. Material fee.

SPED 6288. Characteristics of Individuals with Learning, Emotional, and Intellectual Disabilities. 3 Credits.
An in-depth examination of typical and atypical growth and development, psychiatric diagnosis and psychosocial development issues, and general and specific characteristics of the student with serious emotional disabilities. May be repeated for credit. Material fee.

SPED 6290. Affective Development and Behavior Management in Special Education. 3 Credits.
Theory, programming, and behavior management strategies from theoretical and practical points of view. Material fee.

SPED 6299. Federal Education Policy Institute. 3 Credits.
The federal role in education policymaking in the context of national, state, and local efforts to create school environments for effective learning and the promotion of social and emotional health in children and youth. Same as CPED 6199.

SPED 6990. Internship in Teaching Children with Emotional and Behavioral Disabilities: Assistant Teacher. 3-6 Credits.
The federal role in education policymaking in the context of national, state, and local efforts to create school environments for effective learning and the promotion of social and emotional health in children and youth. Same as CPED 6199.

SPED 6991. Internship in Teaching Children with Emotional and Behavioral Disabilities: Co-Teacher. 3-6 Credits.
Continuation of SPED 6990. Graduate students become the primary teaching team in the classroom with ongoing supervision. Graduate students plan and apply psychoeducational teaching strategies with children with emotional and behavioral disabilities. Refinement of instructional and behavior management strategies. Weekly seminar continues. Material fee.

SPED 6992. Behavior Management Practicum: Adolescents with Disabilities. 3 Credits.
Field-based examination of theory of behavior development and techniques for classroom management. Material fee.

SPED 6993. Internship: Teaching Young Children with Disabilities. 3,6 Credits.
Supervised internship in early childhood special education. Weekly seminar. Material fee.

SPED 6994. Internship: Early Intervention. 3-6 Credits.
Supervised internship in early intervention. Weekly seminar. Material fee.

SPED 6995. School- and Community-Based Internship in Special Education and Transition. 1-9 Credits.
A 50- to 450-hour supervised internship in school- and community-based settings involved in career, vocational, and transition services.

SPED 6996. Teaching Internship in Transition Special Education. 3-6 Credits.
Supervised teaching internship; seminar required. Permission by instructor. Material fee.

SPED 6997. Internship in Teaching Culturally and Linguistically Diverse Students with Disabilities. 3-6 Credits.
Supervised internship and weekly seminar. A full-time, field-based teaching experience working with students with disabilities who are English language learners. Writing an appropriate IEP, interacting with families and communities, and planning and implementing instructional approaches and strategies. Material fee.

SPED 8100. Selected Topics. 1-12 Credits.
Topics and fees announced in the Schedule of Classes.

SPED 8101. Research and Independent Study. 1-3 Credits.
Individual research under guidance of a staff member. Program and conferences arranged with program advisor.

SPED 8301. Research Seminar in Special Education. 1-12 Credits.
Participation in a small group with a selected faculty member; research on and discussion of an area of common interest. Admission by permission of instructor.

SPED 8303. Administration and Supervision of Special Education. 3 Credits.
Philosophy and nature of special education; program organization, administration, and development. Surveying local needs; program evaluation and supervision. Admission by permission of instructor. Material fee.

SPED 8304. Research and Trends in Special Education. 3 Credits.
Emphasis on topical research issues, problems of conducting research, and research syntheses. Material fee.

SPED 8305. Foundations of Neuroscience in Special Education. 3 Credits.
Develops understanding of the neurological bases of sensation and perception, object recognition, control of motor action, learning and memory, emotion and language, attention, consciousness and cognitive control, and social cognition.

SPED 8306. Advanced Study in Development Science and Variance I: The Early Years. 3 Credits.
Consideration of cognitive neuroscience research on developmental issues of infancy and early years; assessment, identification, and related prevention and intervention. Prerequisite: SPED 8305.

SPED 8308. Preparation for the Professoriate in Special Education. 3 Credits.
Philosophical, ethical, and methodological aspects of personnel preparation in university and field-based programs; opportunities for practice in pedagogical design and delivery. Material fee.

SPED 8310. Advanced Study in Development Science and Variance II: The Later Years. 3 Credits.
Consideration of cognitive neuroscience research on adolescent development, including executive functioning, self-regulation, atypicality in learning, social and emotional behavior, motivation, and attention. Prerequisite: SPED 8306.

SPED 8311. Proseminar in Special Education: The Interdisciplinary Foundations. 3 Credits.
A theoretical and research-based course that introduces students to strategies by which data from cognitive neuroscience research can be applied to conceptualizing research in special education. A doctoral student forum addresses interdisciplinary research knowledge. Prerequisite: SPED 8310.

SPED 8343. Psychoeducational Diagnosis in Special Education. 3 Credits.
The range of diagnostic and intervention strategies applicable to the student who presents psychosocial and related learning difficulties. Admission by permission of instructor. Material fee.

SPED 8345. Consultation and the Change Process. 3 Credits.
Consultation models from organizational development, organizational psychology, and mental health applied to professional practice in education and special education. Material fee.

SPED 8352. Disability and Public Policy. 3 Credits.
Overview of current legislation and public policy affecting education, employment, and civil rights of individuals with disabilities. The evolution of disability policies and their relationship to principles of social justice. Material fee.

SPED 8353. Post-Master's Internship in Special Education. 1-6 Credits.
Supervised professional internship in college teaching, administration, supervision, research, or policymaking. Internships are individually arranged. Admission by permission of instructor.

SPED 8354. Doctoral Internship: Special Education. 1-6 Credits.
Supervised professional internship in research college teaching, administration, policymaking, or private agency function. Admission by permission of advisor.

SPED 8360. Interdisciplinary Techniques in the Diagnostic Process in Special Education. 3 Credits.
Application of theoretical concepts of assessment; development of assessment programs; interpretation and application of interdisciplinary diagnostic evaluations. Prerequisite: SPED 6260, and permission of instructor. Material fee.

SPED 8998. Doctoral Seminar in Special Education. 3-6 Credits.
Review of literature in a topical area; preparation of a dissertation proposal and a manuscript of publishable quality. Admission by permission of instructor and approval of major advisor. Material fee.

SPED 8999. Dissertation Research. 3,6 Credits.
Prerequisite: SPED 8998.

SCHOOL OF ENGINEERING AND APPLIED SCIENCE

Dean D.S. Dolling
Associate Deans C.E. Korman, B. Narahari, R. Riffat

The School of Engineering and Applied Science (SEAS) was organized in 1884 as the Corcoran Scientific School of Columbian University, named in honor of William W. Corcoran, president of the University's Board of Trustees from 1869 to 1888. The School was among the first to accept women for degree candidacy in engineering. While the organization and offerings of the School have evolved over the years, throughout most of its history its programs have been characterized by an emphasis on principles guiding the advancement of technology.

The School offers the bachelor of arts, bachelor of science, master of engineering, master of science, doctor of engineering, doctor of philosophy, and the professional degrees of engineer and applied scientist through its six departments—Biomedical Engineering, Civil and Environmental Engineering, Computer Science, Electrical and Computer Engineering, Engineering Management and Systems Engineering, and Mechanical and Aerospace Engineering. In addition, the School offers several graduate certificate programs, as well as combined bachelor's/master's degree programs.

Research centers and institutes provide opportunities for students and faculty to strengthen ties with counterparts in government and industry and contribute to the development and harnessing of emerging technology. Extensive and varied laboratories and computing facilities support the academic programs. The School strongly supports co-curricular activities to broaden and deepen its students' overall educational programs, including an extensive array of internship opportunities at government laboratories and private companies in the Washington, D.C. area and elsewhere. Other co-curricular opportunities include engineering-type team competitions, research projects, and the SEAS student government organization, the Engineers' Council.

    - The Dissertation and Final Examination (p. 592)
  - Doctor of Engineering (p. 592)
  - Doctor of Engineering in Engineering Management (p. 593)
    - Transfer Between Degree Programs (p. 593)

Undergraduate Programs

University Regulations

All SEAS students are required to review the University Regulations (http://bulletin.gwu.edu/university-regulations) as outlined in the Bulletin, as they are responsible for understanding and adhering to this document.

Advising

SEAS practices a hybrid advising system. Every entering undergraduate student is assigned a professional advisor to assist with the transition to the University. Faculty advisors are assigned at the end of the first year to counsel students on their programs of study, achievement and maintenance of satisfactory scholastic performance, professional development, and extracurricular activity as part of the educational process. Until all work required for the degree is completed, students must consult with their faculty advisors in all academic matters, including obtaining the advisor's approval of their program of study prior to registration for each academic semester and summer session. In addition, a student must consult their faculty advisor before they register for a course at another institution. The faculty advisor represents the student in all cases requiring faculty action. However, the faculty advisor may not deny entry into any course or activity to which the student is entitled under the regulations of the School. Students may consult other members of the faculty on an informal basis.

Mathematics Placement

All incoming first-year students are required to take a math proficiency examination, administered through the mathematics department, which places students in either MATH 1220 or MATH 1231. Visit the math placement exam webpage (https://math.columbian.gwu.edu/gw-mathematics-placement-test) for more information.

Makeup of Credit for Waived Courses

Waiver of a required course requires approval of the student's faculty advisor and department chair. If a course required by the SEAS curriculum is waived, the corresponding credits must be earned by satisfactory completion of a university-level academic course, either technical or nontechnical, approved by the student's faculty advisor. The grade earned will be used in determining the SEAS GPA only if the substituted course would normally be considered part of the student's curriculum.

Scholarship Requirements

To be eligible for graduation a student in SEAS must have:

- A minimum overall GPA of 2.0.
- A minimum overall GPA of 2.0 in their SEAS program.
- A minimum GPA of 2.2 for technical courses*
- Completed all degree and University General Education requirements.

*See section on Technical GPA for more information about technical courses.

Technical GPA

For applied science and technology, biomedical engineering, civil engineering, computer engineering, electrical engineering, mechanical engineering, and systems engineering majors, all technical courses taken during the fifth through eighth semesters as outlined by the 4-year curriculum sheet respective to each major and approved by the student's faculty advisor are counted towards the student's technical GPA.

As of Fall 2014, for Computer Science majors (BA and BS), all CSCI courses are counted towards the student's technical GPA. *See archived SEAS bulletin for prior curriculum year technical GPA requirements for Computer Science majors.*

Please note, if a student changes their major or curriculum year this may change the courses applied towards their technical GPA. Students should consult their faculty advisor before making any changes to their academic plans or curriculum.

Incompletes

For more information see Incompletes under University Regulations (http://bulletin.gwu.edu/university-regulations). In addition, SEAS students must get an incomplete agreement in writing by completing a Request for an Incomplete form (http://www.seas.gwu.edu/forms) with the instructor.

Pass/No Pass Grading System

SEAS students may not take required courses on the Pass/No Pass grading system. They may, however, take courses outside their required SEAS academic program on a P/NP basis.

Academic Workload

SEAS adheres to all academic workload regulations outlined under University Regulations (p. 21). In exceptional cases these limits may be exceeded with the faculty advisor's approval.

Humanities and Social Science Requirement

With the assistance of the advisor, each student in a SEAS B.S. program chooses a set of elective courses in the humanities and social sciences. For most B.S. curricula, these normally consist of a minimum of 18 credits, divided equally between the humanities and social sciences. At least one of the humanities and two of the social science electives must be selected from a list of approved general education courses.

Since the SEAS curricula are, by necessity, oriented toward technical subjects, the humanities and social sciences electives should be courses that broaden the student's outlook. This includes courses in areas such as anthropology, economics, foreign languages, geography, history, literature, philosophy, political science, psychology, and sociology. A full menu of courses is available on the SEAS website (http://www.seas.gwu.edu/forms).

In addition, when a foreign language is taken as part of the humanities requirement, the following rules apply:

- The foreign language studied may not be a native language of the student, unless the courses taken are literature courses.
- If the student has studied the language previously, he or she must first take a placement test given by the language department concerned and enroll in a course recommended by that department.
- The advisor must approve the program.

Bachelor of Science Degree Programs

Students should consult the department concerned for total credit requirements for the degree programs. The listed curricula assume that all elective courses are offered for at least 3 credits. Credits for Lifestyle, Sport, and Physical Activity (LSPA) courses cannot be counted toward the degree.

Bachelor of Arts Degree Programs

SEAS offers a Bachelor of Arts degree with majors in applied science and technology and in computer science. Each program provides a strong and level base for students who intend to make their careers in fields allied to science and technology or computer science. The curriculum requirements for these programs can be viewed under the Undergraduate tab in this section of the Bulletin. The listed curricula assume that all elective courses are offered for at least 3 credits. Credits for Lifestyle, Sport, and Physical Activity (LSPA) courses cannot be counted toward the degree.

Special Programs

A number of combined 5-year degree programs are available to select SEAS students. These include a B.S./M.S. in civil engineering, mechanical engineering, and systems engineering; B.A. or B.S. and M.S. in computer science or in cybersecurity in computer science; B.S/M.S. in biomedical engineering, computer engineering, or electrical engineering; and B.S. in computer engineering, computer science, electrical engineering, or systems engineering and M.S. in engineering management. In addition, students may complete a 5-year degree in the following cross disciplines: B.S. in biomedical engineering and M.S. in computer engineering, B.S. in electrical engineering and M.S. in computer engineering, and B.S. in computer engineering and M.S in electrical engineering.

Double Major

Information on declaring and graduating with a double major is outlined under University Regulations. Students who complete the requirements for two SEAS majors may graduate with a double major, provided the majors are in different departments. SEAS students may also pursue a second major in another school in the University but must adhere to any requirements outlined by that school or department. SEAS students must consult both their SEAS faculty advisor and an advisor in the department offering the second major.To officially declare a second major, students must complete a Declaration of Second Major (http://www.seas.gwu.edu/forms) form and have it signed by both their SEAS faculty advisor and the second major department advisor.

Students from other schools of the University may pursue a second major in one of the six SEAS departments. However, they must consult the department for both eligibility and curriculum requirements before planning to declare the second major. There is a limitation on how many courses may be double counted, which is outlined under University Regulations.

The degree is earned from the home school, and students must complete the major in their own school in order to graduate. In no case will a double major result in two degrees.

For more information see *Double Degrees* under University Regulations (http://bulletin.gwu.edu/university-regulations).

Minors

SEAS offers to all students a variety of minors, including biomedical engineering, computer engineering, computer science, electrical engineering, operations research, ands systems engineering. The School may require students to meet certain eligibility requirement to declare the minor. SEAS students may only declare a minor outside their department and must consult their faculty advisor before enrolling in a minor in another school of the University.

SEAS students who wish to declare a minor officially should complete a Declaration of Minor form (http://www.seas.gwu.edu/forms), which must be signed by both their SEAS faculty advisor and the minor department advisor. Depending on the student's major, additional credits beyond the minimum required for the minor may be required. Student from schools other than SEAS should email seasadvising@gwu.edu for more information about requirements and eligibility criteria before requesting to declare a minor through the department.

Graduate Programs

Degree Programs

Fields of graduate study offered by SEAS include biomedical engineering, civil and environmental engineering, computer engineering, computer science, electrical engineering, engineering management, mechanical and aerospace engineering, systems engineering, and (at the M.S. level only) cybersecurity in computer science, telecommunications engineering, and regulatory biomedical engineering (M.Eng.). Degree requirements and representative areas of focus within each field are listed in this section of the Bulletin. In some fields, students may choose to focus their course work in other specialties as well. For information on certificate, professional, and doctoral degree studies in a given field students should contact the relevant department.

Entrance requirements are outlined under individual degree programs. The following information pertains to all SEAS graduate and certificate programs.

Transfer of Credit

With the approval of the student's advisor and department chair, graduate credit earned at a level of study equivalent to that being pursued at GW may be transferred, when applicable, to meet degree requirements of the School. For a master's or professional degree candidate, or a doctoral candidate whose highest earned degree is a master's, up to 6 credits may be transferred. For a doctoral candidate whose highest earned degree is a bachelor's, up to 24 credits may be transferred. In all cases, credits must have been completed with a minimum GPA of 3.0 at another accredited and recognized institution. The professional and doctoral degree programs require that the credit be earned no more than five years prior to admission to the GW program, and some departments require that it be earned more recently. Credit applied toward a previously earned degree may not be transferred. Transfer of credit regulations apply to courses taken as a non-degree student through GW's Office of Non-Degree Students; that is, up to 6 credits may be taken in non-degree status before applying for admission to degree status. For purposes of transfer of credit, SEAS graduate certificate programs are not considered prior degrees. At the discretion of the department concerned, the credits earned in a SEAS certificate program may be applied to a subsequent master's degree program.

English Language Requirements for International Students

Applicants who are not citizens of countries where English is the official language or who do not hold a degree from a regionally accredited U.S. institution of higher learning are required to submit scores from the Test of English as a Foreign Language (TOEFL), the academic International English Language Testing System (IELTS), or the Pearson Test of English–Academic (PTE). Visit the SEAS Graduate Admissions website (http://graduate.seas.gwu.edu/admissions-requirements) for possible exemptions from this policy. The required minimum score for admission is 550 paper-based or 80 Internet-based on the TOEFL, an overall band score of 6.0 on the IELTS with no individual band score below 5.0, or a score of 53 on the PTE. The Department of Engineering Management and Systems Engineering requires a TOEFL score of 600 paper-based or 100 internet-based, or an overall band score of 7.0 on the IELTS with no individual band score below 6.0, or a score of 68 on the PTE. Applicants for graduate teaching assistantships must have a minimum score of 600 paper-based or 100 Internet-based on the TOEFL, an overall band score of 7.0 on the IELTS with no individual band score below 6.0, or a score of 68 on the PTE.

Undergraduate and graduate international students whose TOEFL, IELTS, or PTE scores fall below established cut-off points are required to take one or more courses in the English for Academic Purposes (EAP) Program. Both undergraduate and graduate students receive credit for EAP courses; however, in most cases graduate EAP credits cannot be applied to a degree. Graduate students placed in EAP courses should anticipate additional tuition expenses as well as possible extension of time needed to complete their degree programs. For detailed information concerning this requirement, consult the English for Academic Purposes Program website.

Grades

Information on grades and computing the grade-point average (GPA) is found under University Regulations (http://bulletin.gwu.edu/university-regulations).

Incompletes

At the option of the instructor, the symbol of *I* (Incomplete) may be recorded if a student, for reasons beyond his or her control, is unable to complete the work of the course and if the instructor is informed of and approves such reasons before the date when grades must be reported. The symbol *I* may be recorded only if the student's prior performance and class attendance in the course have been satisfactory. Any course in which a student fails to complete the work of the course and does not provide the instructor with a satisfactory explanation before the date when grades must be turned in will be graded *F*. If acceptable reasons are later presented, the instructor may initiate an appropriate grade change. Although the *I* may remain on the record for a maximum of one year, the instructor should normally set a much briefer period within which the uncompleted work must be made up. The *I* cannot be removed by the student's reregistering for the course at GW or taking its equivalent elsewhere. An Incomplete that is not removed within one calendar year or at the time of the student's graduation, whichever occurs first, is automatically changed to an *F*. As of fall 2014, when the *I* is changed to a letter grade the *I* will be replaced by the letter grade on the transcript.. As of fall 2014, when the *I* is changed to a letter grade the will by replaced by the letter grade on the transcript. Engineering Management and Systems Engineering students with two or more outstanding Incompletes are barred from further course enrollment; see Incompletes under University Regulations regarding continuous enrollment.

Credit/No Credit Grading System

SEAS students may take SEAS courses under the credit/no credit grading system, but credit for such courses cannot be applied toward any degree program in SEAS.

Educational Planner

In consultation with an academic advisor, each student must develop an Educational Planner through DegreeMAP that governs the student's degree requirements. The Educational Planner should be established soon after matriculation and must be completed before the end of the student's first semester. The Educational Planner must be approved by the advisor..

Residence and Continuous Enrollment

All work for the degree must be done in residence unless an exception is granted by the department chair. Students in a degree program are expected to be continuously enrolled in the School until the degree is conferred. To maintain continuous enrollment, students may register in one of the following categories. See Residence and Continuous Enrollment under University Regulations (http://bulletin.gwu.edu/university-regulations) for more information.

Leave of Absence

This status is available to students who, with special permission, are attending classes at another institution; who have temporarily transferred out of the area, e.g., for military TDY; or who are having temporary medical problems. A leave of absence is usually limited to two semesters. See Leave of Absence under University Regulations (http://bulletin.gwu.edu/university-regulations) for more information.

Continuing Research

Students who have completed their research credits, but are not yet ready to defend a thesis or dissertation, must register for 1 credit of SEAS 0920 (Continuing Research–Master's) or SEAS 0940 (Continuing Research—Doctoral) each semester as appropriate.

Examination Preparation

Students who are studying for a comprehensive or qualifying examination for the current or following semester, and are not taking any courses, must register for 1 credit of SEAS 0930 (Examination Preparation) as appropriate. A student who breaks his or her registration must apply for readmission to the degree program under whatever conditions and regulations are in force at that time.

Master of Science

The M.S. degree is offered in the fields of biomedical engineering, civil and environmental engineering, computer engineering, computer science, electrical engineering, engineering management, mechanical and aerospace engineering, systems engineering, cybersecurity in computer science, and telecommunications engineering. Each field in turn encompasses several areas of focus. The course of study responds to the unique interests of the student, who designs an individual program in close consultation with an assigned advisor. In most areas, students follow a prescribed core and approved elective courses from within SEAS and from other schools of the University. Because engineering expertise includes a broad foundation in technology, engineering students may profit from study in other academic areas to sharpen their focus in practice. Students must satisfy, through undergraduate studies or otherwise, either the prerequisites specified for the desired field or approved equivalents.

Entrance Requirements

Admission to the Master of Science degree program requires an appropriate bachelor's degree from a recognized institution and evidence of a strong academic background and capacity for productive work in the field selected. All applicants must submit scores from the Graduate Record Examination (GRE) general test, with the exception of applicants from SEAS undergraduate programs and those applying to special cohort and contract programs. In general, a minimum GPA of 3.0 (on a 4.0 scale) in the last 60 hours of undergraduate course work is recommended. Students must submit a statement of purpose and a minimum of two letters of recommendation, which may be from the student's advisor, faculty member(s) from the institution where the highest degree was earned, and/or workplace supervisor. Visit the Graduate Admissions website (http://www.gwu.edu/gradapply) for more information.

Special Programs

Admission to the 5 year B.S./M.S. combined degree program requires an appropriate bachelor's degree from SEAS undergraduate programs recognized in the Regulations section. In general, a minimum GPA of 3.4 (on a 4.0 scale) is required. Students must submit a statement of purpose and a minimum of two letters of recommendation, which may be from the student's advisor, faculty member(s) from the institution where the highest degree was earned, and/or workplace supervisor. Visit the Graduate Admissions website (http://www.gwu.edu/gradapply) for more information.

Completion of the program should occur within two semesters but can take up to four semesters after the conferral of their SEAS undergraduate degree.

Graduation and Scholarship Requirements

To meet graduation requirements, courses specified in a student's Educational Planner through DegreeMAP must be completed with a minimum GPA of 3.0. This is in addition to the requirements specified for graduation under University regulations. Courses specified upon admission as deficiency or prerequisite courses do not form part of the program of study. Students who receive two grades of *F* or three grades below *B*− are barred from further enrollment in graduate courses and will not be readmitted as a degree candidate. Students may not repeat for credit a course in which they have received a grade of *C*− or above, unless required to do so by the department chair. A written statement requiring a student to repeat such a course for credit must be submitted to the registrar by the department chair. See further graduation policies under University Regulations (http://bulletin.gwu.edu/university-regulations).

Time Limits

Full-time students in the master's program are allowed a maximum of three calendar years from the date of first registration as a degree candidate in prerequisite or graduate courses to complete all degree requirements; this time limit excludes any time spent taking English for Academic Purposes

courses only. Part-time students in the master's program are allowed a maximum of five calendar years. The time limit does not include any period of registration as an unclassified student before admission to degree candidate status or any period spent on approved leave of absence. Students on F1 or J1 visas and students with external funding may have different time limits. Students who do not complete degree requirements within the allowed time will have their degree candidate status terminated. They may be readmitted to degree candidate status under conditions specified by the department chair and approved by the dean.

Master's Thesis

The master's thesis must demonstrate a student's ability to make independent use of the knowledge and discipline of thought acquired through graduate study, to undertake constructive work in a given field, and to communicate the results of the work in writing. Suitable work for which the student has professional responsibility may be considered, whether done on or off campus, provided no significant amount of work is completed without faculty supervision. An accepted thesis is the property of the University.

To register for the thesis course sequence, students must submit their advisor-approved thesis area to the appropriate department chair. At the beginning of the semester of expected graduation, students must submit their thesis title to the dean. Both submissions must be made on the appropriate form available in the Graduate Student Services Center. While registered in the thesis course sequence, students are entitled to the advice of the faculty member under whom the thesis is to be written. Students may consult with their advisors, but they have primary responsibility for their own thesis. Students defend their theses orally before a committee of SEAS faculty members.

The thesis in final form must be submitted by the stated deadline. In the event a thesis is unfinished on the date specified, the student must register for SEAS 0920 (Continuing Research – Master's). The overall time limit for earning the degree (see Time Limits, above) may not be exceeded. All theses must be submitted electronically and meet the formatting and other requirements set forth on GW's Electronic Theses and Dissertations Submission website (http://library.gwu.edu/etds). Additional information regarding thesis requirements and dates may be found under University Regulations (http://bulletin.gwu.edu/university-regulations).

Master of Engineering (M.Eng.)

The M.Eng. degree is currently offered in the field of regulatory biomedical engineering (rBME). The Master of Engineering in Regulatory Biomedical Engineering (rBME) is an interdisciplinary program offered through the Department of Biomedical Engineering (http://bme.seas.gwu.edu) in partnership with GW's School of Medicine and Health Sciences (http://smhs.gwu.edu). The new program addresses a pressing need for a graduate program to train engineers in the specific set of skills of regulatory science, biomedical innovation, and entrepreneurship. Students with training in engineering or physics and/or relevant industry/government experience study the fundamentals of biomedical engineering, global regulatory affairs, regulatory strategy in the development of devices and diagnostics, regulatory compliance, engineering patent law, medical measurements, and instrument design. In addition to coursework, students gain experience in SBIR/STTR grant applications and/or FDA Premarket Notification (510(k)) submissions for medical devices.

Entrance Requirements

Admission to the Master of Engineering degree program requires an appropriate bachelor's degree from a recognized institution and evidence of a strong academic background and capacity for productive work in the field selected. All applicants must submit scores from the Graduate Record Examination (GRE) general test, with the exception of applicants from SEAS undergraduate programs and those applying to special cohort and contract programs. In general, a minimum GPA of 3.0 (on a 4.0 scale) in the last 60 hours of undergraduate course work is recommended. Students must submit a statement of purpose and a minimum of two letters of recommendation, which may be from the student's advisor, faculty member(s) from the institution where the highest degree was earned, and/or workplace supervisor. Visit the Graduate Admissions website (http://www.gwu.edu/gradapply) for more information.

Graduation and Scholarship Requirements

To meet graduation requirements, courses specified in a student's Educational Planner through DegreeMAP must be completed with a minimum GPA of 3.0. This is in addition to the requirements specified for graduation under University regulations. Courses specified upon admission as deficiency or prerequisite courses do not form part of the program of study. Students who receive two grades of F or three grades below B− are barred from further enrollment in graduate courses and will not be readmitted as a degree candidate. Students may not repeat for credit a course in which they have received a grade of C− or above, unless required to do so by the department chair. A written statement requiring a student to repeat such a course for credit must be submitted to the registrar by the department chair. See further graduation policies under University Regulations (http://bulletin.gwu.edu/university-regulations).

Time Limits

Full-time students in the M.Eng. program are allowed a maximum of three calendar years from the date of first registration as a degree candidate in prerequisite or graduate courses to complete all degree requirements; this time limit excludes any time spent taking English for Academic Purposes courses only. Part-time students in the master's program are allowed a maximum of five calendar years. The time limit does not include any period of registration as an unclassified student before admission to degree candidate status or any period

spent on approved leave of absence. Students on F1 or J1 visas and students with external funding may have different time limits. Students who do not complete degree requirements within the allowed time will have their degree candidate status terminated. They may be readmitted to degree candidate status under conditions specified by the department chair and approved by the dean.

Graduate Certificates

Entrance Requirements

Admission to SEAS certificate programs requires an appropriate bachelor's degree from a recognized institution and evidence of a strong academic background and capacity for productive work in the field selected. All applicants must provide an online application, statement of purpose, and resume and/or curriculum vitae. In general, a minimum GPA of 3.0 (on a 4.0 scale) in the last 60 hours credits of undergraduate course work is recommended. Certificate applicants are not required to submit letters of recommendation. Visit the Graduate Admissions website (http://www.gwu.edu/gradapply) for more information.

Graduation and Scholarship Requirements

In order to receive the graduate certificate students must have a minimum GPA in courses specified in their Educational Planner through DegreeMAP. Courses specified upon admission as deficiency or prerequisite courses do not form part of the program of study. Students who receives two grades of *F* or three grades below *B−* are barred from further enrollment in graduate courses, and will not be readmitted as a candidate. Students may not repeat for credit a course in which they have received a grade of *C−* or above, unless required to do so by the department chair. A written statement requiring a student to repeat such a course for credit must be submitted to the registrar by the department chair. Additional information regarding graduation requirements may be found under University Regulations (http://bulletin.gwu.edu/university-regulations).

Professional Degrees

The SEAS professional degree programs are designed for those students who wish to pursue course work beyond the master's degree with emphasis on applied subject material rather than on basic research. Successful completion of the professional degree program leads to the degree of Engineer or of Applied Scientist.

For admission to the degree of Engineer, an applicant must have earned both a bachelor's and master's degree in an area of engineering. For the degree of Applied Scientist, an applicant must possess a master's degree in engineering, computer science, natural science, or mathematics. Applicants who have an equivalent quantitative background may be considered as special cases by the respective departments.

Entrance Requirements

For admission to the degree of Engineer, an applicant must have earned both a bachelor's and master's degree in an area of engineering. For the degree of Applied Scientist, an applicant must possess a master's degree in engineering, computer science, natural science, or mathematics. Applicants who have an equivalent quantitative background may be considered as special cases by the respective departments.

Entrance requirements may vary by department within SEAS. A minimum GPA of 3.0 in graduate work is usually required, although individual departments often set higher admission standards. Some programs have specified prerequisites. An applicant who has significant deficiencies in preparation may be required to take prerequisite courses, which do not count toward any part of the requirements for the professional degree. The Departments of Computer Science and Electrical and Computer Engineering require applicants for the professional degree to have had two years of professional experience after receiving the master's degree. For specific entrance and application requirements see Master's Degree.

Graduation and Scholarship Requirements

The professional degree programs consist of a minimum of 30 credits in approved graduate-level courses beyond a master's degree. Programs of study are determined by established prerequisites and the requirements of the department in which the student wishes to enroll. The student's program must be approved by the faculty advisor and the department chair. Departments may require degree candidates to undertake and defend the results of a technical design project or development problem, or to prepare a comprehensive technical report to demonstrate the candidate's ability to make independent use of the knowledge and discipline of thought acquired through graduate study. When applicable, the student will be informed of this requirement by the faculty advisor at the time when the student's program is being formulated. The project may not account for more than 6 credits.

If a student studying for the professional degree receives two grades of *F* or three grades below *B−,* study is terminated and further enrollment prohibited. A student must have a minimum of GPA of 3.0 in order to receive the degree. The Department of Engineering Management and Systems Engineering requires a final GPA of at least 3.4.

Time Limits

A full-time student in the master's program is allowed a maximum of three calendar years from the date of first registration as a degree candidate in prerequisite or graduate courses to complete all degree requirements. A part-time student is allowed a maximum of five calendar years. The time limit does not include any period of registration as an unclassified student before admission to degree candidate

status or any period spent on approved leave of absence. Students who do not complete degree requirements within the allowed time will have their degree candidate status terminated. Such students may be readmitted to degree candidate status under conditions specified by the department chair.

Doctoral Programs
Doctor of Philosophy

The doctoral program is designed to prepare students for careers of creative scholarship by providing a broad but balanced background of knowledge and guidance in the performance of research. The program is divided into two stages: the first comprises a study of related fields of learning that support the general area of research concentration and culminates in a qualifying examination; the second, composed of original research and the presentation of findings in a written dissertation, culminates in a final examination.

Entrance Requirements

Admission to the Ph.D. program requires an appropriate bachelor's or master's degree from a recognized institution, evidence of a strong academic or relevant professional background, course work designated by the department as pertinent to the field to be studied, and capacity for research. With the exception of applicants from SEAS B.S. and M.S programs, applicants must submit scores from the Graduate Record Examination (GRE) general test. All applicants must submit a minimum of three letters of recommendation, at least one of which should be from the advisor and/or faculty members at the institution(s) from which a degree was earned. Students for whom the bachelor's is the highest earned degree must have a minimum GPA of 3.3 (on a 4.0 scale) in undergraduate work. Students for whom the master's is the highest earned degree, departmental requirements for the GPA in course work leading to that degree are as follows (on a 4.0 scale): Civil and Environmental Engineering, Electrical and Computer Engineering, and Mechanical and Aerospace Engineering—3.4; Computer Science, and Engineering Management and Systems Engineering—3.5. Consult the department concerned for field-specific admission requirements.

Graduation and Scholarship Requirements

Upon admission to the first stage of the program—study of related fields culminating in the qualifying examination—students are assigned a faculty advisor who directs his or her studies. In some departments, a faculty committee may be appointed instead of a single advisor. Programs of study are structured to include a major field and two minor or supporting fields. Consult the department concerned for requirements.

For students who enter the program with a master's degree, the formal program of study consists of a minimum of 30 graduate-level credits. For students who enter with a bachelor's degree only, the program of study consists of a minimum of 54 graduate-level credits. These credits include both course and dissertation research credit. Individual requirements may vary by department. In many cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study exceeds the minimum number of credits stated above. Departments may establish a tool requirement, such as an examination in a computer language. Consult the department concerned for specific curriculum requirements.

If a doctoral student receives two grades of *F* or three grades below *B−,* graduate study is terminated and further enrollment prohibited. Courses in which the student earned grades below *B−* are not included in the total credit requirement for the degree. Students who receive any grade below *B−* are required to review their programs of study with their advisors.

Time Limits

In general, one year of full-time study is the minimum amount of time needed to prepare for the qualifying examination. Students should consult the individual department for specific timelines and regulations. In general, the qualifying examination must be completed within five years of the date of admission, unless specified otherwise by the department. The entire degree program must be completed within seven years, unless the department grants an extension. Approval of an extension is conditional on satisfactory progress. The time period for completion of the degree may be adjusted by the department for an approved leave of absence. A minimum of two years of full-time study and research should be expected. All time periods indicated here are increased by two years for students entering the doctoral program without a master's degree.

Full-time doctoral students must register for a minimum of 9 credits per semester until the minimum number of credits are completed, and 1 credit of SEAS 0940 (Continuing Research – Doctoral) each semester thereafter until satisfactory completion of the final examination. Part-time doctoral students usually register for a minimum of 6 credits per semester until the minimum number of credits is completed, and 1 credit of Continuing Research each semester thereafter until satisfactory completion of the final examination. No minimum course load is required during the summer

Preliminary and Qualifying Examinations

The Department of Computer Science requires a preliminary examination that must be passed within four semesters of starting the program. It comprises material from the areas of algorithms and theory, and software and systems.

The Department of Electrical and Computer Engineering requires a preliminary examination that must be taken before completing 18 credits after initial registration. The examination is guided by, but not limited to, the core material of the GW

master's program. Specific details regarding the structure of the exam are available in the department.

To be admitted to the qualifying examination that is required of all doctoral students, students must have a minimum cumulative GPA of 3.2 in the Departments of Civil and Environmental Engineering and Computer Science, and of 3.4 in the Departments of Mechanical and Aerospace Engineering, Engineering Management and Systems Engineering, and Electrical and Computer Engineering.

The qualifying examination is the principal means of determining whether a student will qualify as a candidate for the doctoral degree and progress to the second stage of the program. Its purpose is to ascertain whether the student's background and intellectual development are adequate to support doctoral research in the central field.

Preliminary and qualifying examinations may be written or oral or both. Students should consult the departments for specific guidelines. The examinations are conducted on dates established by the departments and are administered by a faculty committee. Upon favorable report of the examiners following the qualifying examination, students are admitted to candidacy for the degree. Students then begin specialized study and research under the supervision of a designated member of the full-time faculty. At the discretion of the committee that prepared the examination, students who fail any part of the qualifying examination may be given a second opportunity to qualify for candidacy. Usually, the entire examination must be retaken. Students who fail to qualify for candidacy in a doctoral program of the School will be considered to have failed on a school-wide basis and will not be admitted to further doctoral study within the School.

The Dissertation and Final Examination

Students admitted to candidacy for the degree of Doctor of Philosophy choose the faculty member under whom they wish to conduct research. The faculty member may accept or reject the request to serve as the student's director of research. The research area must be approved by the director, under whom the candidate conducts dissertation research throughout the remainder of the doctoral program. Students may consult other members of the faculty on an informal basis. In the Departments of Engineering Management and Systems Engineering and Civil and Environmental Engineering, students are required to present a written dissertation proposal to a committee of three full-time faculty members and to successfully defend the proposal in an oral defense prior to performing the bulk of their dissertation research. Work on the dissertation encompasses a minimum of 12 to 24 credits, depending on the department.

The dissertation should embody the results of extended original study and include material deemed worthy of publication in recognized scientific and engineering journals. Students are expected to attempt to have the results of the research published as soon as possible after they receive the degree and to submit copies of the published material to the dean. The Department of Computer Science requires that at least one article be accepted for publication by a refereed conference or journal prior to completion of degree requirements. The Department of Engineering Management and Systems Engineering requires that an article be accepted for review by a refereed journal prior to completion of degree requirements. The Department of Electrical and Computer Engineering requires the submission of a paper to a refereed journal and its acceptance for publication prior to the completion of degree requirements. Credit must be given in the publication to the fact that the material is abstracted, summarized, or developed from a dissertation submitted to The George Washington University in partial fulfillment of the requirements for the Ph.D.

All dissertations must be submitted electronically and meet the formatting and other requirements set forth at GW's Electronic Theses and Dissertations Submission website (http://library.gwu.edu/etds). Regulations regarding the form of the dissertation and preparation of the abstract are available in department offices. The dissertation, with accompanying files, becomes the property of the University.

Upon acceptance of the dissertation by the research committee, the candidate is presented for the final examination. The final examination is oral and is open to the public. The candidate must demonstrate a mastery of the special field of study and of the materials and techniques used in the research. The committee of examiners may include qualified experts brought to the University especially to participate in the examination. The director of research usually serves as advocate for the candidate. Students should consult department regulations concerning the formation of the committee and scheduling of the examination. When the examining committee is convinced of the quality and originality of the candidate's contribution to knowledge as well as his or her mastery of the scholarship and research techniques of the field, the committee recommends the candidate for the degree of Doctor of Philosophy. Students completing their degree program should refer to the sections on Eligibility for Graduation and Participation in the Commencement Ceremony under University Regulations.

Doctor of Engineering

The School of Engineering and Applied Science offers an off-campus Doctor of Engineering (D.Eng.) degree program. The Doctor of Engineering program addresses the widespread need for practitioners who can apply the knowledge they gain in the program of study within a business or technical environment, wherein the constant challenge is to create useful applications of the latest engineering principles and lead organizations that are occupied in this work.

The Doctor of Engineering degree currently is offered only in Engineering Management (EM).

Doctor of Engineering in Engineering Management

The D.Eng. (EM) program demands that research be applied to the solution of a real-world problem using the latest engineering concepts and tools—in other words, research toward the D.Eng. program is applied, rather than basic. Its purpose is to empower students, who are likely to be practicing engineers, to create advanced, practice-based solutions.

Admission to the D.Eng.(EM) program requires: (1) bachelor's and master's degrees from accredited institutions in engineering, applied science, mathematics, computer science, business administration, or information technology; (2) a minimum of two college-level calculus courses passed with grades of C or better; and (3) a minimum graduate-level GPA of 3.5 (on a 4.0 scale).

The D.Eng. (EM) program consists of 45 credits divided into a classroom phase of 10 graduate-level, three-credit courses, and a research phase during which a practice-based case study is undertaken on a topic related to engineering management, chosen by the student and approved by the adviser. Research for the case study comprises 15 credits. Prospective students are advised to contact the Engineering Management and Systems Engineering Department for additional information.

Transfer Between Degree Programs

Candidates for the professional or Doctor of Philosophy degree who are in good academic standing may, with the approval of the faculty advisor and department chair, transfer from one degree program to the other within their department if they meet the qualifications and requirements specified by the department. In the Department of Engineering Management and Systems Engineering, only one such transfer is permitted.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in applied science and technology (p. 667)
- Bachelor of Arts with a major in computer science (p. 638)
- Bachelor of Science with a major in biomedical engineering (p. 598)
- Bachelor of Science with a major in civil engineering (p. 609)
- Bachelor of Science with a major in civil engineering, environmental engineering option (p. 611)
- Bachelor of Science with a major in civil engineering, medical preparation option (p. 613)
- Bachelor of Science with a major in civil engineering, sustainability engineering option (p. 615)
- Bachelor of Science with a major in civil engineering, transportation engineering option (p. 617)
- Bachelor of Science with a major in computer engineering (p. 655)
- Bachelor of Science with a major in computer science (p. 640)
- Bachelor of Science with a major in electrical engineering (p. 656)
- Bachelor of Science with a major in electrical engineering, energy option (p. 657)
- Bachelor of Science with a major in electrical engineering, medical preparation option (p. 659)
- Bachelor of Science with a major in mechanical engineering (p. 688)
- Bachelor of Science with a major in mechanical engineering, aerospace option (p. 689)
- Bachelor of Science with a major in mechanical engineering, biomechanical option (p. 691)
- Bachelor of Science with a major in mechanical engineering, medical preparation option (p. 692)
- Bachelor of Science with a major in mechanical engineering, patent law option (p. 693)
- Bachelor of Science with a major in mechanical engineering, robotics option (p. 695)
- Bachelor of Science with a major in systems engineering (p. 669)

Minors

- Minor in biomedical engineering (p. 599)
- Minor in computer engineering (p. 660)
- Minor in computer science (p. 642)
- Minor in electrical engineering (p. 660)
- Minor in mechanical engineering (p. 696)
- Minor in operations research (p. 671)
- Minor in systems engineering (p. 671)

Combined programs

- Combined Bachelor of Science with a major in biomedical engineering and Master of Engineering in the field of regulatory biomedical engineering (p.)
- Combined Bachelor of Science with a major in civil engineering and Master of Science in the field environmental engineering (p. 619)
- Combined Bachelor of Science with a major in civil engineering and Master of Science in the field structural engineering (p. 620)
- Combined Bachelor of Science with a major in civil engineering and Master of Science in the field transportation engineering (p. 622)
- Combined Bachelor of Science with a major in mechanical engineering and Master of Science in the field mechanical engineering (p. 696)

GRADUATE

Master's programs

- Master of Engineering in the field of regulatory biomedical engineering (p. 600)
- Master of Engineering in the field of cybersecurity policy and compliance (online) (p.)
- Master of Science in the field of biomedical engineering (p. 601)
- Master of Science in the field of civil and environmental engineering (p. 624)
- Master of Science in the field of computer science (p. 643)
- Master of Science in the field of computer engineering (p. 661)
- Master of Science in the field of cybersecurity in computer science (p. 643)
- Master of Science in the field of electrical engineering (p. 662)
- Master of Science in the field of engineering management (p. 673)
- Master of Science in the field of mechanical and aerospace engineering (p. 697)
- Master of Science in the field of systems engineering (p. 674)
- Master of Science in the field of telecommunications engineering (p. 664)

Doctoral programs

- Doctor of Engineering in the field of engineering management (p. 675)
- Doctor of Philosophy in the field of biomedical engineering (p. 601)
- Doctor of Philosophy in the field of civil and environmental engineering (p. 625)
- Doctor of Philosophy in the field of computer engineering (p. 665)
- Doctor of Philosophy in the field of computer science (p. 644)
- Doctor of Philosophy in the field of electrical engineering (p. 665)
- Doctor of Philosophy in the field of engineering management (p. 676)
- Doctor of Philosophy in the field of mechanical and aerospace engineering (p. 698)
- Doctor of Philosophy in the field of systems engineering (p. 676)

CERTIFICATES

At the discretion of the respective departments, credit earned in a certificate program may be applied to a subsequent master's degree program. Scholarship requirements are the same as those for the master's degree program. Details are available in the Office of the Dean.

- Graduate certificate in computer-integrated design in mechanical and aerospace engineering (p. 699)
- Graduate certificate in computer security and information assurance (p. 644)
- Graduate certificate in emergency management and public health (p. 677)
- Graduate certificate in energy engineering and management (p. 699)
- Graduate certificate in engineering and technology management (p. 677)
- Graduate certificate in enterprise information assurance (p. 678)
- Graduate certificate in environmental engineering (p. 625)
- Graduate certificate in e (p. 678)nvironmental and energy systems management
- Graduate certificate in geoenvironmental engineering (p. 626)
- Graduate certificate in greenhouse gas management (p. 678)
- Graduate certificate in high-performance computing (p. 665)
- Graduate certificate in homeland security emergency preparedness and response (p. 679)
- Graduate certificate in structural engineering (p. 627)
- Graduate certificate in systems engineering (p. 679)
- Graduate certificate in transportation engineering (p. 627)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

- Applied Sciences (APSC) (p. 1036)
- Biomedical Engineering (BME) (p. 1054)
- Civil Engineering (CE) (p. 1066)
- Computer Science (CSCI) (p. 1079)
- Electrical and Computer Engineering (ECE (p. 1186)) (p. 1186)
- Engineering Management and Systems Engineering ((p. 1196)EMSE (p. 1196))

- Mechanical and Aerospace Engineering ((p. 1341)MAE (p. 1341))
- School of Engineering and Applice Sciences ((p. 1448)SEAS (p. 1448))

BIOMEDICAL ENGINEERING

OVERVIEW

Mission

The mission of the Department of Biomedical Engineering is to motivate and inspire students by providing high-caliber, fully integrated programs to prepare them to lead and participate in advancing the state of the art in health care technologies. In addition, graduates earn advanced degrees and further knowledge in the discipline by actively pursuing scholarly research for publication and dissemination.

Biomedical Engineering Program Educational Objectives

The biomedical engineering program prepares graduates who achieve employment in biomedical and related industry, government, or organizational fields using skills and knowledge learned while an undergraduate student. This is evidenced by their:

- Employment history and/or career advancement.
- Professional visibility (e.g., patents, invention disclosures, honors or awards, refereed journal articles, conference papers and other publications, and involvement in professional associations).
- Entrepreneurial activities.

Student Outcomes

The Department of Biomedical Engineering aims to produce graduates who have the ability to:

- Apply knowledge of mathematics, science, and engineering.
- Design and conduct experiments, as well as to analyze and interpret data.
- Design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
- Function on multidisciplinary teams.
- Identify, formulate, and solve engineering problems.
- Understand professional and ethical responsibility.
- Communicate effectively.
- Understand the impact of engineering solutions in a global, economic environment.
- Engage in life-long learning necessary to thrive in the profession.
- Keep abreast of contemporary issues while maintaining breadth and depth of knowledge.
- Use the techniques, skills, and modern engineering tools necessary for engineering practice.

UNDERGRADUATE

Bachelor's program

- Bachelor of Science with a major in biomedical engineering (p. 598)

Minor

- Minor in biomedical engineering (p. 599)

Combined programs

- Combined Bachelor of Science with a Major in Biomedical Engineering and Master of Engineering in the Field of Regulatory Biomedical Engineering (p. 600)

GRADUATE

Master's programs

- Master of Engineering in the field of regulatory biomedical engineering (p. 600)
- Master of Science in the field of biomedical engineering (p. 601)

Doctoral program

- Doctor of Philosophy in the field of biomedical engineering (p. 601)

FACULTY

Professors I. Efimov (Chair), E. Entcheva, M. Kay, D. Lee, Z. Li, M. Loew, C. Park, J. Zara, V. Zderic

Assistant Professor C. Park

Associate Teaching Professor D.T. Lee

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

BME 1010. Introduction to Biomedical Engineering. 1 Credit.
Basic and emerging concepts in electrical, computer, and biomedical engineering. Hands-on experiments and projects. Introduction to the professional literature and available resources and to technical writing, speaking, and presentation skills. (Fall).

BME 1020. Introduction to Biomedical Engineering. 2 Credits.
Continuation of BME 1010. Basic and emerging concepts in electrical, computer, and biomedical engineering. Hands-on experiments and projects. Introduction to the professional literature and available resources and to technical writing, speaking, and presentation skills. Prerequisite: BME 1010. (Same as ECE 1020) (Spring).

BME 2810. Biomedical Engineering Seminar I. 1 Credit.
BME 2810 and BME 2815 are taken in sequence by students in the biomedical engineering major. Overview of the field of biomedical engineering, including biomechanics, bioinformatics, telemedicine, instrumentation, and medical imaging. Prerequisite: BME 1020. (Fall).

BME 2815. Biomedical Engineering Seminar II. 1 Credit.
BME 2810 and BME 2815 are taken in sequence by students in the biomedical engineering major. Overview of the field of biomedical engineering, including biomechanics, bioinformatics, telemedicine, instrumentation, and medical imaging. (Fall and spring).

BME 2820. Biomedical Engineering Programming I. 3 Credits.
Introduction to Matlab Programming and fundamentals of programming in general with a focus on biomedical engineering problems. Functions, input/output, selection statements, loop statements, string manipulation, and debugging techniques will be covered; manipulation of vectors and matrices and the use of vectorized code. (Fall).

BME 2825. Biomedical Engineering Programming II. 3 Credits.
Introduction to C Programming and fundamentals of data structures with a focus on biomedical engineering problems; the use of data structures, pointers, and linked lists and discuss concepts such as binary trees and sorting algorithms. Students are expected to understand the basics of programming concepts such as the use of functions, input/output, selection statements, loop statements, string manipulation, and debugging techniques are understood, but no prior knowledge of C is required. Prerequisite: BME 2820; equivalent course may be substituted at instructor's discretion. (Fall).

BME 3820. Principles and Practice of Biomedical Engineering. 4 Credits.
Introduction to engineering principles applicable to medicine; medical measurements for clinical use and research; anatomy and physiology of the human body from system and cellular approaches. Principles of biomedical engineering are reinforced by determining and analyzing physiological measurements in laboratory exercises. Prerequisites: ECE 2110 and APSC 2113. (Fall).

BME 3907. Special Topics in Biomechanical Engineering. 3 Credits.
Topics vary by semester. May be repeated for credit if topic differs. See the Schedule of Classes for more details. (Fall, spring, and summer).

BME 3910. Capstone Design Preparation. 1 Credit.
Elements of project design; formulation of project ideas. Prerequisites: BME 2810, BME 2815. (Same as ECE 3910) (Fall).

BME 3915W. Biomedical Engineering Capstone Project Lab I. 1 Credit.
BME 3915, BME 4920, and BME 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. Prerequisite: BME 3910. (Same as ECE 3915W) (Spring).

BME 4820. Anatomy and Physiology for Engineers. 3 Credits.
Human anatomy and physiology from an engineering viewpoint. Analysis of functions of major physiological systems. Biopotentials, mechanics, gas exchange, chemical balance, electrical and chemical signaling, nervous control, voluntary and reflex factors. (Same as BME 6820) (Fall).

BME 4825. Biomedical Properties Laboratory. 1 Credit.
Introduction to biophysical concepts in a laboratory setting; emphasis on biomedical engineering. (Spring).

BME 4830. Introduction to Medical Imaging Methods. 3 Credits.
Common imaging modalities, including ultrasound, X-ray, MRI, CT, SPECT, and PET. Overview of linear systems, basic properties of an imaging system, the physics and instrumentation behind each modality, and their respective advantages, disadvantages, and applications. May be taken for graduate credit. Prerequisites: ECE 3220, BME 3820. (Spring).

BME 4920W. Biomedical Engineering Capstone Project Lab II. 3 Credits.
BME 3915, BME 4920, and BME 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. Prerequisite: BME 3915W. (Same as ECE 4920, ECE 4920W) (Fall, Every Year).

BME 4925W. Biomedical Engineering Capstone Project Lab III. 3 Credits.
BME 3915, BME 4920, and BME 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. (Same as ECE 4925) (Spring, Every Year).

BME 4990. Research. 1-3 Credits.
Applied research and experimentation projects, as arranged. Prerequisites: junior or senior status. (Fall and spring).

BME 6045. Special Topics. 1-3 Credits.
Topics to be announced in the Schedule of Classes. (Fall and spring).

BME 6050. Research. 1-12 Credits.
Applied research and experimentation projects, as arranged. May be repeated for credit.

BME 6065. Colloquium. 0 Credits.
Lectures by outstanding authorities in biomedical engineering. Topics to be announced each semester. (Fall and spring).

BME 6481. Regulatory Law for Medical Devices. 3 Credits.
An introduction to legal issues pertinent to medical device regulation; device classification, general and special controls, quality system regulation, 510(k) submissions, premarket approval applications (PMAs), clinical trials, investigational device exemptions (IDEs) and medical device reporting (MDR), recalls, labeling and advertising, enforcement, and emerging legal issues. Pharmaceutical regulation. (Fall).

BME 6482. Medical Measurements. 3 Credits.
Theory of measurements in biological areas and techniques for electronic measurements on biological specimens. Experiments in acquisition, processing, and measurement of physiological signals, ECG, EEG, and EMG. (Fall).

BME 6483. Medical Instrumentation Design. 3 Credits.
The medical device design process and many of its key aspects, including needs assessment, regulatory processes and concerns, intellectual property, patient safety, and market analysis. Prerequisites: BME 6482. (Spring).

BME 6484. Biomedical Signal Analysis. 3 Credits.
Origin, acquisition, and analysis of physiological signals. Deterministic and probabilistic modeling; fitting models; sequences and time series. Feature extraction from EEG and ECG; Fourier analysis and filtering; modeling. Noise and artifact removal and signal compensation. Prerequisites: BME 6482. (Spring).

BME 6485. Medical Imaging I. 3 Credits.
Principles of projection radiography, fluoroscopy, tomography, ultrasound and nuclear sources; biomagnetic imaging. Source and object; recorder resolution and noise; scatter and attenuation. Ultrasound techniques and instrumentation, including physics of ultrasound, transducers, ultrasound imaging, hemodynamics, Doppler techniques. Prerequisite: BME 4830. (Fall).

BME 6486. Clinical Medicine for Engineers. 3 Credits.
Overview of clinical medicine with emphasis on those areas most affected by engineering and technology. Prerequisites: BME 6482. (Spring, even years).

BME 6487. Rehabilitation Medicine Engineering. 3 Credits.
Cross-sectional view of those areas of medicine most involved with the treatment of handicapped individuals; application of engineering theory and techniques to the rehabilitation of handicapped individuals; solutions to major problem areas and specific problems. Prerequisite: BME 6482. (Spring, Every Year).

BME 6820. Anatomy and Physiology for Engineers. 3 Credits.
Human anatomy and physiology from an engineering perspective. Analysis of functions of major physiological systems. Biopotentials, mechanics, gas exchange, chemical balance, electrical and chemical signaling, nervous control, voluntary and reflex factors. (Same as BME 4820) (Fall).

BME 6840. Digital Image Processing. 3 Credits.
Properties of images and visual systems. Image acquisition, sampling, quantization. One- and two-dimensional image transform techniques; enhancement and restoration. Image coding and data compression. Segmentation, representation, boundary and shape, texture, matching. Image understanding. Prerequisites: ECE 6800. (Same as ECE 6840) (Spring, odd years).

BME 6842. Image Engineering. 3 Credits.
Sensor/camera design and analysis as a system. Detection and noise processes underlying the sensing of optical radiation; the engineering and physics of image formation. Topics covered include radiometry/photometry, optics and image formation, device and camera characterization, and image quality metrics and system design trades. Prerequisites: ECE 6010, ECE 6015. (Same as ECE 6842) (Fall, Every Year).

BME 6850. Pattern Recognition. 3 Credits.
Random vectors, transformations. Hypothesis testing, error probability: bias, variance, and sample size, resampling; sequential methods. Bayes, other linear classifiers. Discriminant functions, support vector machines, maximum-likelihood and parameter estimation, dimensionality reduction. Nonparametric methods; unsupervised learning and clustering; feature selection and ordering. Applications in industry and medicine. Student projects. Learning is reinforced by homework problems and in-class and at-home computer examples. Prerequisite: ECE 6015. (Same as ECE 6850) (Fall, Spring, and Summer, Every Year).

BME 6885. Computer Vision. 3 Credits.
Image processing; edge detection, segmentation, local features, shape and region description in 2D and 3D. Insights from human vision studies. Representation for vision: object models, synthetic images, matching, gaps, algorithms. Interference, production system, syntactic networks. Planning spatial reasoning for robot vision. Prerequisites: BME 6840 or ECE 6840 or equivalent. (Same as ECE 6885) (Fall, Spring, and Summer, Every Year).

BME 6994. Biomedical Engineering Regulatory Practicum I. 3 Credits.
First part of the BME 6994-BME 6995 practicum sequence. Students work with a practicum mentor to develop either an application for federal funding using the Small Business Innovation Research (SBIR) or Small Business Technology Transfer (STTR) mechanism or a 510(k) submission for U.S. Food and Drug Administration (FDA) medical device review. Independent research combined with the synthesis of technical and regulatory topics covered in the program. Restricted to students who have completed a minimum of 9 credits in the Master of Engineering in Regulatory Biomedical Engineering program. (Fall, spring, and summer).

BME 6995. Biomedical Engineering Regulatory Practicum II. 3 Credits.
Second part of the BME 6994-BME 6995 practicum sequence. Prerequisites: BME 6994. (Fall, spring, and summer).

BME 6998. Thesis Research. 3 Credits.
Thesis research. (Fall and spring).

BME 6999. Thesis Research. 3 Credits.
Thesis research. (Fall and spring).

BME 8484. Medical Imaging II: Image Analysis. 3 Credits.
Review of medical imaging modalities; review of image formation and characteristics, both static and dynamic; methods for and evaluation of: medical image reconstruction, enhancement, segmentation, registration, and description; feature extraction and classification; error analysis and the receiver operating characteristic; imaging applications in diagnosis and treatment, including surgery; metrics of truth and quality, with implications for image compression. Prerequisites: BME 6484. (Fall).

BME 8999. Dissertation Research. 0-12 Credits.
Limited to Doctor of Philosophy candidates. May be repeated for credit. (Fall, spring, and summer).

BACHELOR OF SCIENCE WITH A MAJOR IN BIOMEDICAL ENGINEERING

The Department of Biomedical Engineering offers an Accreditation Board for Engineering and Technology (ABET) accredited bachelor's degree in biomedical engineering. The curriculum provides students the opportunity to select a subset of courses to suit their interests and needs through a variety of technical electives. These electives include courses in leading-edge biomedical engineering topics, as well as advanced courses in computer science, electrical engineering, mechanical engineering, cell biology, physiology, and the physical sciences and mathematics.

Visit the program website (http://www.bme.seas.gwu.edu/programs-degrees) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

Code	Title	Credits
First semester		
BISC 1111	Introductory Biology: Cells and Molecules [1]	
BME 1010	Introduction to Biomedical Engineering	
CHEM 1111	General Chemistry I [1]	
MATH 1231	Single-Variable Calculus I [1]	
SEAS 1001	Engineering Orientation	
UW 1020	University Writing [1]	
Second semester		
BISC 1112	Introductory Biology: The Biology of Organisms [1]	
BME 1020	Introduction to Biomedical Engineering	
CHEM 1112	General Chemistry II [1]	
MATH 1232	Single-Variable Calculus II [1]	
PHYS 1025	University Physics I with Biological Applications [1]	
Third semester		
APSC 2113	Engineering Analysis I	
BME 2810	Biomedical Engineering Seminar I	
ECE 2110	Circuit Theory	
MATH 2233	Multivariable Calculus [1]	
PHYS 1026	University Physics II with Biological Applications [1]	
Fourth semester		
BME 2815	Biomedical Engineering Seminar II	
ECE 2210	Circuits, Signals, and Systems	
Programming Elective I [2]		

Restricted Engineering Elective [3]	
Restricted Engineering Elective [3]	
Humanities or social sciences elective [4]	
Fifth semester	
BME 3820	Principles and Practice of Biomedical Engineering
BME 4820	Anatomy and Physiology for Engineers
ECE 3220	Intro to Digital Signal Proces
Programming Elective II [2]	
Technical elective [5]	
BME 3910	Capstone Design Preparation
Sixth semester	
APSC 3115	Engineering Analysis III
BME 3915W	Biomedical Engineering Capstone Project Lab I
Two humanities or social sciences electives [4]	
Two technical electives [5]	
Seventh semester	
BME 4920W	Biomedical Engineering Capstone Project Lab II
MAE 4168	Intro. to Biomaterials
Humanities or social sciences elective [4]	
PHYS 3127	Biophysics: Macroscopic Physics in the Life Sciences
Technical elective [5]	
Eighth semester	
BME 4925W	Biomedical Engineering Capstone Project Lab III
PHIL 2135	Ethics in Business and the Professions
Humanities or social sciences elective [4]	
Technical elective [5]	
Science Elective [6]	

[1] Course satisfies the university general education requirement in math, science, and writing.

[2] Programming elective pairs (take one pair)

a) BME 3907 Special Topics in Biomechanical Engineering.10 Matlab Programming and BME 3907 Special Topics in Biomechanical Engineering.11 C Programming for BME

b) CSCI 1111 Introduction to Software Development and CSCI 1112 Algorithms and Data Structures

c) CSCI 1121 Introduction to C Programming and CSCI 1132 Data Structures and Software Design

d) ECE 1120 C Programming for ECE and ECE 1125 Data Structures&Algorithms ECE

[3] Potential restricted engineering electives (take 2)

MAE 2131 Thermodynamics

APSC 2057 Analytical Mechanics I

APSC 2058 Analytical Mechanics II

CE 2220 Introduction to the Mechanics of Solids

ECE 2115 Engineering Electronics

ECE 2140 Design of Logic Systems I

ECE 3310 Introduction to Electromagnetics

[4] At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list; the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list.

[5] All technical electives must be approved by the academic advisor and must include at least three engineering courses.

[6] Science electives (take one)

PHYS 2128 Biophysics: Microscopic Physics in the Life Sciences

CHEM 3165 Biochemistry I

MINOR IN BIOMEDICAL ENGINEERING

REQUIREMENTS

Code	Title	Credits
Prerequisites		

The following courses must be completed before beginning the minor program:	
PHYS 1022	University Physics II
APSC 2113	Engineering Analysis I
Required	
BME 3820	Principles and Practice of Biomedical Engineering
ECE 2110	Circuit Theory
ECE 2210	Circuits, Signals, and Systems
Electives	
Two of the following:	
BME 4830	Introduction to Medical Imaging Methods
ECE 3225	Signal and Image Analysis
MAE 3128	Biomechanics I
MAE 4168	Intro. to Biomaterials
PHYS 3127	Biophysics: Macroscopic Physics in the Life Sciences
PHYS 3128	Biophysics: Microscopic Physics in the Life Sciences

COMBINED BACHELOR OF SCIENCE WITH A MAJOR IN BIOMEDICAL ENGINEERING AND MASTER OF ENGINEERING IN THE FIELD OF REGULATORY BIOMEDICAL ENGINEERING

REQUIREMENTS

The School of Engineering and Applied Science (SEAS) offers a combined bachelor of science with a major in biomedical engineering (p. 598) and master of engineering in the field of regulatory biomedical engineering (p. 600) degree program. The program allows students to take a specified number of graduate credits as part of their undergraduate degree, thereby decreasing the number of credits normally required for the master's degree.

Students interested in the combined program should visit the SEAS Department of Biomedical Engineering website (https://www.bme.seas.gwu.edu) for additional information.

MASTER OF ENGINEERING IN THE FIELD OF REGULATORY BIOMEDICAL ENGINEERING

The master of engineering in the field of regulatory biomedical engineering (rBME) is an interdisciplinary program offered through the Department of Biomedical Engineering (http://www.bme.seas.gwu.edu) in partnership with the School of Medicine and Health Sciences (http://smhs.gwu.edu). The program is designed to train engineers in the specific set of skills of regulatory science, biomedical innovation, and entrepreneurship. Students with training in engineering or physics, and/or relevant experience in government and industry, learn the fundamentals of biomedical engineering, global regulatory affairs, regulatory strategy in the development of devices and diagnostics, regulatory compliance, engineering patent law, medical measurements, and instrument design. In addition to course work, students gain experience in SBIR/STTR grant applications and/or FDA Premarket Notification (510(k)) submissions for medical devices.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 24 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Required		
BME 6482	Medical Measurements	
BME 6483	Medical Instrumentation Design	
BME 6994	Biomedical Engineering Regulatory Practicum I	
BME 6995	Biomedical Engineering Regulatory Practicum II	
MAE 3171	Patent Law for Engineers	
RAFF 6201	Introduction to Global Regulatory Affairs	
RAFF 6203	Regulatory Device Diagnostics	
RAFF 6205	Regulatory Affairs Compliance	
Elective		
6 credits from the following:		
BME 4820	Anatomy and Physiology for Engineers	
BME 4830	Introduction to Medical Imaging Methods	

BME 6486	Clinical Medicine for Engineers
BME 6487	Rehabilitation Medicine Engineering
CSCI 4531	Computer Security
CSCI 4532	Information Policy
ECE 6565	Telecommunications Security
EMSE 6020	Decision Making with Uncertainty
EMSE 6765	Data Analysis for Engineers and Scientists
EMSE 6770	Techniques of Risk Analysis and Management
MAE 6204	Tissue Engineering
MAE 6238	Biomaterials

MASTER OF SCIENCE IN THE FIELD OF BIOMEDICAL ENGINEERING

The degree of master of science in the field of biomedical engineering degree program is designed to prepare students to apply engineering principles to problems in medicine and biology, to understand and model multiple attributes of living systems, and to synthesize biomedical systems and devices. Students choose between two areas of focus: medical imaging or medical instrumentation. Thesis and non-thesis options are available. The program is offered on GW's main campus in Foggy Bottom, where the School of Engineering and Applied Science (http://www.seas.gwu.edu), the School of Medicine and Health Sciences (http://smhs.gwu.edu), and GW Hospital (http://www.gwhospital.com) are separated by one city block.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://www.bme.seas.gwu.edu/master-science-biomedical-engineering) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits including a zero-credit colloquium.

Code	Title	Credits
Required		
BME 6065	Colloquium	
BME 6482	Medical Measurements	
BME 6484	Biomedical Signal Analysis	
Three of the following:		
BME 4830	Introduction to Medical Imaging Methods	
BME 6842	Image Engineering	
BME 6483	Medical Instrumentation Design	
BME 6485	Medical Imaging I	
BME 6486	Clinical Medicine for Engineers	
BME 6487	Rehabilitation Medicine Engineering	
BME 8484	Medical Imaging II: Image Analysis	
Electives		
5 additional courses approved by the academic advisor, which may include additional courses from above.		

DOCTOR OF PHILOSOPHY IN THE FIELD OF BIOMEDICAL ENGINEERING

Program Overview

The doctoral program in biomedical engineering is designed to prepare students for a career of creative scholarship by providing a broad but balanced background of knowledge and guidance in the performance of research. This interdisciplinary program provides course work and research that draw on resources from across the School of Engineering and Applied Science. Existing research partnerships with the University's School of Medicine and Health Sciences and GW Hospital, as well as the National Institutes of Health and U.S Food and Drug Administration, offer unique research opportunities and laboratory facilities.

Areas of Focus

There are a number of areas in which program students focus their dissertation research. These include cardiac electrophysiology, therapeutic ultrasound and drug delivery, image analysis and image processing, medical imaging and computer-aided diagnosis, assistive robotics, optogenetics, and microfluidics and lab-on-a-chip technology.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://www.bme.seas.gwu.edu/phd-biomedical-engineering) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under School of Engineering, Doctoral Program Regulations (p. 584)

Students with an MS degree must take a minimum of 30 credits, of which at least 18 must be from graduate courses, and at least 12 must be dissertation research credits. The courses to be taken by the student must be approved by the student's advisor. In some cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study exceeds the minimum number of credits.

No specific courses are required; the student and advisor design the curriculum to meet the student's needs and goals.

Student should contact the department for additional information and requirements

CIVIL AND ENVIRONMENTAL ENGINEERING

Mission Statement

The mission of the Department of Civil and Environmental Engineering is to provide an academic environment where professional education can be pursued, scholarly research in science and technology can be conducted, and the interest of the public can be served through the advancement of knowledge.

In pursuit of this mission the administration, faculty, and staff join to provide a broad-based, rigorous professional education in civil engineering at the undergraduate level; a graduate education at the master's level in major areas of civil engineering; and doctoral programs in selective areas of excellence within civil engineering.

Educational Objectives of the Bachelor of Science Program

The civil engineering undergraduate program of study prepares its graduates with the following capabilities necessary to attain career and professional accomplishments:

- Technical knowledge: students are able to use their technical knowledge and expertise in mathematics, science, and engineering to identify, formulate, and solve problems involving design, experimentation, and analysis of a wide variety of civil engineering applications;
- Team skills: students develop leadership skills, demonstrate proficiency in all forms of communication, and perform well in a multidisciplinary team environment;
- Continuous education: students recognize the need for continuing their education through graduate studies, continuous education opportunities, and/or self-education;
- Professionalism: students are prepared to exercise the highest standards of personal and professional integrity, demonstrate an understanding of the ethical and professional issues related to the procurement of work, and provide coordination between the design and construction aspects of the civil engineering profession.

These objectives are accomplished through a rigorous curriculum that emphasizes fundamentals in basic sciences, mathematics, humanities, and engineering in five major areas of civil engineering: environmental engineering, geotechnical engineering, structural engineering, water resources engineering, and transportation engineering. The curriculum enables students to use modern engineering tools to work individually and in teams. The curriculum contains a well-structured set of courses that enable students to develop the required analytical, experimental, and design skills.

Educational Outcomes of the Bachelor of Science Program

The civil engineering undergraduate program of study prepares its graduates to have the following capabilities for career and professional advancement:

- Apply knowledge of mathematics, science, and engineering; design and conduct experiments; and analyze and interpret data;
- Design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, health and safety, manufacturability, and sustainability constraints;
- Identify, formulate, and solve engineering problems;
- Use the techniques, skills, and modern engineering tools necessary for engineering practice;
- Function on multidisciplinary teams; and
- Communicate effectively.

Students are provided with the broad education necessary to understand the impact of engineering solutions in a global economic, environmental, and social context; a knowledge of contemporary issues; an understanding of professional and ethical responsibility; and a recognition of the need for and ability to engage in lifelong learning.

The civil engineering undergraduate program curriculum includes coverage of proficiency in mathematics through differential equations, probability and statistics, calculus-based physics, and general chemistry; proficiency in a minimum of four recognized major civil engineering areas; the ability to conduct laboratory experiments and to critically analyze and interpret data in more than one of the recognized major civil engineering areas; the ability to perform civil engineering design by means of design experiences integrated throughout the professional component of the curriculum; and an understanding of professional practice issues such as procurement of work, bidding versus quality-based selection processes, how the design professionals and the construction professions interact to construct a project, the importance of professional licensure and continuing education, and/or other professional practice issues.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Science with a major in civil engineering (p. 609)
- Bachelor of Science with a major in civil engineering, environmental engineering option (p. 611)
- Bachelor of Science with a major in civil engineering, medical preparation option (p. 613)
- Bachelor of Science with a major in civil engineering, sustainability option (p. 615)
- Bachelor of Science with a major in civil engineering, transportation engineering option (p. 617)

Combined programs

- Combined Bachelor of Science with a major in civil engineering and Master of Science in the field environmental engineering (p. 619)
- Combined Bachelor of Science with a major in civil engineering and Master of Science in the field structural engineering (p. 620)
- Combined Bachelor of Science with a major in civil engineering and Master of Science in the field transportation engineering (p. 622)

GRADUATE

Master's program

- Master of Science in the field of civil and environmental engineering (p. 624)

Doctoral program

- Doctor of Philosophy in the field of civil and environmental engineering (p. 625)

CERTIFICATE

- Graduate certificate in environmental engineering
- Graduate certificate in geoenvironmental engineering
- Graduate certificate in structural engineering (p. 627)
- Graduate certificate in transportation engineering (p. 627)

FACULTY

Professors S.S. Badie, K.H. Digges (*Research*), M.I. Haque, S. Lerman, M.T. Manzari (*Chair*), R. Riffat, K. Roddis, S.S. Badie

Associate Professors P.F. Silva

Assistant Professors L. Farhadi, S.H. Hamdar, T. Li, D. Shuai

Research Professor K.H. Digges

Professorial Lecturers M.O. Critchfield, G.C. Everstine, K. Garrahan, F. Sadek

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CE 1010. Introduction to Civil and Environmental Engineering. 1 Credit.
An introduction to the profession of civil and environmental engineering. Field visits and laboratory exercises complement classroom instruction. (Fall).

CE 1020. Introduction to a Sustainable World. 1 Credit.
The science underlying the basic processes that gave rise to the world we live in and that maintain its viability for human life. Ecosystem-functioning environmental issues, such as greenhouse gas emission and ozone, with current efforts to resolve them. Technological innovations in the context of sustainability.

CE 1098. Variable Topics. 1-36 Credits.

CE 2210. Engineering Computations. 3 Credits.
Numerical methods for engineering applications. Methods for solving systems of linear equations, root finding, curve fitting, and data approximation. Numerical differentiation and integration and numerical solution of differential equations. Computer applications. Prerequisites: CSCI 1121, APSC 2113. (Spring).

CE 2220. Introduction to the Mechanics of Solids. 3 Credits.
Stress and strain, axial load problems, torsion, shear force and bending moment, pure bending of beams, shearing stresses in beams, compound stresses, analysis of plane stress and plane strain, combined stresses, deflection of beams, statically indeterminate problems, columns, energy methods. Prerequisite: APSC 2057, APSC 2113.

CE 2510. Environmental Sustainability. 3 Credits.
An introduction to environmental sustainability with focus on the nexus of water, energy, and climate; energy demands of water systems, water footprints of energy generation, and how the two valuable resources are limiting each other; technologies and research frontiers toward a sustainable water and energy supply.

CE 2710. Introduction to Transportation Engineering. 3 Credits.
Transportation system components; roadway traffic capacity and network performance measures; signalized and un-signalized intersections; monitoring techniques, instruments and data processing. Sustainability issues and environmental impact of transportation systems with focus on urban design, planning and regulation. Prerequisites: Math 2233. (Spring).

CE 3110W. Civil Engineering Materials. 2 Credits.
Mechanical properties and behavior of civil engineering materials such as metals, concrete, and fiber-reinforced polymer composites. Properties range from plastic deformations of metallic materials to crushing of confined and unconfined concrete. Basis of the strength of materials. Concepts of creep, fatigue, fracture, and crack propagation. Prerequisite: CE 2220. (Fall).

CE 3111W. Civil Engineering Materials Lab. 1 Credit.
Measurement of stress–strain characteristics and study of failure modes in ductile steel, brittle concrete, and anisotropic composite materials. Experiments include data collection, data analysis, and interpretation and presentation of results regarding tension, compression, bending, impact, and shear properties. Prerequisite or corequisite: CE 3110W. Prerequisites: CE 3110W. (Fall).

CE 3140. Sustainability in Engineering Materials. 2 Credits.
Sustainable engineering: overall materials energy needs/properties and impacts; load resistance and aging, thermodynamics, water conservation, heat transfer, use of energy-efficient materials in construction, life-cycle assessment. Prerequisite: CE 3110, CE 3111.

CE 3230. Structural Theory I. 3 Credits.
Theory of statically determinate structures; stability and determinacy; influence lines and moving loads. Analysis of beams, frames, trusses, and arches. Calculation of deflections. Prerequisites: CE 2210, CE 2220. (Fall).

CE 3240. Structural Theory 2. 3 Credits.
Theory of statically indeterminate structures using matrix methods and classical approaches such as moment distribution and slope-deflection; influence lines; energy methods. Prerequisite: CE 3230.

CE 3310. Reinforced Concrete Structures. 3 Credits.
Properties of concrete and reinforcement; design of flexural reinforcement, shear reinforcement; development of reinforcement; design of columns, floor slabs; ethics and professionalism in design. A design project, including the use of computer software and a detailed report, is required. Prerequisite or corequisite: CE 3240.

CE 3520. Environmental Engineering I: Water Resources and Water Quality. 3 Credits.
Physical and chemical analyses of water quality and characteristics. Microbiology of water and pathogens. Introduction to water treatment processes involving coagulation, flocculation, filtration, and disinfection. Prerequisite or corequisite: CE 3610.

CE 3521. Environmental Engineering Laboratory. 1 Credit.
Laboratory experiments for physical and chemical analyses of water and wastewater. Measurement of turbidity, alkalinity, dissolved oxygen, BOD, COD, suspended solids, and optimum coagulant dose using jar tests. Corequisite: CE 3520.

CE 3610. Hydraulics. 3 Credits.
Fluid statics: pressure forces, buoyancy, and flotation. Application of kinematic principles; flow fields, stream tubes, and flow nets. Fluid dynamics: applications to pipe flow, hydraulic models, measurement of pressure, and velocity. Open channel flow: applications to water resources engineering. Prerequisite: MAE 3126.

CE 3611. Hydraulics Laboratory. 1 Credit.
Laboratory experiments and demonstrations of hydraulics in pipe and open-channel flow. Topics include center of pressure, floating bodies, Bernoulli's theorem, discharge coefficients, velocity profile, and head losses. Prerequisite or corequisite: CE 3610.

CE 3720. Highway Engineering and Design. 3 Credits.
Road vehicle performance. Principles of highway design: horizontal and vertical alignments, roadside design; drainage and drainage structures, earthwork, intersections, interchanges, parking facilities; basic traffic models; highway materials. Application of safety standards. Prerequisite: MATH 2233; prerequisite or corequisite: APSC 3115 and CE 2220.

CE 3730. Sustainable Urban Planning Dynamics. 3 Credits.
Human and physical processes shaping urban environments; human–environment interactions in the context of an urban region; urban design, materials, transport, planning, and regulation. Prerequisite: CE 2710.

CE 4320. Metal Structures. 3 Credits.
Principles of the design of metal structures, structural elements, connections, specific problems of analysis including the use of computer software, methods of construction, professionalism in design. Prerequisite: CE 3240.

CE 4330W. Contracts and Specifications. 3 Credits.
Law of contracts, construction contracts, specifications, bidding, insurance and bonds, professional liability, arbitration of disputes, litigation. Restricted to juniors and seniors. (Spring, Every Year).

CE 4340. Design and Cost Analysis of Civil Engineering Structures. 0-3 Credits.
Total structural systems concepts. Design of civil engineering structures such as piers, wharves, bulkheads, offshore platforms, dams, and other special structures. Principles of cost analysis for timber, steel, and reinforced concrete structures. Project and report are required. Prerequisites: CE 3310, CE 4320, CE 4410. (Spring).

CE 4410. Introduction to Geotechnical Engineering. 3 Credits.
Soils and rock formation, soil composition, permeability, seepage and flow netanalysis, stresses in soil medium, consolidation and settlement, shear strength of soil, analysis of lateral earth pressures, soil compaction. Prerequisite: CE 2220, MAE 3126.

CE 4411. Geotechnical Engineering Laboratory. 1 Credit.
Laboratory experiments to evaluate liquid and plastic limits, grain-size distribution, shear strength, compressibility, permeability, and moisture–density relationship of soils. Prerequisite or corequisite: CE 4410.

CE 4450. Introduction to Geo-environmental Engineering. 3 Credits.
Characterization of soils and wastes, engineering properties of soils and geo-synthetics, fundamental concepts of fate and transport of contaminants, common practice in design and construction of waste containment systems, current methods for remediation of contaminated groundwater and soils. Prerequisites: CE 3520, CE 4410. (Spring, Every Year).

CE 4530. Environmental Engineering II: Water Supply and Pollution Control. 3 Credits.
Introduction to wastewater treatment systems including clarification, suspended and attached growth processes. Use of dissolved oxygen models. Water supply and wastewater collection systems, applied hydraulics of pipelines and pumps. Planning to meet quality needs and regulatory requirements. Prerequisite: CE 3520.

CE 4620. Hydrology and Hydraulic Design. 3 Credits.
Descriptive hydrology: hydrologic cycle, precipitation, stream flow, evaporation, and transpiration. Quantitative hydrology: hydrograph analysis, hydrographs of basin outflow, storage routing. Probability concepts in hydrology: flood frequency, rainfall frequency, stochastic hydrology. Culverts and stilling basins. Prerequisite or corequisite: APSC 3115, CE 3610.

CE 4810. Research. 1-3 Credits.
Applied research and experimentation projects, as arranged. Prerequisite: junior or senior status.

CE 4820. Special Topics. 1-6 Credits.
Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

CE 6101. Numerical Methods in Engineering. 3 Credits.
Eigenvalue problems. Numerical solution of systems of equations and ordinary differential equations. Solution techniques for elliptic, parabolic, and hyperbolic partial differential equations. Numerical methods for solving finite element equations. Introduction to solution of fluid-flow problems. Prerequisite: CE 2210.

CE 6102. Application of Probability Methods in Civil Engineering. 3 Credits.
Uncertainty in real-world information; basic probability concepts and models; random variables; useful probability distributions, statistical estimation of distribution parameters from observed data; empirical determination of distribution models; testing hypothesis; regression and correlation analyses; decision theory. Prerequisite: APSC 3115.

CE 6201. Advanced Strength of Materials. 3 Credits.
Deflection of beams using singular functions, unsymmetrical bending of beams, beams on elastic foundation. Beam-column problems, shear center for thin-walled beam cross sections, curved beams. Applications of energy methods, torsion, basic equations for theory of elasticity, thin- and thick-walled cylinders, stress concentration, and failure criteria. Prerequisites: CE 2220, CE 3240. (Spring).

CE 6202. Methods of Structural Analysis. 3 Credits.
Modern methods of analysis of statically indeterminate structures, matrix analysis based on flexibility, stiffness, energy and variational methods, substructuring techniques; consideration of plastic collapse of structures; introduction to the finite element method. Prerequisites: CE 2220, CE 3240. (Fall).

CE 6203. Reliability Analysis of Engineering Structures. 3 Credits.
Probability theory, theory of structural reliability, probabilistic analysis of strength and loads, risk and reliability function, empirical distribution, probability plot. The design service life, method of perturbation, Monte Carlo simulation. Fatigue and fracture, proof testing, inspection and repair–replacement maintenance. Prerequisite: APSC 3115.

CE 6204. Analysis of Plates & Shells. 3 Credits.
Bending and stretching of thin elastic plates under loading with various boundary conditions, continuous plates and plates on elastic foundations, theory of folded-plate structures. Theory of curved surfaces; general linear bending theory and its simplification to membrane theory; bending stresses in shells of revolution, shallow-shell theory. Prerequisites: CE 2220, CE 3240. (Spring, odd years).

CE 6205. Theory of Structural Stability. 3 Credits.
General criteria for stability, buckling of elastic and inelastic columns and frames, torsional and lateral buckling, variational methods. Buckling of plates and shells under static loads, stability of stiffened structures, effect of imperfections and boundary conditions. Prerequisites: CE 2220, CE 3240. (Fall).

CE 6206. Continuum Mechanics. 3 Credits.
Introduction to the mechanics of continuous media. Tensor calculus; kinematics; stress and stress rate, conservation of mass, conservation of linear and angular momentum, energy balance, second law of thermodynamics; constitutive theory; linear and nonlinear elasticity, newtonian fluids, micropolar elasticity. Prerequisites: CE 2220. (Fall, spring, and summer, even years).

CE 6207. Theory of Elasticity I. 3 Credits.
Introduction to Cartesian tensors; deformation, stress, constitutive relations for linear elasticity; formulation of boundary value problems, variational principles, torsion and bending of prismatial rods, plane problems. Prerequisites: CE 2220. (Same as MAE 6207) (Spring).

CE 6208. Plasticity. 3 Credits.
Introduction to the continuum theory of plastic deformation. Physical basis of rate-independent plasticity. Concepts of yield, strain hardening and softening, reverse yield, and cyclic plasticity. Constitutive equations describing plastic deformation. Prerequisite: CE 6201 or CE 6206.

CE 6209. Mechanics of Composite Materials. 3 Credits.
Stress–strain relationship for orthotropic materials, invariant properties of an orthotropic lamina, biaxial strength theory for an orthotropic lamina. Mechanics of materials approach to stiffness, elasticity approach to stiffness. Classical lamination theory, strength of laminates. Statistical theory of fatigue damage. Same as MAE 6233. Prerequisite: CE 3240.

CE 6210. Introduction to Finite Element Analysis. 3 Credits.
Calculus of variations. Variational formulation of the finite element method. Weighted residual techniques. Computer implementation of the finite element method. Application to problems in heat transfer, stress analysis, fluid flow, and structural analysis. Prerequisites: proficiency in one computer language, CE 2220, CE 3240. (Fall).

CE 6301. Design of Reinforced Concrete Structures. 3 Credits.
Structural behavior of reinforced concrete structures, ultimate strength and deformation characteristics; design of structural components including beams, columns, floor slabs, deep beams, corbels, and composite slab/beam systems. Prerequisite: CE 3310.

CE 6302. Prestressed Concrete Structures. 3 Credits.
Structural behavior and failure modes of prestressed concrete structures; design in prestressed concrete, including long-span structures, bridges, and precast systems. Prerequisite: CE 3310.

CE 6310. Advanced Reinforced Concrete Structures. 3 Credits.
Conception, analysis, and design of low-rise and high-rise buildings by ultimate-strength methods, precast systems, progressive collapse, earthquake considerations, domes, folded plates, shell-type structures, and special topics. Prerequisite: CE 6301.

CE 6311. Bridge Design. 3 Credits.
Application of basic design procedures for reinforced and prestressed concrete bridges, according to AASHTO bridge specifications. Various types of concrete bridges, design superstructure bridge elements (deck slab, girders, bearing pads), and development of superstructure/substructure details. Prerequisite: CE 6302.

CE 6320. Design of Metal Structures. 3 Credits.
Structural behavior of metal structures and composite girders. Conception, analysis, and design of low-rise and high-rise buildings by elastic and inelastic methods. Earthquake considerations and special topics. Prerequisite: CE 4320.

CE 6321. Advanced Metal Structures. 3 Credits.
Conception and design of advanced structural components and systems, hysteretic behavior, plastic design principles, box-type girders, cable systems, and unique structural systems. Prerequisite: CE 6320. (As arranged).

CE 6340. Structural Dynamics. 3 Credits.
Vibration of continuous systems: membranes, beam plates, and shells; approximate methods of vibration analysis; methods of integral transform; analysis of nonlinear systems; wave propagation. Prerequisites: APSC 2058, CE 3240. (Fall, odd years).

CE 6341. Random Vibration of Structures. 3 Credits.
Introduction to random processes, responses of linear structures to stationary and nonstationary random inputs. Structural responses to earthquakes, waves, boundary-layer turbulences, wind loads, etc. Failure analysis of structures under random loads. Prerequisites: APSC 3115, CE 6340. (Spring, even years).

CE 6342. Structural Design to Resist Natural Hazards. 3 Credits.
Prediction of forces due to earthquakes and strong winds; generalized codes; pseudostatic methods for preliminary design; codes based on spectra, energy absorption and ductility; influence of foundations; ground failures; static and aeroelastic effects of strong winds. Design project. Prerequisites: CE 3240, CE 4340, either CE 6340 or CE 6701. (Spring).

CE 6350. Intro to Biomechanics. 3 Credits.
Fundamentals of continuum mechanics as they apply to biological materials: concepts of stress, strain, and equilibrium; elastic and viscoelastic properties of solids; physiological fluid mechanics and bioheat and mass transfer. Fundamentals of solid mechanics of soft tissues and bone structures. Development of computer models and applications. Prerequisite: CE 2220.

CE 6401. Fundamentals of Soil Behavior. 3 Credits.
Soil mineralogy, clay–water–electrolyte systems, soil composition, fabric, structure, volume change behavior, permeability, coupled phenomena, in-situ evaluation of soil behavior. Prerequisite: CE 4410.

CE 6402. Theoretical Soil Mechanics. 3 Credits.
Porous media, stress–strain behavior of soil skeleton, elastic and elastoplastic models for soil behavior, critical state concept, cam clay, strength of soils, stress–dilatancy, stress paths. (Fall, odd years).

CE 6403. Geotechnical Engineering. 3 Credits.
Principles of soil mechanics applied to the analysis and design of mat foundations, pile foundations, retaining structures including sheeting and bracing systems, and waterfront structures. Foundations on difficult soils and reinforced earth structures. Prerequisite: CE 4410.

CE 6404. Geotechnical Earthquake Engineering. 3 Credits.
Ground motion, wave propagation, foundation isolation, site response analysis, seismic stability of retaining structures, soil structure interaction. Prerequisite: graduate standing.

CE 6405. Rock Engineering. 3 Credits.
Classification and properties of rock; nature of rock masses and rock discontinuities; field exploration; methods of excavation; design and applications to foundation slopes, tunnels, and chambers in rock. Prerequisite: CE 4410.

CE 6501. Environmental Chemistry. 3 Credits.
Principles of chemistry of natural waters, water supplies, wastewaters, hazardous wastes. Stoichiometry, equilibrium, solubility, kinetics, organic chemistry, biochemistry, analytical techniques. Examples from water/wastewater practice to illustrate applications. Prerequisites: CHEM 1111, CHEM 1112. (Fall).

CE 6502. Advanced Sanitary Engineering Design. 3 Credits.
Elements of design including basic parameters and hydraulic requirements. Layout and design of water supply and wastewater systems, pumping stations, and treatment plants. Plant expansions and modifications. Prerequisite: CE 4530.

CE 6503. Principles of Environmental Engineering. 3 Credits.
Basic concepts of water, air, and terrestrial environments and interrelationships among them. Principles of environmental chemistry and microbiology. Assessment of environmental quality and impacts. Environment and health. Water and wastewater systems. Legal and regulatory controls. Prerequisites: CE 3520. (Fall).

CE 6504. Water and Wastewater Treatment Processes. 3 Credits.
Theory and application of commonly used processes. Sedimentation, coagulation, filtration, disinfection, gas transfer, activated sludge, trickling filters, oxidation ponds, sorption, and sludge stabilization and disposal. Process combinations to produce treatment systems. Prerequisite: CE 6503.

CE 6505. Environmental Impact Assessment. 3 Credits.
Public policy and legislation on environmental quality. Methods for assessing impacts of engineering projects. Technology for assessing impacts on air, water, and land environments, applied to transportation facilities, water and wastewater facilities, industrial and community development. Prerequisites: CE 3520. (Fall).

CE 6506. Microbiology for Environmental Engineers. 3 Credits.
Principles and applications of advanced treatment systems for water, wastewater, and hazardous wastes, including: biological nutrient removal, oxidation-reduction processes, stripping, sorption, membrane processes, chemical precipitation, others. Prerequisites: CE 3520. (Spring, even years).

CE 6507. Advanced Treatment Processes. 3 Credits.
Principles and applications of advanced treatment systems for water, waste-water, and hazardous wastes, including: biological nutrient removal, oxidation-reduction processes, stripping, sorption, membrane processes, chemical precipitation, others. Prerequisite: CE 6504.

CE 6508. Industrial Waste Treatment. 3 Credits.
Types of industries, waste sources. Characteristics, measurements, and evaluation. Minimization and reuse. Treatment process selection, development, and design. Regulations, permits, standards, monitoring, and pretreatment. (Fall).

CE 6509. Introduction to Hazardous Wastes. 3 Credits.
Regulations, including RCRA and Superfund. Transport and fate of hazardous substances. Elements of environmental toxicology, risk assessment, and hazard ranking. Monitoring, data collection, and evaluation. Waste minimization. Case histories. Prerequisites: CE 3520. (Spring).

CE 6601. Open Channel Flow. 3 Credits.
Types and regimes of flow; energy and momentum principles, uniform flow, gradually varied flow, spatially and rapidly varied flow. Flow in nonprismatic channels. Unsteady flow; dam break problem, flood routing. Prerequisite: CE 3610 .

CE 6602. Hydraulic Engineering. 3 Credits.
Hydraulic design of conveyance, regulating, and measurement structures. Design for spillways, energy dissipators, inlet and outlet works related to dams. Forces on hydraulic structure and stability analysis. Hydraulic turbines and pumps. Design considerations for flow through pipes. Transients and cavitation. Prerequisite: CE 3610.

CE 6603. Design of Dams. 3 Credits.
Project planning and investigations. Types of dams; design of earth–rock fill dams; stability analysis, foundation treatment, wind–wave protection. Construction methods for dams. Reservoir sedimentation. Safety inspection of dams. Prerequisite: CE 3610.

CE 6604. Advanced Hydrology. 3 Credits.
Precipitation, evaporation, and transpiration. Soil physics; stream flow, drainage basins, hydrograph analysis, and stream-flow routing. Design criteria, flood frequency statistics and analysis, flood forecasting and control, water supply forecasting. Prerequisite: CE 4620.

CE 6605. Ground Water and Seepage. 3 Credits.
Permeability theory of groundwater flow, flow nets, analogs, computer solutions; applications to engineering problems such as excavation dewatering, flow through dams, stabilization of earth slopes. Prerequisites: CE 4410. (Spring).

CE 6606. Mechanics of Water Waves. 3 Credits.
Irrotational theory for deep- and shallow-water waves, reflexion, refraction, diffraction, attenuation. Water waves of finite amplitude: shallow-water theory, tides, bores, long-waves theory, conoidal and solitary waves. Wave generation by wind. Wave breaking and reflexion. Prerequisite: APSC 6213 and permission of instructor.

CE 6607. Water Resources Planning and Control. 3 Credits.
The parameters of water resources planning and control, economics of water resources and related natural resources, economics of water-quality control, physical parameters of water resource development, water resources law. Prerequisite: approval of department.

CE 6608. Hydraulic Modeling. 3 Credits.
Dimensional analysis and similitude. Types of models—physical, mathematical. Distortions in physical models. Erodible bed models. Prerequisite: CE 3610.

CE 6609. Numerical Methods in Environmental and Water Resources. 3 Credits.
Use of microcomputers in water resources. Elements of finite difference schemes, basic operations, convergence, stability, and consistency. Nonuniform flow and error analysis; unsteady laminar flow; diffusion problems; unsteady flow in open channels; water hammer, seepage flow, and diffusion–dispersion problems. Prerequisites: CE 2210, MAE 3126. (Spring).

CE 6610. Pollution Transport Systems. 3 Credits.
Distribution of pollutants in natural waters and atmosphere, diffusive and advective transport, mathematics for stream pollutant deoxygenation rates, groundwater pollution transport, sediment transport, thermal transport, numerical simulation of pollutant transports in streams and estuaries. Prerequisite: CE 3610, MAE 2131.

CE 6701. Analytical Mechanics. 3 Credits.
Fundamental principles, particle and rigid-body dynamics, generalized coordinates, variational principles and Lagrange's equations, nonholonomic systems, Hamilton's equations, theory of small oscillations. Prerequisites: APSC 2058, APSC 2113. (Fall).

CE 6702. Vehicle Dynamics. 3 Credits.
Engineering principles and analytical methods explaining the performance of an automotive vehicle. Basic mechanics governing vehicle dynamic performance in longitudinal, ride, and handling modes. Engineering analysis techniques applied to basic systems and subsystems to derive the governing equations. Prerequisite or corequisite: CE 6701. Prerequisites: CE 6701 (either prerequisite or corequisite). (Spring, even years).

CE 6705. Nonlinear Finite Element Modeling and Simulation. 3 Credits.
Rigid and flexible body methods for modeling crashes. Application of dynamic nonlinear finite element methods with contact algorithms for modeling crash phenomena. Modeling and simulation of vehicles, airbags, safety restraining systems, and highway barriers. (Spring).

CE 6706. Pavement & Runway Design. 3 Credits.
Pavement types, wheel-load characteristics; stresses in pavements and subgrades; empirical methods of design of flexible and rigid highway and airfield pavements; general principles of runway design. (Spring, odd years).

CE 6707. Systems Dynamics Modeling and Control. 3 Credits.
Introduction of concepts in control theory and applications to solve problems in civil and transportation engineering dealing with single-input/single-output and multi-input/multi-output systems. Review of classical control theory in the frequency and time domain, state–space analysis, system optimization, and non-linear control. (Fall).

CE 6721. Traffic Engineering and Highway Safety. 3 Credits.
Roadway traffic capacity and network performance measures; steady and unsteady traffic flow phenomena; traffic control signalization theory and practical implementation; monitoring techniques, instruments, and data processing for highway safety. Traffic related highway safety design concepts. (Fall).

CE 6722. Intelligent Transportation Systems. 3 Credits.
Commands, controls, and communications in modern multimodal transportation; infrastructure/highway and vehicle automation, advanced traffic management, vehicle control and safety systems; information, data, and sensory requirements; practical applications and projects. Prerequisite: CE 2710 or CE 3720. Recommended background: basic knowledge of transportation engineering. (Spring, Every Year).

CE 6800. Special Topics. 1-6 Credits.
Topic to be announced in the Schedule of Classes.

CE 6801. Civil and Environmental Engineering Graduate Internship. 1 Credit.
For graduate students in the department. May be repeated once for credit. Prerequisite: required courses in the area of focus and department approval. Additional prerequisites may be required for a specific internship as determined by the research supervisor.

CE 6808. Research. 1-12 Credits.
Basic research projects, as arranged. May be repeated for credit.

CE 6998. Thesis Research. 3 Credits.

CE 6999. Thesis Research. 3 Credits.

CE 8320. Theory of Elasticity II. 3 Credits.
Application of integral transform and analytic function theory to solution of plane problems; elastic wave propagation. Three-dimensional elasto-statics. Prerequisite: APSC 6211; CE 6207.

CE 8321. Nonlinear Mechanics of Continua. 3 Credits.
Polar decomposition, invariance, isotropy, representation theorems for invariants and isotropic tensor functions. Deformation, kinematics, stress, balance principles. Principles for constitutive relations. Applications to nonlinear elasticity and non-Newtonian fluids. Prerequisite: CE 6206.

CE 8330. Advanced Finite Element Analysis. 3 Credits.
Review of variational formulation of the finite element method. Formulation of various continuum and structural elements. Application to static and dynamic problems in elasticity, plasticity, large deflection, and instability in plates and shells. Recent developments in finite element methods. Same as MAE 6288. Prerequisite: CE 6206, 6210; or MAE 6210, MAE 6286.

CE 8350. Sedimentation Engineering. 3 Credits.
Problems of erosion and sedimentation. Properties of sediment. Initiation of motion. Suspension of sediment and sediment discharge theories. Sedimentation measurements. Economic and legal aspects. Prerequisite: CE 6601 or approval of department.

CE 8351. Mechanics of Alluvial Channels. 3 Credits.
Physical processes in drainage basins and channels. Channel forms and bed forms. Hydraulics and sediment transport in alluvial channels. Design of stable channels. Qualitative and quantitative response of rivers. Channel stabilization, navigation channels. Case studies including environmental impacts. Prerequisite: CE 6601 or approval of department.

CE 8352. Advanced Hydraulics. 3 Credits.
Theory of unsteady flow. Diffusion and dispersion through pipes and open channels. Numerical solutions using finite element and finite difference methods. Prerequisite: CE 6601 or approval of department.

CE 8370. Intelligent Systems Theory and Applications. 3 Credits.
Overview of artificial intelligence, neural networks, genetic algorithms, fuzzy systems, and hybrid intelligent systems and their integration with other information processing methods. Intelligent systems applications; examples are drawn from ITS and traffic engineering, vehicle safety, remote sensing, and structural design optimization. Prerequisite: CE 6707.

CE 8380. Advanced Biomechanics. 3 Credits.
Historical overview of biomechanics and biomaterials. Fundamental concepts in mechanics as applied to the treatment of biological systems. Approaches to the mechanical analysis of the human structure under physiological and non-physiological loading conditions. Constitutive laws for biological materials. Finite element applications. Prerequisite: CE 6206 or 6350. (As arranged).

CE 8998. Advanced Reading and Research. 1-12 Credits.
Limited to students preparing for the Doctor of Philosophy qualifying examination. May be repeated for credit.

CE 8999. Dissertation Research. 1-12 Credits.
Limited to Doctor of Philosophy candidates. May be repeated for credit.

BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING

Civil engineering encompasses those branches of engineering most closely related to the control and improvement of our environment and of the physical conditions of life. Civil engineers apply many technical specialties in order to plan, design, and construct projects that range from buildings and transportation systems to space stations and space habitats.

Visit the program website (http://www.cee.seas.gwu.edu/programs-degrees) for additional information.

REQUIREMENTS

Recommended program of study

First semester	
CE 1010	Introduction to Civil and Environmental Engineering
UW 1020	University Writing *
SEAS 1001	Engineering Orientation
MATH 1231	Single-Variable Calculus I *
CHEM 1111	General Chemistry I *
One humanities or social sciences elective **	
Second semester	
PHYS 1021	University Physics I *
MATH 1232	Single-Variable Calculus II *
MAE 1004	Engineering Drawing and Computer Graphics
CSCI 1121	Introduction to C Programming
One humanities or social sciences elective **	
Third semester	
APSC 2057	Analytical Mechanics I
APSC 2113	Engineering Analysis I
MATH 2233	Multivariable Calculus
PHYS 1022	University Physics II *
One humanities or social sciences elective **	
Fourth semester	
APSC 2058	Analytical Mechanics II
CE 2210	Engineering Computations

CE 2220	Introduction to the Mechanics of Solids
CE 2710	Introduction to Transportation Engineering
GEOL 1001	Physical Geology *
One humanities or social sciences elective **	
Fifth semester	
APSC 3115	Engineering Analysis III
CE 3110W	Civil Engineering Materials
CE 3111W	Civil Engineering Materials Lab
CE 3230	Structural Theory I
CE 3720	Highway Engineering and Design
MAE 3126	Fluid Mechanics I
One humanities or social sciences elective **	
Sixth semester	
CE 3240	Structural Theory 2
CE 3310	Reinforced Concrete Structures
CE 3611	Hydraulics Laboratory
CE 3520	Environmental Engineering I: Water Resources and Water Quality
CE 3610	Hydraulics
CE 3521	Environmental Engineering Laboratory
One humanities or social sciences elective **	
Seventh semester	
CE 4410	Introduction to Geotechnical Engineering
CE 4411	Geotechnical Engineering Laboratory
CE 4320	Metal Structures
CE 4620	Hydrology and Hydraulic Design
CE 4530	Environmental Engineering II: Water Supply and Pollution Control
One engineering elective selected from list below	
Eighth semester	
CE 4330	Contracts and Specifications
CE 4340	Design and Cost Analysis of Civil Engineering Structures
CE 6403	Geotechnical Engineering
Two engineering electives from the list below	

Engineering electives

CE 4810	Research
CE 4820	Special Topics
CE 6102	Application of Probability Methods in Civil Engineering
CE 6201	Advanced Strength of Materials
CE 6202	Methods of Structural Analysis
CE 6203	Reliability Analysis of Engineering Structures
CE 6204	Analysis of Plates & Shells
CE 6205	Theory of Structural Stability
CE 6206	Continuum Mechanics
CE 6207	Theory of Elasticity I
CE 6208	Plasticity
CE 6209	Mechanics of Composite Materials
CE 6301	Design of Reinforced Concrete Structures
CE 6302	Prestressed Concrete Structures
CE 6320	Design of Metal Structures
CE 6321	Advanced Metal Structures
CE 6401	Fundamentals of Soil Behavior
CE 6402	Theoretical Soil Mechanics
CE 6403	Geotechnical Engineering
CE 6404	Geotechnical Earthquake Engineering
CE 6405	Rock Engineering
CE 6501	Environmental Chemistry
CE 6502	Advanced Sanitary Engineering Design
CE 6503	Principles of Environmental Engineering
CE 6504	Water and Wastewater Treatment Processes

CE 6505	Environmental Impact Assessment
CE 6506	Microbiology for Environmental Engineers
CE 6507	Advanced Treatment Processes
CE 6508	Industrial Waste Treatment
CE 6509	Introduction to Hazardous Wastes
CE 6601	Open Channel Flow
CE 6602	Hydraulic Engineering
CE 6603	Design of Dams
CE 6604	Advanced Hydrology
CE 6605	Ground Water and Seepage
CE 6606	Mechanics of Water Waves
CE 6607	Water Resources Planning and Control
CE 6608	Hydraulic Modeling
CE 6609	Numerical Methods in Environmental and Water Resources
CE 6610	Pollution Transport Systems
CE 6701	Analytical Mechanics
CE 6702	Vehicle Dynamics
CE 6703	Vehicle Standards and Crash Test Analysis
CE 6704	Crash Investigation and Analysis
CE 6705	Nonlinear Finite Element Modeling and Simulation
CE 6706	Pavement & Runway Design
CE 6707	Systems Dynamics Modeling and Control
CE 6721	Traffic Engineering and Highway Safety
CE 6722	Intelligent Transportation Systems
CE 6800	Special Topics
EMSE 6410	Survey of Finance and Engineering Economics

*Course satisfies the university general education requirement in math, science, and writing.
**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list; (p. 38) the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING, ENVIRONMENTAL ENGINEERING OPTION

Graduates with the degree of bachelor of science in civil engineering, environmental engineering option, can identify, formulate, and solve problems involving design, experimentation, and analysis of a wide variety of civil engineering applications. The program of study prepares students to understand the impact of engineering solutions in a global economic, environmental, and social context. The well-structured curriculum enables students to design systems, components, or processes to meet desired needs within realistic constraints such as economic, environmental, social, political, health and safety, manufacturability, and sustainability.

Visit the program website (http://www.cee.seas.gwu.edu/programs-degrees) for additional information.

BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING, MEDICAL PREPARATION OPTION

The degree program for the bachelor of science in civil engineering, medical preparation option, focuses on proficiency in mathematics through differential equations, probability and statistics, calculus-based physics, and general chemistry; and the ability to conduct laboratory experiments and to critically analyze and interpret data. The curriculum prepares students to use their technical knowledge and expertise in mathematics, science, and engineering to identify, formulate, and solve problems involving design, experimentation, and analysis of a wide variety of civil engineering applications with special emphasis on the medical field.

Visit the program website (http://www.cee.seas.gwu.edu/programs-degrees) for additional information.

REQUIREMENTS

Recommended program of study

First semester

CE 1010	Introduction to Civil and Environmental Engineering

CHEM 1111	General Chemistry I *
MATH 1231	Single-Variable Calculus I *
SEAS 1001	Engineering Orientation
UW 1020	University Writing *
One humanities or social sciences elective **	
Second semester	
CHEM 1112	General Chemistry II *
CSCI 1121	Introduction to C Programming
MAE 1004	Engineering Drawing and Computer Graphics
MATH 1232	Single-Variable Calculus II *
PHYS 1021	University Physics I *
Third semester	
APSC 2057	Analytical Mechanics I
APSC 2113	Engineering Analysis I
BISC 1111	Introductory Biology: Cells and Molecules *
MATH 2233	Multivariable Calculus *
PHYS 1022	University Physics II *
One humanities or social sciences elective **	
Fourth semester	
APSC 2058	Analytical Mechanics II
BISC 1112	Introductory Biology: The Biology of Organisms *
CE 2210	Engineering Computations
CE 2220	Introduction to the Mechanics of Solids
CE 2710	Introduction to Transportation Engineering
GEOL 1001	Physical Geology *
Fifth semester	
CE 3110W	Civil Engineering Materials
CE 3111W	Civil Engineering Materials Lab
CE 3230	Structural Theory I
CHEM 2151	Organic Chemstry I *
CHEM 2153	Organic Chemistry Laboratory I *
ECE 2110	Circuit Theory
MAE 3126	Fluid Mechanics I
Sixth semester	
CE 3240	Structural Theory 2
CE 3310	Reinforced Concrete Structures
CE 3520	Environmental Engineering I: Water Resources and Water Quality
CE 3521	Environmental Engineering Laboratory
CE 3611	Hydraulics Laboratory
CE 3610	Hydraulics
CHEM 2152	Organic Chemistry II *
CHEM 2154	Organic Chemistry Laboratory II *
Seventh semester	
CE 4320	Metal Structures
CE 4410	Introduction to Geotechnical Engineering
CE 4411	Geotechnical Engineering Laboratory
CE 4530	Environmental Engineering II: Water Supply and Pollution Control
One humanities or social sciences elective **	
Eighth semester	
APSC 3115	Engineering Analysis III
CE 4340	Design and Cost Analysis of Civil Engineering Structures
CE 6403	Geotechnical Engineering
One humanities or social sciences elective *	

*Course satisfies the university general education requirement in math, science, and writing.
**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list (p. 38); the remaining courses must be selected from either the University General Education

Requirement list or the SEAS General Education Requirement list. (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf)

A complete list of engineering electives can be found on the department's website (http://www.cee.seas.gwu.edu/programs-degrees).

BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING, SUSTAINABILITY OPTION

Civil engineering encompasses those branches of engineering most closely related to the control and improvement of our environment and the physical conditions of life. The Bachelor of Science in Civil Engineering prepares graduates to design systems, components, or processes to meet desired needs within realistic constraints such as sustainability. The University defines sustainability as the balance of environmental resources, social equity, and economic prosperity across the globe and across generations. The curriculum for the bachelor of science in civil engineering, sustainability option, enables students to develop the required analytical, experimental, and design skills to apply interdisciplinary methods and approaches to sustainability and analyze challenges, and develop and implement solutions.

Visit the program website (http://www.cee.seas.gwu.edu/programs-degrees) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

Code	Title	Credits
First semester		
CE 1010	Introduction to Civil and Environmental Engineering	
CHEM 1111	General Chemistry I *	
MATH 1231	Single-Variable Calculus I *	
SEAS 1001	Engineering Orientation	
UW 1020	University Writing *	
One humanities or social sciences elective **		
Second semester		
CE 1020	Introduction to a Sustainable World	
CSCI 1121	Introduction to C Programming	
MAE 1004	Engineering Drawing and Computer Graphics	
MATH 1232	Single-Variable Calculus II *	
PHYS 1021	University Physics I *	
One humanities or social sciences elective **		
Third semester		
APSC 2057	Analytical Mechanics I	
APSC 2113	Engineering Analysis I	
CE 2510	Environmental Sustainability	
MATH 2233	Multivariable Calculus *	
PHYS 1022	University Physics II *	
One humanities or social sciences elective **		
Fourth semester		
APSC 2058	Analytical Mechanics II	
CE 2210	Engineering Computations	
CE 2220	Introduction to the Mechanics of Solids	
CE 2710	Introduction to Transportation Engineering	
GEOL 1001	Physical Geology	
One humanities or social sciences elective **		
Fifth semester		
APSC 3115	Engineering Analysis III	
CE 3110W	Civil Engineering Materials	
CE 3111W	Civil Engineering Materials Lab	
CE 3230	Structural Theory I	
CE 3720	Highway Engineering and Design	
MAE 3126	Fluid Mechanics I	
One humanities or social sciences elective **		
Sixth semester		
CE 3140	Sustainability in Engineering Materials	
CE 3240	Structural Theory 2	
CE 3310	Reinforced Concrete Structures	
CE 3520	Environmental Engineering I: Water Resources and Water Quality	
CE 3521	Environmental Engineering Laboratory	

CE 3610	Hydraulics
CE 3611	Hydraulics Laboratory
Seventh semester	
CE 4410	Introduction to Geotechnical Engineering
CE 4411	Geotechnical Engineering Laboratory
CE 4320	Metal Structures
CE 4620	Hydrology and Hydraulic Design
CE 4530	Environmental Engineering II: Water Supply and Pollution Control
Civil engineering elective from the list below	
Eighth semester	
CE 4330	Contracts and Specifications
CE 4340	Design and Cost Analysis of Civil Engineering Structures
CE 4450	Introduction to Geo-environmental Engineering
Two engineering electives from the list below	

Code	Title	Credits
Engineering electives		
CE 4810	Research	
CE 4820	Special Topics	
CE 6102	Application of Probability Methods in Civil Engineering	
CE 6201	Advanced Strength of Materials	
CE 6202	Methods of Structural Analysis	
CE 6203	Reliability Analysis of Engineering Structures	
CE 6204	Analysis of Plates & Shells	
CE 6205	Theory of Structural Stability	
CE 6206	Continuum Mechanics	
CE 6207	Theory of Elasticity I	
CE 6208	Plasticity	
CE 6209	Mechanics of Composite Materials	
CE 6301	Design of Reinforced Concrete Structures	
CE 6302	Prestressed Concrete Structures	
CE 6320	Design of Metal Structures	
CE 6321	Advanced Metal Structures	
CE 6401	Fundamentals of Soil Behavior	
CE 6402	Theoretical Soil Mechanics	
CE 6403	Geotechnical Engineering	
CE 6404	Geotechnical Earthquake Engineering	
CE 6405	Rock Engineering	
CE 6501	Environmental Chemistry	
CE 6502	Advanced Sanitary Engineering Design	
CE 6503	Principles of Environmental Engineering	
CE 6504	Water and Wastewater Treatment Processes	
CE 6505	Environmental Impact Assessment	
CE 6506	Microbiology for Environmental Engineers	
CE 6507	Advanced Treatment Processes	
CE 6508	Industrial Waste Treatment	
CE 6509	Introduction to Hazardous Wastes	
CE 6601	Open Channel Flow	
CE 6602	Hydraulic Engineering	
CE 6603	Design of Dams	
CE 6604	Advanced Hydrology	
CE 6605	Ground Water and Seepage	
CE 6606	Mechanics of Water Waves	
CE 6607	Water Resources Planning and Control	
CE 6608	Hydraulic Modeling	
CE 6609	Numerical Methods in Environmental and Water Resources	
CE 6610	Pollution Transport Systems	
CE 6701	Analytical Mechanics	
CE 6702	Vehicle Dynamics	

CE 6703	
CE 6704	
CE 6705	Nonlinear Finite Element Modeling and Simulation
CE 6706	Pavement & Runway Design
CE 6707	Systems Dynamics Modeling and Control
CE 6721	Traffic Engineering and Highway Safety
CE 6722	Intelligent Transportation Systems
CE 6800	Special Topics
EMSE 6410	Survey of Finance and Engineering Economics

*Course satisfies the university general education requirement in math, science, and writing.
**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list; the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list.

BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING, TRANSPORTATION ENGINEERING OPTION

Civil engineering encompasses those branches of engineering most closely related to the control and improvement of our environment and the physical conditions of life. The bachelor of science in civil engineering, transportation option, prepares students to design systems, components, or processes to achieve desired outcomes within realistic constraints such as economic, environmental, social, political, health and safety, manufacturability, and sustainability. Students are able to use their experience with interdisciplinary methods and approaches to transportation engineering and design to develop the analytical, experimental, and design skills they will need. Graduates of the program understand issues involving professional practice such as procurement of work, bidding versus quality-based selection processes, and how construction professionals and civil engineers interact to design and construct a project.

Visit the program website (http://www.cee.seas.gwu.edu/programs-degrees) for additional information.

REQUIREMENTS

COMBINED BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING AND MASTER OF SCIENCE IN THE FIELD OF ENVIRONMENTAL ENGINEERING

The School of Engineering and Applied Science offers the combined bachelor of science with a major in civil engineering and master of science in the field of environmental engineering (B.S./M.S.) for undergraduate students who are interested in careers in civil engineering with a focus in the field of environmental engineering. The program allows students to take a specified number of graduate credits as part of their undergraduate degree, thereby allowing both degrees to be earned more quickly and at a lower cost. To meet the requirements of the dual program, students take 6 credits in graduate-level courses as part of their B.S. program of study.

Visit the program website (http://www.cee.seas.gwu.edu/five-year-dual-degree-program-bs-and-ms-civil-engineering-0) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

Code	Title	Credits
First semester		
CE 1010	Introduction to Civil and Environmental Engineering	
CHEM 1111	General Chemistry I *

One engineering elective	
Eighth semester	
CE 4330W	Contracts and Specifications
CE 4340	Design and Cost Analysis of Civil Engineering Structures
CE 6502	Advanced Sanitary Engineering Design
Two engineering electives	
One CE master of science program course	
Ninth semester	
Four CE master of science program courses	
Tenth semester	
Four CE master of science program courses	

*Course satisfies the university general education requirement in math, science, and writing.
**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list (p. 38); the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list. (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf)

A complete list of engineering electives can be found on the department's website (http://www.cee.seas.gwu.edu/programs-degrees).

COMBINED BACHELOR OF SCIENCE WITH A MAJOR IN CIVIL ENGINEERING AND MASTER OF SCIENCE IN THE FIELD OF STRUCTURAL ENGINEERING

Offered by the School of Engineering and Applied Science, the bachelor of science with a major in civil engineering and master of science in the field of structural engineering (B.S./M.S.)

degree program allows civil engineering students to specialize in the field of structural engineering. Civil engineering encompasses those branches of engineering most closely related to the control and improvement of the environment and the physical conditions of life. Civil engineers apply many technical specialties in order to plan, design, and construct projects that range from buildings and transportation systems to space stations and space habitats.

Visit the Department of Civil and Environmental Engineering website (http://www.cee.seas.gwu.edu/about) for additional information

CE 6707	Systems Dynamics Modeling and Control
CE 6721	Traffic Engineering and Highway Safety
CE 6722	Intelligent Transportation Systems
CE 6800	Special Topics
EMSE 6410	Survey of Finance and Engineering Economics

*Course satisfies the university general education requirement in math, science, and writing.
**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list; (p. 38) the remaining course must be selected from either the University General Education Requirement list (p. 38) or the SEAS General Education Requirement list. (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf) At least one humanities course must be selected from the University General Education Requirement list; (p. 38) the remaining courses must be selected from either the University General Education Requirement list (p. 38) or the SEAS General Education Requirement list. (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf)

MASTER OF SCIENCE IN THE FIELD OF CIVIL AND ENVIRONMENTAL ENGINEERING

The master of science in the field of civil and environmental engineering degree program is designed to provide students with the fundamentals and knowledge about the various specializations within environmental engineering. These include water, wastewater, hazardous wastes, industrial wastes, and pertinent regulatory requirements. Environmental engineering students use one of the world's largest wastewater treatment plants as a real-world laboratory to improve the water quality of the Potomac River and the Chesapeake Bay watershed. Structural engineering students study earthquake engineering, extreme event design of structures, and bridge design on a state-of-the-art, six-degrees-of-freedom earthquake simulator. Transportation engineering students learn from faculty and experts at GW's National Crash Analysis Center (https://virginia.gwu.edu/centers-institutes-labs) and the Federal Outdoor Impact Laboratory.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

More information can be found on the departmental website (http://www.cee.seas.gwu.edu/master-science-program).

REQUIREMENTS

The following requirements must be fulfilled: Non-thesis option –33 credits; thesis option–30 credits, including 6 credits of thesis. In either option, the student must select one area of concentration from below and complete the required 9 credits of courses in that area. The remaining credits are selected by the student in consultation with a faculty advisor.

Code	Title	Credits
Required		
All courses in one concentration		
Engineering Mechanics:		
APSC 6213	Analytical Methods in Engineering III	

CE 6206	Continuum Mechanics
CE 6210	Introduction to Finite Element Analysis
Environmental engineering:	
CE 6501	Environmental Chemistry
CE 6503	Principles of Environmental Engineering
CE 6609	Numerical Methods in Environmental and Water Resources
Geotechnical engineering:	
CE 6210	Introduction to Finite Element Analysis
CE 6402	Theoretical Soil Mechanics
CE 6605	Ground Water and Seepage
Structural engineering:	
CE 6201	Advanced Strength of Materials
CE 6202	Methods of Structural Analysis
CE 6210	Introduction to Finite Element Analysis
Transportation safety engineering:	
CE 6102	Application of Probability Methods in Civil Engineering
CE 6721	Traffic Engineering and Highway Safety
CE 6722	Intelligent Transportation Systems
Water resources engineering:	
CE 6601	Open Channel Flow
CE 6604	Advanced Hydrology
CE 6609	Numerical Methods in Environmental and Water Resources
Required of students who have selected the thesis option	
CE 6998	Thesis Research
CE 6999	Thesis Research

Students should consult with the advisor concerning their program of study.

DOCTOR OF PHILOSOPHY IN THE FIELD OF CIVIL AND ENVIRONMENTAL ENGINEERING

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under School of Engineering, Doctoral Program Regulations (http://bulletin.gwu.edu/engineering-applied-science/#Doctor_of_Philosophy).

Students with an MS degree must take a minimum of 30 credits, of which at least 18 must be from graduate courses, and at least 12 must be dissertation research credits. The courses to be taken by the student must be approved by the student's advisor. Students with a BS degree must take a minimum of 54 credits, of which at least 42 must be graduate course credits, and at least 12 must be dissertation research credits. The courses to be taken by the student must be approved by the student's advisor. In some cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study exceeds the minimum number of credits.

No specific courses are required; the student and advisor design the curriculum to meet the student's needs and goals.

Other requirements

- Qualifying examination—Administered twice a year, the examination covers subject matters at both the master's and doctoral levels. Students should prepare for comprehensive questioning on all subject matters regardless of any particular course included in the actual doctoral coursework load.

Student should contact the department for additional information and requirements

GRADUATE CERTIFICATE IN ENVIRONMENTAL ENGINEERING

The graduate certificate in environmental engineering program is particularly appropriate for individuals interested in the areas of hazardous waste remediation and water/wastewater treatment. Students who complete the graduate certificate may opt to continue towards a master's degree in the civil and environmental engineering department. All courses completed by the student in the graduate certificate program with a grade of B or better can be transferred to the master's degree program.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in one selected track, including 9 credits in required courses and a 3-credit elective course.

Hazardous Waste Remediation

Code	Title	Credits
Required		
CE 6503	Principles of Environmental Engineering	
CE 6504	Water and Wastewater Treatment Processes	
CE 6509	Introduction to Hazardous Wastes	
Elective		
One of the following:		
CE 6501	Environmental Chemistry	
CE 6502	Advanced Sanitary Engineering Design	
CE 6503	Principles of Environmental Engineering	
CE 6504	Water and Wastewater Treatment Processes	

Advanced Technologies in Environmental Engineering

Code	Title	Credits
Required		
CE 6503	Principles of Environmental Engineering	
CE 6504	Water and Wastewater Treatment Processes	
CE 6800	Special Topics (Environmental Application and Implications of Nanotechnology)	
Elective		
One of the following:		
CE 6501	Environmental Chemistry	
CE 6502	Advanced Sanitary Engineering Design	
CE 6503	Principles of Environmental Engineering	
CE 6504	Water and Wastewater Treatment Processes	

Engineering Design and Impact Assessment

Code	Title	Credits
Required		
CE 6503	Principles of Environmental Engineering	
CE 6504	Water and Wastewater Treatment Processes	
CE 6505	Environmental Impact Assessment	
Elective		
One of the following:		
CE 6501	Environmental Chemistry	
CE 6502	Advanced Sanitary Engineering Design	
CE 6503	Principles of Environmental Engineering	
CE 6504	Water and Wastewater Treatment Processes	

GRADUATE CERTIFICATE IN GEOENVIRONMENTAL ENGINEERING

The graduate certificate in geoenvironmental engineering program is designed to provide the necessary background for civil engineers to practice in the field. The program offers an in-depth understanding of the issues that a geo-environmental engineer may encounter in practice. Students who successfully complete the certificate program may opt to continue towards a master's degree in the Civil and Environmental Engineering department. All courses completed by the student in the graduate certificate program with a grade of B or better can be transferred to the master's degree program.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 9 credits in required courses and one 3-credit elective course.

Code	Title	Credits
Required		
CE 6401	Fundamentals of Soil Behavior	
CE 6509	Introduction to Hazardous Wastes	

CE 6800	Special Topics (Containment Systems for Waste Disposal and Remediation Systems for Subsurface Contamination)
Elective	
One of the following:	
CE 6501	Environmental Chemistry
CE 6504	Water and Wastewater Treatment Processes
CE 6507	Advanced Treatment Processes
CE 6605	Ground Water and Seepage
CE 6610	Pollution Transport Systems

GRADUATE CERTIFICATE IN STRUCTURAL ENGINEERING

The graduate certificate in structural engineering program is appropriate for those who wish to gain specialized knowledge in one of the following tracks: earthquake engineering design of bridges and buildings, extreme event design of structures to resist the effects of accidental explosions and vehicular collision, concrete bridge design using the LRFD approach, or building design using the LRFD approach.

Students who successfully complete the certificate program may opt to continue towards a master's degree in the Civil and Environmental Engineering department. All courses completed by the student in the graduate certificate program with a grade of B or better can be transferred to the master's degree program.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses in one selected track.

Earthquake Engineering Design

Code	Title	Credits
Required		
CE 6202	Methods of Structural Analysis	
CE 6342	Structural Design to Resist Natural Hazards	
CE 6404	Geotechnical Earthquake Engineering	
CE 6800	Special Topics (Advanced Earthquake Engineering Topics)	

Concrete Bridge Design

Code	Title	Credits
Required		
CE 6301	Design of Reinforced Concrete Structures	
CE 6302	Prestressed Concrete Structures	
CE 6310	Advanced Reinforced Concrete Structures	
CE 6800	Special Topics (Advanced Bridge Design Topics)	

Extreme Event Design of Structures

Code	Title	Credits
Required		
CE 6202	Methods of Structural Analysis	
CE 6342	Structural Design to Resist Natural Hazards	
CE 8330	Advanced Finite Element Analysis	
CE 6800	Special Topics ((Advanced Blast Resistant Topics)	

Building Design

Code	Title	Credits
Required		
CE 6310	Advanced Reinforced Concrete Structures	
CE 6342	Structural Design to Resist Natural Hazards	
CE 6320	Design of Metal Structures	
CE 6800	Special Topics (Advanced Building Design Topics)	

GRADUATE CERTIFICATE IN TRANSPORTATION ENGINEERING

The graduate certificate in the field of transportation engineering is particularly appropriate for those who wish to gain specialized knowledge in either intelligent transportation systems and congestion mitigation or transportation safety.

Students who successfully complete the graduate certificate in structural engineering may opt to continue towards a master's degree in the Civil and Environmental Engineering department. All courses completed by the student in the graduate certificate

program with a grade of B or better can be transferred to the master's degree program.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 15 credits, including 9 credits in required courses and 6 credits in elective courses in one selected track.

Intelligent Transportation Systems and Congestion Mitigation Track

Code	Title	Credits
Required		
Three of the following:		
CE 6707	Systems Dynamics Modeling and Control	
CE 6721	Traffic Engineering and Highway Safety	
CE 6722	Intelligent Transportation Systems	
CE 6800	Special Topics (Advanced Theory in Traffic Flow)	
CE 6800	Special Topics (Advanced Demand Modeling)	
Electives		
Two of the following:		
CE 6101	Numerical Methods in Engineering	
CE 6102	Application of Probability Methods in Civil Engineering	
CE 6210	Introduction to Finite Element Analysis	
CE 6701	Analytical Mechanics	
CE 8330	Advanced Finite Element Analysis	
CE 8380	Advanced Biomechanics	

Transportation Safety Track

Code	Title	Credits
Required		
Three of the following:		
CE 6350	Intro to Biomechanics	
CE 6702	Vehicle Dynamics	
CE 6703	Vehicle Standards and Crash Test Analysis	
CE 6704	Crash Investigation and Analysis	
CE 6705	Nonlinear Finite Element Modeling and Simulation	
CE 6707	Systems Dynamics Modeling and Control	
CE 6721	Traffic Engineering and Highway Safety	
CE 6722	Intelligent Transportation Systems	
Electives		
Two of the following:		
CE 6101	Numerical Methods in Engineering	
CE 6102	Application of Probability Methods in Civil Engineering	
CE 6210	Introduction to Finite Element Analysis	
CE 6701	Analytical Mechanics	
CE 8330	Advanced Finite Element Analysis	
CE 8380	Advanced Biomechanics	

COMPUTER SCIENCE

Mission Statement

The mission of the Department of Computer Science is to serve the global community by providing high-quality computer science education, research, and professional services and to advance computer technology in selective areas while upholding standards of excellence.

Educational Objectives

The undergraduate program of study is designed to prepare graduates to earn an advanced degree in computer science or related disciplines; for a professional degree such as law, business, or medicine; or for employment in the computer or IT industry, where they will apply the skills and knowledge learned in the program. Graduates will conduct themselves professionally and ethically, work effectively in teams, and communicate effectively with both technical and non-technical audiences.

Educational Outcomes

A graduate in computer science will have the ability to do the following:

- Apply knowledge of computing and mathematics appropriate to the discipline;

- Analyze a problem and identify and define the computing requirements appropriate to its solution;
- Design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs;
- Function effectively on teams to accomplish a common goal;
- Understand professional, ethical, legal, security, and social issues and responsibilities;
- Communicate effectively with a range of audiences;
- Analyze the local and global impact of computing on individuals, organizations, and society;
- Recognize the need to engage in continuing professional development;
- Use current techniques, skills, and tools necessary for computing practice;
- Apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the trade-offs involved in design choices; and
- Apply design and development principles in the construction of software systems of varying complexity.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in computer science (p. 638)
- Bachelor of Science with a major in computer science (p. 640)

Minor

- Minor in computer science (p. 642)

GRADUATE

Master's programs

- Master of Science in the field of computer science (p. 643)
- Master of Science in the field of cybersecurity in computer science (p. 643)

Doctoral program

- Doctor of Philosophy in the field of computer science (p. 644)

CERTIFICATES

- Graduate certificate in computer security and information assurance (p. 644)

FACULTY

Professors X. Cheng, H.A. Choi, J.K. Hahn, R.S. Heller, B. Narahari, R. Simha, P. Vora, and A. Youssef

Associate Professors M. Diab, G. Parmer, N. Zhang

Assistant Professors E. Drumwright, C. Monteleoni, T. Wood

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses; computer science courses in this numerical range may only be taken for graduate credit with permission of the course instructor, permission of the student's academic advisor, and by completing additional work in the course
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Note: With the exception of CSCI 1010, CSCI courses numbered CSCI 1041 and below normally may not be counted toward degree requirements for computer science majors, unless approved by a departmental advisor.

CSCI 1010. Computer Science Orientation. 1 Credit.
Introduction to the field of computer science. Basic and emerging concepts and applications of computer science. Hands-on experiments and team projects. Technical resources, professional ethics, writing, and presentation.

CSCI 1011. Introduction to Programming with Java. 3 Credits.
An introductory course in programming a computer, using the Java language. Object-oriented programming, classes, applets, methods, control structures, inheritance, overriding, GUI widgets, containers, and exceptions.

CSCI 1020. Applications Software. 3 Credits.
Introduction to the use of microcomputer hardware and software for word processing (e.g., Word), spreadsheets (e.g., Excel), and database management (e.g., Access), with emphasis on the use of computers to solve typical problems in academia and business.

CSCI 1021. Introduction to Computers and the Internet. 3 Credits.
Survey of computers and languages. Introduction to computer programming. History of computing and networking. The effects of computing and the Internet on our lives. E-commerce and new technologies. Concepts of web page design. (Fall and spring).

CSCI 1022. Introduction to Internet Technology. 3 Credits.
An introductory course for non-technical students who wish to obtain a better understanding of the hardware and software that comprise the Internet. Information transfer over fiber, routing and switching of packets, methods of information transfer, protocols, software, ISP, web pages and multimedia.

CSCI 1023. Introduction to Web Software Development. 3 Credits.
Introduction to the Internet. Topics include address and URL to find your way, linking to a URL, HTML and web programming, building a web page, building a home page, client-server techniques. (Fall and spring).

CSCI 1030. Technology and Society. 3 Credits.
Historical, social, and ethical issues of the technological age. Ethical principles and skills and social analysis skills needed to evaluate the design and implementation of complex computer systems. Privacy, computer crime, equity, intellectual property, professional ethics. Data collection, analysis, and presentation; technical writing and oral communication skills.

CSCI 1030W. Technology and Society. 3 Credits.
Historical, social, and ethical issues of the technological age. Ethical principles and skills and social analysis skills needed to evaluate the design and implementation of complex computer systems. Privacy, computer crime, equity, intellectual property, professional ethics. Data collection, analysis, and presentation; technical writing and oral communication skills.

CSCI 1041. Introduction to FORTRAN Programming. 3 Credits.
Structured programming with high-level language using FORTRAN. Control structures. Different data types with emphasis on real and complex number computations. Arrays used with vector and matrix manipulation to solve simultaneous equations. External subroutines for mathematical and graphical applications. Prerequisite or corequisite: Math 1220 or MATH 1231.

CSCI 1111. Introduction to Software Development. 3 Credits.
Introduction to the solution of problems on a digital computer using the Java language. Object-oriented programming concepts; documentation techniques; design of test data. Writing, debugging, and running programs in an interactive computing environment.

CSCI 1112. Algorithms and Data Structures. 3 Credits.
Object-oriented software. Inheritance, exceptions, development of classes, event-driven programming. Data structures such as trees, lists, stacks, queues, and strings. Sorting and searching. Introduction to algorithm performance prediction. May be taken for graduate credit by students in fields other than computer science. Prerequisites: CSCI 1111 with a grade of C or higher; and MATH 1220 or MATH 1231. (Spring).

CSCI 1121. Introduction to C Programming. 3 Credits.
Structured programming with the C language. Control structures. Data types. Use of pointers. Matrix manipulation to solve simultaneous equations. External subroutines for mathematical and graphical applications. Introduction to C> Complex number representation. Corequisite: MATH 1220 or MATH 1231.

CSCI 1131. Introduction to Programming with C. 3 Credits.
Intensive introductory course for students with a science, mathematics, or other quantitative background. Solution of numerical and nonnumerical problems on a digital computer using C programming language in a Unix environment. Recommended for graduate and advanced undergraduate students in other departments. Prerequisite: MATH 1232 .

CSCI 1132. Data Structures and Software Design. 3 Credits.
Data structures such as trees, lists, stacks, queues, and strings. Big-O notation and introduction to algorithm performance analysis. Solutions of numerical and non-numerical problems. Use of I/O libraries. Application development and software testing. Prerequisite: CSCI 1121.

CSCI 1311. Discrete Structures I. 3 Credits.
Mathematics for computer science. Sets, functions, sequences. Propositional and predicate calculus, formal proofs, mathematical induction. Matrices, semigroups, groups, isomorphism. Relations, partitions, equivalence relations, trees, graphs. May be taken for graduate credit by students in fields other than computer science. Prerequisites: MATH 1220 or MATH 1231. (Fall).

CSCI 2113. Software Engineering. 3 Credits.
Programming techniques and software development in one or more programming languages. Application development with GUIs, database access, threads, Web programming. Prerequisites: CSCI 1112 with a grade of C or higher; MATH 1231. (Fall).

CSCI 2312. Discrete Structures II. 3 Credits.
Basic discrete techniques in computer science. Proofs, algebraic structures, number theory, graph theory, (coloring and planar graphs, communication networks), advanced recurrences, advanced sums, approximations and asymptotics. Prerequisites: CSCI 1311 with a grade of C or higher; MATH 1231. (Fall).

CSCI 2441. Database Systems and Team Projects. 3 Credits.
Design of relational database systems, relational query languages, normal forms, design of database applications. Team software development, integration, and testing. Professional code of ethics, intellectual property, privacy, software copyrights. Corequisite: CSCI 2113.

CSCI 2441W. Database Systems and Team Projects. 3 Credits.
Design of relational database systems, relational query languages, normal forms, and design of database applications. Team software development, integration, and testing. Professional code of ethics, intellectual property, privacy, and software copyrights. Corequisite: CSCI 2113. (Spring).

CSCI 2461. Computer Architecture I. 3 Credits.
Number representation, computer arithmetic, digital logic and circuit design. Computer organization, micro-architecture and processor datapath, assembly and machine language programming. Introduction to memory organization and the hardware–software interface. Implementation of high-level language constructs. Prerequisites: CSCI 1112, CSCI 1311. (Fall, Every Year).

CSCI 3212. Algorithms. 4 Credits.
Core concepts in design and analysis of algorithms, data structures, and problem-solving techniques. Hashing, heaps, trees. Graph algorithms, searching, sorting, graph algorithms, dynamic programming, greedy algorithms, divide and conquer, backtracking. Combinatorial optimization techniques. NP-completeness. Prerequisite: CSCI 1311, CSCI 2113.

CSCI 3221. Programming Languages. 3 Credits.
Programming language and software design fundamentals. Writing programs in a non-procedural programming language. Closures; procedure and data abstraction; object-oriented, procedural, and declarative programming; continuation compilation and interpretation, and syntactic extension. Advanced control structures appropriate for parallel programming. Prerequisite: CSCI 2113.

CSCI 3240. Pre-Senior Design with Research. 3 Credits.
For students who wish to combine a research project with their Senior Design project. The goal is to complete the research, under a faculty mentor, within three semesters. Prerequisite: CSCI 3212, CSCI 3313, CSCI 3411, and permission of instructor.

CSCI 3313. Foundations of Computing. 4 Credits.
Theoretical foundations. Formal languages and automata; regular expressions, context-free languages; finite state automata and pushdown automata; Turing machines and computability, recursive function theory, undecidability. Compiler construction. Lexical and syntax analysis; parsing and parsing techniques; lexical and parsing tools. Prerequisite: CSCI 2461, CSCI 2113.

CSCI 3362. Probability for Computer Science. 3 Credits.
Introduction to probability and statistics for computer scientists. Random variables. Conditional probability, independence, correlation. Applications to computer science, including information theory, data compression, coding, inference, Markov chains, introduction to randomized algorithms. Prerequisite: Math 1232, CSCI 1311; or permission of instructor.

CSCI 3410. Systems Programming. 3 Credits.
Concepts underlying all computer systems. Processor operation, hierarchical memory systems, embedded boards, data acquisition, actuation, and systems software such as compilers, linkers, and operating systems from the programmer's perspective. Use of embedded platforms to examine how programs interact with and are constrained by hardware. Prerequisite: CSCI 2461, CSCI 2113.

CSCI 3411. Operating Systems. 4 Credits.
Process management, process state, concurrent processing, synchronization, events. Operating system structure, the kernel approach, processor scheduling, task switching, monitors, threads. System management, memory management, process loading, communication with peripherals. File systems. Socket programming, packets, Internet protocols. Prerequisite: CSCI 2461, CSCI 2113.

CSCI 3462. Computer Architecture II. 3 Credits.
Computer organization; design of computer components and of a simple computer. Instruction set and assembly language of a pipelined RISC processor; introduction to high-performance processors; design of cache, main memory, and virtual memory systems; program performance models and system performance; I/O structure and peripherals. Prerequisites: CSCI 2113, CSCI 2461. (Same as ECE 3515) (Spring, Every Year).

CSCI 3571. Introduction to Bioinformatics. 3 Credits.
An introduction to the use of computational techniques in molecular biology, genetics, and evolution. Techniques and software for database searching, sequence alignment, gene finding, phylogenetics, genomics, and proteomics. May be taken for graduate credit. Prerequisites: BISC 1111 and BISC 1112 or permission of the instructor. (Same as BISC 2584) (Spring, Every Year).

CSCI 3907. Special Topics. 1-3 Credits.
Topic to be announced in the Schedule of Classes. (Fall and spring).

CSCI 3908. Research. 1-3 Credits.
Applied research and experimentation projects, as arranged. Prerequisite: junior or senior status.

CSCI 4222. Theory of Computer Translators. 3 Credits.
Lexical and syntax analysis, regular expressions, context-free grammars, parsing techniques, top-down parsing, efficient parsing, syntax-directed translation, intermediate formats, flow of control, block structures, procedure calls, symbol tables, run-time storage, error-detection and recovery, code optimization, code generation. Prerequisite: CSCI 3462, CSCI 3313.

CSCI 4223. Principles of Programming Languages. 3 Credits.
Fundamental concepts underlying design of programming languages. Detailed study of functional and object-oriented computational models. Types, evaluation, abstraction, control flow, modules, mutation, laziness, polymorphism, subtyping, inheritance. Practice learning new languages. Prerequisites: CSCI 1311, CSCI 2113. (Same as CSCI 6223) (Spring, Odd Years).

CSCI 4235. Development of Open-Source Software. 3 Credits.
Design, process, tools, and culture of open-source software development. Cross-platform development and testing. Geographic dispersal, social and team dynamics, licenses (GPL, BSD, other); code reuse (modular code, shared libraries); very-large-scale distributed development techniques (CVS, Bugzilla, release-management, mailing-lists). May be taken for graduate credit. Prerequisite: CSCI 2113 or CSCI 6221.

CSCI 4237. Software Design for Handheld Devices. 3 Credits.
Design of interactive software for handheld devices. Event driven programming, user interface design practices, memory management, handheld debugging techniques. May be taken for graduate credit. Prerequisite: CSCI 2113 or CSCI 6221.

CSCI 4243. Capstone Design Project I. 3 Credits.
Planning, design, and construction of the capstone project. Economic analysis of the project. Application of software engineering principles, including software requirements, specification, requirements engineering, reuse, documentation, verification/validation, testing, configuration management. Report writing and presentations. Prerequisite: senior status.

CSCI 4243W. Capstone Design Project I. 4 Credits.
Planning, design, and construction of the capstone project. Economic analysis of the project. Application of software engineering principles, including software requirements, specification, requirements engineering, reuse, documentation, verification/validation, testing, configuration management. Report writing and presentations. Prerequisite: senior status.

CSCI 4244. Capstone Design Project II. 4 Credits.
Continuation of CSCI 4243. Planning, design, and construction of the capstone project. Economic analysis of the project. Application of software engineering principles, including software requirements, specification, requirements engineering, reuse, documentation, verification/validation, testing, configuration management. Report writing and presentations. Prerequisite: senior status.

CSCI 4314. Discrete Analysis-Computer Sci. 3 Credits.
Combinatorial theory: permutations and combinations, generating functions, recurrence relations, the principle of inclusion and exclusion. Block designs. Applications to the analysis of algorithms, computer organization, VLSI placement, coding theory, simulation, and other problems. May be taken for graduate credit. Prerequisite: CSCI 1311 or permission of the instructor. (Fall, Every Year).

CSCI 4331. Cryptography. 3 Credits.
Algorithmic principles of cryptography from Julius Caesar to public key cryptography. Key management problems and solutions. Cryptographic systems and applications. Prerequisite: CSCI 2312, CSCI 3313, CSCI 3212.

CSCI 4341. Continuous Algorithms. 3 Credits.
Overview of structures in continuous mathematics from a computational viewpoint. Main topics include continuous system simulation, computational modeling, probability, statistical techniques, next-event simulation, algorithms for continuous optimization, machine learning, neural networks, statistical language processing, robot control algorithms. Prerequisite: CSCI 1311, CSCI 2113.

CSCI 4342. Computational Linear Algebra and Applications. 3 Credits.
Application of linear algebra to computer science and engineering, with a computational perspective. Topics include points, vectors, matrices, and their programming representations; algorithms for 3D transformations, pose and viewpoint estimation; linear equations, independence, rank; algorithms for matrix decompositions, reduction of dimension; computation with large matrices, under and over-determined systems; applications to large data, computer vision, text processing. Prerequisite: CSCI 2113.

CSCI 4361. Simulation Methods. 3 Credits.
Computational methods for continuous and discrete system simulation; effects of computer software and hardware architectures on computational precision and accuracy requirements. Random-number generation and testing; calibration and scaling technique; verification and validation technique. May be taken for graduate credit. Prerequisite: CSCI 2113 or permission of the instructor. (Spring, Every Year).

CSCI 4364. Machine Learning. 3 Credits.
Overview of core machine learning techniques: nearest-neighbor, regression, classification, perceptron, kernel methods, support vector machine (SVM), logistic regression, ensemble methods, hidden Markov models (HMM), non-parametrics, online learning, active learning, clustering, feature selection, parameter tuning, and cross-validation. Prerequisites: CSCI 3212, CSCI 3362 and MATH 2184; or permission of the instructor. (Same as CSCI 6364) (Fall, Every Year).

CSCI 4415. Real-Time and Embedded Systems. 3 Credits.
Development of software for real-time control of physical systems. Reliability and fault tolerance, exceptions and exception handling, reliability and concurrent processes, timeouts, deadline scheduling, shared-memory and message-based device drivers. May be taken for graduate credit. Prerequisite: CSCI 2113.

CSCI 4417. UNIX System Programming. 3 Credits.
Exposure to UNIX internals. Use of UNIX system calls and utilities in conjunction with script and C programs. RFCs, GNU project, and other collaborative traditions in the UNIX community. May be taken for graduate credit. Prerequisite: Senior status or 1 year of C programming and UNIX user experience.

CSCI 4418. UNIX System Administration. 3 Credits.
System administration for the stand-alone system or small networks. Installation of two or more UNIX variants (Linux, FreeBSD, Solaris) on Intel or Sparc platforms. Configuration of mail, name services, and other network utilities. Backup and recovery, security and ethics. May be taken for graduate credit. Prerequisite: CSCI 4417.

CSCI 4431. Computer Networks I. 3 Credits.
Higher-layer protocols and network applications on the Internet, such as session layer, presentation layer, data encryption, directory services and reliable transfer services, telnet, network management, network measurements, e-mail systems, and error reporting. Prerequisite: CSCI 2461, CSCI 2113.

CSCI 4431W. Computer Networks I. 3 Credits.
Higher-layer protocols and network applications on the Internet, such as session layer, presentation layer, data encryption, directory services and reliable transfer services, telnet, network management, network measurements, e-mail systems, and error reporting. Prerequisite: CSCI 2461, CSCI 2113.

CSCI 4432. Computer Networks II. 3 Credits.
Computer networks and open system standards. Network configurations and signals, encoding and modulation, transmission media, connection interfaces, error detection and correction, signal compression, switching, link layer control, ISDN, X.25, frame relay, ATM, and Sonet. Bridges, routers, and routing algorithms. Prerequisite: CSCI 4431.

CSCI 4455. Computer Game Design and Programming. 3 Credits.
Principles, techniques, and design of computer games. Graphic game engines, modeling, motion, AI and interaction; sound design and synthesis; real-time software and hardware issues. May be taken for graduate credit. (Fall).

CSCI 4511. Artificial Intelligence Algorithms. 3 Credits.
Knowledge representation and reasoning, propositional logic and predicate calculus. Logic programming. Search, game trees, backtracking. Planning. May be taken for graduate credit. Restricted to graduate students. Prerequisites: CSCI 3221 and CSCI 3212.

CSCI 4521. Introduction to Mobile Robotics. 3 Credits.
Overview of autonomous mobile robotics. Sensing, localization, calibration, mapping, perception, decision making, planning, and control. Emphasis on algorithmic rather than hardware aspects of robotics. Development of algorithms that can operate autonomous mobile platforms in complex, real-world environments. Prerequisite: MATH 1232, MATH 2184; CSCI 3362 or CSCI 4341.

CSCI 4525. Autonomous Robotics: Manipulation. 3 Credits.
Introduction to robot manipulation. Core principles necessary to program robots for autonomous operation in dynamic and typically human-centric environments. Transdisciplinary concepts from computer science (reinforcement learning, perception), mechanical engineering (kinematics, dynamics), and electrical engineering (control theory). Prerequisite: permission of instructor.

CSCI 4527. Introduction to Computer Vision. 3 Credits.
Introduction and overview of computer vision. Image-formation signal processing and filtering. Saliency, image features and feature extraction, tracking, stereo disparity estimation, structure form motion, photogrammetry, optic flow, homography estimation and warping, scene segmentation, place recognition, object recognition, robust estimation, and camera calibration. Prerequisites: MATH 1232, MATH 2184 and CSCI 3362 or CSCI 4341. (Same as CSCI 6527) (Spring, Every Year).

CSCI 4531. Computer Security. 3 Credits.
Risk analysis, cryptography, operating system security, identification and authentication systems, database security. Prerequisite: CSCI 3411; corequisite: CSCI 4431.

CSCI 4532. Information Policy. 3 Credits.
Roles, issues, and impacts of computer-based information systems in national and international arenas, focusing on privacy, equity, freedom of speech, intellectual property, and access to personal and governmental information. Professional responsibilities, ethics, and common and best practices in information use.

CSCI 4541. Network Security. 3 Credits.
Security protocols and applications in local, global, and wireless networks; IPSec and packet-level communication security systems; network authentication and key-exchange protocols; intrusion detection systems and firewalls; secure network applications; network worms and denial-of-service attacks. Prerequisite: CSCI 4531.

CSCI 4551. Concepts and Applications of Computer Graphics. 3 Credits.
Introduction to computer graphics without programming; building 3-D geometry and rendering; computer animation; virtual reality and computer games; hands-on projects in modeling, rendering, and animation using commercial software; hands-on projects in photo and video manipulation.

CSCI 4552. Design of Computer Animation I. 3 Credits.
Use of commercial 3-D computer animation packages to create digital artistic works. Principles of animation, including timing, exaggeration of motion, and anticipation; use of a storyboard; modeling; motion; rendering and editing. Prerequisite: CSCI 4551.

CSCI 4553. Design of Computer Animation II. 3 Credits.
Use of commercial 3-D animation packages to create artistic works and visualizations. Process-spanning concepts of development through pre-production, production, and post-production. Emphasis on developing original content and attaining high production values. Prerequisite: CSCI 4552.

CSCI 4554. Computer Graphics 1. 3 Credits.
Hardware; concepts of graphics subroutine packages; programming concepts for interaction, display, and data structuring; basic clipping and scan-conversion algorithms; homogeneous coordinates; three-dimensional viewing transforms; basic rendering. May be taken for graduate credit. Prerequisite: CSCI 2113 or CSCI 6221.

CSCI 4561. Design of User–Interface Programs. 3 Credits.
Structure of interactive programs. Widgets, windows, and input devices. Client–server model, event-driven programming, and callbacks. Window systems (e.g., Xwindows) and dialog control. May be taken for graduate credit. Prerequisite: CSCI 2113 or CSCI 6221.

CSCI 4572. Computational Biology. 3 Credits.
Pairwise alignment and scoring. Multiple sequence alignment. Fragment assembly, physical mapping of DNA. Phylogenetic trees. Molecular structure prediction and protein folding. Microarrays and microarray data, image comparison. Clustering. Overview of biological databases, PDB, MMDB, GenBank. Draft genomes and genome browsers. Pathway databases. May be taken for graduate credit. Prerequisite: CSCI 3571 and CSCI 3212 or CSCI 6212.

CSCI 4576. Introduction to Biomedical Computing. 3 Credits.
A survey of the problems and solutions in biomedical computing. Application of computers in medicine. Patient care and monitoring systems, electronic medical records, digital imaging and analysis. Telemedicine, medical ethics, health care regulations and organizations.

CSCI 4577. Biomedical Computing. 3 Credits.
Computing issues in epidemiology and biosurveillance, decision support, medical imaging and visualization, image-guided surgery; medical databases, issues in system integration, mobile medical computing. May be taken for graduate credit. Prerequisite: CSCI 2113, CSCI 4576; corequisite: CSCI 2441.

CSCI 6010. Introduction to Computer Science Fundamentals. 3 Credits.
Review of programming in a high-level language using Java or C++ Introduction to objects and object-oriented programming: static and dynamic objects, inheritance, dynamic method invocation. Data structures: 2D-arrays, linked-lists, stacks, queues, trees, hashing. Discrete structures: sets, graphs, permutations and combinations. Prerequisite: one year of course work in programming in C, C++ or Java.

CSCI 6011. Introduction to Computer Systems. 3 Credits.
Introduction to basic concepts underlying all computer systems. Processor operation, hierarchical memory systems, elementary logic circuits, and systems software such as compilers, linkers, and operating systems from the programmer's perspective. Prerequisite: one year of course work in programming in C, C< or Java.

CSCI 6012. Cybersecurity and Privacy. 3 Credits.
Overview of cybersecurity and privacy, including cryptography, authentication, malware, viruses, network security, anonymity, privacy and online privacy, risk management; common cyberattacks and techniques for detection and defense; policy and legal perspectives for managing cybersecurity missions supporting private sector and government; cyber technologies as applied to the stability of global information and communications infrastructure; government cybersecurity policies. (Fall, spring, and summer).

CSCI 6013. Security in Mobile Computing. 3 Credits.
Relationship between security strategic plan and business strategic plan; mobile device solutions (MDS) to access enterprise corporate data; bring your own device (BYOD) paradigm; mobile device management (MDM) best practices, policies, network controls to identify countermeasures, and risk mitigation strategies against common threats. Overview of mobile security solutions for classified processing and communications. Prerequisites: CSCI 6012. (Fall, spring, and summer).

CSCI 6212. Design and Analysis of Algorithms. 3 Credits.
Design and analysis of algorithms. Turing machines; NP-Complete theory. Algorithmic techniques: divide-and-conquer, greedy, dynamic programming, graph traversal, backtracking, and branch-and-bound. Applications include sorting and searching, graph algorithms, and optimization. Restricted to graduate students. Prerequisites: CSCI 1112 and CSCI 1311.

CSCI 6221. Advanced Software Paradigms. 3 Credits.
Object-oriented, procedural, functional, and concurrent software design paradigms; design patterns; software life-cycle concepts. Tradeoffs between compiled and interpreted languages. Examples from Java, C, C++ and Perl. Prerequisites: CSCI 1112 and CSCI 1311 or graduate status.

CSCI 6223. Principles of Programming Languages. 3 Credits.
Fundamental concepts underlying design of programming languages. Detailed study of functional and object-oriented computational models. Types, evaluation, abstraction, control flow, modules, mutation, laziness, polymorphism, subtyping, inheritance. Practice learning new languages. Prerequisite: CSCI 1311, CSCI 2113.

CSCI 6231. Software Engineering. 3 Credits.
The life-cycle model. Requirements and specifications. Design models, structured and object-oriented design. Program development, PDL's tools, configuration control. Program, unit, and integration testing. Program verification. Other development models. Development metrics. Computer-aided software engineering (CASE). Prerequisite: CSCI 6221, CSCI 6212.

CSCI 6232. Software Engineering Development. 3 Credits.
Formal methods in software engineering. First-order logic, basic specification elements, rigorous proofs, formal development process, concurrency. Prerequisite: CSCI 6461, CSCI 6212.

CSCI 6233. Software Testing & Quality. 3 Credits.
Flow graphs and path testing, transaction flow testing, data flow testing, software metrics, system testing, test planning and documentation, reliability, statistical testing. Prerequisite: CSCI 6231.

CSCI 6234. Object-Oriented Design. 3 Credits.
Object-oriented systems, software reusability, software modularity, top–down and bottom–up approaches, object classification, genericity, metaprogramming, concurrent object-oriented programming languages. Prerequisite: CSCI 6221.

CSCI 6235. Component-Based Enterprise Software Development. 3 Credits.
Component-based software development for enterprise applications. Component models, multi-tier architecture. Specific case studies may include topics such as Enterprise Java Beans, DCOM, and COBRA. Prerequisite: CSCI 6221.

CSCI 6311. Theory of Computation. 3 Credits.
Theoretical foundations of computer science. Formal languages and automata; regular expressions, context-free languages, parsing; Turing machines and complexity; partial recursive functions; undecidability; program correctness; fixed-point theory; formal specifications of software. Prerequisite: CSCI 6212.

CSCI 6312. Graph Theory & Applications. 3 Credits.
Undirected and directed graphs. Connectivity, partitions, cycles and matchings. Edge and vertex coloring, chromatic polynomials, and the four-coloring problem. Planar graphs and Kuratowski's theorem. Properties of random graphs. Applications to a variety of problems. Prerequisite: CSCI 6212.

CSCI 6318. Complex Systems. 3 Credits.
The edge-of-chaos phenomenon, phase transitions, power laws, small-world networks, Boolean networks, cellular automata, and complex dynamics. Applications to networks and biological systems. Prerequisite: CSCI 6212.

CSCI 6331. Cryptography. 3 Credits.
Review of mathematical theory for cryptography. Classical ciphers. Modern block and stream ciphers. Symmetric and asymmetric systems. Digital signatures. Public key infrastructure. Authentication. Prerequisite: CSCI 6212.

CSCI 6341. Continuous Algorithms. 3 Credits.
Overview of structures in continuous mathematics from a computational viewpoint. Main topics include continuous system simulation, computational modeling, probability, statistical techniques, next-event simulation, algorithms for continuous optimization, machine learning, neural networks, statistical language processing, robot control algorithms. Prerequisite: CSCI 1311, CSCI 2113.

CSCI 6342. Computational Linear Algebra and Applications. 3 Credits.
Linear algebra applied to computational problems in computer science and engineering. Topics include points, vectors, matrices, and their programming abstractions; 3D transformations, pose and viewpoint estimation; linear equations; algorithms for matrix decompositions, dimension reduction, computation with large matrices, under- and over-determined systems; applications to big data, computer vision, text processing. Prerequisite: CSCI 2113.

CSCI 6351. Data Compression. 3 Credits.
Background on signals, information theory, transforms, human vision, and metrics. Lossless and lossy compression techniques. Video compression. Compression standards. Progressive transmission. Prerequisite: CSCI 6212.

CSCI 6362. Probability for Computer Science. 3 Credits.
Concepts of probability and statistics used in computer science. Random variables. Conditional probability, independence, correlation. Law of large numbers, central limit theorem. Applications to computer science, including entropy, information theory, data compression, coding, inference, Markov chains, randomized algorithms. Prerequisites: MATH 1232, CSCI 1311; or permission of instructor.

CSCI 6364. Machine Learning. 3 Credits.
Machine learning algorithms: nearest-neighbor, regression, classification, perceptron, kernel methods, support vector machine (SVM), logistic regression, ensemble methods, boosting, graphical models, hidden Markov models (HMM), non-parametrics, online learning, active learning, clustering, feature selection, parameter tuning, and cross-validation. Prerequisite: CSCI 6212; CSCI 6362, MATH 2184; or permission of instructor.

CSCI 6365. Advanced Machine Learning. 3 Credits.
Theory and algorithms for machine learning research. In-depth focus on advanced machine learning topics such as clustering, learning from data streams, and Climate Informatics. Prerequisite: CSCI 4364, CSCI 6212, CSCI 6362, MATH 2184; or permission of instructor.

CSCI 6411. Advanced Operating Systems. 3 Credits.
Fundamentals of operating system design and structure, resource management, and system support for multi-core. Topics include scheduling, synchronization, system structure, virtual address spaces, memory management, I/O management, and systems abstractions for modern multi-core architectures. The course involves an implementation component and requires substantial programming experience. This course can be taken for credit by undergraduates who have taken CSCI 3411. Prerequisite: CSCI 6461 or CSCI 2461.

CSCI 6412. OS Design & Implementation. 3 Credits.
Builds on CSCI 6411 to provide students with the knowledge to build parts of modern operating systems, which will be studied and motivated from the viewpoint of practical design and implementation. Students will learn how operating system's components for resource management and abstraction are built from the ground up and integrated into working systems considering the challenges of reliability, multi-core, and security. The course has a significant implementation component; substantial low-level programming experience is required. Prerequisite: CSCI 6411.

CSCI 6421. Distributed and Cluster Computing. 3 Credits.
In-depth study of the algorithmic and implementation challenges in building large scale distributed applications. Topics include distributed coordination, scheduling, consistency issues, and fault tolerance algorithms. The course will cover how fundamental distributed systems concepts are applied to both high performance computing and cloud computing environments. The course will mix algorithmic concepts and practical implementation concerns; substantial programming experience is recommended. Prerequisite: CSCI 6212, CSCI 3411.

CSCI 6431. Computer Networks. 3 Credits.
Fundamental concepts in the design and implementation of computer communication networks and internet, their protocols, and applications. Layered network architectures, applications, network programming interfaces, transport, routing, data link protocols, local area networks, network management, and network security. Prerequisite: CSCI 6461.

CSCI 6433. Internet Protocols. 3 Credits.
Understanding of the layered protocols for the Internet. Interconnection of networks. The IP protocol and routing algorithms, switches, bridges, and routers. The transmission control protocol (TCP). Addressing and names. Application-specific protocols, FTP, TELNET, SMTP, SNMP, HTTP. Domain name services. Prerequisite: CSCI 6221, CSCI 6431.

CSCI 6434. Design of Internet Protocols. 3 Credits.
Protocol specifications and formal description methods. Finite-state descriptions of Internet protocols. Specification and Description Language. Implementation of protocol specifications. Prerequisite: CSCI 6212, CSCI 6433.

CSCI 6441. Database Management Systems. 3 Credits.
Design and architecture of relational database management systems; query languages, data models, index structures, database application design. Prerequisite: CSCI 6221, CSCI 6461.

CSCI 6442. Database Systems II. 3 Credits.
Concepts in database systems. Relational database design. Editing, report generation, updating, schema refinement, tuning. Construction of database management systems. Conceptual and logical design of a database. Prerequisite: CSCI 6441.

CSCI 6443. Data Mining. 3 Credits.
Fundamental concepts of data mining. Algorithm techniques for data mining, including classification, clustering, association rules mining. Prerequisite: CSCI 6441 or permission of instructor.

CSCI 6444. Introduction to Big Data and Analytics. 3 Credits.
Big data, its properties, technology, and the types and classes of analytics that can be applied to it; associated storage and programming systems. Students gain practical experience through focused projects to apply different analytics to a data set. Prerequisite: CSCI 2113 or CSCI 6221. (Fall, spring, and summer).

CSCI 6451. Information Retrieval Systems. 3 Credits.
Information organization and retrieval of natural language data by digital computer systems; statistical, syntactic, and logical analysis of natural language; dictionary and thesaurus systems; searching strategies and cataloging. Large-scale file structures. Prerequisite: CSCI 6221, CSCI 6461.

CSCI 6461. Computer System Architecture. 3 Credits.
Concepts in processor, system, and network architectures; architecture of pipeline, superscalar, and VLIW/EPIC processors; multiprocessors and interconnection networks. Cache coherence and memory subsystem design for multiprocessor architectures. Parallel and distributed system architecture; internetworking. Prerequisite: CSCI 1311, CSCI 1112, CSCI 2461.

CSCI 6511. Artificial Intelligence. 3 Credits.
Representation and space search. Heuristic search. Predicate calculus. Knowledge representation and knowledge engineering for expert systems. Rule-based, hybrid, and O-O systems. Semantic nets, frames, and natural language. Theorem provers. Overview of planning, learning, neural nets. Use of AI languages. Prerequisite: CSCI 4511, CSCI 6212.

CSCI 6515. Natural Language Understanding. 3 Credits.
The state of the art of natural language parsing and semantic understanding by computer systems. Review of formal, context-free, and transformational grammars and parsing. Augmented transition networks: problems of complexity, semantics, and context. Deterministic parsing and semantic parsing. Prerequisite: CSCI 6511.

CSCI 6521. Introduction to Mobile Robotics. 3 Credits.
Concepts of autonomous mobile robotics with emphasis on algorithmic aspects. Sensing, sensor fusion, localization, calibration, mapping, perception, decision making, planning, behavior-based control, world modeling, and navigation. Development of algorithms that can operate autonomous mobile platforms in complex, real-world environments. Prerequisite: MATH 1232, MATH 2184; CSCI 6362 or CSCI 4341.

CSCI 6525. Autonomous Robotics: Manipulation. 3 Credits.
Manipulation and autonomous operation in dynamic, human-centric environments. Reinforcement learning, perception, optimization algorithms, kinematics, dynamics, control theory. Prerequisite: CSCI 6362, MATH 2184; or permission of instructor.

CSCI 6527. Introduction to Computer Vision. 3 Credits.
Image signal processing and filtering. Saliency, features and feature extraction, tracking, stereo disparity estimation, structure form motion, photogrammetry, optic flow, homography estimation and warping, scene segmentation, place recognition, object recognition, robust estimation, and camera calibration. Current research topics. Prerequisite: MATH 1232, MATH 2184; CSCI 6362 or CSCI 6341.

CSCI 6531. Computer Security. 3 Credits.
Functional description of cryptographic primitives. Risk analysis. Policy models: security, confidentiality, integrity, hybrid. Design principles: access control, information flow, confinement. Assurance: formal methods, evaluation. Malicious logic: security effects of programming languages. Prerequisite: CSCI 6461.

CSCI 6532. Information Policy. 3 Credits.
Roles, issues, and impacts of computer-based information systems in national and international arenas, focusing on privacy, equity, freedom of speech, intellectual property, and access to personal and governmental information. Professional responsibilities, ethics, and common and best practices in information use.

CSCI 6534. Information Security in Government. 3 Credits.

CSCI 6541. Network Security. 3 Credits.
Security protocols and applications in local, global, and wireless networks; IPSec and packet-level communication security systems; network authentication and key-exchange protocols; intrusion detection systems and firewalls; secure network applications; network worms and denial-of-service attacks. Prerequisite: CSCI 6531.

CSCI 6542. Computer Network Defense. 3 Credits.
Offensive and defensive information warfare operations. Simulation of various attacks on and defenses of computer systems. Laws related to information warfare. History and literature related to information warfare attacks. Prerequisite: CSCI 6541.

CSCI 6545. Software Security. 3 Credits.
Security for software systems. Theory and practice of designing and implementing secure software. Security in the context of software engineering. Practical experience with building a software system and securing it, with emphasis on correctness and robustness. Requires substantial prior programming experience. Prerequisite: CSCI 6461 or CSCI 6411; CSCI 6531 or EMSE 6540 or permission of instructor.

CSCI 6547. Wirless and Mobile Security. 3 Credits.
Mobile Agents, Wireless Web, WAP, WEP, Peer-to-Peer Computing; secure routing; intrusion detection and authentication on wireless networks; security for handheld devices; encryption and cryptographic measures for wireless; real-time wireless security; security measures for embedded devices. Prerequisite: CSCI 6431, CSCI 6531.

CSCI 6548. E-Commerce Security. 3 Credits.
Advanced technical topics in e-commerce security. X.500 registration systems, X.509/PKIX certification systems, secure payment methods, smart cards, authorization models in open distributed environments. Secure web systems, technologies, and applications. Prerequisite: CSCI 6541.

CSCI 6554. Computer Graphics II. 3 Credits.
Curves and surfaces. Spatial sampling and aliasing. Visible surface algorithms. Illumination and shading models, raytracing and radiosity. Image manipulation and texture mapping. Procedural models. Prerequisite: CSCI 4554.

CSCI 6555. Computer Animation. 3 Credits.
Euler angles and quaternions; articulated figure motion; forward and inverse kinematics; kinematic, physics based, and behavioral motion control; rendering problems (temporal aliasing); sound synthesis and synchronization; recording and editing techniques. Prerequisite: CSCI 4554 or permission of instructor.

CSCI 6561. Design of Human–Computer Interface. 3 Credits.
Design of dialogues for interactive systems. Psychological, physiological, linguistic, and perceptual factors. Advantages and disadvantages of various interaction techniques, command language syntaxes, and data presentations. Design methodology and guidelines. Case studies, research readings, and projects. Prerequisite: CSCI 6221.

CSCI 6562. Design of Interactive Multimedia. 3 Credits.
History, theory, and development of multimedia concepts. Hardware components, platforms, and authoring tools. Scientific, technical, and cognitive foundations of various media including text, sound, graphics, and video. Interface design. Use of a media taxonomy as a design and evaluation tool. Completion of a multimedia portfolio required. Prerequisite: CSCI 6221.

CSCI 6572. Computational Biology Algorithms. 3 Credits.
Algorithms and models for DNA and protein sequence alignments, gene finding, identification of gene regulatory regions, sequence evolution and phylogenetics, RNA and protein structure, microarray and/or proteomics data analysis. Prerequisite: CSCI 6212 ; programming experience in C/C or Java.

CSCI 6900. Colloquium. 0 Credits.
Lectures by outstanding authorities in computer science. Topics to be announced each semester. (Fall and spring).

CSCI 6907. Special Topics. 1-3 Credits.
Topics to be announced in the Schedule of Classes. (Fall and spring).

CSCI 6908. Research. 1-12 Credits.
Applied research and experimentation projects, as arranged. May be repeated for credit.

CSCI 6998. Thesis Research. 3 Credits.

CSCI 6999. Thesis Research. 3 Credits.

CSCI 8211. Advanced Topics in Algorithms. 3 Credits.
Graph algorithms, strongly connected components, biconnected components, dominators in acyclic graphs, ordered trees, network flow, planarity testing, bipartite matching, theory of NP completeness, NP-complete problems. Design and analysis of approximation algorithms for NP-complete problems. Prerequisite: CSCI 6212.

CSCI 8231. Advanced Topics in Software Engineering. 3 Credits.
Seminar on current research and developments in software engineering. Students develop a software package with the aid of available software tools such as requirement tool, design tool, code generators, testing tools, measurement tools, cost estimation tools. Prerequisite: CSCI 6232, CSCI 6233.

CSCI 8331. Advanced Cryptography. 3 Credits.
Linear and differential cryptanalysis. Cryptanalysis of AES. Factorization and primality. Computational and information-theoretic secrecy. Theory of secrecy. Zero-knowledge proofs. Secret sharing. Cooperative distributed cryptography. Provable security. Prerequisite: CSCI 6331.

CSCI 8401. Advanced Topics in Systems. 3 Credits.
Seminar on current research and developments in computer operating systems. May be repeated for credit. (Spring, even years).

CSCI 8431. Advanced Topics in Computer Networks and Networked Computing. 3 Credits.
Seminar on current research and developments in computer networks, Internet, networked computing, mobile computing and pervasive computing. May be repeated for credit. Prerequisites: CSCI 6461, CSCI 6212, CSCI 6433.

CSCI 8440. Advanced Topics in Data Management. 3 Credits.
Seminar on current research and developments in computer database systems and information retrieval. May be repeated for credit. Prerequisite: CSCI 6442 or CSCI 6451.

CSCI 8531. Advanced Topics in Security. 3 Credits.
Seminar on current research and developments in information assurance. May be repeated for credit. Prerequisite: CSCI 6531.

CSCI 8554. Advanced Topics in Computer Graphics. 3 Credits.
Seminar on current research and developments in computer graphics. Spatial and temporal anti-aliasing: hidden-surface algorithms: illumination models, radiosity, textural mapping. May be repeated for credit. Prerequisite: CSCI 6554.

CSCI 8900. Advanced Selected Topics. 3 Credits.
Topics announced in the Schedule of Classes.

CSCI 8901. Research and Evaluation Methods. 3 Credits.
Required for all computer science doctoral candidates. The scientific method; research/design requirements and objectives: qualitative, quantitative, and case studies; performance metrics; design procedures and control; sources of error and bias; evaluation tools; formal validation methods; documentation standards. Prerequisite: APSC 3115.

CSCI 8998. Computer Science Research. 1-12 Credits.
Limited to students preparing for the Doctor of Philosophy qualifying examination. May be repeated for credit.

CSCI 8999. Dissertation Research. 1-12 Credits.
Limited to Doctor of Philosophy candidates. May be repeated for credit.

BACHELOR OF ARTS WITH A MAJOR IN COMPUTER SCIENCE

Bachelor of Arts Degree Program

The bachelor of arts with a major in computer science degree program provides a broad-based liberal arts curriculum for students who wish to augment technical knowledge with humanities, social sciences, business, communication, or management skills. Foundation courses focus on mathematics, science, software design and programming, computer systems and architecture, and algorithm design. Additional breadth or depth is afforded by selection of technical track courses that build on the foundations to provide in-depth exposure to a specific field in computer science. The program is designed for those with interests in two or more disciplines; students complete a second major or two minors in another academic department.

The minimum number of credits required for the major in computer science is 120; the credit total depends on the second major or minors chosen by the student. Students interested in pursuing a computer science major with preparation for application to medical school can also choose the medical preparation option. Students select a technical track in which at least three technical track elective courses are selected in consultation with advisor.

Additional information about the Bachelor of Arts with a major in computer science is available on the program website (http://www.cs.seas.gwu.edu/bachelor-arts-program).

Second Major in Computer Science

Students who are not enrolled in the School of Engineering and Applied Science (SEAS), who are enrolled in a bachelor of arts program and wish to declare a second major in computer science, must apply and be admitted to the computer science program.

Criteria for admission
To be considered for admission to the second major in computer science, a student must have:

- A minimum grade of *B* in CSCI 1111 Introduction to Software Development or CSCI 1011 Introduction to Programming with Java or CSCI 1121 Introduction to C Programming; and a minimum grade of *B–* in MATH 1220 Calculus with Precalculus I and MATH 1221 Calculus with Precalculus II or in MATH 1231 Single-Variable Calculus I.
- A minimum overall grade-point average of 3.0 at the time of application to the major.

Application Deadline
The application is due no later than the start of the 5th semester of study at GW or completion of the 60th credit, whichever comes first. Contact the School of Engineering and Applied Science Undergraduate Advising Office (https://www.seas.gwu.edu/academic-advising) for specific application deadlines.

Credits in residence requirement
- For a second major, at least 24 credits in computer science courses must be completed in SEAS.

Graduation grade-point average criteria
- To satisfactorily complete a second major in computer science, a student must have a minimum grade-point average of 2.2 in all the computer science courses. See the department website (http://www.seas.gwu.edu/department-computer-science) for more information on curriculum requirements for the second major in computer science.

REQUIREMENTS

Recommended program of study

Code	Title	Credits
First semester		
CSCI 1010	Computer Science Orientation	
CSCI 1111	Introduction to Software Development	
SEAS 1001	Engineering Orientation	
UW 1020	University Writing *	
Math requirement *		
Social and behavioral sciences elective **		
Second semester		
CSCI 1112	Algorithms and Data Structures	
CSCI 1311	Discrete Structures I	
Math requirement *		
Science requirement *		
Social and behavioral sciences elective **		
Third semester		
CSCI 2113	Software Engineering	
CSCI 2461	Computer Architecture I	
Science requirement *		
Humanities elective †		
One of the following to fulfill the statistics requirement:		
APSC 3115	Engineering Analysis III	
CSCI 3362	Probability for Computer Science	
CSCI 4341	Continuous Algorithms	
STAT 1051	Introduction to Business and Economic Statistics	
STAT 1053	Introduction to Statistics in Social Science	
STAT 1091	Principles-Statistical Methods	
Fourth semester		
CSCI 2441W	Database Systems and Team Projects	
Humanities elective †		
Second major elective		
Science requirement *		
Unrestricted elective		
Fifth semester		
One of the following Computer Science restricted electives:		
CSCI 3212	Algorithms	
CSCI 3313	Foundations of Computing	
CSCI 3411	Operating Systems	
CSCI 4223	Principles of Programming Languages	

Creative arts elective	
Second major electives (9 credits)	
Sixth semester	
Technical track elective	
Humanities elective †	
Foreign languages and culture elective	
Second major electives (6 credits)	
Seventh semester	
One of the following Computer Science restricted electives: (if not taken above)	
Technical track elective	
Foreign languages and culture elective	
Second major electives (6 credits)	
Eighth semester	
Technical track elective	
Humanities elective †	
Unrestricted elective	
Second major electives (6 credits)	

*Course satisfies the university general education requirement in math, science, and writing. UW 1020 must be completed prior to any writing course in the major, including CSCI 2441W.
**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf).
†At least one humanities course must be selected from the University General Education Requirement list; the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list.

BACHELOR OF SCIENCE WITH A MAJOR IN COMPUTER SCIENCE

The program combines software development, computer systems and architecture, algorithms, project design, science, and mathematics to provide a strong foundation in the underpinnings of computer science. Students are prepared to design and implement software needed for Internet operations, computer graphics and animation, secure systems, and applications for small, large, and embedded systems. In consultation with the advisor, students choose a technical track and a non-technical track. The technical track provides depth in a particular area of computer science, while the non-technical track enables students to stay current with the rapidly evolving field and to establish the relevance of their studies in the ever-changing global environment. The B.S. in computer science program is accredited by ABET.

Medical Preparation Option in Computer Science

This option is for students interested in pursuing a computer science major as they prepare to apply to a medical school. The degree program combines additional natural science course work with computer science course requirements.

Visit the program website (http://www.cs.seas.gwu.edu/bachelor-science-program) for additional information.

Bachelor of Science With a Second Major in Computer Science

Students who are not enrolled in the School of Engineering and Applied Sciences (SEAS), who are enrolled in another bachelor of science program, but wish to declare a second major in computer science must apply and be admitted to the second major program in Computer Science. Students in this program must follow the same degree requirements as those receiving a bachelor of science in computer science as their primary major.

Criteria for admission:
To be considered for admission to the second major in computer science, a student must satisfy the following criteria:

- A minimum grade of *B* or above in CSCI 1111 or CSCI 1011 or CSCI 1121; and a *B–* or above in Math 1220 and Math 1221 or a *B–* in Math 1231;
- A minimum overall grade-point average of 3.0 at the time of application to the major;
- The application is due no later than the start of the 5th semester of study at GW or completion of the 60th credit, whichever comes first.

Contact the School of Engineering and Applied Science Undergraduate Advising Office (https://www.seas.gwu.edu/academic-advising) for current application deadlines for the second major in computer science.

Credits in residence requirement:
- For a second major at least 24 credits in computer science courses must be completed in SEAS.

Graduation grade-point average criteria:
- To satisfactorily complete a second major in computer science, a student must have a minimum grade-point average of 2.2 in all the computer science courses. See the department webpage (http://www.seas.gwu.edu/department-computer-science) for more information on curriculum requirements for the second major in computer science.

REQUIREMENTS

Recommended program of study

Code	Title	Credits
First semester		
UW 1020	University Writing *	
CSCI 1010	Computer Science Orientation	
CSCI 1111	Introduction to Software Development	
SEAS 1001	Engineering Orientation	
Math requirement *		
Humanities or social sciences elective **		
Second semester		
CSCI 1311	Discrete Structures I	
CSCI 1112	Algorithms and Data Structures	
Math requirement *		
Science requirement *		
Humanities or social sciences elective **		
Third semester		
CSCI 2312	Discrete Structures II	
CSCI 2461	Computer Architecture I	
CSCI 2113	Software Engineering	
Science requirement *		
Humanities or social sciences elective **		
Fourth semester		
CSCI 3410	Systems Programming	
CSCI 2441W	Database Systems and Team Projects	
Computer science elective ***		
Science requirement *		
Statistics requirement - one of the following:		
CSCI 4341	Continuous Algorithms	
CSCI 3362	Probability for Computer Science	
APSC 3115	Engineering Analysis III	
STAT 4157	Introduction to Mathematical Statistics I	
Fifth semester		
CSCI 3313	Foundations of Computing	
CSCI 3212	Algorithms	
CSCI 3411	Operating Systems	
Humanities or social sciences elective **		
Sixth semester		
Technical track elective		
Non-technical track elective		
Math or science elective *		
Humanities or social sciences elective **		
Unrestricted elective		
Seventh semester		
CSCI 4243W	Capstone Design Project I	
Technical track elective		
Non-technical track elective		
Humanities or social sciences elective **		
Unrestricted elective		
Eighth semester		
CSCI 4244	Capstone Design Project II	
Technical track elective		
Non-technical track elective		
Two unrestricted electives		

*Course satisfies the university general education requirement in math, science, or writing. UW 1020 must be completed prior to any writing course in the major, including CSCI 2441W.
**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list (p. 38); the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list. (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf)

***Any CS course number 3000 or above.

Mathematics requirements can be met by taking MATH 1220 Calculus with Precalculus I–MATH 1221 Calculus with Precalculus II and MATH 1232 Single-Variable Calculus II or by taking MATH 1231 Single-Variable Calculus I and MATH 1232 Single-Variable Calculus II. All students must take two math courses not counting MATH 1220 Calculus with Precalculus I; students who take MATH 1220 Calculus with Precalculus I must take it as one of their unrestricted electives. Science requirements can be met by choosing from BISC 1111 Introductory Biology: Cells and Molecules–BISC 1112 Introductory Biology: The Biology of Organisms, CHEM 1111 General Chemistry I–CHEM 1112 General Chemistry II, and PHYS 1021 University Physics I–PHYS 1022 University Physics II. The three science requirement courses must include a two-course sequence.

CSCI 4341 Continuous Algorithms and CSCI 3362/6362 Probability for Computer Science can count towards the statistics requirement or the math/science elective, but not both. Students who were admitted prior to fall 2014 may count STAT 1051 Introduction to Business and Economic Statistics and STAT 1053 Introduction to Statistics in Social Science towards the statistics requirement, if they took the course prior to the start of the Spring 2015 semester.

Some examples of technical tracks include computer security and information assurance, digital media, foundations and theory, biomedical computing, systems, software engineering and applications and research. Examples of non-technical tracks include business, project management, global engineering, pre-law,, and environment and climate change. Students may define their own non-technical track in consultation with their advisor. More information on the tracks and track requirements may be found on the program website (http://www.cs.seas.gwu.edu/bachelor-science-program).

MINOR IN COMPUTER SCIENCE

This minor, offered by the Department of Computer Science, is for students in other GW schools as well as other majors within the School of Engineering and Applied Science. The curriculum consists of two segments: core courses and electives whose purpose is to provide the student with depth in an area of computer science. The total number of credits for the minor is 18.

To be considered for admission to the minor in computer science, a student must satisfy the following criteria:

- A minimum grade of B or above in CSCI 1111 Introduction to Software Development, CSCI 1011 Introduction to Programming with Java, or CSCI 1121 Introduction to C Programming; and a B- or above in MATH 1220 Calculus with Precalculus I and MATH 1221 Calculus with Precalculus II or a B- in MATH 1231 Single-Variable Calculus I;
- A minimum overall grade-point average of 3.0 at the time of application to the minor.
- The application is due no later than the start of the 5th semester of study at GW or completion of the 60th credit, whichever comes first.

Contact the Department of Computer Science (https://www.cs.seas.gwu.edu) for current application deadlines for the minor in computer science.

Credits in residence requirement:

- For students pursuing a minor, at least 15 credits in computer science courses must be completed at GW.

Graduation grade-point average criteria:

- To satisfactorily complete a minor in computer science, a student must have a minimum grade-point average of 2.2 in all the computer science courses.

REQUIREMENTS

Code	Title	Credits
Required		
CSCI 1111	Introduction to Software Development	
CSCI 1112	Algorithms and Data Structures	
CSCI 1311	Discrete Structures I	
CSCI 2113	Software Engineering	
Electives		
Choose at least two Computer Science elective courses that either require CSCI 2113 as a prerequisite or have CSCI 2113 in the prerequisite chain. Possible electives include:		
CSCI 2441	Database Systems and Team Projects	
CSCI 2461	Computer Architecture I	
CSCI 3212	Algorithms	
CSCI 3221	Programming Languages	
CSCI 3313	Foundations of Computing	
CSCI 3410	Systems Programming	
CSCI 3411	Operating Systems	
CSCI 4223	Principles of Programming Languages	
CSCI 4235	Development of Open-Source Software	
CSCI 4237	Software Design for Handheld Devices	
CSCI 4331	Cryptography	
CSCI 4341	Continuous Algorithms	

CSCI 4342	Computational Linear Algebra and Applications
CSCI 4364	Machine Learning
CSCI 4415	Real-Time and Embedded Systems
CSCI 4431	Computer Networks I
CSCI 4511	Artificial Intelligence Algorithms
CSCI 4525	Autonomous Robotics: Manipulation
CSCI 4527	Introduction to Computer Vision
CSCI 4531	Computer Security
CSCI 4541	Network Security
CSCI 4554	Computer Graphics 1
CSCI 4561	Design of User–Interface Programs
CSCI 4572	Computational Biology
CSCI 4577	Biomedical Computing

Other electives may be substituted with the approval of the minor advisor.

MASTER OF SCIENCE IN THE FIELD OF COMPUTER SCIENCE

The Department of Computer Science offers a graduate degree program leading to the master of science in the field of computer science. After completing core requirements, students select electives in subject areas such as computer security and information assurance, database and information retrieval systems, software engineering and systems, biomedical computing, digital media and computer graphics, networking and mobile computing, computer architecture, pervasive computing and embedded systems, machine intelligence, robotics, and algorithms and theory. Students are not required to take elective courses in a particular subject area or across subject areas. Both thesis and non-thesis options are available.

In addition to the entrance requirements, students are expected to be adequately prepared in the basic physical sciences and in mathematics (one year each of university laboratory science and of math beyond precalculus). Students are also expected to have taken a course in computer programming using a structured language, as well as CSCI 1112 Algorithms and Data Structures, CSCI 1311 Discrete Structures I, and CSCI 2461 Computer Architecture I, or their equivalents.

Graduate students are required to attend several department colloquia each semester. These are intended to broaden the student's professional outlook and to encourage interaction with the faculty.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://www.cs.seas.gwu.edu/master-science-computer-science) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 9 credits in required courses and 21 credits in elective courses.

In addition to the entrance requirements, students are expected to be adequately prepared in the basic physical sciences and in mathematics (one year each of university laboratory science and of math beyond precalculus). Students also are expected to have taken a course in computer programming using a structured language, as well as CSCI 1112 Algorithms and Data Structures, CSCI 1311 Discrete Structures I, and CSCI 2461 Computer Architecture I, or their equivalents.

Code	Title	Credits
Required		
CSCI 6212	Design and Analysis of Algorithms	
CSCI 6221	Advanced Software Paradigms	
CSCI 6461	Computer System Architecture	
Electives		
21 credits in elective course selected in consultation with the advisor. As a general rule, no more than two courses may be taken outside of the department.		

At least 24 of the 30 credits required for this program must be at the 6000 level or above.

Graduate students are required to attend several department colloquia each semester. These are intended to broaden the student's professional outlook and to encourage interaction with the faculty.

MASTER OF SCIENCE IN THE FIELD OF CYBERSECURITY IN COMPUTER SCIENCE

The master of science in the field of cybersecurity in computer science degree program was created in response to the significant and fast-growing need for technical cybersecurity experts, both nationally and internationally. Students in the program acquire up-to-date knowledge and skills in cybersecurity, a field with increasing importance to national

security, the economy, and private citizens. Students take courses in computer security, software security, network security, cryptography, and security management, among others. They also gain a firm grounding in computer science and take courses in related disciplines such as cybersecurity law and digital forensics.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the departmental website (http://www.cs.seas.gwu.edu/master-science-cybersecurity-computer-science) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 12 credits in required courses and 18 credits in elective courses. Thesis and non-thesis options are available; students should contact the department concerning these options.

Code	Title	Credits
Required		
CSCI 6212	Design and Analysis of Algorithms	
CSCI 6221	Advanced Software Paradigms	
CSCI 6461	Computer System Architecture	
EMSE 6540	Management of Information and Systems Security	
Electives		
In addition to the four required courses, four designated security courses are required. Two of these courses must be Computer Science (CSCI) courses and one must be a CSCI applied cryptography course. In addition, students must take two graduate-level, credit-bearing courses. See the Department of Computer Science website for specifics.		
Normally, no more than three courses may be taken outside of those offered by the Department of Computer Science.		
At least 24 of the 30 credits required for the degree must be at the 6000 level or above.		

DOCTOR OF PHILOSOPHY IN THE FIELD OF COMPUTER SCIENCE

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under School of Engineering, Doctoral Program Regulations (http://bulletin.gwu.edu/engineering-applied-science/#Doctor_of_Philosophy).

Students with an MS degree must take a minimum of 30 credits, consisting of 18 credit hours of courses available for graduate credit and 12 credit hours of dissertation research. For students without an MS degree, an additional 24 credit hours have to be completed, that may be divided between courses available for graduate credit and dissertation credit hours, subject to the approval of the student's advisor. For students without a prior master's degree, 15 credits may be taken outside of the department; for those with a prior master's degree, 9 credits may be taken outside of the department. In some cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study exceeds the minimum number of credits.

No specific courses are required. Individual plans of study are developed in consultation with the advisor; however, the plan of study must include one course in of each of the areas of theory, systems, and applications and one advanced topics course.

Other requirements

- Preliminary examination—Students must pass the examination within four semesters of starting the program
- Dissertation proposal examination—Students must pass the preliminary examination prior to the dissertation proposal examination. The student must then submit a written proposal for evaluation and undergo an oral examination.
- Students are responsible for forming a dissertation committee comprising three members in addition to the advisor and co-advisor(s).
- Peer-reviewed papers—Students are required to have one peer-reviewed article accepted for publication; two to three published peer-reviewed articles are encouraged.
- Colloquium requirement—Each semester, students must attend a minimum of two seminars, workshops, or symposia sponsored by the department in order to fulfill this zero-credit requirement.

Student should contact the department for additional information and requirements.

GRADUATE CERTIFICATE IN COMPUTER SECURITY AND INFORMATION ASSURANCE

The graduate certificate in computer security and information assurance provides a strong technical education in the security of computer systems and networks, as well as training in related policy issues. The program emphasizes concepts in computer security, augmented with current industry standard techniques and challenges. It provides an alternative to the full M.S. program for practicing computer scientists and other information technology personnel who wish to extend their education beyond the B.S. level, and to those who wish to

acquire up-to-date knowledge in the burgeoning field of computer and network security.

The George Washington University has been recognized as a Center of Academic Excellence in Education-Research and by the National Security Agency (NSA) and the Department of Homeland Security (DHS).

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 6 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Required		
CSCI 6531	Computer Security	
CSCI 6541	Network Security	
Elective		
Two of the following:		
CSCI 6331	Cryptography	
CSCI 6532	Information Policy	
CSCI 6542	Computer Network Defense	
CSCI 6547	Wirless and Mobile Security	
CSCI 6548	E-Commerce Security	
CSCI 8331	Advanced Cryptography	
CSCI 8531	Advanced Topics in Security	

ELECTRICAL AND COMPUTER ENGINEERING

OVERVIEW

Mission Statement

The mission of the department is to motivate and inspire students by providing high-caliber, fully integrated programs in electrical and computer engineering. These programs prepare graduates to provide leadership in a rapidly evolving global information society and to serve the greater good. The programs are also designed to allow students to advance the state of knowledge in our disciplines by actively pursuing scholarly research for publication and dissemination.

Educational Objectives

The objectives of the electrical and computer engineering undergraduate program of study are to educate students in the principles of engineering, as well as ensure awareness of their social responsibilities. The engineering education is based on the sciences and the principles of design. A balanced program in the humanities and social sciences as well as coverage of specific topics in professional ethics and social responsibilities, further instills a sense of social responsibilities. The programs provide students with a solid foundation in electrical and computer engineering through a balanced curriculum integrating the underlying scientific and mathematical knowledge with the latest technological developments. The curriculum is designed to produce engineers capable of functioning in the present technological environment and of adapting to future directions of the profession. Specifically, the programs aim to teach students how to analyze and implement complex interdisciplinary engineering projects; to give students a strong foundation for graduate study in their field; to prepare students for competitive and challenging industrial applications; to teach students how to use state-of-the-art computer tools for solving engineering problems; to expose students to hands-on engineering experience through laboratory courses; to cultivate students' abilities to communicate and work effectively in teams; and to help students develop an understanding of the ethical issues and global perspectives arising in the practice of the engineering profession.

Educational Outcomes

The Department of Electrical and Computer Engineering aims to produce graduates who will have the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context, as well as professional and ethical responsibility; and a recognition of the need for, and an ability to engage in life-long learning.

Graduates will also have the ability to:

- Apply knowledge of mathematics, science, and engineering
- Design and conduct experiments, as well as analyze and interpret data
- Design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- Function on multidisciplinary teams
- Identify, formulate, and solve engineering problems
- Communicate effectively
- Use the techniques, skills, and modern engineering tools necessary for engineering practice.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Science with a major in computer engineering (p. 655)
- Bachelor of Science with a major in electrical engineering (p. 656)
- Bachelor of Science with a major in electrical engineering, energy option (p. 657)
- Bachelor of Science with a major in electrical engineering, medical preparation option (p. 659)

Minors

- Minor in computer engineering (p. 660)
- Minor in electrical engineering (p. 660)

GRADUATE

Master's programs

- Master of Science in the field of computer engineering (p. 661)
- Master of Science in the field of electrical engineering (p. 662)
- Master of Science in the field of telecommunications engineering (p. 664)

Professional programs

See the School of Engineering and Applied Science for programs leading to the professional degree.

Doctoral programs

- Doctor of Philosophy in the field of computer engineering (p. 665)
- Doctor of Philosophy in the field of electrical engineering (p. 665)

CERTIFICATES

- Graduate certificate in high-performance computing (p. 665)

FACULTY

Professors S. Ahmadi, L. Bennett (*Research*), C.B. Cameron *(Practice),* R.L. Carroll, E. Della Torre, T. El-Ghazawi, K.B. Eom, R.J. Harrington, H.J. Helgert, C.E. Korman, N. Kyriakopoulos, R.H. Lang, D. Nagel *(Research)*, A. Louri *(Chair)*, S. Subramaniam, M.E. Zaghloul

Associate Professors M. Doroslovacki, H.H. Huang, T. Lan, G.P. Venkataramani

Assistant Professors A. Etemadi, E. Simsek, V. Sorger

Assistant Research Professors V. Narayana

Professorial Lecturers A. Mehrotra, S.A. Torrico

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ECE 1010. Introduction to Electrical, Computer, and Biomedical Engineering. 1 Credit.
Basic and emerging concepts in electrical, computer, and biomedical engineering. Hands-on experiments and projects. Introduction to the professional literature and available resources and to technical writing, speaking, and presentation skills.

ECE 1020. Introduction to Electrical, Computer, and Biomedical Engineering. 1 Credit.
Continuation of ECE 1010. Basic and emerging concepts in electrical, computer, and biomedical engineering. Hands-on experiments and projects. Introduction to the professional literature and available resources and to technical writing, speaking, and presentation skills.

ECE 1120. C Programming for ECE. 3 Credits.
Basic programming concepts including algorithmic thinking and structured programming, control flow, data types, pointers, functions, algorithms, I/Os, threads, and performance evaluation and optimization. Concurrency and multicore programming using threads, processes as well as parallel C programming paradigms. Controlling hardware devices and fine control via interfacing with assembly language.

ECE 1125. Data Structures&Algorithms ECE. 3 Credits.
Fundamentals of algorithms and data structures for electrical and computer engineering. Topics include techniques to solve problems through programming in C/C++ languages, linked lists, stacks, queues and trees; searching methods such as binary trees, hashing, and multi-way trees; design and analysis of algorithms and their space and time complexity. (Fall).

ECE 2110. Circuit Theory. 4 Credits.
Lecture (3 hours), laboratory (3 hours). Circuit elements, techniques of circuit analysis; circuit theorems; operational amplifiers; RLC circuits; natural and step responses; series, parallel and resonant circuits; sinusoidal steady-state analysis; phasers; power calculations; transformers; two-port circuits. CAD tools used in circuit projects. Corequisite: APSC 2113. Prerequisites: PHYS 1022 or PHYS 1026. (Fall and spring).

ECE 2115. Engineering Electronics. 4 Credits.
Lecture (3 hours), laboratory (3 hours). Solid-state devices used in electronic engineering. Physics of their operation. Application to electronic circuits. Primary emphasis on application of these elements in power supplies and in linear amplifiers. Design concepts through use of SPICE and graphical techniques. Prerequisite: ECE 2110.

ECE 2120. Engineering Seminar. 0-1 Credits.
This seminar course provides electrical and computer engineering students with a detailed view of the electrical and computer engineering professions. Speakers from within and outside of the department discuss facets of ECE, engineering education, and other important department, college, or university topics of interest. (Fall).

ECE 2140. Design of Logic Systems I. 4 Credits.
Lecture (3 hours), laboratory (3 hours). Boolean algebra; combinational and sequential circuits; minimization techniques; design-and-build logic subsystems, such as decoders, multiplexers, adders, and multipliers; use of CAD tools. Corequisite: ECE 2115.

ECE 2210. Circuits, Signals, and Systems. 3 Credits.
Circuit analysis using Laplace transforms; transfer functions; poles and zeroes; Bode diagrams; effects of feedback on circuits; convolution; Fourier series and Fourier transforms; design of filters; CAD tools used in design of projects. Prerequisite: ECE 2110.

ECE 3125. Analog Electronics Design. 4 Credits.
Design, testing, and measurement of analog electronic circuits. Differential and multistage amplifiers. Output stages and power amplifiers. Frequency response of amplifiers, high-frequency models of FETs and BJTs. Introduction to feedback circuit topologies. Use of electronic CAD tools, such as P-SPICE. Prerequisite: ECE 2115.

ECE 3130. Digital Electronics and Design. 4 Credits.
Lecture (3 hours), laboratory (3 hours). Design and testing of logic gates, regenerative logic circuits, and semiconductor memory circuits. Implementation of such circuits with NMOS, CMOS, TTL, and other integrated circuit technologies. Use of electronic CAD tools, such as SPICE. Prerequisite: ECE 2140.

ECE 3135. Design of Logic Systems II. 4 Credits.
Lecture (3 hours), laboratory (3 hours). Introduction of ASIC design techniques; design and programming of FPGAs using CAD tools; timing in sequential circuits; essential hazards; races in sequential circuits; design-and-build FPGA project. Prerequisite: ECE 2140.

ECE 3220. Intro to Digital Signal Proces. 3 Credits.
Signal representation, sampling and quantization, discrete-time signals, z-transforms and spectra, difference equations. Fourier analysis. Discrete Fourier transform, IIR and FIR filter design. Prerequisite: ECE 2210.

ECE 3225. Signal and Image Analysis. 3 Credits.
Introduction and clinical applications; characteristics of biomedical problems, time- and frequency-domain techniques for signal feature analysis; spectral estimation and analysis; autoregressive modeling; detection and estimation of periodicity; digital images as two-dimensional signals; 2-D Fourier transform. Corequisite: ECE 2210, ApSc 3115.

ECE 3310. Introduction to Electromagnetics. 3 Credits.
Maxwell's equations, pulse propagation in one dimension, transmission line equations, reflection coefficient, capacitance and inductance calculations, Smith chart, plane waves, reflection from a dielectric of fiber and integrated optics. Prerequisites: APSC 2113, PHYS 1022.).

ECE 3315. Fields and Waves I. 3 Credits.
Complex phasor notation, uniform transmission lines, standing wave ratio, power, reflection coefficient, impedance matching. Review of vector analysis and numerical methods. Electrostatics, generalizations of Coulomb's law, Gauss's law, potential, conductors, dielectrics, capacitance, energy. Prerequisites: APSC 2113 and PHYS 1022. (Fall and spring).

ECE 3410. Communications Engineering. 3 Credits.
Fourier series and Fourier transform in relation to signal analysis. Convolution and linear filtering. Signal bandwidth and sampling theorem. Analog modulation. Random variables and stochastic processes; power spectrum. Digital modulation: BPSK, QPSK, MSK. Pulse code modulation, DPCM and delta modulation. Prerequisites: APSC 3115, ECE 2210.).

ECE 3420. Communications Laboratory. 1 Credit.
Experiments supporting communications systems. Fourier analysis and Fourier transform. Sampling theorem, filtering, and aliasing. Amplitude modulation (AM), frequency modulation (FM), quantization, and pulse code modulation (PCM). Delta modulation. Binary phase shift keying (BPSK). Quadrature phase shift keying (PSK). Prerequisite or corequisite: ECE 3410.

ECE 3515. Computer Organization. 3 Credits.
Structure and operation of a digital computer. Design of computer arithmetic units, data and instruction paths. Microprogramming; memory technology; virtual memory; caches; pipelined computer organization; characteristics of secondary storage; I/O interfacing. May be taken for graduate credit. Prerequisite: ECE 2140. (Same as CSCI 3462) (Fall, Every Year).

ECE 3520. Microprocessors: Software, Hardware, and Interfacing. 3 Credits.
Microprocessor architecture, assembly language, address decoding, hardware interrupt, parallel and serial interfacing with various circuits, timer/counters, direct memory access, microprocessor-based system. Hands-on laboratory experience is an integral part of this course. Prerequisite: ECE 2140.

ECE 3525. Introduction to Embedded Systems. 3 Credits.
Microcontrollers and their application in embedded systems. Topics include assembly and C for microcontroller programming, serial and parallel I/O interfacing, and multimedia interfacing. Students perform laboratory experiments and a final project to develop a microcontroller-based embedded system. Prerequisite: CSCI 1121, ECE 3520.

ECE 3530. Introduction to Parallel and Distributed Computer Systems. 3 Credits.
Shared and distributed memory computer systems. Parallel computation. Interprocess communication and synchronization. Terminal, file transfer, and message handling protocols. Algorithms for deadlock detection, concurrency control, and synchronization in distributed systems. Network security and privacy. Resource control and management. Prerequisite: ECE 3515.

ECE 3915W. Electrical, Computer, and Biomedical Engineering Capstone Project Lab I. 1 Credit.
ECE 3915, ECE 4920, and ECE 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project.

ECE 4140. VLSI Design and Simulation. 3 Credits.
Study of VLSI circuit design including PMOS and NMOS transistor analysis, switch and gate logic design, understanding of semiconductor fabrication processes and design rules, CAD system, speed and power considerations, scaling of transistors to the nano-scale, and designing with highly variable process parameters. Each student will design a VLSI chip, simulate the design and submit a GDS II file for chip fabrication. Prerequisites: ECE 3130, ECE 3135. Same as ECE 6240. (Fall).

ECE 4145. Micro and Nano Fabrication Techniques. 3 Credits.
Introduction to modern fabrication process technologies associated with various types of nano-or micro fabrications process, with applications to the micro- and nano scale device fabrications; steps of standard processing will be illustrated; nano lithography and other available modern technologies. Prerequisite: ECE 2110. (Fall).

ECE 4150. ASIC Design and Testing of VLSI Circuits. 3 Credits.
ASIC and mixed-signal design methodology, use of ASIC design CAD tools. Logic synthesis, styles of synthesis, power/area/speed constraints. MIPS CPU HDL implementation/verification/testing. VLSI testing, fault models, design for testability techniques, scan path, built-in self-test. Testing of chips designed and fabricated in ECE 4140 or equivalent chips. Prerequisite: ECE 4140. (Same as ECE 6250) (Spring, Every Year).

ECE 4155. Modern Measurements and Sensors. 3 Credits.
Measurement of dc, ac, and high-frequency signals. Interface electronic circuits. Sensors for measurement of mechanical, optical, magnetic, electromagnetic, thermal, chemical, and biochemical signals. Prerequisite: ECE 4320, ECE 3125, ECE 2140. May be taken for graduate credit.

ECE 4160. Introduction to Nanoelectronics. 3 Credits.
Nanoscience and technology and nanoelectronics. Basic nanofabrication steps, and techniques to build devices such as carbon nanotubes, Graphene device, and other 2D nanoelectronic devices. Tools for performing design and characterizations of nanodevices, including scanning electron microscopy (SEM), atomic force microscopy (AFM), and transmission electron microscope (TEM). Prerequisite: ECE 2115. (Same as ECE 6260) (Fall, Every Year).

ECE 4320. Fields and Waves II. 3 Credits.
Magneto-stationary fields, Lorentz force torques, Biot–Savart law, Ampere's law, magnetic materials, inductance, energy. Maxwell's equations, Faraday's law, charge–current continuity, vector potential. Time-harmonic fields, plane waves, polarization, skin effect, dielectric boundaries, and fiber optics. Radiation, dipole, gain, effective area. Prerequisites: APSC 2114, ECE 3315.).

ECE 4325. Microwave and Optics Laboratory. 1 Credit.
Experiments in transmission lines, network analyzer measurements of scattering parameters, microwave systems, fiber-optic systems and antennas. Introduction to the characteristics of laser and optical systems. Prerequisite: ECE 4320.

ECE 4435. Fiber Optical Communications. 3 Credits.
Lightwave fundamentals. Integrated optics. Optical fiber waveguides. Light sources and detectors. Distribution networks and fiber components. Modulation. Noise and detection. System design. Prerequisite: APSC 2114; ECE 3310 or ECE 4320.

ECE 4535. Computer Architecture and Design. 3 Credits.
Design of bus-based digital computer systems, memory subsystems, caches, and multiple processors. Comparison of RISC and CISC processors and standard buses. Bus transfer and control signals. Performance, memory management, architectural support for protection, task switching, exception handling, instruction pipelines. Prerequisite: ECE 3515.

ECE 4610. Electrical Energy Conversion. 3 Credits.
Three-phase and single-phase AC rotating machines and transformers, DC machines, rotating machines as circuit elements, power semiconductor converters. Renewable generation, utility grid integration, smart grid applications. Prerequisites: ECE 2210, ECE 3315. (Same as ECE 6610) (Spring, Every Year).

ECE 4615. Electrical Power Laboratory. 1 Credit.
Experiments in support of the analysis and design of electrical power systems. Measurements of the characteristics of devices to generate electric power. Rectification and inversion processes for power systems and drives. Prerequisite or corequisite: ECE 4610.

ECE 4620. Electrical Power Systems. 3 Credits.
AC power grids, transmission line parameters, load flow, economic dispatch voltage, frequency and power flow control. Voltage, current and power limitations. Fault analysis and stability considerations. Effect of independent power producers and variable energy sources and energy storage. (Same as ECE 6620) (Fall, Every Year).

ECE 4710. Control Systems Design. 3 Credits.
Mathematical models of linear systems; steady-state and transient analyses; root locus and frequency response methods; synthesis of linear feedback control systems. Prerequisite: APSC 2114, ECE 2210 or MAE 3134.

ECE 4715. Control Systems Laboratory. 1 Credit.
Experiments in support of control theory, involving the use of the digital computer for process control in real time. Design of feedback and compensation with computer implementation. Digital simulation of linear and nonlinear systems. Prerequisite or corequisite: ECE 4710.

ECE 4730. Robotic Systems. 3 Credits.
Modeling and analysis of robot designs. Kinematics of mechanical linkages, structures, actuators, transmissions, and sensors. Design of robot control systems, computer programming, and vision systems. Use of artificial intelligence. Current industrial applications and limitations of robotic systems. Same as MAE 3197. Prerequisite: computer programming, APSC 2058, ECE 4710.

ECE 4735. Robotics Laboratory. 1 Credit.
Experiments illustrating basic principles and programming of robots and other automated machinery. Design and writing of computer programs to use a robot's arm, vision, and data files to accomplish tasks. Prerequisite or corequisite: ECE 4730/ MAE 3197.

ECE 4920W. Electrical, Computer, and Biomedical Engineering Capstone Project Lab II. 3 Credits.
ECE 3915, ECE 4920, and ECE 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project.

ECE 4925W. Electrical, Computer, and Biomedical Engineering Capstone Project Lab III. 2 Credits.
ECE 3915, ECE 4920, and ECE 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project.

ECE 4980. Special Topics. 1-3 Credits.
Topic to be announced in the Schedule of Classes. (Fall and spring).

ECE 4990. Research. 1-3 Credits.
Applied research and experimentation projects, as arranged. Prerequisite: junior or senior status.

ECE 6005. Microcomputer Systems Architecture. 3 Credits.
Advanced topics in computer architecture and design; instruction-level parallelism, thread-level parallelism, memory, multithreading, and storage systems. (Fall, Every Year).

ECE 6010. Linear Systems Theory. 3 Credits.
Introduction to linear systems theory. Topics include linear vector spaces and linear operators, mathematical representation of dynamic linear systems, concept of state and solution of the state equation, controllability and observability, canonical forms of the state equation, state feedback, and state estimation. (Fall, Spring, Every Year).

ECE 6015. Stochastic Processes in Engineering. 3 Credits.
Basic concepts of modeling of random phenomena in electrical and computer systems: probability framework, stationarity, linear filtering. Optimization of discrete and continuous stochastic processes. Elements of performance analysis. (Fall, Spring, and Summer, Every Year).

ECE 6020. Applied Electromagnetics. 3 Credits.
Review of Maxwell's equations; electromagnetics of circuits, plane wave propagation; transmission lines; waveguides; radiating systems; receiving antennas and pattern reciprocity, array antennas; electromagnetic properties of materials: conductors, crystals, devices; optical transmission. (Fall, Every Year).

ECE 6025. Signals and Transforms in Engineering. 3 Credits.
Signal spaces and approximation. Orthogonal functions. Fourier series and transform. Bandpass signals and modulation. Hilbert transform and analytic signals. Timefrequency analysis. Short-time Fourier transform. Linear systems properties. Laplace transform. Sampling and discrete-time signals. Discrete-time Fourier transform and z-transform. Wavelets. (Fall and Spring, Every Year).

ECE 6030. Device Electronics. 3 Credits.
Semiconductor device concepts; doping, drift diffusion, recombination. Analysis of Schottky and Ohmic contacts, pn junctions, MOS systems. Modeling and analysis of semiconductor devices such as MOSFET and bipolar transistors. Hot electron and short and narrow channel effects. (Spring, Every Year).

ECE 6035. Introduction to Computer Networks. 3 Credits.
Layered protocol architectures. Digital transmission, fundamental limits. Error detection and ARQ protocols. Data link layer and control. Multiple access protocols. Circuit and packet switching. Multiplexing. Routing. Flow and congestion control, queue management. LAN standards. TCP/IP. Next-generation Internet. (Same as ECE 3415) (Spring and fall).

ECE 6045. Special Topics. 1-3 Credits.
Topics to be announced in the Schedule of Classes. (Fall and spring).

ECE 6050. Research. 1-12 Credits.
Applied research and experimentation projects, as arranged. May be repeated for credit.

ECE 6060. Electric Power Generation. 3 Credits.
Overview of primary traditional and alternative energy sources and storage. Analysis of machinery employed in energy conversion processes. Effect of independent power producers on long-term and short-term stability of large grids. (Fall, Every Year).

ECE 6065. Colloquium. 0 Credits.
Lectures by outstanding authorities in electrical and computer engineering. Topics to be announced each semester. (Fall and spring).

ECE 6105. Introduction to High-Performance Computing. 3 Credits.
Taxonomy and classifications of computers and parallel computers. Parallel thinking and parallel algorithms. Domain decomposition and load balancing. Programming parallel computers using the message passing, global address space, and partitioned global address space paradigms. Prerequisite: graduate standing in science or engineering or consent of instructor.

ECE 6120. High-Performance Processors. 3 Credits.
Processor microarchitecture and instruction-level parallelism. Superpipelines and superscalar processors. Multiple-instruction fetching, aligning, merging, and issuing. Hardware and software solutions to structural and data and control hazards. Branch prediction and static and dynamic speculation. Register renaming, Tomasulo's algorithm. VLIWs. Prerequisite: ECE 6005.

ECE 6125. Parallel Computer Architecture. 3 Credits.
Architectural classifications and taxonomies of parallel computers; enabling technologies, including advanced processor concepts, interconnection networks, high-speed memory architectures and protocols; parallel performance and scalability; and introduction to parallel algorithms and parallel programming. Prerequisite: ECE 6005 or ECE 6105.

ECE 6130. Big Data and Cloud Computing. 3 Credits.
Research topics related to big data and cloud computing, including data centers, virtualization, hardware and software architecture; system-level issues on performance, energy efficiency, reliability, scalability, and security. Prerequisite: ECE 6105. (Spring).

ECE 6132. Secure Cloud Computing. 3 Credits.
Security and privacy issues in cloud computing systems; confidentiality, integrity, and availability of data and computations; cloud computing models, threat models, outsourcing, and security issues. Practical applications of secure cloud computing. (Fall, spring, and summer).

ECE 6140. Embedded Systems. 3 Credits.
Architectural advances and instruction sets for embedded microprocessors. Real-time operating systems and real-time scheduling, use of pre-designed software and hardware cores. Sensors, actuators, and data acquisition. System-on-chip (SoC). Design case studies. Prerequisite: ECE 6005.

ECE 6213. Design of VLSI Circuits. 3 Credits.
Top-down ASIC/FPGA design methodology; modeling of VLSI circuits using HDL; behavioral, structural, and RTL modeling techniques; logic synthesis techniques; design verification plan and techniques. Students design and verify a final project using state of the art commercial VLSI CAD tools for ASIC and FPGA (Altera). Prerequisite: ECE 6240. (Fall, Every Year).

ECE 6214. High-Level VLSI Design Methodology. 3 Credits.
High-level ASIC–FPGA design methodology. RTL modeling of VLSI circuits, using HDL for synthesis. Detailed discussion of logic synthesis. Architectural tradeoff for large VLSI circuits. Advanced optimization techniques. VLSI design flow, using the state-of-the-art, front-end design entry and simulation tools and back-end logic synthesis. Prerequisite: ECE 6213.

ECE 6215. Introduction to MEMS. 3 Credits.
Introduction to microelectromechanical and nanoelectromechanical systems (MEMS/NEMS). Basic principles of simulating, designing, and fabricating MEMS/NEMS. Prerequisite: ECE 6240. (Spring, Every Year).

ECE 6216. RF/VLSI Circuit Design. 3 Credits.
Introduction to radio frequency systems. RF design, specifications, S-parameters, gain, noise, stability, matching concepts, small signal amplifiers, low noise amplifiers, power amplifiers, system-level design. Students use CAD tools such as ADS and other industrial tools to design class project. Prerequisite: ECE 6240. (Spring, Odd Years).

ECE 6218. Advanced Analog VLSI Circuit Design. 3 Credits.
MOS technology: building blocks, devices, capacitors, limitations. Operational amplifiers and other analog systems. Layout examples and design principles. Mixed-signal A/D and D/A. Students use the CAD VLSI laboratory to design and simulate circuits. Prerequisite: ECE 6240. (Spring, Odd Years).

ECE 6221. Introduction to Physical Electronics. 3 Credits.
Theoretical principles underlying the operation of electronic devices. Postulates of quantum mechanics: wave–particle duality, uncertainty relations, electronic band structure. Free-carrier statistics; electron–photon interaction. Physical principles of semiconductor and optoelectronic devices. (Fall, Every Year).

ECE 6240. VLSI Design and Simulation. 3 Credits.
Study of VLSI circuit design including PMOS and NMOS transistor analysis, switch and gate logic design, understanding of semiconductor fabrication processes and design rules, CAD system, speed and power considerations, scaling of transistors to the nano-scale, and designing with highly variable process parameters. Each student will design a VLSI chip, simulate the design and submit a GDS II file for Chip fabrication. (Same as ECE 4140) (Fall, Every Year).

ECE 6245. Micro and Nano Fabrication Technology. 3 Credits.
Introduction to the basic fabrication principles at the micro and nano scale; students practice and fabricate simple devices. Restricted to graduate students. Prerequisites: ECE 2150. (Fall and spring).

ECE 6250. ASIC Design and Testing of VLSI Circuits. 3 Credits.
ASIC and mixed-signal design methodology, use of ASIC design CAD tools. Logic synthesis, styles of synthesis, power/area/speed constraints. MIPS CPU HDL implementation/verification/testing. VLSI testing, fault models, design for testability techniques, scan path, built-in self-test. Testing of chips designed and fabricated in ECE 4140 or equivalent chips. (Same as ECE 4150) (Spring, Every Year).

ECE 6260. Introduction to Nanoelectronics. 3 Credits.
Nanoscience and technology and nanoelectronics. Basic nanofabrication steps; techniques to build devices such as carbon nanotubes, graphene device, and other 2D nanoelectronic devices. Tools for performing design and characterizations of nanodevices, including scanning electron microscopy (SEM), atomic force microscopy (AFM), and transmission electron microscope (TEM). (Same as ECE 4160) (Fall, Every Year).

ECE 6500. Information Theory. 3 Credits.
The concepts of source and channel. Measure of information, entropy, mutual information. The noiseless coding theorem. The noisy coding theorem. Channel capacity: symmetric and nonsymmetric channels, Gaussian and binary symmetric channels. Rate-distortion theory. Basics of multiple-user information theory. Prerequisite: ECE 6015.

ECE 6505. Error Control Coding. 3 Credits.
Algebraic coding theory: finite fields, linear block codes, cyclic and Reed– Solomon codes. Error detection using CRC codes. Convolutional codes and trellis-coded modulations: structure, properties, performance bounds. Capacity achieving codes; soft-input–soft-output decoding; computationally efficient decoding algorithms. Prerequisite: ECE 6015.

ECE 6510. Communication Theory I. 3 Credits.
Principles of digital communications. Channels, digital modulation; optimum receivers and algorithms in the AWGN; coherent, non-coherent, and fading channels. Correlation detectors, matched filters; diversity. Bounds on performance of communications, comparison of communications systems and implementation issues. Prerequisite: ECE 6015.

ECE 6520. Mobile and Wireless Communication Systems. 3 Credits.
Characterization of mobile and wireless channels. Indoor and outdoor path loss models. Multipath propagation. Fading. Fading countermeasures (coding and equalization). Power control. Cellular design and frequency reuse. Modulation and coding techniques. Spread spectrum and orthogonal frequency-division multiplexing (OFDM). Space-code division multiple access (SCDMA), multiple-input and multiple-output (MIMO). Prerequisite: ECE 6510. (Fall, Odd Years).

ECE 6525. Satellite Communication Systems. 3 Credits.
Low earth orbit and geostationary satellite systems; transmission systems; RF link budgets; modulation and multiplexing; multiple access techniques, including FDMA, TDMA, and CDMA; satellite transponders, antennas, and earth stations. Prerequisite: ECE 6510. (Fall, odd years).

ECE 6530. Electronic Warfare. 3 Credits.
Electronic attack and protection of information. Countermeasures and counter-countermeasures. Electronic attacks on ranging and tracking radar systems; jamming and jamming defense. Electronic attack on communications systems. Defensive techniques, signal design, spread spectrum. Attack and defense of optical and high-energy systems. Prerequisite: ECE 6510. (Fall and Spring, Every Year).

ECE 6550. Advanced Network Architectures. 3 Credits.
Review of packet and circuit switching. Local access networks: digital subscriber lines. High-speed wide area networks: Frame relay, asynchronous transfer mode, and synchronous optical network. Multi-protocol label switching. Network layer protocols. Network management systems. Prerequisite: ECE 6035. (Spring, Every Year).

ECE 6555. Networks Protocols. 3 Credits.
Layering, OSI, and Internet architectures. Link–layer protocols: PPP, HDLC, SONET. Cell-switching, ATM, and adaptation protocols. MAC layer protocols: Ethernet, 802.11. IP addressing, routing protocols: RIP, OSPF. Multi-domain routing: CIDR, BGP. End-to-end protocols: UDP, TCP. TCP congestion control. Application layer protocols: DNS, HTTP, SMTP, FTP. Prerequisite: ECE 6035. (Fall and Spring, Every Year).

ECE 6560. Network Performance Analysis. 3 Credits.
Telecommunications traffic models: arrival and service time distributions, Poisson and Erlang formulas. Topological design algorithms. Delay and blocking models and probabilities for packet switched networks. Routing, relaying, and flow control algorithms: delay and cost minimization, throughput optimization. Prerequisite: ECE 6015, ECE 6035. (Fall, Every Year).

ECE 6565. Telecommunications Security. 3 Credits.
Speech and data scrambling. Linear and nonlinear transformations. Cryptographic techniques. Block and stream ciphers. The Data Encryption Standard (DES). Key management, digital signatures, message authentication, hash functions. Public key algorithms. Prerequisite: graduate standing in science or engineering or consent of instructor.

ECE 6570. Telecommunications Security Protocols. 3 Credits.
The OSI security architecture: services and mechanisms, risk analysis. Internet protocol mechanisms. Ipv4 and Ipv6 security, security associations, authentication, MD5. Encapsulating security payload. E-mail security: PGP, S/MIME, PEM, MSP. Secure voice communications algorithms. Security in Internet commerce: SSL, SET. Prerequisite: ECE 6565.

ECE 6575. Optical Communication Networks. 3 Credits.
Wave propagation through fiber, dispersion, polarization. Multiplexing techniques, WDM. Optical networking components. Optical transmission systems design. All-optical networking, broadcast star and wavelength routing networks. Performance analysis, survivability, control and management. Optical access networks. Prerequisite: APSC 3115.

ECE 6580. Wireless Networks. 3 Credits.
Telecommunications traffic models: arrival and service time distributions, Poisson and Erlang formulas. Topological design algorithms. Delay and blocking models and probabilities for packet switched networks. Routing, relaying, and flow control algorithms: delay and cost minimization, throughput optimization. Prerequisite: ECE 6015, ECE 6035. (Fall, Every Year).

ECE 6610. Electrical Energy Conversion. 3 Credits.
Three-phase and single-phase AC rotating machines and transformers, DC machines, rotating machines as circuit elements, power semiconductor converters. Renewable generation, utility grid integration, smart grid applications. May be taken for graduate credit by students in fields other than electrical engineering. Prerequisites: ECE 2210, ECE 3315. (Same as ECE 4610) (Spring, Every Year).

ECE 6620. Electrical Power Systems. 3 Credits.
AC power grids, transmission line parameters, load flow, economic dispatch voltage, frequency, and power flow control. Voltage, current, and power limitations. Fault analysis and stability considerations. Effect of independent power producers and variable energy sources and energy storage. (Same as ECE 4620) (Fall, Every Year).

ECE 6662. Power Electronics. 3 Credits.
The application of electronics to energy conversion. Principles of operation, analysis, and control of circuits including solid-state electronic switches. Methods of solving power electronic circuits and finding the steady-state values of important quantities. Deriving the linear model of the studied power electronic circuits and designing controllers for these devices. A general knowledge of electric circuits and linear control theory is required. (Spring, Every Year).

ECE 6666. Power System Transmission, Control, and Security. 3 Credits.
Analysis of AC networks, load flow, economic dispatch, voltage and frequency control. N-1 contingency and its role in assessing and maintaining system integrity. Analysis of loss of critical generating units and transmission capabilities under severe threats. Rapid restoration techniques based on historical data and heuristic approaches. Prerequisite: ECE 6620. (Spring, Odd Years).

ECE 6667. Nuclear Power Generation. 3 Credits.
Review of nuclear reactor engineering, traditional and developing reactor design, issues regarding the safe operation of nuclear plant, and control and regulatory aspects of nuclear power generation. Prerequisites: ECE 6620 or permission of the instructor. (Fall, Even Years).

ECE 6668. Power Distribution Grids. 3 Credits.
Equipment for power distribution for industrial, commercial, and residential applications. Switching and safety at the distribution voltage level. Bulk insulation level and insulation coordination principles. Smart grid innovations. Remote metering. Prerequisites: ECE 4620 or permission of course director. (Fall, odd years).

ECE 6669. Smart Power Grids. 3 Credits.
Review of power systems and elements of smart grids; wide-area monitoring (WAMS) and advanced metering infrastructure (AMI); communication and networking architecture (SCADA, Zigbee, PLC, GSM), standards and reliability aspects; state estimation; synchrophasors and their applications; demand response; distributed energy resources (DER) and microgrids; power electronic interface of DER units; switching techniques of inverters; control of DER units; control of microgrids; and electric vehicles. (Fall, Odd Years).

ECE 6670. Power System Protection. 3 Credits.
Main philosophy for protection of power systems. Protection systems and approaches; reliability and security of protection systems; protection of generators, transformers, motors and transmission lines; requirements for distributed source generation (DSG); and requirements for system protection to prevent grid blackouts and enhance power system security. Prerequisite: ECE 6620 or permission of instructor. (Spring, Even Years).

ECE 6690. Power Systems Economics. 3 Credits.
Overview of electrical power market economics and market participants. Production pricing and market clearing pricing. Market ancillary service pricing. Location marginal pricing and zonal pricing schemes. New electrical generation entrant impact. Investing in generation and in transmission. Independent power producers and independent transmission owners. Prerequisites: ECE 6060 or permission of course director. (Fall).

ECE 6691. Power Systems Reliability. 3 Credits.
Overview of probability theory and basic power market reliability modeling and evaluation; generation supply reliability techniques; reliability of transmission system and delivery of supply; loss of load probability evaluation; forced and maintenance outages; load forecasting and probability of interconnected systems; risk evaluation and operating reserves. Prerequisite: ECE 6620 or permission of the instructor. (Spring, Even Years).

ECE 6699. Energy and Sustainability. 3 Credits.
Energy sources, consumption, and the societal and environmental impacts. Energy generation and harvesting technology. Thermodynamics and efficiency limits. Nanotechnology for sustainability. Emission and pollution. Growth models; learning curves. Life-cycle analysis. Energy in an international perspective: origins, crises, and solutions. Recommended background: Basic understanding of energy and thermodynamics, such as ECE 4620, MAE 2131, or with permission from the course director. (Fall, even years).

ECE 6705. Introduction to Microwave Engineering I. 3 Credits.
Transmission lines, scattering parameters, microwave networks, resonators. Modes in uniform waveguides, general characteristics of waveguide junctions. Transfer representations, filters, couplers, symmetrical waveguide junctions. Prerequisite: ECE 6020.

ECE 6710. Microwave Engineering. 3 Credits.
Transmission line theory, transmission lines and waveguides, waveguide discontinuities, microwave networks, impedance matching and tuning, microwave resonators, power dividers and directional couplers, and microwave filters and active microwave circuits. (Fall, Even Years).

ECE 6715. Antennas. 3 Credits.
Antenna circuits, radiation pattern, reciprocity, gain, receiving cross-section, scattering by antennas, mutual coupling, arrays. Polarization. Radiation from current distributions, equivalent aperture currents, dipoles, patch antennas, large phased arrays. Prerequisites: ECE 6020.).

ECE 6720. Remote Sensing. 3 Credits.
Active and passive remote-sensing systems: scatterometers, real-aperture imaging, and synthetic-aperture radars. Sensing of surface, subsurface, and atmospheric parameters at microwave, infrared, and optical frequencies. Analysis of radiometric techniques using radiative transport theory, inverse scattering methods, profile inversion. Prerequisite: ECE 6020.

ECE 6725. Electromagnetic Radiation and Scattering. 3 Credits.
Alternative representations of solutions to Maxwell equations, Fourier transforms and spherical mode representations, field equivalence principles, dyadic Green's functions, radiation and scattering by simple shapes, geometrical theory of diffraction, integral equations and the moment method. Prerequisite: ECE 6020, ECE 6025.

ECE 6730. Waves in Random Media. 3 Credits.
Propagation and scattering of electromagnetic, optical, and acoustic waves in random media, scattering from rough surfaces and randomly distributed particles, turbulence. Applications to propagation through rain and fog. Laser beam scintillations, remote sensing, and communications channel modeling. Monte Carlo simulation. Prerequisite: ECE 6015, ECE 6725.

ECE 6735. Numerical Electromagnetics. 3 Credits.
Systematic discussion of useful numerical methods in computational electromagnetics, including integral equation techniques and differential equation techniques, both in the frequency and time domains. Hands-on experience with numerical techniques, including the method of moments, finite element and finite-difference time-domain methods, and spectral integral methods. Related numerical issues such as accuracy, stability, and dispersion are discussed. Examples are drawn from various electromagnetic applications such as nanowires, waveguides, and antenna radiation. Prerequisite: ECE 6020. (Fall, Odd Years).

ECE 6745. Analysis of Nonlinear and Multivalued Devices. 3 Credits.
Numerical techniques for modeling semiconductor and magnetic devices. Modeling multivalued behavior of memory materials. Optimization of geometry. Prerequisite: ECE 6020.

ECE 6750. Introduction to Radar Systems. 3 Credits.
The radar range equation. Radar cross section of targets, target detection and parameter estimation, detection in clutter. Resolution, ambiguities, and signal design. Moving-target indicators. Pulse Doppler radar. Radar antennas, phased arrays. Synthetic aperture and space-based radar. Prerequisite: ECE 4320, ECE 6015.

ECE 6760. Propagation Modeling in Wireless Communications. 3 Credits.
Wireless communication channel modeling, propagation mechanisms, terrestrial fixed links, satellite fixed links, macrocells, fading models, micro-cells, picocells, diversity, equalizers. Prerequisite: ECE 6020 or permission of instructor.

ECE 6765. Photonics and Fiber Optics. 3 Credits.
Concepts of opto-electronic devices. Light-matter-interaction and absorption. Device details and applications, including laser, photodetector, and modulators. Optical cavity. Waveguides and optical fibers. Device and link considerations include energy-per-bit, modulation speed, and nano fabrication. Plasmonics and nanophotonics. Industry perspective. (Fall, Odd Years).

ECE 6770. Applied Magnetism. 3 Credits.
Classification of magnetic materials. Magnetic measurements. Soft and hard magnetic materials. Applications to microwave, magnetic recording, permanent magnets, magneto-optics, magnetostrictive devices. Magnetic sensors. Electric power. Superconducting devices. Prerequisite: ECE 6020.

ECE 6800. Computational Techniques in Electrical Engineering. 3 Credits.
Introduction to linear algebra and vector spaces as applied to networks and electrical systems. Orthogonal bases, projections, and least squares. Fast Fourier transforms. Eigenvalues and eigenvectors with applications. Computations with matrices. Constrained optimization in electrical systems. Network models and applications. Prerequisite: ECE 2210, APSC 2114.

ECE 6810. Speech and Audio Processing by Computer. 3 Credits.
Acoustic sensor technologies and characteristics. Speech coding: waveform coding, voice source coding. Speech enhancement and noise reduction. Speech analysis and synthesis, audio formats and compression standards. Speech recognition: isolated word recognition, continuous speech recognition, language identification. Models for speech and audio. Prerequisite: graduate standing.

ECE 6815. Microarchitect/Multimedia Proc. 3 Credits.
Introduction to multimedia. Multimedia formats, conversion, and combinations. Delivery and trends. Servers and networks. Hardware and architecture. End-user devices. Digital libraries, video conferencing and collaboration. Educational and health applications. Case studies and trials. Prerequisite: ECE 6005.

ECE 6820. Real Time DSP. 3 Credits.
Digital signals, binary number representation, fixed-point and floating-point DSP architectures. Q-format for data representation, bit allocation and arithmetic. Portability of arithmetic expressions: floating point vs. fixed point. Applications to signal parameter estimation, signal generation, filtering, signal correlation, spectral estimation (FFT). Prerequisite: ECE 6005. Recommended background: Basic knowledge of computer architecture and DSP algorithms; knowledge of C programming language, assembly language and Matlab is desirable. (Fall and Spring, Every Year).

ECE 6825. Computer Control Systems. 3 Credits.
Analysis of automatic control systems in which the control procedure uses on-line digital computation. Topics include single- and multirate sampling, z-transforms, responses of discrete systems, stability criteria, and discrete control design. Prerequisite or concurrent registration: ECE 6010.

ECE 6830. System Optimization. 3 Credits.
Parameter optimization problems, theory of minima and maxima. Optimization problems for dynamic systems, calculus of variations, the maximum principle and the Hamilton–Jacobi equation. Optimization problems with constraints, optimal feedback systems. Numerical solution of optimal problems. Prerequisite: ECE 6010.

ECE 6835. Nonlinear Systems. 3 Credits.
Definition of linear and nonlinear systems; introduction to approximate analysis of nonlinear systems—describing functions, Krylov and Bogoliubov asymptotical method, and Tsypkin locus. Forced oscillations—jump resonance. Stability analysis—Liapunov criterion. Luré problem and Popov method. Prerequisite: ECE 6010.

ECE 6840. Digital Image Processing. 3 Credits.
Properties of images and visual systems. Image acquisition, sampling, quantization. One- and two-dimensional image transform techniques; enhancement and restoration. Image coding and data compression. Segmentation, representation, boundary and shape, texture, matching. Image understanding. Prerequisite: ECE 6800.

ECE 6842. Image Engineering. 3 Credits.
Sensor/camera design and analysis as a system. Detection and noise processes underlying the sensing of optical radiation; the engineering and physics of image formation. Topics covered include radiometry/photometry, optics and image formation, device and camera characterization, and image quality metrics and system design trades. Prerequisites: ECE 6010, ECE 6015. (Fall, even years).

ECE 6845. Image Synthesis. 3 Credits.
Image synthesis techniques, mathematical image models, image reconstruction techniques, color texture synthesis, synthesis of three-dimensional scenes. Prerequisite: ECE 6015.

ECE 6850. Pattern Recognition. 3 Credits.
Random vectors, transformations. Hypothesis testing, error probability, sequential methods. Bayes, other linear classifiers. Discriminant functions, parameter estimation, learning, and dimensionality reduction. Nonparametric methods; clustering; feature selection and ordering. Computer applications and projects. Prerequisite: ECE 6015.

ECE 6855. Digital Signal Processing. 3 Credits.
Signal and system representation, sampling and quantization, transform techniques. Recursive and nonrecursive digital filter design, recursive estimation, linear predictive filtering. Fast algorithms for signal processing. Current topics. Prerequisites: ECE 3220 or ECE 6025, and ECE 6015.).

ECE 6860. Compression Techniques for Data, Speech, and Video. 3 Credits.
Lossless and lossy coding theorems, rate distortion bound. Data compression algorithms: Huffman coding, run-length coding. Differential coding. Transform coding. Voice, audio, image and video coding techniques: CELP, JPEG, MPEG, MP3. Data coding standards: G.722, G.726, G.728, H.261, H.323. Prerequisite: ECE 6015, ECE 6025.

ECE 6865. Statistical Signal Estimation. 3 Credits.
Minimum variance unbiased estimation. Cramer–Rao bound, statistical modeling, sufficient statistics, maximum likelihood estimation, efficient estimators, and least squares. Bayesian estimators. Wiener and Kalman filters, complex data and parameters. Applications to radar, speech, image, biomedicine, and communications, control. Prerequisites: ECE 6010, ECE 6015, and ECE 6025. (Fall, Even Years).

ECE 6875. Wavelets and Their Applications. 3 Credits.
Time-frequency analysis. Continuous, discrete, and discrete-time wavelet transform. Multirate filter banks. Multiband wavelets, two-dimensional wavelets. Wavelet packets and matching pursuit. Wavelets in noise filtering, compression, modeling of fractals, communications, detection, adaptive systems, neural networks, and fast computation. Prerequisite: ECE 6025, ECE 6855.

ECE 6880. Adaptive Signal Processing. 3 Credits.
Adaptation criteria. On-line adaptive filtering algorithms: least mean square and recursive least square. Adaptation in transform domain. Convergence of adaptive algorithms and tracking. Applications in system identification, adaptive channel equalization, interference cancellation and suppression, and adaptive antenna arrays. Blind deconvolution. Prerequisite: ECE 6865.

ECE 6885. Computer Vision. 3 Credits.
Image processing; edge detection, segmentation, local features, shape and region description in 2D and 3D. Insights from human vision studies. Representation for vision: object models, synthetic images, matching, gaps, algorithms. Interference, production system, syntactic networks. Planning spatial reasoning for robot vision. Prerequisite: CSCI 6511; ECE 6850.

ECE 6998. Thesis Research. 3 Credits.

ECE 6999. Thesis Research. 3 Credits.

ECE 8150. Advanced Topics in Computer Architecture. 3 Credits.
Examples of topics are interconnection networks, fault tolerance, load balancing, workload characterization, and performance modeling of advanced computer systems. Prerequisite: ECE 6120, ECE 6125.

ECE 8999. Dissertation Research. 0-12 Credits.
Limited to Doctor of Philosophy candidates. May be repeated for credit.

BACHELOR OF SCIENCE WITH A MAJOR IN COMPUTER ENGINEERING

Computer engineering combines electronic design, computer architecture, programming of computing systems, computer networks, and applied mathematics. The bachelor of science with a major in computer engineering degree program prepares students in the theory and application of hardware and software design, computer networks, embedded systems, and very large scale integrated (VLSI) circuit design and applications. Students may take electives in advanced topics such as optical networks, broadband wireless networks, and technologies for the next generation of information systems.

Visit the program website (http://www.ece.seas.gwu.edu/bachelor-science-computer-engineering) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

Code	Title	Credits
First semester		
CHEM 1111	General Chemistry I [1]	
ECE 1010	Introduction to Electrical and Computer Engineering	
MATH 1231	Single-Variable Calculus I [1]	
SEAS 1001	Engineering Orientation	
UW 1020	University Writing [1]	
Humanities or social sciences elective [2]		
Second semester		
CSCI 1311	Discrete Structures I	
ECE 1020	Introduction to Electrical and Computer Engineering	
ECE 1120	C Programming for ECE	
MATH 1232	Single-Variable Calculus II [1]	
PHYS 1021	University Physics I [1]	
Humanities or social sciences elective [2]		
Third semester		
APSC 2113	Engineering Analysis I	
ECE 1125	Data Structures&Algorithms ECE	
ECE 2110	Circuit Theory	
ECE 2120	Engineering Seminar	
MATH 2233	Multivariable Calculus [1]	
PHYS 1022	University Physics II [1]	
Fourth semester		
APSC 3115	Engineering Analysis III	
ECE 2115	Engineering Electronics	
ECE 2140	Design of Logic Systems I	
ECE 2210	Circuits, Signals, and Systems	
Humanities or social sciences elective [2]		
Fifth semester		

CSCI 3411	Operating Systems
ECE 3130	Digital Electronics and Design
ECE 3220	Intro to Digital Signal Proces
ECE 3515	Computer Organization
ECE 3520	Microprocessors: Software, Hardware, and Interfacing
Sixth semester	
ECE 3135	Design of Logic Systems II
ECE 3310	Introduction to Electromagnetics
ECE 3415	Introduction to Computer Networks
ECE 3425	Data Communications Laboratory
ECE 3525	Introduction to Embedded Systems
ECE 3915	Electrical, Computer, and Biomedical Engineering Capstone Project Lab I
Humanities or social sciences elective [2]	
Seventh semester	
ECE 4140	VLSI Design and Simulation
ECE 4535	Computer Architecture and Design
ECE 4920	Electrical, Computer, and Biomedical Engineering Capstone Project Lab II
Humanities or social sciences elective [2]	
Technical elective [3]	
Eighth semester	
ECE 4150	ASIC Design and Testing of VLSI Circuits
ECE 4925	Electrical, Computer, and Biomedical Engineering Capstone Project Lab III
PHIL 2135	Ethics in Business and the Professions
Two technical electives [3]	

[1] Course satisfies the university general education requirement in math, science, and writing.

[2] At least two social and behavioral sciences courses must be selected from the University General Education Requirement list; (p. 38) the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list (p. 38); the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list. (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf)

[3] Three 3-credit technical courses must be chosen with the approval of the advisor from advanced undergraduate or graduate courses in engineering, computer science, mathematics, physical sciences, or biological sciences. At least one of the technical electives must be an upper-level math or science course.

BACHELOR OF SCIENCE WITH A MAJOR IN ELECTRICAL ENGINEERING

Electrical engineers design the enabling technology for all applications of electricity; examples include energy, telecommunications, the Internet, biomedical instrumentation, and electromagnetic applications. The bachelor of science with a major in electrical engineering degree program focuses on signal processing; communication theory and practice; voice, data, video and multimedia communication networks; very large scale integrated (VLSI) circuit design and applications; and control and power systems. Students can take electives in advanced topics, such as optical networks, broadband wireless networks, and technologies for the next generation of information systems.

Visit the program website (http://www.ece.seas.gwu.edu/bachelor-science-electrical-engineering) for additional information.

REQUIREMENTS

Recommended program of study

First semester	
CHEM 1111	General Chemistry I *
ECE 1010	Introduction to Electrical, Computer, and Biomedical Engineering
MATH 1231	Single-Variable Calculus I *
SEAS 1001	Engineering Orientation
UW 1020	University Writing *
Humanities or social sciences elective **	
Second semester	
ECE 1020	Introduction to Electrical, Computer, and Biomedical Engineering

ECE 1120	C Programming for ECE
MATH 1232	Single-Variable Calculus II *
PHYS 1021	University Physics I *
Two humanities or social sciences electives **	
Third semester	
APSC 2113	Engineering Analysis I
ECE 1125	Data Structures&Algorithms ECE
ECE 2110	Circuit Theory
ECE 2120	Engineering Seminar
MATH 2233	Multivariable Calculus *
PHYS 1022	University Physics II *
Fourth semester	
APSC 2114	Engineering Analysis II
ECE 2115	Engineering Electronics
ECE 2140	Design of Logic Systems I
ECE 2210	Circuits, Signals, and Systems
Humanities or social sciences elective **	
Fifth semester	
APSC 3115	Engineering Analysis III
ECE 3130	Digital Electronics and Design
ECE 3220	Intro to Digital Signal Proces
ECE 3315	Fields and Waves I
ECE 3520	Microprocessors: Software, Hardware, and Interfacing
Sixth semester	
ECE 3125	Analog Electronics Design
ECE 3135	Design of Logic Systems II
ECE 3410	Communications Engineering
ECE 3915	Electrical, Computer, and Biomedical Engineering Capstone Project Lab I
ECE 4320	Fields and Waves II
Seventh semester	
ECE 4710	Control Systems Design
ECE 4920	Electrical, Computer, and Biomedical Engineering Capstone Project Lab II
Technical elective	
Two ECE restricted electives	
Eighth semester	
ECE 4610	Electrical Energy Conversion
ECE 4925	Electrical, Computer, and Biomedical Engineering Capstone Project Lab III
PHIL 2135	Ethics in Business and the Professions
Two technical electives	
Humanities or social sciences elective **	

*Course satisfies the university general education requirement in math, science, and writing.
**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list; the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list.

The Electrical and Computer Engineering electives must be selected from upper level ECE courses. Three 3-credit technical courses must be chosen with the approval of the advisor from advanced undergraduate or graduate courses in engineering, computer science, mathematics, physical sciences, or biological sciences.

Visit the program website (http://www.ece.seas.gwu.edu/bachelor-science-electrical-engineering) for additional information.

BACHELOR OF SCIENCE WITH A MAJOR IN ELECTRICAL ENGINEERING, ENERGY OPTION

The bachelor of science with a major in electrical engineering, energy option degree program energy option prepares students to work in technical energy fields such as electric utility companies and in research into improved methods of generation, transmission, and distribution of electrical energy.

Visit the program website (http://www.ece.seas.gwu.edu/bachelor-science-electrical-engineering) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

Code	Title	Credits
First semester		
CHEM 1111	General Chemistry I [1]	
ECE 1010	Introduction to Electrical and Computer Engineering	
MATH 1231	Single-Variable Calculus I [1]	
UW 1020	University Writing [1]	
SEAS 1001	Engineering Orientation	
Humanities or social sciences elective [2]		
Second semester		
ECE 1020	Introduction to Electrical and Computer Engineering	
ECE 1120	C Programming for ECE	
MATH 1232	Single-Variable Calculus II [1]	
PHYS 1021	University Physics I [1]	
Two humanities or social sciences electives [2]		
Third semester		
APSC 2057	Analytical Mechanics I	
APSC 2113	Engineering Analysis I	
ECE 2110	Circuit Theory	
ECE 2120	Engineering Seminar	
MATH 2233	Multivariable Calculus [1]	
PHYS 1022	University Physics II [1]	
Fourth Semester		
APSC 2058	Analytical Mechanics II	
APSC 2114	Engineering Analysis II	
ECE 2115	Engineering Electronics	
ECE 2210	Circuits, Signals, and Systems	
ECE 2140	Design of Logic Systems I	
Fifth Semester		
APSC 3115	Engineering Analysis III	
ECE 3130	Digital Electronics and Design	
ECE 3220	Intro to Digital Signal Proces	
ECE 3315	Fields and Waves I	
ECE 3520	Microprocessors: Software, Hardware, and Interfacing	
Sixth Semester		
ECE 3125	Analog Electronics Design	
ECE 3915W	Electrical and Computer Engineering Capstone Project Lab I	
ECE 4320	Fields and Waves II	
MAE 2131	Thermodynamics	
MAE 3134	Linear System Dynamics	
Humanities or social sciences elective [2]		
Seventh Semester		
ECE 4620	Electrical Power Systems	
ECE 4710	Control Systems Design	
ECE 4920W	Electrical and Computer Engineering Capstone Project Lab II	
Humanities or social sciences elective [2]		
Technical elective [3]		
Eighth Semester		
ECE 3410	Communications Engineering	
ECE 4610	Electrical Energy Conversion	
ECE 4625	Power Electronics	
ECE 4925W	Electrical and Computer Engineering Capstone Project Lab III	
PHIL 2135	Ethics in Business and the Professions	

[1] Course satisfies the university general education requirement in math, science, and writing.

[2] At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list; the remaining courses must be selected from

either the University General Education Requirement list or the SEAS General Education Requirement list.

[3] Technical electives must be chosen with the approval of the advisor from advanced undergraduate or graduate courses in engineering, computer science, mathematics, physical sciences, or biological sciences.

Visit the program website (http://www.ece.seas.gwu.edu/bachelor-science-electrical-engineering) for additional information.

BACHELOR OF SCIENCE WITH A MAJOR IN ELECTRICAL ENGINEERING, MEDICAL PREPARATION OPTION

The bachelor of science with a major in electrical engineering, medical preparation option degree program prepares students for application to medical school. Student also are prepared to work in various health sciences fields, to conduct research toward development of electronic equipment to assist in diagnosing and treating disease, or to continue as a graduate student in engineering with exceptional qualifications for biomedical engineering.

Visit the program website (http://www.ece.seas.gwu.edu/bachelor-science-electrical-engineering) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

Code	Title	Credits
First semester		
BISC 1111	Introductory Biology: Cells and Molecules	
CHEM 1111	General Chemistry I *	
ECE 1010	Introduction to Electrical and Computer Engineering	
MATH 1231	Single-Variable Calculus I *	
UW 1020	University Writing *	
SEAS 1001	Engineering Orientation	
Second semester		
CHEM 1112	General Chemistry II	
ECE 1020	Introduction to Electrical and Computer Engineering	
ECE 1120	C Programming for ECE	
MATH 1232	Single-Variable Calculus II *	
PHYS 1021	University Physics I *	
Third semester		
APSC 2113	Engineering Analysis I	
ECE 1125	Data Structures&Algorithms ECE	
ECE 2110	Circuit Theory	
ECE 2120	Engineering Seminar	
MATH 2233	Multivariable Calculus *	
PHYS 1022	University Physics II *	
Fourth Semester		
BISC 1112	Introductory Biology: The Biology of Organisms	
ECE 2115	Engineering Electronics	
ECE 2140	Design of Logic Systems I	
ECE 2210	Circuits, Signals, and Systems	
Humanities or social sciences elective **		
Fifth Semester		
APSC 3115	Engineering Analysis III	
CHEM 2151	Organic Chemistry I	
CHEM 2153	Organic Chemistry Laboratory I	
ECE 3130	Digital Electronics and Design	
ECE 3220	Intro to Digital Signal Proces	
ECE 3520	Microprocessors: Software, Hardware, and Interfacing	
Sixth Semester		
CHEM 2152	Organic Chemistry II	
CHEM 2154	Organic Chemistry Laboratory II	
ECE 3125	Analog Electronics Design	
ECE 3310	Introduction to Electromagnetics	
ECE 3410	Communications Engineering	
ECE 3915W	Electrical and Computer Engineering Capstone Project Lab I	
Humanities or social sciences elective **		

Seventh Semester	
BME 3820	Principles and Practice of Biomedical Engineering
ECE 4710	Control Systems Design
ECE 4920W	Electrical and Computer Engineering Capstone Project Lab II
Technical elective	
Humanities or social sciences elective **	
Eighth Semester	
ECE 4925W	Electrical and Computer Engineering Capstone Project Lab III
PHIL 2135	Ethics in Business and the Professions
Technical elective	
Two humanities or social sciences electives **	

*Course satisfies the university general education requirement in math, science, and writing.
**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list; the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list.

Technical courses must be chosen with the approval of the advisor from advanced undergraduate or graduate courses in engineering, computer science, mathematics, physical sciences, or biological sciences.

Visit the program website (http://www.ece.seas.gwu.edu/bachelor-science-electrical-engineering) for additional information.

MINOR IN COMPUTER ENGINEERING

REQUIREMENTS

The minor in computer engineering is offered by the department of electrical and computer engineering. The curriculum consists of prerequisite courses, core courses, and elective courses. The total number of credit hours beyond the prerequisites is 18, out of which at least 9 credit hours are from the courses not required for the major.

The following requirements must be fulfilled:

Code	Title	Credits
Prerequisites		
The following courses must be completed before beginning the minor program.		
PHYS 1022	University Physics II *	
ECE 1120	C Programming for ECE	
APSC 2113	Engineering Analysis I *	
Required		
ECE 2110	Circuit Theory	
ECE 2115	Engineering Electronics	
ECE 2140	Design of Logic Systems I	
Electives		
Two of the following:		
ECE 3310	Introduction to Electromagnetics	
ECE 3220	Intro to Digital Signal Proces *	
ECE 3130	Digital Electronics and Design	
ECE 4140	VLSI Design and Simulation *	
ECE 3520	Microprocessors: Software, Hardware, and Interfacing	
ECE 3525	Introduction to Embedded Systems *	
ECE 3515	Computer Organization	
ECE 4535	Computer Architecture and Design *	
* These courses require additional preqrequisites.		

MINOR IN ELECTRICAL ENGINEERING

REQUIREMENTS

The minor in electrical engineering is offered by the department of electrical and computer engineering. The curriculum consists of prerequisite courses, core courses, and elective courses. The total number of credit hours beyond the prerequisites is 17, out of which at least 9 credit hours are from the courses not required for the major.

The following requirements must be fulfilled:

Code	Title	Credits
Prerequisites		
The following courses must be completed before beginning the minor program.		
PHYS 1022	University Physics II	
APSC 2113	Engineering Analysis I	
Required		
ECE 2110	Circuit Theory	
ECE 2115	Engineering Electronics	
ECE 2210	Circuits, Signals, and Systems	
Electives		
Two of the following:		
ECE 3220	Intro to Digital Signal Proces	
ECE 3125	Analog Electronics Design	
ECE 3130	Digital Electronics and Design *	
ECE 3315	Fields and Waves I *	
ECE 3410	Communications Engineering *	
ECE 3415	Introduction to Computer Networks *	
ECE 3520	Microprocessors: Software, Hardware, and Interfacing *	
ECE 4610	Electrical Energy Conversion	
ECE 4620	Electrical Power Systems	
ECE 4710	Control Systems Design *	

* These course have additional prerequisites.

MASTER OF SCIENCE IN THE FIELD OF COMPUTER ENGINEERING

The master of science in the field of computer engineering degree program provides students with the latest knowledge and skills training to address contemporary advances in computer systems architecture and networking. It also addresses the rapidly growing use of superscalar microprocessors, real-time embedded systems, VLSI and ASIC design modules, digital signal processors, and networked computing platforms.Students learn sophisticated computer architecture and integrated circuit design techniques using industry-standard computer-aided design tools and choose between two areas of focus: computer architecture and high-performance computing or microelectronics and VLSI systems.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://www.ece.seas.gwu.edu/master-science-computer-engineering) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 15 credits in required courses and 15 credits in elective courses. Thesis and non-thesis options are available. Students should contact the department concerning these options.

Students select one of the areas of focus leading to the Master of Science degree including computer architecture and high-performance computing, and MEMS, electronics, and photonics.

Computer Architecture and High-Performance Computing

Code	Title	Credits
Required		
ECE 6005	Microcomputer Systems Architecture	
ECE 6065	Colloquium	
4 of the following:		
ECE 6105	Introduction to High-Performance Computing	
ECE 6120	Advanced Microarchitectures	
ECE 6125	Parallel Computer Architecture	
ECE 6130	Grid and Cloud Computing	
ECE 6140	Embedded Systems	
ECE 8150	Advanced Topics in Computer Architecture	
Electives		
15 credits in elective courses; normally, no more than two courses taken outside the Department of Electrical and Computer Engineering may be counted toward the requirements for the graduate degree		

Microelectronics and VLSI systems

Code	Title	Credits
Required		

ECE 6030	Device Electronics
4 of the following:	
ECE 6213	Design of VLSI Circuits
ECE 6214	High-Level VLSI Design Methodology
ECE 6215	Introduction to MEMS
ECE 6216	RF/VLSI Circuit Design
ECE 6218	Advanced Analog VLSI Circuit Design
ECE 6221	Introduction to Physical Electronics
ECE 6223	Introduction to Nanotechnology
ECE 6240	VLSI Design and Simulation
ECE 6245	
ECE 6250	ASIC Design and Testing of VLSI Circuits
ECE 6260	Introduction to Nanoelectronics
Electives	
15 credits in elective courses; normally, no more than two courses taken outside the Department of Electrical and Computer Engineering may be counted toward the requirements for the graduate degree	

Additional requirements are found on the Department of Electrical and Computer Engineering Master's Degree requirements (https://www.ece.seas.gwu.edu/masters-program-degree-requirements) webpage.

MASTER OF SCIENCE IN THE FIELD OF ELECTRICAL ENGINEERING

The master of science in the field of electrical engineering degree program is designed to help students understand and apply the principles of the field to diverse areas such as communications, power and energy, and micro- and nano-electronics. Students may choose from the following five areas of focus: communications and networks; electrical power and energy; applied electromagnetics; electronics, photonics, and MEMS; and signal and image processing, systems, and controls.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://www.ece.seas.gwu.edu/master-science-electrical-engineering) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including the number of required and elective credits determined by the selected focus area. Thesis and non-thesis options are available. Students should contact the department concerning these options.

Students select one of the following five areas of focus: communications and networks; electrical power and energy; applied electromagnetics; electronics, photonics, and MEMS; and signal and image processing, systems, and controls.

Communications and Networks

Code	Title	Credits
Required		
ECE 6015	Stochastic Processes in Engineering	
ECE 6035	Introduction to Computer Networks	
ECE 6510	Communication Theory I	
ECE 6065	Colloquium	
Two of the following:		
ECE 6500	Information Theory	
ECE 6505	Error Control Coding	
ECE 6520	Mobile and Wireless Communication Systems	
ECE 6525	Satellite Communication Systems	
ECE 6530	Electronic Warfare	
ECE 6550	Advanced Network Architectures	
ECE 6555	Networks Protocols	
ECE 6560	Network Performance Analysis	
ECE 6565	Telecommunications Security	
ECE 6570	Telecommunications Security Protocols	
ECE 6575	Optical Communication Networks	
ECE 6580	Wireless Networks	
Electives		
15 credits in elective courses.*		

Electrical Power and Energy

Code	Title	Credits
Required		

ECE 6010	Linear Systems Theory
ECE 6020	Applied Electromagnetics
ECE 6060	Electric Power Generation
ECE 6065	Colloquium
Three of the following:	
ECE 6025	Signals and Transforms in Engineering
ECE 6610	Electrical Energy Conversion
ECE 6620	Electrical Power Systems
ECE 6662	Power Electronics
ECE 6666	Power System Transmission, Control, and Security
ECE 6667	Nuclear Power Generation
ECE 6668	Power Distribution Grids
ECE 6669	Smart Power Grids
ECE 6670	Power System Protection
ECE 6690	Power Systems Economics
ECE 6691	Power Systems Reliability
Electives	

12 credits in elective courses.*

Applied Electromagnetics

Code	Title	Credits
Required		
ECE 6020	Applied Electromagnetics	
ECE 6065	Colloquium	
ECE 6710	Microwave Engineering	
ECE 6715	Antennas	
One of the following:		
ECE 6720	Remote Sensing	
ECE 6725	Electromagnetic Radiation and Scattering	
ECE 6730	Waves in Random Media	
ECE 6735	Numerical Electromagnetics	
ECE 6745	Analysis of Nonlinear and Multivalued Devices	
ECE 6750	Introduction to Radar Systems	
ECE 6760	Propagation Modeling in Wireless Communications	
ECE 6765	Photonics and Fiber Optics	
ECE 6770	Applied Magnetism	
Electives		

18 credits in elective courses.*

Electronics, Photonics, and MEMS

Code	Title	Credits
Required		
ECE 6030	Device Electronics	
ECE 6065	Colloquium	
Four of the following:		
ECE 6213	Design of VLSI Circuits	
ECE 6214	High-Level VLSI Design Methodology	
ECE 6215	Introduction to MEMS	
ECE 6216	RF/VLSI Circuit Design	
ECE 6218	Advanced Analog VLSI Circuit Design	
ECE 6221	Introduction to Physical Electronics	
ECE 6223	Introduction to Nanotechnology	
ECE 6240	VLSI Design and Simulation	
ECE 6245		
ECE 6250	ASIC Design and Testing of VLSI Circuits	
ECE 6260	Introduction to Nanoelectronics	
Electives		

15 credits in elective courses.*

Signal and Image Processing, Systems and Controls

Code	Title	Credits
Required		
ECE 6015	Stochastic Processes in Engineering	

ECE 6065	Colloquium
Four of the following:	
ECE 6005	Microcomputer Systems Architecture
ECE 6010	Linear Systems Theory
ECE 6025	Signals and Transforms in Engineering
ECE 6666	Power System Transmission, Control, and Security
ECE 6800	Computational Techniques in Electrical Engineering
ECE 6810	Speech and Audio Processing by Computer
ECE 6815	Multimedia Processing
ECE 6820	Real Time DSP
ECE 6825	Computer Control Systems
ECE 6830	System Optimization
ECE 6835	Nonlinear Systems
ECE 6840	Digital Image Processing
ECE 6842	Image Engineering
ECE 6845	Image Synthesis
ECE 6850	Pattern Recognition
ECE 6855	Digital Signal Processing
ECE 6860	Compression Techniques for Data, Speech, and Video
ECE 6865	Statistical Signal Estimation
ECE 6875	Wavelets and Their Applications
ECE 6880	Adaptive Signal Processing
ECE 6885	Computer Vision
Electives	
15 credits in elective courses.*	

*Normally, no more than two elective courses taken outside the Department of Electrical and Computer Engineering may be counted toward the requirements for the degree.

Additional requirements found on the Department of Electrical and Computer Engineering Master's Degree requirements (https://www.ece.seas.gwu.edu/masters-program-degree-requirements) webpage.

MASTER OF SCIENCE IN THE FIELD OF TELECOMMUNICATIONS ENGINEERING

The master of science in the field of telecommunications engineering degree program is designed for the practicing or aspiring telecommunications engineer. The program provides students with a foundation in the fundamentals of telecommunications engineering, including topics such as transmission systems, computer networking, network architectures and protocols, and telecommunications security protocols. In addition, students have the option to take courses on optical networking, wireless networking, and cloud computing.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://www.ece.seas.gwu.edu/master-science-telecommunications-engineering) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 15 credits in required courses, 15 credits in elective courses, and a zero-credit colloquium. Thesis and non-thesis options are available. Students should contact the department concerning these options.

Required	
ECE 6035	Introduction to Computer Networks
ECE 6065	Colloquium
ECE 6550	Advanced Network Architectures
ECE 6565	Telecommunications Security
ECE 6575	Optical Communication Networks
ECE 6580	Wireless Networks
Three of the following:	
ECE 6005	Microcomputer Systems Architecture
ECE 6015	Stochastic Processes in Engineering
ECE 6130	Grid and Cloud Computing
ECE 6560	Network Performance Analysis
ECE 6570	Telecommunications Security Protocols
Electives	

6 credits of electives

Additional requirements found on the Department of Electrical and Computer Engineering Master's Degree requirements (https://www.ece.seas.gwu.edu/masters-program-degree-requirements) webpage.

DOCTOR OF PHILOSOPHY IN THE FIELD OF COMPUTER ENGINEERING

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under School of Engineering, Doctoral Program Regulations (http://bulletin.gwu.edu/engineering-applied-science/#Doctor_of_Philosophy).

Students with an MS degree must take a minimum of 30 credits, of which at least 18 must be credits from courses available for graduate credit, and at least 12 must be dissertation research credits. The courses to be taken by the student must be approved by the student's advisor. Students with a BS degree must take a minimum of 54 credits, of which at least 36 must be credits from courses available for graduate credit, and at least 12 must be dissertation research credits. The courses to be taken by the student must be approved by the student's advisor. In some cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study exceeds the minimum number of credits.

No specific courses are required; the student and advisor design the curriculum to meet the student's needs and goals.

Other requirements

- Scholarship requirements–Students must have a minimum GPA of 3.4 at the time of graduation and a minimum grade of *B* in all courses that count toward the degree.
- Seminar requirement–Students must present one departmental seminar, excluding the dissertation defense, prior to graduation.
- Colloquium requirement–Students must attend five seminars, workshops, or symposia sponsored by the department in order to fulfill this zero-credit requirement.

Student should contact the department for additional information and requirements

DOCTOR OF PHILOSOPHY IN THE FIELD OF ELECTRICAL ENGINEERING

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under School of Engineering, Doctoral Program Regulations (http://bulletin.gwu.edu/engineering-applied-science/#Doctor_of_Philosophy).

Students with an MS degree must take a minimum of 30 credits, of which at least 18 must be credits from courses available for graduate credit, and at least 12 must be dissertation research credits. The courses to be taken by the student must be approved by the student's advisor. Students with a BS degree must take a minimum of 54 credits, of which at least 36 must be credits from courses available for graduate credit, and at least 12 must be dissertation research credits. The courses to be taken by the student must be approved by the student's advisor. In some cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study exceeds the minimum number of credits.

No specific courses are required; the student and advisor design the curriculum to meet the student's needs and goals.

Other requirements

- Seminar requirement–Students must present one departmental seminar, excluding the dissertation defense, prior to graduation.
- Colloquium requirement–Students must attend a minimum of five seminars, workshops, or symposia sponsored by the department in order to fulfill this zero-credit requirement.

Student should contact the department for additional information and requirements

GRADUATE CERTIFICATE IN HIGH-PERFORMANCE COMPUTING

The graduate certificate in the field of high-performance computing (HPC) program provides a mechanism for practicing interdisciplinary computational engineers and scientists to acquire up-to-date knowledge in the advances of computer systems, in particular, the rapidly growing use of multicore processors, parallel computers, hardware accelerators, and networked computing platforms in applications. The program is tailored to provide students with necessary knowledge in all aspects of high performance computing including programming, applications, performance, architectures, and systems.

The certificate program may serve as an alternative to a master of science degree program for professionals who may not have the time to commit to a full graduate degree program, but who wish to align their background with the rapid changes in computing technologies and to expand their education beyond the bachelor's degree. All courses taken as part of this program may be transferred to the Department of Electrical and Computer Engineering's M.S. and/or Ph.D. programs. While the HPC certificate can be coupled with a graduate degree program, interested students must be admitted to and complete the HPC certificate program separately.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://www.ece.seas.gwu.edu/graduate-certificate-high-performance-computing) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 6 credits in required courses and 6 credits in elective courses.

Required	
ECE 6105	Introduction to High-Performance Computing
At least one of the following:	
ECE 6125	Parallel Computer Architecture
ECE 6130	Grid and Cloud Computing
Electives	
Six additional credits from the following:	
CE 6210	Introduction to Finite Element Analysis
CE 6705	Nonlinear Finite Element Modeling and Simulation
CE 8330	Advanced Finite Element Analysis
CSCI 3571	Introduction to Bioinformatics
CSCI 4572	Computational Biology
CSCI 6421	Distributed and Cluster Computing
ECE 6005	Microcomputer Systems Architecture
ECE 6045	Special Topics
ECE 6050	Research
ECE 6120	High-Performance Processors
ECE 6140	Embedded Systems
ECE 6213	Design of Vlsi Circuits
ECE 6214	High-Level VLSI Design Methodology
ECE 6735	Numerical Electromagnetics
ECE 6800	Computational Techniques in Electrical Engineering
MAE 6225	Computational Fluid Dynamics
MAE 6291	Special Topics in Mechanical Engineering
PHYS 6130	Computational Physics I
PHYS 6230	Computational Physics II
PHYS 6330	Computational Physics III
PHYS 8110	Selected Topics in Theoretical Nuclear Physics

Credits taken for the certificate may be used towards a graduate degree, with academic advisor approval.

ENGINEERING MANAGEMENT AND SYSTEMS ENGINEERING

Mission Statement

The mission of the Department of Engineering Management and Systems Engineering is to deliver an integrated program of research, teaching, and public service to the technology community. The department develops creative leadership to bridge dynamic, complex technologies, and societal needs. This includes delivering instruction in the management of technology and in systems engineering, operations research, and allied fields to undergraduate and graduate students who are preparing to assume leadership roles as technology professionals. The department's programs provide an understanding of the managerial role, analysis of the diverse functions of technology-based organizations, and instruction in modern management and mathematical analysis and modeling tools as they apply to formulating and executing decisions in engineering and scientific organizations. In addition, research programs feature the study of the management of technology; fundamental and applied research in systems engineering and operations, with a particularly strong interest in stochastic analysis and system optimization; sponsorship from government, industry, and the technology community; and a strong presence in refereed professional journals and leadership in professional societies.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in applied science and technology (p. 667)
- Bachelor of Science with a major in systems engineering (p. 669)

Minor

- Minor in operations research (p. 671)
- Minor in systems engineering (p. 671)

GRADUATE

Master's programs

- Master of Engineering in the field of cybersecurity policy and compliance (online) (p.)
- Master of Science in the field of data analytics (p. 672)
- Master of Science in the field of engineering management (p. 673)
- Master of Science in the field of systems engineering (p. 674)

Doctoral program

- Doctor of Engineering in the field of engineering management (p. 675)
- Doctor of Philosophy in the field of engineering management (p. 676)
- Doctor of Philosophy in the field of systems engineering (p. 676)

CERTIFICATES

- Graduate certificate in emergency management and public health (p. 677)
- Graduate certificate in energy engineering and management (p. 699)
- Graduate certificate in engineering and technology management (p. 677)
- Graduate certificate in enterprise information assurance (p. 678)
- Graduate certificate in e (p. 678)nvironmental and energy systems management
- Graduate certificate in greenhouse gas management (p. 678)
- Graduate certificate in homeland security emergency preparedness and response (http://bulletin.gwu.edu/engineering-applied-science/engineering-management-systems-engineering/%20/engineering-applied-science/engineering-management-systems-engineering/homeland-security-emergency-preparedness-response-certificate)
- Graduate certificate in systems engineering (p. 679)

FACULTY

Professors J.P. Deason, J.R. van Dorp, T.A. Mazzuchi (*Chair*), B. Narahari, S. Sarkani

Associate Professors H. Abeledo, J.A. Barbera, M.R. Duffey, J.J. Ryan, J.R. Santos, G.L. Shaw

Assistant Professors D. Broniatowski, R.A. Francis, E. Gralla, E. Shittu, Z. Szajnfarber,

Professorial Lecturers R.M. Andersen, M.J. Armstrong, J.H. Chang, T.H. Holzer Jr., D.J. Ryan, J.V. Shah, J.S. Wasek, R.C. West

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

- Applied Sciences (APSC) (p. 1036)
- Engineering Management and Systems Engineering ((p. 1196)EMSE (p. 1196))

BACHELOR OF ARTS WITH A MAJOR IN APPLIED SCIENCE AND TECHNOLOGY

The bachelor of arts with a major in applied science and technology is a broad-based, engineering-oriented degree program that includes significant exposure to the liberal arts. It is designed for students who intend to make their careers in fields allied to science and technology and/or continue their education toward professional careers in law, medicine, business, teaching, or the media.

The program can be enhanced with a second major in either the Columbian College of Arts and Sciences (https://columbian.gwu.edu) or the Elliott School of International Affairs (http://elliott.gwu.edu). A second major in the School of Engineering and Applied Science also is possible.

Visit the program website (http://www.emse.seas.gwu.edu/bachelor-arts-applied-science-technology) for additional informational.

REQUIREMENTS

The following requirements must be fulfilled:

Code	Title	Credits
First semester		
CHEM 1111	General Chemistry I [1]	
EMSE 1001	Introduction to Systems Engineering	
SEAS 1001	Engineering Orientation	
MATH 1231	Single-Variable Calculus I [1]	
UW 1020	University Writing [2]	
Humanities or social sciences elective [3]		
Second semester		
CHEM 1112	General Chemistry II [1]	
CSCI 1121	Introduction to C Programming	
or CSCI 1112	Algorithms and Data Structures	
MATH 1232	Single-Variable Calculus II [1]	
Humanities or social sciences elective [3]		
Arts elective [4]		
Third semester		
CSCI 1132	Data Structures and Software Design	
or CSCI 1112	Algorithms and Data Structures	
PHYS 1011	General Physics I [1]	
or PHYS 1021	University Physics I	
Literature elective [5]		
Two unrestricted electives [6]		
Fourth semester		
APSC 3115	Engineering Analysis III	
EMSE 4410	Engineering Economic Analysis	
PHYS 1012	General Physics II [1]	
or PHYS 1022	University Physics II	
Literature elective [5]		
Unrestricted elective [6]		
Fifth semester		
BISC 1111	Introductory Biology: Cells and Molecules	
EMSE 3850	Quantitative Models in Systems Engineering	
COMM 1040	Public Communication [1]	
or COMM 1041	Interpersonal Communication	
or COMM 1042	Business and Professional Speaking	
MAE 1004	Engineering Drawing and Computer Graphics	
Allied minor elective [7]		
Sixth semester		
BISC 1112	Introductory Biology: The Biology of Organisms [1]	
ISTM 4121	Database Principles and Applications	
Humanities or social sciences elective [3]		
Two allied minor electives [7]		
Seventh semester		
MAE 3192	Manufacturing Processes and Systems	
EMSE 3740	Systems Thinking and Policy Modeling I	
EMSE 6005	Organizational Behavior for the Engineering Manager	
Allied minor elective [7]		
SEAS elective [8]		
Eighth semester		
CE 4330	Contracts and Specifications	
Allied minor elective [7]		
Humanities or social sciences elective [3]		
Three unrestricted electives [6]		

Electives

Students choose electives in specified categories from lists of courses available from the advisor. Allied minor electives are selected, with the approval of the advisor, to form a coherent and meaningful program of 15 credits. Popular selections include biology, communication, computer science, design, economics, engineering, environmental studies, finance, international business, management, mathematics, medical preparation, psychology, statistics, and operations research.

[1] Course satisfies the University General Education Requirement (http://bulletin.gwu.edu/university-regulations/general-education) in either mathematics or statistics, natural or physical laboratory sciences, or writing.

[2] Literacy (7 credits). UW 1020 (a required freshman writing course) and COMM 1040, COMM 1041, or COMM 1042. In addition to UW 1020, the student's academic program must include two writing#intensive courses to satisfy the GW Writing in the Disciplines (WID) requirement; one such course is CE 4330W.

[3] Humanities (6) and Social Sciences (6). two two#course sequences selected from the SEAS menu of electives in the humanities and social sciences.

[4] Creative and performing arts (3 credits). One of the following: ENGL 1210; FA 1014, FA 1017, FA 1021, or FA 1041; MUS 1103, MUS 1104, MUS 1107, MUS 1108, or performance study course; PHIL 3162; TRDA 1015, TRDA 1017, TRDA 1025, TRDA 1150, TRDA 1151, TRDA 1152, TRDA 1153, TRDA 1214, or an advanced performance course. Other choices are possible.

[5] Literature (6 credits). One two-course sequence selected from among CHIN 3111 and CHIN 3112; ENGL 1410 and ENGL 1411, ENGL 1510 and ENGL 1511, ENGL 1710 and ENGL 1711, or ENGL 1830 and ENGL 1840; FREN 3210 and FREN 3220; GER 2091 and GER 2092; JAPN 3111 and JAPN 3112; REL 1009 and REL 1010; SLAV 1391 and SLAV 1392; SPAN 3210 and SPAN 3220. Other choices are possible.

[6] Unrestricted (or "free") electives (18 credit). The academic advisor must approve the student's selection of unrestricted electives. If necessary, unrestricted electives may be used to satisfy prerequisite requirements for the allied minor. Such electives also may be used to convert the allied minor into an official minor or second major. Exercise and sport activities courses may not be used as unrestricted electives.

[7] Allied minor (15 credits). The student constructs a coherent program with the assistance of the academic advisor. Popular selections include biology, chemistry, business, communication, design, economics, engineering, environmental studies, finance, international business, management, mathematics, media, medical preparation, physics, psychology, public health, statistics, and operations research. The allied minor may be part of a second major in CCAS, ESIA, or SEAS, part of the concentration in general business, or part of an official minor.

[8] See the advisor for details.

BACHELOR OF SCIENCE WITH A MAJOR IN SYSTEMS ENGINEERING

The bachelor of science with a major in systems engineering degree program provides students with a broad and solid education in the basics of mathematical modeling, software and information systems, and the treatment of uncertainty. Systems engineering can be applied in many areas, including communications, energy, environment, finance, health care, information technology, marketing, national defense, project management, software development, and transportation. The program emphasizes analytical thinking and fosters communication skills and awareness of the current professional world in order to prepare students for graduate education or productive professional employment.

Visit the program website (http://www.emse.seas.gwu.edu/bachelor-science-systems-engineering) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

Code	Title	Credits
First semester		
EMSE 1001	Introduction to Systems Engineering	
MATH 1231	Single-Variable Calculus I [1]	
SEAS 1001	Engineering Orientation	
UW 1020	University Writing [2]	
Computing Track Elective [2]		
BISC 1111	Introductory Biology: Cells and Molecules	
or BISC 1112	Introductory Biology: The Biology of Organisms	
or CHEM 1111	General Chemistry I	
or CHEM 1112	General Chemistry II	
Second semester		
ECON 1011	Principles of Economics I [1]	
MATH 1232	Single-Variable Calculus II [1]	
PHYS 1021	University Physics I	
COMM 1042	Business and Professional Speaking	
Computing track elective [2]		
Third semester		
APSC 3115	Engineering Analysis III	
EMSE 2801	Fundamentals of Systems Engineering	
MATH 2233	Multivariable Calculus [1]	

PHYS 1022	University Physics II
Computing track elective [2]	
Fourth semester	
EMSE 2705	Mathematics in Operations Research
EMSE 3815	Requirements Analysis and Elicitation
EMSE 4765	Data Analysis for Engineers and Scientists
Computing track elective [2]	
Humanities or social sciences elective [3]	
Fifth semester	
APSC 2113	Engineering Analysis I
EMSE 3740W	Systems Thinking and Policy Modeling
EMSE 3850	Quantitative Models in Systems Engineering
EMSE 4755	Quality Control and Acceptance Sampling
Humanities or social sciences elective [3]	
Professional elective [4]	
Sixth semester	
EMSE 4770	Techniques of Risk Analysis and Management
EMSE 3820	Project Management for Engineering Systems
EMSE 3855W	Critical Infrastructure Systems
EMSE 4410	Engineering Economic Analysis
PHIL 2135	Ethics in Business and the Professions
Professional elective [4]	
Seventh semester	
EMSE 3760	Discrete Systems Simulation
EMSE 4190	Senior Project in Systems Engineering I
EMSE 4710	Applied Optimization Modeling
Humanities or social sciences elective [3]	
Professional elective [4]	
Eighth semester	
EMSE 4191	Senior Project in Systems Engineering II
Humanities or social sciences elective [3]	
Three professional electives [4]	

Code	Title	Credits
Computing track electives:		
Option One		
Taken sequentially:		
CSCI 1111	Introduction to Software Development	
CSCI 1112	Algorithms and Data Structures	
CSCI 2113	Software Engineering	
CSCI 2441W	Database Systems and Team Projects	
Option Two		
Taken sequentially:		
CSCI 1111	Introduction to Software Development	
or CSCI 1121	Introduction to C Programming	
or CSCI 1131	Introduction to Programming with C	
BADM 2301W	Mgt Information Systems Tech	
ISTM 4120	Business Systems Development	
ISTM 4121	Database Principles and Applications	

[1] Course satisfies the university general education requirement in math, science, and writing.

[2] Computing track elective requirements may be met with the courses in either option in the list directly above.

[3] At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); any remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list (p. 38); the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list. (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf)

[4] Professional electives: Each systems engineering major will gain specific expertise in a chosen technical area by

taking a six-course sequence leading to a minor from another department of the University. Technical electives are selected with the approval of the student's academic advisor. Areas frequently chosen are computer science, economics, finance, management, mathematics, naval science, statistics, or specific fields of engineering. Consult the advisor for other approved areas and requirements.

Internship requirement–All EMSE majors are required to complete an appropriate internship/co-op experience during the last two years of the program. This requirement may be satisfied by an approved full-time summer position after the second or third year, or by one or two approved part-time positions requiring 15–20 hours per week during two of the final four semesters. A position obtained through the GW Career Center (http://gwired.gwu.edu/career) will usually be acceptable; the position may be either paid or unpaid. Consult the advisor for approval.

Medical preparation option

The bachelor of science with a major in civil engineering, medical preparation option (p. 613) leads to a bachelor's degree in systems engineering and quantitatively prepares students for medical careers through a program that emphasizes decision modeling. Decision modeling is increasingly applicable to the medical field because of the growing use of computers and information systems in medicine and the interplay of diagnosis, treatment, and economics.

MINOR IN OPERATIONS RESEARCH

REQUIREMENTS

The following requirements must be fulfilled:

Code	Title	Credits
Required		
Four of the following:		
EMSE 2705	Mathematics in Operations Research	
EMSE 3701	Operations Research Methods	
EMSE 3740	Systems Thinking and Policy Modeling I	
EMSE 3760	Discrete Systems Simulation	
EMSE 4710	Applied Optimization Modeling	
EMSE 4755	Quality Control and Acceptance Sampling	

MINOR IN SYSTEMS ENGINEERING

REQUIREMENTS

Code	Title	Credits
Prerequisites		
The following courses must be completed before beginning the minor program:		
APSC 3115	Engineering Analysis III	
COMM 1040	Public Communication	
or COMM 1041	Interpersonal Communication	
or COMM 1042	Business and Professional Speaking	
MATH 1231	Single-Variable Calculus I	
MATH 1232	Single-Variable Calculus II	
MATH 2233	Multivariable Calculus	
MATH 2184	Linear Algebra I	
or EMSE 2705	Mathematics in Operations Research	
UW 1020	University Writing	
Required		
EMSE 2801	Fundamentals of Systems Engineering	
EMSE 3815	Requirements Analysis and Elicitation	
EMSE 3820	Project Management for Engineering Systems	
EMSE 3850	Quantitative Models in Systems Engineering	
EMSE 4765	Data Analysis for Engineers and Scientists	
Elective		
One additional EMSE course selected in consultation with the advisor.		

ONLINE MASTER OF ENGINEERING IN THE FIELD OF CYBERSECURITY POLICY AND COMPLIANCE

The online master of engineering in cybersecurity policy and compliance is an interdisciplinary program that draws courses from three areas of study across SEAS: computer

science, electrical and computer engineering, and engineering management and systems engineering. The purpose of the M.Eng.(CPC) degree is to capture the latest trends and issues from the field of cybersecurity to provide students the tools and skills necessary to stay in the forefront of this fast-changing discipline. The program is expected to attract prospective students with technical degrees, as well as those with nontechnical degrees who wish to study the complex issues of cybersecurity policy and compliance.

Please visit the program website (http://onlinecybersecurity.seas.gwu.edu) for more information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits in required courses.

Code	Title	Credits
Required		
CSCI 6012		
CSCI 6532	Information Policy	
EMSE 6540	Management of Information and Systems Security	
CSCI 6013		
CSCI 6534	Information Security in Government	
ECE 6132		
EMSE 6542	Cybersecurity Risk Management and Compliance	
EMSE 6543	Managing the Protection of Information Assets and Systems	
EMSE 6544	Auditing, Monitoring, and Intrusion Detection for Information Security Managers	
EMSE 6546	Cybercrime for Info Secur Mgrs	

MASTER OF SCIENCE IN THE FIELD OF DATA ANALYTICS

Administered jointly through the Department of Computer Science (http://cs.seas.gwu.edu) and the Department of Engineering Management & Systems Engineering (http://emse.seas.gwu.edu), the program seeks to address the growing demand for professionals skilled in big data and data analytics in government, industry and research organizations. Through courses led by top faculty members at SEAS and the GW School of Business, this program covers topics in computer science, business analytics, and systems engineering while focusing on the foundations of analytics from a technical, engineering perspective.

This program is ideal for those seeking to learn in a small, tight-knit cohort about the engineering foundations that propel the fields of data science and analytics; pursue or enhance careers as data analysts or data scientists; lead interdisciplinary teams; or apply data science and analytics techniques in the decision-making process of a wide range of organizations.

REQUIREMENTS

Code	Title	Credits
Required		
CSCI 6362	Probability for Computer Science	
CSCI 6441	Database Management Systems	
CSCI 6444	Introduction to Big Data and Analytics	
EMSE 6574	Programming for Analytics	
SEAS 6401	Data Analytics Capstone 1	
SEAS 6402	Data Analytics Capstone 2	
Electives		
Students take six elective courses, at least four of which must be in either the computer science track or in the engineering management and systems engineering track, effectively constituting a concentration in one of the two tracks. Up to two courses may be taken outside of SEAS; courses in the business analytics program are recommended.		
Computer science track electives		
CSCI 6212	Design and Analysis of Algorithms	
CSCI 6312	Graph Theory & Applications	
CSCI 6341	Continuous Algorithms	
CSCI 6342	Computational Linear Algebra and Applications	
CSCI 6351	Data Compression	
CSCI 6364	Machine Learning	
CSCI 6365	Advanced Machine Learning	
CSCI 6421	Distributed and Cluster Computing	
CSCI 6442	Database Systems II	
CSCI 6443	Data Mining	
CSCI 6451	Information Retrieval Systems	
CSCI 6515	Natural Language Understanding	

CSCI 6527	Introduction to Computer Vision
Engineering management and systems engineering track electives	
EMSE 6020	Decision Making with Uncertainty
EMSE 6510	Decision Support Systems and Models
EMSE 6575	Data Minning and Processing
EMSE 6579	Applied Data Mining in Engineering Management
EMSE 6740	Systems Thinking and Policy Modeling I
EMSE 6760	Discrete Systems Simulation
EMSE 6770	Techniques of Risk Analysis and Management

MASTER OF SCIENCE IN THE FIELD OF ENGINEERING MANAGEMENT

The master of science in engineering management is designed for the technical manager who needs a broad education to keep an organization operating efficiently and working ahead of its competitors. The program provides graduate education in the most current management techniques for technological and scientific organizations. Students can pursue their degree by selecting electives in one of five areas of focus: crisis, emergency, and risk management; economics, finance, and cost engineering; engineering and technology management; environmental and energy management; and knowledge and information management.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://www.emse.seas.gwu.edu/master-science-engineering-management) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 12 credits in required courses, 12 to 15 credits in a focus area, and 3 to 9 credits in elective courses, depending on which focus area is selected.

Code	Title	Credits
Required		
EMSE 6001	The Management of Technical Organizations	
EMSE 6020	Decision Making with Uncertainty	
EMSE 6410	Engineering Economic Analysis	
EMSE 6801	Systems Engineering I	

Crisis, Emergency, and Risk Management

Code	Title	Credits
Required		
EMSE 6305	Crisis and Emergency Management	
EMSE 6310	Information Technology in Crisis and Emergency Management	
EMSE 6315	Management of Risk and Vulnerability for Hazards and Terrorism	
EMSE 6325	Medical and Public Health Emergency Management	
or EMSE 6330	Management of Terrorism Preparedness and Response	
Two of the following:		
EMSE 6240	Environmental Hazard Management	
EMSE 6300	Homeland Security: The National Challenge	
EMSE 6345	Disaster Recovery and Organizational Continuity	
EMSE 6350	Hazard Mitigation in Disaster Management	
EMSE 6540	Management of Information and Systems Security	
EMSE 6820	Program and Project Management	
EMSE 6992	Special Topics (with program advisor approval)	
Electives		
Two additional Engineering Management and Systems Engineering (EMSE) courses with the advisor's approval.		

Engineering and Technology Management

Code	Title	Credits
Required		
EMSE 6005	Organizational Behavior for the Engineering Manager	
EMSE 6820	Program and Project Management	
EMSE 6099	Problems in Engineering Management and Systems Engineering	

Two of the following:	
EMSE 6010	HR for Engineering Managers
EMSE 6014	Management of Engineering Contracts
EMSE 6018	Engineering Law
EMSE 6023	Technology Issue Analysis
EMSE 6026	Technical Enterprises
EMSE 6030	Technological Forecasting and Management
EMSE 6035	Marketing of Technology
EMSE 6070	Management of Research and Development
EMSE 6430	Financial Management for Engineers
EMSE 6505	Knowledge Management I
EMSE 6760	Discrete Systems Simulation
EMSE 6805	Systems Engineering II
EMSE 6992	Special Topics (with program advisor approval)
Electives	
Three additional Engineering Management and Systems Engineering (EMSE) courses with the advisor's approval.	

Environmental and Energy Management

Code	Title	Credits
Required		
EMSE 6220	Environmental Management	
EMSE 6225	Air Quality Management	
EMSE 6235	Water Quality Management	
EMSE 6260	Energy Management	
Two of the following:		
EMSE 6200	Policy Factors in Environmental and Energy Management	
EMSE 6230	Hazardous Waste Management and Cleanup	
EMSE 6240	Environmental Hazard Management	
EMSE 6245	Analytical Tools for Environmental Management	
EMSE 6285	Analytical Tools for Energy Management	
EMSE 6290	Climate Change: Policy, Impact	
EMSE 6295	Environmental Secuity	
EMSE 6992	Special Topics (with program advisor approval)	
Electives		
Two additional Engineering Management and Systems Engineering (EMSE) courses with the advisor's approval.		

Economics, Finance, and Cost Engineering

Code	Title	Credits
Required		
EMSE 6420	Uncertainity Analysis in Cost Engineering	
EMSE 6430	Financial Management for Engineers	
EMSE 6450	Investment Engineering	
EMSE 6820	Program and Project Management	
Two of the following:		
EMSE 6014	Management of Engineering Contracts	
EMSE 6018	Engineering Law	
EMSE 6026	Technical Enterprises	
EMSE 6701	Operations Research Methods	
EMSE 6840	Applied Enterprise Systems Engineering	
EMSE 6850	Quantitative Models in Systems Engineering	
EMSE 6992	Special Topics (with program advisor approval)	
Electives		
Two additional Engineering Management and Systems Engineering (EMSE) courses with the advisor's approval.		

MASTER OF SCIENCE IN THE FIELD OF SYSTEMS ENGINEERING

The master of science in systems engineering program provides broad knowledge of the systems approach for designing and managing large-scale engineering systems throughout the lifecycle, with faculty and students exploring case studies and methodologies from NASA, the U.S.

Department of Defense, and domestic corporations. Students can pursue the degree by selecting electives in one of two areas of focus: operations research and management science or systems engineering.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the department website (http://www.emse.seas.gwu.edu/master-science-systems-engineering) for more information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 12 credits in required courses and 21 credits in a focus area.

Code	Title	Credits
Required		
EMSE 6001	The Management of Technical Organizations	
EMSE 6020	Decision Making with Uncertainty	
EMSE 6410	Engineering Economic Analysis	
EMSE 6801	Systems Engineering I	

Operations Research and Management Science

Code	Title	Credits
Required		
EMSE 6701	Operations Research Methods	
EMSE 6710	Applied Optimization Modeling	
EMSE 6760	Discrete Systems Simulation	
EMSE 6765	Data Analysis for Engineers and Scientists	
EMSE 6770	Techniques of Risk Analysis and Management	
Three of the following:		
EMSE 6705	Mathematics in Operations Research	
EMSE 6715	Theory of Games	
EMSE 6730	Integer and Network Programming	
EMSE 6740	Systems Thinking and Policy Modeling I	
EMSE 6750	Stochastic Foundations of Operations Research	
EMSE 6755	Quality Control and Acceptance Sampling	
EMSE 6992	Special Topics	

Systems Engineering

Code	Title	Credits
Required		
EMSE 6805	Systems Engineering II	
EMSE 6810	Systems Analysis and Management	
EMSE 6820	Program and Project Management	
EMSE 6850	Quantitative Models in Systems Engineering	
Four of the following:		
EMSE 6540	Management of Information and Systems Security	
EMSE 6580	Information and Software Engineering	
EMSE 6815	Requirements Engineering	
EMSE 6992	Special Topics (in consultation with advisor)	

DOCTOR OF ENGINEERING IN THE FIELD OF ENGINEERING MANAGEMENT

The Doctor of Engineering (D.Eng.) in the field of Engineering Management (EM) is designed for students who seek a practice- or praxis-oriented doctoral degree. Such students typically have professional needs that the traditional Ph.D. degree does not meet. The D.Eng. (EM) focuses on solutions to real-world problems. Unlike the Ph.D., for which fundamental research leads to foundational work that is published and contributes to the basic understanding of a field, the D.Eng. (EM) is applied, not basic research.

In a broad-based program of study, the D.Eng. (EM) course work culminates in the student's production of a praxis for use by practicing engineers. The D.Eng. (EM) is ideal for individuals doing advanced engineering in the workplace, who want to update their knowledge with cutting-edge techniques from the engineering disciplines, and cap it with a formal degree that recognizes their contributions to the field.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://emse.offcampus.gwu.edu/doctor-engineering-degree-program) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 30 credits in required courses and 15 credits in research culminating in a practice-based case study.

Code	Title	Credits
Required		
EMSE 6115	Uncertainty Analysis for Engineers	
EMSE 6992	Special Topics (Quantitative Methods for Engineering Managers)	
A minimum of 6 credits of EMSE analytical methods courses selected in consultation with advisor.		
A minimum of 9 credits of EMSE engineering management courses selected in consultation with advisor.		
Electives		
6 credits selected in consultation with advisor		
Praxis		
EMSE 6992	Special Topics (Research Methods for the Praxis) *	
EMSE 8998	Adv Reading & Research (taken for 15 credits) *	

*Students must complete the praxis proposal examination by preparing and defending their proposal before a committee of at least two full-time SEAS faculty members and one outside advisor external to the faculty.

DOCTOR OF PHILOSOPHY IN THE FIELD OF SYSTEMS ENGINEERING

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under School of Engineering, Doctoral Program Regulations (http://bulletin.gwu.edu/engineering-applied-science/#seasregulationstext)

Students with an MS degree must take a minimum of 54 credits, of which at least 30 must be credits from courses available for graduate credit, and at least 24 must be dissertation research credits. The courses to be taken by the student must be approved by the student's advisor. Students with a BS degree must take a minimum of 78 credits, consisting of 54 credits of graduate coursework and at least 24 credits of dissertation research. The courses to be taken by the student must be approved by the student's advisor. In some cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study exceeds the minimum number of credits.

No specific courses are required beyond the preparatory courses. The student and advisor design the curriculum to meet the student's needs and goals.

Prepatory courses	
MATH 1231	Single-Variable Calculus I
MATH 1232	Single-Variable Calculus II
APSC 3115	Engineering Analysis III
Other requirements	
Qualifying examinations	
Proposal defense	
Final examination	
Post-graduate survey	

Student should contact the department for additional information and requirements.

GRADUATE CERTIFICATE IN EMERGENCY MANAGEMENT AND PUBLIC HEALTH

Offered through the Department of Engineering Management and Systems Engineering (EMSE) (http://www.emse.seas.gwu.edu/graduate-certificates), the graduate certificate in emergency management and public health program helps students define emergencies and disasters as well as develop incident management plans for responding to and managing environmental and public health emergencies. In addition to course work within the department, students take courses at GW's Milken Institute School of Public Health (http://publichealth.gwu.edu).

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 12 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Required		
EMSE 6305	Crisis and Emergency Management	
EMSE 6325	Medical and Public Health Emergency Management	
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
Electives		
Two of the following:		
EMSE 6240	Environmental Hazard Management	
EMSE 6300	Homeland Security: The National Challenge	
EMSE 6310	Information Technology in Crisis and Emergency Management	
EMSE 6315	Management of Risk and Vulnerability for Hazards and Terrorism	
EMSE 6320	International Disaster Management	
EMSE 6330	Management of Terrorism Preparedness and Response	
EMSE 6335	Geographic Information Systems for Emergency Management	
EMSE 6345	Disaster Recovery and Organizational Continuity	
EMSE 6350	Hazard Mitigation in Disaster Management	
EMSE 6820	Program and Project Management	
EMSE 6992	Special Topics (as approved by academic advisor)	

Appropriate electives from other departments may be permitted with the advisor's approval.

GRADUATE CERTIFICATE IN ENGINEERING AND TECHNOLOGY MANAGEMENT

The graduate certificate program in engineering and technology management helps students understand management theory and practice as it is applied to engineering projects and organizations. The program emphasizes the study of general management issues as well as specific methods in resolving such problems in practice.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://graduate.seas.gwu.edu/engineering-and-technology-management) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Code	Title	Credits
Required		
EMSE 6001	The Management of Technical Organizations	
EMSE 6014	Management of Engineering Contracts	
EMSE 6020	Decision Making with Uncertainty	
EMSE 6035	Marketing of Technology	
EMSE 6801	Systems Engineering I	
EMSE 6820	Program and Project Management	

GRADUATE CERTIFICATE IN ENTERPRISE INFORMATION ASSURANCE

The graduate certificate program in enterprise information assurance is designed to help information security managers understand, manage, and reduce the risk to information assets within technological organizations and enterprises. Course work covers everything from program and project management to techniques in auditing and monitoring system intrusions.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://www.seas.gwu.edu/enterprise-information-assurance) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Code	Title	Credits
Required		
EMSE 6345	Disaster Recovery and Organizational Continuity	
EMSE 6540	Management of Information and Systems Security	
EMSE 6543	Managing the Protection of Information Assets and Systems	
EMSE 6544	Auditing, Monitoring, and Intrusion Detection for Information Security Managers	
EMSE 6801	Systems Engineering I	
EMSE 6820	Program and Project Management	

GRADUATE CERTIFICATE IN ENVIRONMENTAL AND ENERGY SYSTEMS MANAGEMENT

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Code	Title	Credits
Required		
EMSE 6220	Environmental Management	
EMSE 6245	Analytical Tools for Environmental Management	
EMSE 6260	Energy Management	
EMSE 6285	Analytical Tools for Energy Management	
EMSE 6992	Special Topics (Beyond Compliance: Next Generation Environmental Self-governance)	
EMSE 6992	Special Topics (Global Connections: Standards in Technology, Business & Public Policy)	

GRADUATE CERTIFICATE IN GREENHOUSE GAS MANAGEMENT

The graduate certificate in greenhouse gas (GHG) management, which was developed in cooperation with experts at the Greenhouse Gas Management Institute, provides an alternative for professionals who wish to expand their knowledge in the field without committing to the requirements of a master's degree program. The program addresses the engineering, economic, legal, and logistical considerations for implementing GHG management in compliance with existing and planned GHG mitigation. The focus is on managing GHG emissions from energy-related activities in a business setting,

through the measurement, reporting, analysis, reduction, trading, and verification of GHG emissions from these activities.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Required	
EMSE 6290	Climate Change: Policy, Impact
EMSE 6291	Greenhouse Gas Measurement and Reporting
EMSE 6292	Greenhouse Gas Mitigation
EMSE 6293	Greenhouse Gas Management Assurance and Information Systems Design

GRADUATE CERTIFICATE IN HOMELAND SECURITY, EMERGENCY PREPAREDNESS, AND RESPONSE

Students pursuing the graduate certificate in homeland security, emergency preparedness, and response also may apply for the master of science degree in engineering management with a focus area in crisis, emergency, and risk management. Upon acceptance to the master's program, such students may transfer the 18 credits required for the certificate into the master of science degree program of study.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 3 credits in required courses and 15 credits in elective courses.

Graduate Certificate in Homeland Security, Emergency Preparedness, and Response

GRADUATE CERTIFICATE IN SYSTEMS ENGINEERING

The graduate certificate program in systems engineering provides a foundation in the "systems approach" for designing and managing large-scale engineering systems.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Graduate Certificate in Systems Engineering

MECHANICAL AND AEROSPACE ENGINEERING

Mission Statement

The mission of the Department of Mechanical and Aerospace Engineering is to educate students to become professional mechanical and aerospace engineers who are confident in their understanding of science and technology and creative in the face of new challenges. Graduates of the program have the analytical skill and thirst for lifelong learning that will expand career horizons. The program prepares students to conduct relevant research at the forefront of mechanical and aerospace engineering knowledge. Students learn through faculty mentoring and go on to practice mechanical engineering as skilled, responsible, and ethical professionals.

Educational Objectives

The mechanical engineering program provides an integrated curriculum designed to produce graduates who develop successful careers in mechanical engineering or in science and technology. Graduates will be prepared to accomplish the following objectives within a few years after graduation:

1. Practice mechanical engineering in industry or government, applying knowledge and skills acquired in the program to the design of engineering systems and devices, and the analysis and solution of engineering problems of complex scope; and/or
2. Succeed in advanced education, research and development, or other creative efforts in engineering, science, and technology; and/or
3. Apply engineering skills while pursuing careers in other professions, such as law, medicine, business, or public policy (this objective reflects the program's patent law and medical preparation options and will apply to a selected group of graduates);
4. Conduct themselves in a responsible and ethical manner, cognizant of the social, environmental, and economic impact of engineering and technology on society;
5. Embark upon a process of lifelong learning in their profession; and
6. Enter into leadership roles in technological development or local, national, or global economic development.

Student Outcomes

Students acquire knowledge of the following disciplines:

Chemistry and calculus-based physics with depth in at least:

- Advanced mathematics through multivariate calculus and differential equations; familiarity with statistics and linear algebra;
- Thermal, fluid, and mechanical systems areas.

In addition, students gain the ability to fulfill the following professional responsibilities:

- Understand professional and ethical responsibility;
- Apply knowledge of mathematics, science, and engineering, and familiarity with materials science, electrical circuits, and electromechanical control theory;
- Design and conduct experiments, as well as analyze and interpret data;
- Design a mechanical engineering system, component, or process to meet desired needs within realistic constraints;
- Identify, formulate, and solve engineering problems;
- Use the techniques, skills, and modern engineering tools necessary for engineering practice;
- Use computer systems and knowledge of computer programming;
- Apply computer software used in engineering practice, such as computer-aided engineering packages and mathematical software, to the solution of mechanical engineering problems;
- Apply manufacturing techniques to realize mechanical engineering designs;
- Communicate effectively both orally and graphically;
- Write technical reports in a professional manner; and
- Function on multidisciplinary teams.

The program prepares graduates who have the broad education necessary to practice mechanical engineering, including the following fundamentals:

- An understanding of the impact of engineering solutions in a global, economic, environmental, and societal context;
- Recognition of the need for, and an ability to engage in life-long learning; and
- Knowledge of contemporary issues.

For more information contact the Department of Mechanical and Aerospace Engineering. (http://www.mae.seas.gwu.edu)

UNDERGRADUATE

Bachelor's programs

- Bachelor of Science with a major in mechanical engineering (p. 688)
- Bachelor of Science with a major in mechanical engineering, aerospace option (p. 689)
- Bachelor of Science with a major in mechanical engineering, biomechanical option (p. 691)
- Bachelor of Science with a major in mechanical engineering, medical preparation option (p. 692)
- Bachelor of Science with a major in mechanical engineering, patent law option (p. 693)
- Bachelor of Science with a major in mechanical engineering, robotics option (p. 695)

Combined program

- Combined Bachelor of Science with a major in mechanical engineering and Master of Science in the field mechanical engineering (p. 696)

Minor

- Minor in mechanical engineering (p. 696)

GRADUATE

Master's program

- Master of Science in the field of mechanical and aerospace engineering (p. 697)

Doctoral program

- Doctor of Philosophy in the field of mechanical and aerospace engineering (p. 698)

CERTIFICATE

- Graduate certificate in energy engineering and management (p. 699)
- Graduate certificate in computer-integrated design in mechanical and aerospace engineering (p. 699)

FACULTY

Professors E. Balaras, A.D. Cutler, D.S. Dolling, C.A. Garris, S.M. Hsu, M. Keidar, J.D.-Y. Lee, M.W. Plesniak (*Chair*), K. Sarker, Y.-L. Shen, M. Snyder

Associate Professors L. Barba, T. Lee, Y. Leng, S. Solares, L. Zhang

Assistant Professors P.M. Bardet, S. LeBlanc, M. Leftwich, C. Liang, A.M. Wickenheiser

Assistant Research Professors K. Bulusu

Professorial Lecturers M.A. Busby, T. Conway, S.S. Dodbele, G.C. Everstine, J.M. Fleming, D.R. Gerk, T.M. Krafchak, R. Krishnamurthy, J.H. Milgram, A. Rao, J. Silver, J.K. Soldner

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students

- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

MAE 1001. Introduction to Mechanical and Aerospace Engineering. 1 Credit.
Careers in mechanical and aerospace engineering and the necessary academic program. Teamworking and problem-solving skills for solution of design problems. Analytical and design problems and correlations between academic skills and the mechanical and aerospace engineering professions. Basic aspects of engineering ethics. (Fall).

MAE 1004. Engineering Drawing and Computer Graphics. 0-3 Credits.
Introduction to technical drawing, including use of instruments, lettering, geometric construction, sketching, orthographic projection, section view, dimensioning, tolerancing, and pictorial drawing. Introduction to computer graphics, including topics covered in manual drawing and computer-aided drafting. (Fall and spring).

MAE 2117. Engineering Computations. 3 Credits.
Numerical methods for engineering applications. Round-off errors and discretization errors. Methods for solving systems of linear equations, root finding, curve fitting, numerical Fourier transform, and data approximation. Numerical differentiation and integration and numerical solution of differential equations. Computer applications. Prerequisite: MATH 1232. (Fall, Every Year).

MAE 2124. Linear Systems Analysis for Robotics. 3 Credits.
Properties of linear systems. Mathematical modeling of dynamic systems. State space, state variables, and their selection. Linearization of non-linear behavior. Matrix functions. Solution of state equations in the time domain and using transformations. System stability and frequency response.

MAE 2131. Thermodynamics. 3 Credits.
Fundamentals of equilibrium thermodynamics; Zeroth, First, and Second Laws. Work, heat, internal energy, enthalpy, thermodynamic potential functions; heat transfer mechanisms, phase diagrams, equations of state and property tables, power systems, refrigeration, heat pump systems. Reversible and irreversible processes, Carnot cycle, entropy, exergy. Prerequisite: PHYS 1021.

MAE 2170. History and Impact of the U.S. Patent System. 3 Credits.
Economic systems and emergence of the free market; role of the patent system in the industrial development of the United States; constitutional foundations; evolution of the U.S. patent system; landmark litigation; impact on future innovation; international aspects; the likely future of the patent system.

MAE 3120. Methods of Engineering Experimentation. 0-3 Credits.
Acquisition and analysis of experimental data. Laws of modeling and simulation. Report formulation and presentation. Basic principles of measuring instruments and sensors. Fundamentals of digital data acquisition and use of computer-based data systems. Strain gages, oscilloscopes, transducers, and computerized data systems. Prerequisite: MAE 2117.

MAE 3126. Fluid Mechanics I. 0-3 Credits.
Fluid properties, fluid statics, integral and differential formulations of conservation of mass, momentum, and energy. Bernoulli's equation. Dimensional analysis and similitude. Inviscid flow. Viscous flow. Experimental and computational methods in fluid mechanics. Prerequisite: APSC 2058. (Fall, Every Year).

MAE 3128. Biomechanics I. 3 Credits.
Mechanical analysis of biological systems. Characterization of living tissue. Applications of statics, solid mechanics, kinematics, and elementary dynamics to the human musculoskeletal system. May be taken for graduate credit with departmental approval. Prerequisites: APSC 2057, CE 2220. (Spring, Every Year).

MAE 3134. Linear System Dynamics. 3 Credits.
Modeling of linear mechanical, electrical, and fluid systems as transfer functions and in state space. Linearization, discretization. Laplace and z-transforms. Natural frequencies and damping, free vibration, forced vibration. Measurement techniques, parameter estimation, and computer simulation. Time and frequency domain analysis. Prerequisite: APSC 2113; corequisite: APSC 2058.

MAE 3145. Orbital Mechanics and Spacecraft Dynamics. 3 Credits.
Coordinate systems and transformations, rocket equation, two-body problem, orbit transfers, orbit perturbations, attitude dynamics and stability of symmetric spacecraft, environmental and control torques. Prerequisite: APSC 2058. (Fall).

MAE 3155. Aerodynamics. 3 Credits.
Subsonic and supersonic aerodynamics: potential flow, lift and form drag, viscous effects, compressible flow. Prerequisite: MAE 3126.

MAE 3162. Aerospace Structures. 3 Credits.
Basic structural theory of lightweight aerospace structures; analysis of typical monocoque structures; load transfer in stiffened panel structures; virtual work and energy methods of structural analysis, bending of open and closed, thin walled beams, shear and torsion of beams, and structural idealization. Restricted to juniors and seniors; permission of the instructor may be substituted. Prerequisites: APSC 2057 and CE 2220. (Fall, Every Year).

MAE 3166W. Materials Science and Engineering. 3 Credits.
Mechanical properties, plastic deformation dislocation theory, yielding, strengthening mechanisms, microstructure and properties, heat treatment of steel, composites, amorphous materials, viscoelastic deformation, creep, fracture, fatigue, fatigue crack propagation. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: CHEM 1111 and PHYS 1022. (Fall, Every Year).

MAE 3167W. Mechanics of Materials Lab. 1 Credit.
Measurement of strains and study of failure resulting from applied forces in ductile, brittle, anisotropic, elastomeric, plastic, and composite materials. Tension, compression, bending, impact, and shear failures. Prerequisites: MAE 3166W. (Spring).

MAE 3171. Patent Law for Engineers. 3 Credits.
Types of patents; international patents; inventorship; prosecution process; basic references for patents; detailed structure of a patent; patentability requirements; reexamination and reissue; litigation; infringement and invalidity; copyrights, trademarks, and trade dress. May be taken for graduate credit with approval of department.

MAE 3184. Robotics Lab. 1 Credit.
Forward and inverse kinematics modeling of robots, control design, trajectory planning, and force rendering. Corequisite: MAE 3197.

MAE 3187. Heat Transfer. 3 Credits.
Steady- and unsteady-state heat conduction problems. Analytical and numerical solution methods. Convective heat transfer, boundary-layer approach, analogy between heat and momentum transfer. Thermal radiation; fundamental concepts and laws. Heat-exchanger design. Prerequisite: MAE 3126, MAE 2131.

MAE 3190. Analysis and Synthesis of Mechanisms. 3 Credits.
Kinematics and dynamics of mechanisms. Displacements, velocities, and accelerations in linkage, cam, and gear systems by analytical, graphical, and computer methods. Synthesis of linkages to meet prescribed performance requirements. Prerequisite: APSC 2058. (Fall).

MAE 3191. Mechanical Design. 3 Credits.
Integration of knowledge of strength of materials in a design context. Stresses and deflections in engineering structures. Theories of failure. Introduction to the design of mechanical components, such as fasteners, shafts, springs. Introduction to the use of computers in mechanical engineering design. Prerequisite: CE 2220, MAE 2117.

MAE 3192. Manufacturing Processes and Systems. 3 Credits.
Introduction to manufacturing techniques for metals, polymers, ceramics, and composites. Relationships between properties of materials and techniques for processing them. Process selection, design, control, and integration. Computer-integrated manufacturing, robotics and assembly automation. Prerequisite or concurrent registration: MAE 1004.

MAE 3193. Mechanical Systems Design. 3 Credits.
Creative engineering design, problem definition, and concept generation; design of mechanisms and mechanical systems; safety, reliability, manufacturability, material selections, cost, and integration in design process; finite element analysis of mechanical systems, computer-aided design, and optimization. Prerequisites: MAE 3191. (Spring).

MAE 3195. Computer-Aided Engineering of Mechanical Systems. 3 Credits.
Presentation of the major elements of computer-aided engineering systems: interactive computer graphics, finite element analysis, and design optimization. Consideration of economics, safety, and reliability factors. Prerequisite: MAE 4193; concurrent registration: MAE 3196.

MAE 3196. Computer-Aided Engineering Laboratory. 1 Credit.
Instruction and hands-on applications of computer-aided engineering systems to the design, analysis, and optimization of mechanical engineering components and systems. Concurrent registration: MAE 3195.

MAE 3197. Robotic Systems Design and Applications. 3 Credits.
Modeling and analysis of robot designs. Kinematics, statics, and dynamics of linkages. Design and selection of mechanical structures, actuators, transmissions, and sensors. Design of robotic control systems. Relevant computer hardware and software. Industrial applications and limitations of robot systems. Lab experiments. Same as ECE 4730. Prerequisite: MAE 3134.

MAE 4129. Biomechanics II. 3 Credits.
Mechanical analysis of physiological fluid dynamics. Application of fluid flow analysis techniques to cardiovascular, pulmonary, respiratory, and phonatory flows. Introduction to biomedical devices that manipulate physiological flows. May be taken for graduate credit with approval of department. Prerequisite: MAE 3128.

MAE 4149. Thermal Systems Design. 3 Credits.
Completion of a thermal systems design project that requires integration of engineering science, economics, reliability, safety, ethics, professional responsibility, and social considerations. Development and use of design methodology, optimization, feasibility considerations, detailed system descriptions, and presentation of results. Prerequisite: MAE 3187.

MAE 4151. Mechanical Engineering Project. 1 Credit.
Capstone design project. Conceptualization, research, specification of constraints, and preliminary design analysis. Presentations and proposal. Project is continued in MAE 4152W. Prerequisites: MAE 3193. (Fall).

MAE 4152W. Mechanical Engineering Laboratory. 3 Credits.
Project-oriented course. Simulates working environment of professional engineers. Projects are assigned in student's areas of interest; student is expected to design and assemble own experiments. Extensive use of instrumentation and computing facilities. Project proposal, progress reports, final report, and periodic oral presentations required. (Spring).

MAE 4157. Aerodynamics Laboratory. 1 Credit.
Subsonic and supersonic wind tunnel experiments and simulations. Prerequisite: MAE 3155. (Fall).

MAE 4163. Airplane Performance. 3 Credits.
Lift and drag estimation methods. Airplane performance measures, such as range and endurance, turning flight, specific excess power and acceleration, takeoff and landing performance. Longitudinal and lateral-direction static and dynamic stability. Control surface effectiveness. Prerequisites: MAE 3134. (Fall).

MAE 4168. Intro. to Biomaterials. 3 Credits.
Fundamentals of materials science and engineering applied to artificial materials in the human body. Topics include biocompatibility, techniques to minimize corrosion or other degradation of implant materials, and the use of artificial materials in various tissues and organs. Prerequisite: Approval of department. Course not open to MAE students.

MAE 4172. Engineering Design and the Patent System. 3 Credits.
Design experience in group projects involving following precisely the teachings of a licensed patent; or avoiding infringement of a provided patent while offering a competitive alternative; or evaluating a provided patent in light of prior art or by attempting to design a competitive product. May be taken for graduate credit with approval of department. Prerequisite: MAE 3171 and senior status.

MAE 4182. Electromechanical Control System Design. 3 Credits.
Application of control theory to the design of electromechanical systems. Transducers, valves, and other control components. Mathematical models of open- and closed-loop electromechanical systems. Root locus and frequency response methods; application to the synthesis of feedback systems by both manual and computer-aided techniques. Prerequisite: MAE 2117, MAE 3134.

MAE 4183. Controls Lab. 1 Credit.
Modeling, control design, simulation, implementation, tuning, and operation of a control system. Corequisite: MAE 4182.

MAE 4193. Engineering Systems Design. 3 Credits.
Creative engineering design, problem definition, and concept generation. Design of journal and roller element bearings, fasteners and permanent joints, and springs. Design project incorporating design selection, and optimization. Project presentation using graphical and computer resources. Prerequisite: MAE 3191. (Fall, Every Year).

MAE 4194. Mechatronics Design. 3 Credits.
Data acquisition and digital signal processing. Sensors and their characteristics—displacement, position/velocity, force/pressure, piezoelectric. Actuators—mechanical, electrical, pneumatic, hydraulic. Modeling and simulation of dynamic systems. Mechanism design. Digital control systems. Microprocessors, digital logic/circuits, motor drives. Lab experiments. Prerequisite: MAE 4182.

MAE 4195. Mechatronics Lab. 1 Credit.
Corequisite: MAE 4194.

MAE 4198. Research. 1-3 Credits.
Applied research and experimentation projects, as arranged. Prerequisite: junior or senior status.

MAE 4199. Student Design Project. 1-3 Credits.
Special student projects involving extensive design of various mechanical engineering systems. Examples include the solar car, mini-Baja, or other design competitions that typically are national in scope. May be taken for graduate credit by graduate students.

MAE 6194. Mechatronics Design. 3 Credits.
Review of data acquisition and digital signal processing. Mathematical models, design, and applications of sensors and actuators in mechatronic systems. Theory and applications of mechanism design. Microprocessor-based design integration, motor drives, and digital logic/circuits. Case studies and lab experiments. Restricted to graduate students. (Same as MAE 4194) (Spring).

MAE 6195. Mechatronics Lab. 1 Credit.
Designing and building a mechatronic system based around a programmable microcontroller; using sensors and actuators to create devices capable of sensing their surrounding environment and reacting to stimuli from that environment. Restricted to graduate students. (Same as MAE 4195) (Spring).

MAE 6201. Intro to Manufacturing. 3 Credits.
Fundamentals of modern manufacturing. Processes for manufacturing mechanical and electronic components from metals, polymers, ceramics, and silicon. Manufacturing systems, CAD, robotics, and design for assembly. Current capabilities, technological needs, and competitiveness. Examples from high-tech industries. Prerequisite: approval of department.

MAE 6203. Adv Experimentation Tech. 3 Credits.
Sensors; measurement of displacement, temperature, pressure and velocity. Optical methods. Signal conditioning. Computer data acquisition. Uncertainty analysis. Case studies of instrumentation systems such as hot-wire anemometers, laser-doppler anemometers, shlieren/shadowgraph and interferometers. Laboratory projects. (As arranged).

MAE 6204. Tissue Engineering. 3 Credits.

MAE 6207. Theory of Elasticity I. 3 Credits.
Introduction to Cartesian tensors; deformation, stress, constitutive relations for linear elasticity; formulation of boundary value problems, variational principles, torsion and bending of prismatial rods, plane problems. Prerequisite: approval of department. Same as CE 6207.

MAE 6210. Continuum Mechanics. 3 Credits.
Tensor analysis; fundamental concepts of continuum mechanics; kinematics of continuum; derivation of balance laws of mass, linear momentum, angular momentum, energy and entropy; axioms of constitutive theory; formulation of constitutive theories; Onsager's principle; objectivity; representation theorem for isotropic functions; plasticity, including concepts of internal variables, yield surface, return mapping algorithm. Departmental approval required. (Fall, Every Year).

MAE 6220. Applied Computational Fluid Dynamics. 3 Credits.
Basic principles of fluid dynamics and aerodynamics. Finite difference and finite volume methods. Fluid flow and heat transfer analysis of thermo-fluid mechanical systems. Computational aerodynamics codes. Individual hands-on experience with a commercial CFD code such as FLUENT. Prerequisite: approval of department.

MAE 6221. Fluid Mechanics. 3 Credits.
Continuum, kinematics of fluids; stress and strain rate tensors; fundamental equations of viscous compressible flows. Irrotational flows; sources, sinks, doublets, and vortices. Laminar flow of viscous incompressible fluids; boundary-layer concept. Prerequisite: approval of department.

MAE 6222. Applied Aerodynamics. 3 Credits.
Introduction to practical and computational methods for solving two-dimensional and three-dimensional aerodynamics problems. Linear methods, nonlinear potential methods, coordinate transforms, and boundary-layer methods. Prerequisite: MAE 6221, MAE 6286.

MAE 6223. Turbomachinery. 3 Credits.
Turbine, compressor, and pump types and uses; dimensional analysis of turbomachines; cycle analysis of gas and steam turbines; energy interchange in fluid machinery; design, characteristics, and performance of turbines, compressors, and pumps; comparison of types of turbines, compressors, and pumps. Prerequisite: MAE 6221.

MAE 6224. Viscous Flow. 3 Credits.
Exact solutions of Navier–Stokes equations; the laminar boundary-layer theory. Reynolds stresses and turbulence; internal, boundary-layer, and mixing flows. Applications to heat and mass transfer and to reacting flows. Prerequisite: APSC 6213, MAE 6221, .

MAE 6225. Computational Fluid Dynamics. 3 Credits.
Theory of discrete methods for solving the governing equations of fluid dynamics. Potential flow, Euler equations, Navier-Stokes equations. Emphasis on algorithm development appropriate to modern supercomputers. Prerequisite: MAE 6221, MAE 6286.

MAE 6226. Aero/Hydrodynamics. 3 Credits.
Inviscid flows in two and three dimensions and irrotational flow theory; conformal mapping and applications. Helmoltz theorems and vorticity dynamics. Applications such as airfoil theory, finite wing theory, panel methods, instabilities, free surface flow. Prerequisite: MAE 6221 .

MAE 6227. Aeroelasticity. 3 Credits.
Static and dynamic structural deformations; static aeroelasticity (structural deformation, divergence, control effectiveness, and reversal); dynamic aeroelasticity (flutter, response to gusts and turbulence); unsteady aerodynamics for 2-D wings; strip theory for 3-D lifting surfaces; piston and Newtonian-flow theories. Prerequisite: MAE 6221, MAE 6257.

MAE 6228. Compressible Flow. 3 Credits.
Thermodynamics and equations of compressible inviscid flow. One-dimensional flow. Isentropic flow. Normal and oblique shock waves. Quasi-one-dimensional flow. Unsteady one-dimensional and steady two-dimensional flow. Introduction to transonic flow. Prerequisite: APSC 6213, MAE 6221 .

MAE 6229. Propulsion. 3 Credits.
Basic concepts of propulsion: energy transformations in propulsive flows, gas dynamics of combustion. Thermal and propulsive efficiencies. Cycle and engine component analysis. Intake, nozzle performance. Drag and thrust generation. Augmentation. Propellers, turbojets, turbofans, ramjets, and rockets. Prerequisite: Graduate Standing or MAE 2131 and MAE 3126. (Spring).

MAE 6230. Space Propulsion. 3 Credits.
Advanced chemical propulsion: dynamic combustion and instabilities in solid propellants. Injection, atomization, mixing in liquid propellant engine performance. Plasma propulsion: electrostatic, electromagnetic, and electrothermal instabilities (laser and microwave). Nuclear propulsion. Prerequisite: MAE 6229.

MAE 6231. Structure and Transformations in Materials. 3 Credits.
Structure of crystals, crystal binding, crystal defects, dislocations, solid solutions, phases, diffusion, phase transformations, deformation twinning, and martensite. Prerequisite: APSC 2130.

MAE 6232. Fracture Mechanics. 3 Credits.
Concepts, history, and recent developments of fracture mechanics. Singularity at the crack tip; solutions around crack tip; stress intensity factors; energy release rate; J-integral; direction of crack extension; Plasticity and slow crack growth; dynamic crack propagation; molecular dynamics simulation of fracture. Prerequisite: approval of department.

MAE 6233. Mechanics of Composite Materials. 3 Credits.
Stress-strain relationship for orthotropic materials, invariant properties of an orthotropic lamina, biaxial strength theory for an orthotropic lamina. Mechanics of materials approach to stiffness, elasticity approach to stiffness. Classical lamination theory, strength of laminates. Statistical theory of fatigue damage. Same as CE 6209. Prerequisite: approval of department.

MAE 6234. Composite Materials. 3 Credits.
Principles of composites and composite reinforcement. Micromechanics and failure, interface reactions in various composites, reinforcing materials. Structure of composites: fiber-reinforced polymers, filler-reinforced polymers, fiber-reinforced metals, directionally solidified alloys, dispersion-strengthened metals. Prerequisite: approval of department.

MAE 6235. Deformation and Failure of Materials. 3 Credits.
Elastic and plastic deformation, yield, dislocation theory, strengthening mechanisms, creep, polymers, fracture, transition temperature, microstructure, fatigue. (Spring, odd years).

MAE 6237. Applied Electrochemistry. 3 Credits.
Charged interfaces, electrochemical cells, corrosion thermodynamics, electrode kinetics, general corrosion, crevice corrosion, pitting, stress-corrosion cracking, corrosion protection, batteries and fuel cells, energy storage. May include current and potential distribution in electrochemical cells and scaling effects in modeling. Prerequisite: approval of department.

MAE 6238. Biomaterials. 3 Credits.
Applications of materials science and engineering to artificial materials in the human body with the objective of detailed understanding of synthetic materials and biopolymers. Biocompatibility and its consequences on tissue–implant interfaces. Design and development of new implant materials, drug delivery systems, and biosensors. Prerequisite: MAE 3166 or MAE 4168.

MAE 6239. Computational Nanosciences. 3 Credits.
Introduction to surface force measurements in nanosciences; continuum contact mechanics in nanoscience research; intermolecular forces; empirical potentials for transition metals; surface forces in liquids; large-scale atomic/molecular massively parallel simulator; force field development from quantum mechanical density–functional theory for organic/metal molecular systems. Prerequisite: approval of department.

MAE 6240. Kinematic Synthesis. 3 Credits.
Techniques for the analysis and synthesis of function, path, and motion generating mechanisms. Methods for the dimensional design of mechanisms. Computer-aided techniques for the optimal design of planar linkages. Review of recent developments and current research. Term project. Prerequisite: MAE 3190 .

MAE 6241. Computer Models of Physical and Engineering Systems. 3 Credits.
Reduction of physical and engineering systems to simplified physical and mathematical models. Manipulation of models using C/C programming. Numerical algorithms for optimization, graph identification, mini-sum arithmetic, and searching. Styles of problem solving. Prerequisite: MAE 2117.

MAE 6242. Advanced Mechanisms. 3 Credits.
Emphasis on spatial kinematics. Analysis and synthesis of mechanisms. Analytical techniques using matrices, dual numbers, quaternion algebra, finite and instantaneous screws, theory of envelopes. Applications to design of linkages, cams, gears. Use of digital computers in mechanism analysis and design. (Spring, even years).

MAE 6243. Advanced Mechanical Engineering Design. 3 Credits.
Design of mechanical engineering components and systems emphasizing computer-aided engineering (CAE), including interactive computer graphics, finite element analysis, and design optimization. Creation of a complete design on an engineering workstation. Prerequisite: approval of department.

MAE 6244. Computer-Integrated Engineering Design. 3 Credits.
Design of engineering components and systems on engineering workstations using I-DEAS. Interactive computer graphics, finite element analysis, computer-based design optimization, and other relevant computer-based tools. Students apply design concepts in a computer-aided engineering environment to a selected project. Prerequisite: approval of department.

MAE 6245. Robotic Systems. 3 Credits.
Classification, features, and applications of industrial robots. Spatial descriptions and transformations, forward and inverse kinematics. Jacobian matrix, velocities and static forces, manipulator dynamics and controls. Robot actuators, transmissions, sensors, end effectors, and programming. Prerequisite: MAE 4182 .

MAE 6246. Electromechanical Control Systems. 3 Credits.
State–space representations of dynamic systems; dynamics of linear systems; controllability and observability; linear observers; compensator design by separation principle; linear–quadratic optimal control; Riccati equations; random processes; Kalman filter; applications of optimal stochastic control theory to robotics and earthquake engineering. Prerequisite: approval of department.

MAE 6247. Aircraft Design I. 3 Credits.
Conceptual design methods used in response to prescribed mission and performance requirements, alternate configuration concepts. Configuration general arrangement and empennage sizing. Estimation of aircraft size, weight, and balance; lift, thrust and drag; system level tradeoff and sensitivity studies. Prerequisite: Graduate Standing or MAE 4163. (Spring).

MAE 6249. Spacecraft Design. 3 Credits.
Computer-aided design of spacecraft and satellites to meet specific mission requirements. Environment, propulsion, structure, heat transfer, orbital mechanics, control considerations. Use of modern computer codes for design studies. Prerequisite: MAE 3145 or graduate student standing. (Spring, Every Year).

MAE 6251. Computer-Integrated Manufacturing. 3 Credits.
Automation techniques for processing metals, polymers, and composites. Use of sensing and process modeling in process control. Numerical control and robot applications and limitations. Integration, scheduling, and tool management in the computer-integrated factory. Quality control. Social and economic considerations in CIM. Prerequisite: MAE 3192 .

MAE 6252. Projects in Computer-Integrated Design and Manufacturing. 3 Credits.
Applications of the concepts of computer-integrated manufacturing to group projects, culminating in written and oral presentations. Robot programming, vision-guided assembly, force sensing, fixturing, and end-effector design for practical applications. Factory simulation, part scheduling, and NC program-verification algorithms. Prerequisite: MAE 6251.

MAE 6253. Aircraft Structures. 3 Credits.
Statics of thin-walled beams and panels, force interplay between stiffeners and skin in the analysis and design of stiffened thin-walled structures. Strength and stiffness of locally buckled stiffened structures. Design considerations. Critical evaluation of various design procedures. Prerequisite: approval of department.

MAE 6254. Applied Nonlinear Control. 3 Credits.
Dynamic characteristics of nonlinear systems. State stability and input-output stability. Lyapunov stability theory and invariance principle. Nonlinear control systems, including feedback linearization, back-stepping, sliding mode control, and passivity-based design. Applications to robotics, aircraft, and spacecraft control systems. Geometric controls and hybrid systems. Prerequisite: approval of department.

MAE 6255. Plasma Engineering in Aerospace and Nanotechnology. 3 Credits.
Plasma fundamentals, electromagnetic waves in plasma, plasma–wall interactions, modeling and experimental techniques in plasmas, electrical discharge, plasma propulsion, plasma-based nanotechnology. Prerequisite: MAE 3126.

MAE 6257. Theory of Vibration. 3 Credits.
Damped and undamped natural vibration, response of single- and multiple-degrees-of-freedom systems to steady-state and transient excitations, modal analysis, nonproportional damping and complex modes, variation formulation of equations of motion, discretization of structural systems for vibrational analysis. Prerequisite: approval of department.

MAE 6258. Advanced Vibration Analysis and Control. 3 Credits.
Passive and active vibration control of discrete and continuous systems, dynamic vibration absorbers, random vibrations, failure analysis, modal analysis, nonlinear vibrations. Prerequisites: MAE 3134 and MAE 4182 or graduate standing. (Spring).

MAE 6260. Nanomechanics. 3 Credits.
Introduction to crystallography; interatomic potentials; phonon dispersion relations; molecular dynamics simulation; Nose–Hoover thermostat; coarse grained non-equilibrium molecular dynamics; multiple length/time scale theory of multi-physics; microcontinuum field theories; applications to nano materials/structures. Prerequisite: approval of department.

MAE 6261. Air Pollution. 3 Credits.
Introductory course on the generation, monitoring, and control of air pollution. Atmospheric pollutants; current levels and health problems. Combustion chemistry and mixing. Photochemical processes; smog and measurements. Atmospheric dispersion; inversion and acid rain. Prerequisite: approval of department.

MAE 6262. Energy Systems Analysis I. 3 Credits.
Analysis of energy resources and conversion devices. Statistical data analysis, forecasting, I/O, and net energy analyses, mathematical modeling. Prerequisite: approval of department.

MAE 6263. Advances in Energy Engineering. 3 Credits.
Review of thermodynamics, heat transfer, fluid dynamics, and materials technology used in the energy industries. New energy-efficient technologies in transportation and buildings; renewable energy (wind, solar, and biomass). Climate change and sustainability issues, such as carbon capture, cap and trade, carbon sequestration.

MAE 6270. Theoretical Acoustics. 3 Credits.
Basic acoustic theory in stationary and uniformly moving media; waves in infinite space; sound transmission through interfaces; sound radiation from simple solid boundaries, source and dipole fields; propagation in ducts and enclosures; elements of classical absorption of sound. Prerequisite: APSC 6213, MAE 6221.

MAE 6271. Time Series Analysis. 3 Credits.
Harmonic analysis of random signals; auto- and cross-correlations and spectra; coherence; modern techniques for spectral estimation, including fast Fourier transform, maximum entropy, and maximum likelihood; bias and variability; randomly sampled data; digital filtering; applications. Prerequisite: approval of department.

MAE 6274. Dynamics/Cntrl of Spacecraft. 3 Credits.
Fundamentals of satellite attitude dynamics and passive stabilization. Spacecraft attitude representation, rotational kinematics and kinetics. External torques. Dynamics of gyroscopes. Gravity gradient stabilization. Effect of internal energy dissipation on stability of spinning bodies and methods of despin. Dual spin satellites. Prerequisite: approval of department.

MAE 6275. Dynamics and Control of Aircraft. 3 Credits.
Derivation of equations of motion, Euler transformations and direction cosines, stability derivatives and linearization of equations of motion, stability of linear systems with application to longitudinal and lateral dynamics, Laplace transform techniques, and frequency-response analysis. Departmental approval required prior to registration. (Fall, even years).

MAE 6276. Mechanics of Space Flight. 3 Credits.
Coordinate and time systems. Newton's laws; 2-, 3-, and n-body problems, Lagrange points, gravity-assisted trajectories, variation of parameters and orbit perturbations, non-central gravity effects, drag, sun-synchronous, and formation orbits. Numerical applications using MatLab. Prerequisite: approval of department.

MAE 6277. Spacecraft Attitude Control. 3 Credits.
Control of spinning and three-axis stabilized spacecraft. Elements of linear control theory for single-input, single-output systems and basic feedback control laws. Momentum management and actuator desaturation. Sensors for attitude determination. Application of modern control for multi-input, multi-output systems. Control system simulations using MatLab. (As arranged).

MAE 6280. Thermodynamics. 3 Credits.
Review of First and Second Laws of Thermodynamics and combining the two through exergy; entropy generation minimization and applications. Single phase systems, exergy analyses, multiphase systems, phase diagrams and the corresponding states principle. Prerequisite: approval of department.

MAE 6281. Advanced Thermodynamics. 3 Credits.
Development of classical and quantum statistical mechanics, including Maxwell–Boltzman distributions and microscopic origins of entropy and other thermodynamic variables. Partition functions and micro- and grand-canonical ensembles; Fermi–Dirac, Bose–Einstein, and intermediate statistics. Einstein and Debye models of solids. Prerequisite: MAE 6280 .

MAE 6282. Convective Heat/Mass Transfer. 3 Credits.
Heat and momentum transfer in laminar and turbulent flow. The laminar boundary-layer solution. Similarity and nondimensional parameters. Mass-momentum heat transfer analogy. Convective heat transfer at high velocity. Stability, transition, and turbulence. Free convection. Prerequisite: MAE 6221 .

MAE 6283. Radiative Heat Transfer. 3 Credits.
Basic concepts of heat transfer by thermal radiation starting from Planck's equation for blackbody radiation. Realistic engineering problems are addressed, some involving radiative heat transfer with a variety of surfaces, geometries, and enclosures. Radiative heat flow combined with conduction and convection boundaries. Prerequisite: approval of department.

MAE 6284. Combustion. 3 Credits.
Basic combustion phenomena. Rate processes and chemical kinetics. Chain reaction theory. Detonation, deflagration, diffusion flames, heterogeneous combustion. Experimental measurements. Impact of pollution regulations and alternate fuels. Prerequisite: approval of department.

MAE 6286. Numerical Solution Techniques in Mechanica land Aerospace Engineering. 3 Credits.
Development of finite difference and finite element techniques for solving elliptic, parabolic, and hyperbolic partial differential equations. Prerequisite: APSC 6213.

MAE 6287. Applied Finite Element Methods. 3 Credits.
Review of theory of elasticity. Basic aspects of theory and application of finite element methods. Utilization of MSC/NASTRAN for static, dynamic, linear, and nonlinear analyses of problems in mechanical, aeronautical, and astronautical engineering. Course emphasizes individual hands-on experience with the MSC/NASTRAN code. Prerequisite: approval of department.

MAE 6288. Advanced Finite Element Analysis. 3 Credits.
Review of variational formulation of the finite element method. Finite element analysis of large-strain thermomechanics. Applications to static and dynamic problems in finite elasticity, Fung elasticity (biomechanics), nonlocal theory, active stress in living biological tissues, biological growth, and large-strain plasticity. Recent developments in finite element methods. Same as CE 8330. Prerequisite: approval of department.

MAE 6290. Special Topics in Materials Science. 3 Credits.
Selected subjects of current interest. Arranged by consultation between department faculty and students. Typical topics include experimental methods in materials science and nondestructive inspection of materials. Prerequisite: approval of department.

MAE 6291. Special Topics in Mechanical Engineering. 3 Credits.
Selected subjects of current interest. Arranged by consultation between department faculty and students. Typical topics include tribology, power systems design, solar heating systems, HVAC, and plasticity theory. Prerequisite: approval of department.

MAE 6292. Special Topics in Aerospace Engineering. 3 Credits.
Selected subjects of current interest. Arranged by consultation between department faculty and students. Typical topics include environmental noise control, aeroacoustics, hypersonic flow, and flight vehicle aerodynamics. May be repeated for credit. Prerequisite: approval of department.

MAE 6298. Research. 1-6 Credits.
Basic research projects as arranged. May be repeated for credit.

MAE 6998. MS Thesis Research. 3 Credits.

MAE 6999. MS Thesis Research. 3 Credits.

MAE 8350. Advanced Topics in Materials Science. 3 Credits.
Topics such as surface science that are of current research interest. Selected after consultation between department faculty and students. Prerequisite: approval of department.

MAE 8351. Advanced Topics in Mechanical Engineering. 3 Credits.
Topics such as advanced analytical mechanics, advanced mechanics of continua, and advanced theory of elasticity that are of current research interest. Selected after consultation between department faculty and students. Prerequisite: approval of department.

MAE 8352. Advanced Topics in Aerospace Engineering. 3 Credits.
Topics such as nonsteady flow, physical gas dynamics, turbulence, and nonlinear wave propagation that are of current research interest. Selected after consultation between department faculty and students. Prerequisite: approval of department.

MAE 8998. Advanced Reading & Research. 1-12 Credits.
Limited to students preparing for the Doctor of Philosophy qualifying examination. May be repeated for credit.

MAE 8999. Dissertation Research. 1-12 Credits.
Limited to Doctor of Philosophy candidates. May be repeated for credit.

BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing, power and propulsion systems, robotics, and control systems. The Department of Mechanical and Aerospace Engineering offers the bachelor of science with a major in mechanical engineering degree program to prepare students for work in these fields. The program is accredited by ABET (Accreditation Board for Engineering and Technology).

Visit the program website (http://www.mae.seas.gwu.edu/programs-degrees) for additional information.

REQUIREMENTS

Recommended program of study

Code	Title	Credits
First semester		
CHEM 1111	General Chemistry I *	
MAE 1001	Introduction to Mechanical and Aerospace Engineering

*Course satisfies the University General Education Requirement in math, science, and writing.

**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list (p. 38); the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list. (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf) Humanities and social sciences electives must include PHIL 2135 Ethics in Business and the Professions.

†All technical electives must be approved by the undergraduate advisor. On a case-by-case basis, technical electives may be chosen from other departments if approved by both the undergraduate advisor and the department chair.

Code	Title	Credits
Technical electives are chosen from MAE courses in the 3000, 4000, and 6000 series, excluding:		
MAE 3171	Patent Law for Engineers	
MAE 4172	Engineering Design and the Patent System	
MAE 6298	Research	
MAE 6998 & MAE 6999	MS Thesis Research and MS Thesis Research	

Visit the program website (http://www.mae.seas.gwu.edu/programs-degrees) for additional information.

BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING, AEROSPACE OPTION

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing, power and propulsion systems, robotics, and control systems. The bachelor of science with a major in mechanical engineering, aerospace option degree program prepares students to work in the aerospace industry or to pursue graduate study in aerospace engineering. It provides a strong foundation in aerodynamics, airplane performance, propulsion, aerospace structures, orbital mechanics, spacecraft dynamics, and aircraft and spacecraft design.

Visit the program website (http://www.mae.seas.gwu.edu/programs-degrees) for additional information.

[1] Course satisfies the university general education requirement in math, science, and writing.

[2] At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list. At least one humanities course must be selected from the University General Education Requirement list (p. 38); the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list.

[3] Space: In the 5th semester take MAE 3145 and in the 8th semester take MAE 6249 Spacecraft Design. Aero: In the 7th

semester take MAE 4163 Airplane Performance and in the 8th semester take MAE 6247 Aircraft Design I.

[4] All technical electives must be approved by the undergraduate advisor. On a case-by-case basis, technical electives may be chosen from other departments if approved by both the undergraduate advisor and the department chair. Technical electives are chosen from MAE courses in the 3000, 4000, and 6000 series, excluding: MAE 3171 Patent Law for Engineers, MAE 4172 Engineering Design and the Patent System, MAE 6298 Research, MAE 6998 MS Thesis Research and MAE 6999 MS Thesis Research. Visit the program website (http://www.mae.seas.gwu.edu/programs-degrees) for additional information.

BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING, BIOMECHANICAL OPTION

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing, power and propulsion systems, robotics, and control systems. The bachelor of science with a major in mechanical engineering, biomechanical option degree program prepares students to work in the biomedical industry or to pursue graduate study in biomedical engineering. It provides a strong foundation in human anatomy and physiology, biomechanics, biomaterials, and design of biomedical devices.

Visit the program website (http://www.mae.seas.gwu.edu/programs-degrees) for additional information.

MAE 3128	Biomechanics I	
MAE 3134	Linear System Dynamics	
MAE 3167W	Mechanics of Materials Lab	
MAE 3193	Mechanical Systems Design	
Humanities or social sciences elective [2]		

Seventh semester	
MAE 4182	Electromechanical Control System Design
MAE 3192	Manufacturing Processes and Systems
MAE 6238	Biomaterials
MAE 4151	Mechanical Engineering Project
Two humanities or social sciences electives [2]	
Eighth semester	
MAE 3187	Heat Transfer
MAE 4129	Biomechanics II
MAE 4152W	Mechanical Engineering Laboratory
Two humanities or social sciences electives [2]	
Technical elective [3]	

[1] Course satisfies the university general education requirement in math, science, and writing.
[2] At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 38); the remaining course must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list (p. 38); the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list. (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf)

[3] Technical electives are chosen from MAE courses in the 3000, 4000, and 6000 series, excluding: MAE 3171 Patent Law for Engineers, MAE 4172 Engineering Design and the Patent System, MAE 6298 Research, MAE 6998 MS Thesis Research and MAE 6999 MS Thesis Research. Visit the program website (http://www.mae.seas.gwu.edu/programs-degrees) for additional information.

BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING, MEDICAL PREPARATION OPTION

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing, power and propulsion systems, robotics, and control systems. The bachelor of science with a major in mechanical engineering, medical preparation option degree program prepares students for application to medical school. Students are prepared to work in research and development or to pursue graduate study in the fields of biomechanics and biotechnology.

Visit the program website (http://www.mae.seas.gwu.edu/programs-degrees) for additional information.

REQUIREMENTS

Recommended program of study

Code	Title	Credits
First semester		
CHEM 1111	General Chemistry I [1]	
MAE 1001	Introduction to Mechanical and Aerospace Engineering	
MATH 1231	Single-Variable Calculus I [1]

BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING, PATENT LAW OPTION

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing, power and propulsion systems, robotics, and control systems. The bachelor of science with a major in mechanical engineering, patent law option degree program provides a strong foundation in fundamental principles of patent law and the influences of the U.S. patent system on modern engineering design. Students in this option obtain skills and knowledge that can lead to work as a technical specialist in a patent law firm or in the patent department of an industrial employer. The option provides excellent preparation for pursuit of a law degree that may focus on intellectual property law.

Visit the program website (http://www.mae.seas.gwu.edu/programs-degrees) for additional information.

Requirement list or the SEAS General Education Requirement list. (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf)

[3] Technical electives are chosen from MAE courses in the 3000, 4000, and 6000 series, excluding: MAE 3171 Patent Law for Engineers, MAE 4172 Engineering Design and the Patent System, MAE 6298 Research, MAE 6998 MS Thesis Research and MAE 6999 MS Thesis Research. Visit the program website (http://www.mae.seas.gwu.edu/programs-degrees) for additional information.

BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING, ROBOTICS OPTION

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing, power and propulsion systems, robotics, and control systems. The bachelor of science with a major in mechanical engineering, robotics option degree program prepares students to work in the robotics industry or to pursue graduate study in robotics engineering. It provides a strong foundation in robotic mechanisms design, analysis, and integration; kinematics, dynamics, and control of robots; mechatronics design; sensing, actuation, and measurement; microprocessors for robotic systems; robotic haptics; and topics on artificial intelligence.

Visit the program website (http://www.mae.seas.gwu.edu/programs-degrees) for additional information.

[3] All technical electives must be approved by the undergraduate advisor. On a case-by-case basis, technical electives may be chosen from other departments if approved by both the undergraduate advisor and the department chair.
Technical electives are chosen from MAE courses in the 3000, 4000, and 6000 series, excluding: MAE 3171 Patent Law for Engineers,MAE 4172 Engineering Design and the Patent System, MAE 6298 Research, MAE 6998 MS Thesis Research and MAE 6999 MS Thesis Research. Visit the program website (http://www.mae.seas.gwu.edu/programs-degrees) for additional information.

MINOR IN MECHANICAL ENGINEERING

REQUIREMENTS

Code	Title	Credits
Prerequisites		
The following courses must be completed before beginning the minor program:		
APSC 2113	Engineering Analysis I	
PHYS 1021	University Physics I	
Required		
APSC 2057	Analytical Mechanics I	
APSC 2058	Analytical Mechanics II	
CE 2220	Introduction to the Mechanics of Solids	
MAE 2131	Thermodynamics	
MAE 3126	Fluid Mechanics I	
MAE 3191	Mechanical Design	
or MAE 3187	Heat Transfer	

COMBINED BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING AND MASTER OF SCIENCE IN THE FIELD OF MECHANICAL ENGINEERING

The combined bachelor of science with a major in mechanical engineering and master of science in the field of mechanical engineering degree program (B.S./M.S.) is offered by the School of Engineering and Applied Science's Department of Mechanical and Aerospace Engineering (http://www.mae.seas.gwu.edu).

REQUIREMENTS

Five-Year BS/MS Degree Program

The MAE Department offers a five-year dual degree program for the B.S. and M.S. in mechanical engineering. The five-year program differs from the standard B.S. in mechanical engineering in that:

1. In the seventh and eight semesters, three 3-credit courses are taken at the graduate level. Two of these courses must complete the requirements of the four-year Bachelor of Science curriculum as the required courses or technical electives. One of these 3-credit courses is in excess of the requirements of the four-year Bachelor of Science curriculum.
2. In the ninth and tenth semesters, students take eight 3-credit courses at the graduate level. Alternatively, in the ninth and subsequent semesters (probably extending beyond a total of five years) students take a total of five 3-credit courses and a Master's thesis (6 credits).
3. Courses taken as part of items 1 and 2 above must satisfy the requirements of the Master of Science degree and be chosen with approval from their advisor.

Students must have a 3.4 GPA at the end of the sixth semester to be admitted to the program and must satisfy all requirements for graduation with a Bachelor's degree at the end of the eighth semester to continue in it. All requirements for master's degree students are in effect for the graduate portion of the program. Students apply through the normal GW MAE MS application process during the seventh semester.

MASTER OF SCIENCE IN THE FIELD OF MECHANICAL AND AEROSPACE ENGINEERING

The master of science in the field of mechanical and aerospace engineering degree program offers a a rigorous course of study that helps prepare students for leadership roles in government and industry. Students have the opportunity to work across disciplines in emerging areas of technology. The program is designed to build a solid background on the fundamentals of the related discipline, and at the same time it can be tailored to meet individual needs under the guidance of an academic advisor. Students can tailor their program to meet their interests and goals by choosing from the following focus areas: aerospace engineering; design of mechanical engineering systems; fluid mechanics, thermal sciences, and energy; industrial engineering; solid mechanics and materials science; and structures and dynamics; and robotics, mechatronics, and controls. Thesis and non-thesis options are available.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://www.graduate.seas.gwu.edu/programs/mechanical-and-aerospace-engineering/admissions-requirements) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: non-thesis option—a minimum of 33 credits, including the required focus area curriculum; thesis option—30 credits, including the required focus area curriculum and 6 credits in thesis research.

Aerospace Engineering

Required	
APSC 6212	Analytical Methods in Engineering II
or APSC 6213	Analytical Methods in Engineering III
MAE 6286	Numerical Solution Techniques in Mechanica land Aerospace Engineering
One of the following:	
MAE 6207	Theory of Elasticity I
MAE 6221	Fluid Mechanics
MAE 6276	Mechanics of Space Flight
Electives	
Remaining credits in aeroacoustics, aeronautics, astronautics, propulsion, or space systems elective courses	

Design of Mechanical Engineering Systems

Required	
MAE 6243	Advanced Mechanical Engineering Design
MAE 6251	Computer-Integrated Manufacturing
MAE 6286	Numerical Solution Techniques in Mechanica land Aerospace Engineering
Electives	
Remaining credits in computer-aided design, computer-integrated design and manufacturing, mechanical engineering design, or robotics courses	

Fluid Mechanics, Thermal Sciences, and Energy

Required	
APSC 6213	Analytical Methods in Engineering III
MAE 6221	Fluid Mechanics
MAE 6286	Numerical Solution Techniques in Mechanica land Aerospace Engineering
Electives	
Remaining credits in elective courses	

Industrial Engineering

Required	
EMSE 6755	Quality Control and Acceptance Sampling
EMSE 6770	Techniques of Risk Analysis and Management
MAE 6201	Intro to Manufacturing
MAE 6252	Projects in Computer-Integrated Design and Manufacturing
One of the following:	
MATH 2233	Multivariable Calculus
APSC 3115	Engineering Analysis III
CSCI 1041	Introduction to FORTRAN Programming
CSCI 1121	Introduction to C Programming
CSCI 1131	Introduction to Programming with C
Electives	
Remaining credits in elective courses in two approved three-course sequences, one in the Department of Mechanical and Aerospace Engineering, the other in a cooperating department in SEAS	

Solid Mechanics and Materials Science

Required	
APSC 6213	Analytical Methods in Engineering III
Two of the following:	
MAE 6210	Continuum Mechanics
MAE 6238	Biomaterials
MAE 6239	Computational Nanosciences
Electives	
Remaining credits in elective courses	

Structures and Dynamics

Required	
APSC 6213	Analytical Methods in Engineering III
MAE 6207	Theory of Elasticity I
MAE 6286	Numerical Solution Techniques in Mechanica land Aerospace Engineering
Elecives	
Remaining credits in elective courses	

Robotics, Mechatronics, and Controls

Required	
MAE 6245	Robotic Systems
MAE 6246	Electromechanical Control Systems
One of the following:	
MAE 6240	Kinematic Synthesis
MAE 6242	Advanced Mechanisms
MAE 6243	Advanced Mechanical Engineering Design
Electives	
Remaining credits in elective courses	

DOCTOR OF PHILOSOPHY IN THE FIELD OF MECHANICAL AND AEROSPACE ENGINEERING

Offered through the department of mechanical and aerospace engineering, the Ph.D. program in mechanical and aerospace engineering prepares students for leadership careers in academia, industry and government. Students and faculty work together to explore solutions in areas such as robotics, traditional and additive manufacturing, tissue engineering, energy materials and harvesting, plasma-based systems, fluid dynamics and nanotechnology.

Students choose from the following areas of focus:

- Aerospace engineering
- Design of mechanical engineering systems
- Fluid mechanics, thermal sciences, and energy
- Industrial engineering
- Solid mechanics and materials science
- Structures and dynamics
- Robotics, mechatronics, and controls

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under School of Engineering, Doctoral Program Regulations (http://bulletin.gwu.edu/engineering-applied-science/#seasregulationstext)

Students with an MS degree must take a minimum of 30 credits, of which at least 12 credits are graduate course credits. Students with a BS degree must take a minimum of 54 credits,

of which at least 36 credits are graduate course credits.
In some cases, particularly when the student undertakes a doctoral program in a field other than that in which the earlier degree was earned, the program of study exceeds the minimum number of credits.

No specific courses are required; the student and advisor design the curriculum to meet the student's needs and goals.

Other requirements

- Qualifying examinations: All Ph.D. students are required to take the Doctoral Qualifying Examination (DQE) held in the first two weeks of each semester. The goal of the exam is to determine the student's aptitude and ability to do original and independent research at the doctoral level, to assess the student's ability to review previous work from the literature, and to determine the student's ability to understand and apply fundamental concepts in his/her technical area. A written proposal and an oral presentation of the chosen problem are required. All students should take the exam as early as possible after they complete at least 6 credits of core courses and 6 credits of electives, and maintain an average GPA of at least 3.4. The exam should typically be taken no later than the beginning of their 3rd semester.
- Seminar attendence: prior to graduation, doctoral students must complete the Department of Mechanical and Aerospace Engineering (MAE) seminar attendance requirement, whereby the student must attend at least 80 percent of the MAE seminars offered during any two semesters of the student's enrollment. In order for a seminar to count toward the requirement, the student must be present for the duration of the seminar. To track attendance, the student must obtain a certification signature on the MAE Seminar Attendance Form from an MAE faculty member present at the seminar and submit the completed form to the MAE departmental office at the end of the semester. The student may attempt to fulfill this requirement in as many semesters as needed. This requirement is applicable to doctoral students who matriculate during the 2016-2017 academic year or later.
- Dissertation: During the research phase, each doctoral candidate will be required to give a dissertation research proposal presentation to the Dissertation Committee. The student's research progress will be assessed by the committee and appropriate suggestions for continuing research directions will be solicited from the Committee. After consultation with the research advisor, the final Ph.D. defense can be scheduled, typically at least one year after the research proposal.

Student should contact the department for additional information and requirements

GRADUATE CERTIFICATE IN COMPUTER-INTEGRATED DESIGN IN MECHANICAL AND AEROSPACE ENGINEERING

The graduate certificate in computer-integrated design in mechanical and aerospace engineering program offers an alternative to a master of science degree (M.S.) degree program for professionals who wish to expand their education beyond the bachelor's degree but might not have the time to commit to a full graduate degree program. The graduate certificate also may serve as a path towards the M.S. degree as all certificate courses are transferable to an M.S. program.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
Required		
MAE 6220	Applied Computational Fluid Dynamics	
MAE 6243	Advanced Mechanical Engineering Design	
MAE 6246	Electromechanical Control Systems	
MAE 6287	Applied Finite Element Methods	

GRADUATE CERTIFICATE IN ENERGY ENGINEERING AND MANAGEMENT

Offered jointly through the Department of Mechanical and Aerospace Engineering (http://mae.seas.gwu.edu) and the Department of Engineering Management and Systems Engineering (http://emse.seas.gwu.edu), the graduate certificate in energy engineering and management provides a well-rounded education in energy engineering in the technical areas of fluid mechanics, heat transfer, and mathematics, as well as policy oriented education in state-of-the-art renewable energy technologies, energy management, and design for energy efficient tools and buildings. The certificate program is designed to enable graduates to analyze energy consumption patterns and perform energy audits, manage energy generation projects, manage energy utilization and its economic impacts, and analyze energy options to achieve optimal energy efficiency.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit program website (https://www.emse.seas.gwu.edu/graduate-certificates) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
Required		
EMSE 6260	Energy Management	
EMSE 6285	Analytical Tools for Energy Management	
MAE 6262	Energy Systems Analysis I	
MAE 6263	Advances in Energy Engineering	

ELLIOTT SCHOOL OF INTERNATIONAL AFFAIRS

Dean R. E. Brigety II
Associate Deans J. Brinkerhoff, E. McCord, H. Harrison, L. Stephenson,

The Elliott School of International Affairs offers undergraduate and graduate programs to prepare individuals to understand and work in an increasingly globalized world. The historical roots of the Elliott School extend back to the establishment of the School of Comparative Jurisprudence and Diplomacy in 1898. In 1966, the School separated from the School of Government, Business, and International Affairs to become an independent unit, the School of Public and International Affairs. In 1987, the name was changed to the School of International Affairs, and in 1988 the School was renamed in honor of Evelyn E. and Lloyd H. Elliott. Lloyd Elliott was the president of George Washington University from 1965 to 1988.

The Elliott School offers the bachelor of arts degree in international affairs, Asian studies, Latin American and hemispheric studies, and Middle East studies; the master of arts degree in the fields of international affairs, Asian studies, European and Eurasian studies, global communication, international development studies, international science and technology policy, international trade and investment policy, Latin American and hemispheric studies, Middle East studies, and security policy studies; the master of international policy and practice degree for mid-career professionals; and the master of international studies degree for students enrolled in master's degree programs at international universities with which the Elliott School has a special partnership.

These programs provide advanced academic and professional training in international affairs as preparation for employment in public, private, and nonprofit sectors. Focusing on major historical and contemporary issues in international affairs, the programs are both interdisciplinary and multidisciplinary, combining courses offered through the School with courses offered by other schools and departments of the University.

REGULATIONS

- **Undergraduate Degree Requirements (p. 701)**
- **Graduate Degree Requirements (p. 702)**
  - Scholarship Requirements (p. 702)
  - Readmission (p. 703)

Undergraduate Degree Requirements

Academic Standing

To earn a bachelor's degree, students must complete 120 credits, meet the University General Education Requirement (p. 38), and have a cumulative grade point average of at least 2.0. Courses in lifestyle, sport, and physical activity do not count toward the degree; some ROTC classes are also excluded. Rules governing Academic Standing are applicable to students enrolled for a full-time program (12 credits or more) during the fall or spring semester.

Scholarship Performance in the Major

All courses indicated as requirements for the major, including courses taken to fulfill the third-year language proficiency requirement, must be completed with a minimum grade of *C*−. If a student receives a grade of *D+, D,* or *D*− in any of these courses, the credit will count toward the degree, but the student must either repeat the course or, with approval of the academic advisor, substitute another course; in either case, the student must earn a minimum grade of *C*−. If the student must repeat the course, credit for the repetition does not count toward the degree, and grades for both the initial course and the repeated course are used to compute the GPA. If the Office of Academic Advising and Student Services (http://elliott.gwu.edu/undergraduate-advising) allows another course to be substituted, the initial course is considered to be an elective. Students are expected to consult the Office of Academic Advising and Student Services in all matters affecting the program of study, such as changes, substitutions, withdrawals, or transfer of credit from other institutions.

Incompletes

Conditions under which the symbol *I* (Incomplete) may be assigned are described under University Regulations (p. 21). Incomplete course work must be completed within the designated time period agreed upon by the instructor, student, and school, but no more than one calendar year from the end of the semester in which the course was taken. All students who receive an Incomplete must maintain active student status during the subsequent semester(s) in which the work of the course is being completed. If not registered in other classes during this period, the student must register for continuous enrollment status. When work for the course is completed, the instructor will complete a grade change form and submit it to the Office of the Registrar (https://registrar.gwu.edu). Beginning with the fall 2014 semester, the final grade will replace the symbol of *I*. If work for the course is not completed within the designated time, the grade will be converted automatically to a grade of *F,* Failure, 0 quality points, and the grade-point average and academic standing recalculated. The *I* cannot be changed by reregistering for the course at GW or by taking its equivalent elsewhere. In cases of well-documented extenuating circumstances, the instructor and student may jointly petition the Office of Academic Advising and Student Services (http://elliott.gwu.edu/undergraduate-advising) for additional time in which to complete the work of the course. Such petitions should be submitted within a year of the assignment of the *I*. Students are not permitted to register for any additional course work if they have more than two Incompletes on their record.

Pass/No Pass Option

A student who has a cumulative grade-point average of 2.5 or better may, with the approval of the Office of Academic Advising and Student Services (http://elliott.gwu.edu/undergraduate-advising), take one course per semester and receive a grade of Pass, *P*, or No Pass, *NP*, which will be recorded on the student's transcript but will not be reflected in the cumulative grade average. A student must sign up for such an option at the Office of Academic Advising and Student Services within the first eight weeks of classes. Under no circumstances may a student change from *P/NP* status to graded status, or vice versa, after the end of the eighth week of the semester. Foreign language courses and required courses in the student's degree program (except those in which the grade of *P* or *NP* is normally assigned) may not be taken on a *P/NP* basis. Freshmen may not elect to take a course on a P/NP basis. A transfer student may not elect to take a course on a *P/NP* basis until the second semester of enrollment in the University. No more than six courses in which the grade of *P* or *NP* is assigned will apply toward the degree, including courses in which the grade of *P* or *NP* is normally given.

Study Abroad

Students are encouraged to study abroad. Those wishing to study abroad must consult their academic advisor and the University's Office for Study Abroad (http://studyabroad.gwu.edu). A maximum of 34 credits may be transferred in from other institutions' study abroad programs. Credits for courses taken abroad through GW Study Centers and GW Summer Abroad do not apply to this maximum. Students must secure prior approval from the Office of Academic Advising and Student Services for any plan of study abroad in order for the credit to apply toward the student's degree requirements. Students must apply to a program from the University's list of approved study abroad programs. A catalogue or other description of the study abroad program must be presented for consideration together with detailed descriptions of the courses to be taken.

Internships

Internships offer students the opportunity to make practical use of the knowledge they acquire in the classroom. Elliott School undergraduates students who have completed at least 24 credits in-residence, have a cumulative grade-point average of at least 2.5, and have no more than one incomplete on their transcript, are eligible to arrange internships for credit or zero-credit, to a total maximum of 6 credits toward the degree. Academic work in the field of the internship is required. A zero-credit internship, which requires no additional academic work outside of the internship itself, is also available. Internships are available in the private, nonprofit, and public sectors. Students must register for internships (even if for zero-credit) through the Office of Academic Advising and Student Services but are responsible for locating their own internships.

Double Majors

Students who complete the requirements of two majors in the Elliott School (such as international affairs and Asian studies) may graduate with a double major. Consult the Office of Academic Advising and Student Services (http://elliott.gwu.edu/undergraduate-advising) to officially declare both majors on the appropriate form.

Students in the Elliott School may declare a second major offered by Columbian College of Arts and Sciences (majors in communication, creative writing & English, journalism & mass communication and political communication are excluded), the School of Engineering and Applied Science, the Milken Institute School of Public Health or the School of Business (finance major only). Permission for the second major must be obtained from the appropriate administrative office of the other school.

Students in Columbian College of Arts and Sciences, the School of Engineering and Applied Science, the Milken Institute School of Public Health and the School of Business may declare a second major in the Elliott School. Students wishing to pursue these options must request approval through the Elliott School's Academic Advising and Student Services. Students must complete all degree requirements for their major in their home school in order to graduate with a second major from the other school.

In all cases, double majors do not result in two degrees. See Double Majors and Double Degrees in the University Regulations (p. 21).

Special Honors

Students who complete a senior thesis or research seminar with a grade of A- or higher, earn a cumulative GPA of 3.7, and complete 60 credit hours in residence at GW will be awarded Special Honors.

Graduate Degree Requirements

Scholarship Requirements

Information on grades and computing the grade-point average is under University Regulations (p. 21). Courses taken to satisfy degree requirements cannot be taken on a *CR/NC* basis, with the exception of some capstone courses.

Graduate students are required to maintain a minimum cumulative grade-point average of 3.0. A student whose grade-point average falls below 3.0 or who receives a grade of F in a course at any point after completing 9 credits is placed on academic probation. This probation extends through the period in which the student next attempts up to 12 credits of work, including prescribed courses. The student's academic advisor will meet with the program director and/or academic dean to review the student's record. The student's account will be put on hold until the student has met with the program director and/or academic dean to discuss the terms

of probation. A student's program may be restricted by the program director if deemed necessary.

During the probation period, the student's performance will be monitored to determine suitability for continued study. The Office of Academic Advising and Student Services will inform the program director and/or academic dean if the student is no longer on probation or is eligible for dismissal. Incomplete grades are not allowed during the probation period and are grounds for dismissal. A student who fails to raise the cumulative grade-point average to 3.0 or above by the end of the period of probation or who is subject to probation for a second time at any point during the academic program is eligible for dismissal. If a student is eligible for dismissal, the academic dean in consultation with the program director will decide whether the student is to be dismissed from the Elliott School.

Readmission

A graduate student who has not been continuously enrolled or on approved leave of absence must file an application for readmission the semester before planning to return to school.

General Requirements for Master of Arts Degree Programs

Programs leading to the master of arts degree require a minimum of 40 credits of graduate course work, which includes a capstone project. By the end of the first semester in residence, candidates for the degree are required to submit to the Office of Academic Advising and Student Services for final approval a plan of study that includes fields, supporting course work, and any other required information as endorsed by the program director. Degrees are awarded after the student has completed the required course work, an acceptable capstone project, and satisfied the foreign language requirement (if relevant).

Students with sufficient academic backgrounds may waive a core course with approval of a designated faculty member from the department concerned. A course waiver does not reduce the number of credits required for the degree. Under special circumstances, upper-level undergraduate courses may be counted toward the master's degree; registration for graduate credit must be approved at the beginning of the course by the program director, the instructor, and the Office of Academic Advising and Student Services. The student who takes an undergraduate course for graduate credit is expected, by arrangement with the instructor, to do work at the graduate level in addition to the regular work of the course. Normally, no more than 9 credits of approved undergraduate course work may be taken for credit toward a graduate degree. Academic credit counted toward a previous degree may not be counted toward the master's degree.

All master's degree candidates must complete degree requirements within five years of their admission to the program. Students who are unable temporarily to continue their studies may request a leave of absence not to exceed one year. Extensions beyond the five-year period may be granted in exceptional circumstances, but the student will be required to register for Leave of Absence each semester.

Students are encouraged, and in some cases required, to take professional skills-based courses (IAFF 6502 Professional Skills I–IAFF 6503 Professional Skills II) and should consult their program guidelines for limits on the number of credits in these courses that can count toward their degree program. The maximum allowed by the Elliott School is 4 credits.

No more than a combined total of 6 graduate credits may be transferred from other accredited institutions or from non-degree status; these may be accepted only under limited conditions of time, grades earned, and relevance to the student's program. Foreign language course credit is not eligible for transfer.

Foreign Language Requirements

In most degree programs, a candidate for the master of arts must demonstrate reading and speaking proficiency in a modern foreign language. All students in regional programs (including those who are not native speakers of English) must demonstrate proficiency in a language appropriate to the study of the specific region. Students should consult their program guidelines for specific requirements, academic credit, and options for fulfilling the language requirement.

Capstone/Thesis Option

Every student must successfully complete a capstone or, with approval of the program director, a thesis near the conclusion of the master's program. For the capstone, the student must have a 3.0 grade-point average and must have completed or registered for 30 credits. If there is a lapse of time between completion of other course work and the capstone, the student must be continuously enrolled during this period. A student who fails to complete successfully the capstone may repeat it with the permission of the dean. If the student fails a second time, no further opportunity to complete the capstone will be permitted and the degree will not be conferred. Details concerning the capstone course vary across programs; students should consult their program guidelines for details.

For most programs, exceptional students may write a thesis, in addition to the capstone, if they qualify by having a minimum 3.5 grade-point average for at least 20 credits of course work in their program and developing a formal thesis proposal approved by their prospective thesis advisor and the program director.

The thesis subject should be selected as early as possible so as to permit effective integration with the student's course work. A student will not be permitted to register for (IAFF 6998 Thesis–IAFF 6999 Thesis) until the thesis subject has been formally submitted to the Office of Academic Advising. The subject must be approved by the member of the full-time faculty under whom the thesis is to be written, a second

member of the faculty who will serve as a reader, and the student's program director. The thesis in its final form must have the approval of the thesis director and one other reader. All theses must be submitted electronically by May 1 prior to the student's final academic year and meet the formatting and other requirements set forth at GW's Electronic Theses and Dissertations Submission website (http://library.gwu.edu/etds).

Payment of tuition for thesis research entitles the candidate, during the period of registration, to the advice and direction of the thesis director and the other reader. In case a thesis is unfinished, the student must maintain continuous enrollment and is allowed one calendar year to complete it. If the preparation of the thesis extends beyond the additional calendar year, the student must register for the entire 6 credits of thesis again and pay tuition as for a repeated course.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in Asian studies (p. 709)
- Bachelor of Arts with a major in international affairs (p. 711)
- Bachelor of Arts with a major in Latin American and hemispheric studies (p. 712)
- Bachelor of Arts with a major in Middle East studies (p. 713)

Minors

- Minors (p. 714)

GRADUATE

Master's programs

- Master of Arts in the field of Asian studies (p. 717)
- Master of Arts in the field of European and Eurasian studies (p. 724)
- Master of Arts in the field of global communication (p. 729)
- Master of Arts in the field of international affairs (p. 734)
- Master of Arts in the field of international development studies (p. 747)
- Master of Arts in the field of international science and technology policy (p. 750)
- Master of Arts in the field of international trade and investment policy (p. 751)
- Master of Arts in the field of Latin American and hemispheric studies (p. 752)
- Master of Arts in the field of Middle East studies (p. 753)
- Master of Arts in the field of security policy studies (p. 754)
- Master of International Policy and Practice (p. 756)
- Master of International Studies (p. 756)

Combined programs

- Dual Master of Arts and Master of Public Health (p. 757)
- Joint Master of Arts and Juris Doctor (p. 757)
- Joint Master of Arts and Master of Business Administration (p. 757)

CERTIFICATES

The Elliott School of International Affairs offers a series of graduate certificates covering topics of specialized interest. The certificate programs are open to all graduate students presently enrolled in the Elliott School, Columbian College of Arts and Sciences, Graduate School of Education and Human Development, School of Business, and Milken Institute School of Public Health. The programs are also open to graduate students from other universities, individuals who have already earned a graduate degree, and individuals with a bachelor's degree and a minimum of eight years of relevant professional work experience. Applicants who have less than eight years of work experience are eligible to apply but must submit the same application materials required of other M.A. degree programs. Transfer credit from non-GW institutions is not accepted into any graduate certificate program. No more than 6 credits of graduate course work taken in any degree or non-degree status within the University, including the Elliott School, may be included in any graduate certificate program. Additional information is available in the Elliott School Graduate Admissions office (http://elliott.gwu.edu/graduate-admissions).

Graduate certificate programs

- Graduate certificate in global gender policy (p. 758)
- Graduate certificate in international science and technology policy (p. 758)
- Graduate certificate in nuclear policy (p. 759)

Research Instructors T. Costa, S.R. Marshall, J. Rothenberg, J.E. Vayman

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

IAFF 1005. Introduction to International Affairs: A Washington Perspective. 4 Credits.
Open only to first-year students in the Elliott School. An introduction to the study of international affairs, integrating material designed to orient students to the Elliott School, the University, and the city of Washington. Students who have transferred into the Elliott School should take PSC 1003 instead of this course. Credit may not be earned for both IAFF 1005 and PSC 1003.

IAFF 2040. Basic Topics in International Affairs. 0-3 Credits.
Topics announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Primarily for Elliott School freshmen and sophomores.

IAFF 2090. Latin America: Problems and Promise. 3 Credits.
An interdisciplinary course in Latin American studies designed to introduce undergraduates to the diverse, rich, and complex history, politics, economy, culture, and society of Latin America.

IAFF 2091. East Asia-Past and Present. 3 Credits.
An interdisciplinary course offering a comprehensive and integrated introduction to the civilizations and present problems of East Asia.

IAFF 2092. Russia and Eastern Europe: An Introduction. 3 Credits.
A multidisciplinary introduction to the lands and cultures of the former Soviet Union and Central and Eastern Europe. The main emphasis is on history and politics, with attention also given to economics, trade, geography, military matters, literature, and the media.

IAFF 2093. Africa: Problems and Prospects. 3 Credits.
Aspects of the environment, culture, and politics as they affect the present and anticipated future of Africa.

IAFF 2094. Europe: International and Domestic Interactions. 3 Credits.
A multidisciplinary view of contemporary Europe, including the E.U. states, other states of Eastern Europe, and Turkey. The widening processes of political, judicial, economic, cultural, and security integration. Prerequisite: IAFF 1005, PSC 1001.

IAFF 2190. Special Topics. 3 Credits.

IAFF 2190W. Special Topics. 3 Credits.

IAFF 3155. Spain in the Modern World. 3 Credits.

IAFF 3171. U.S. Foreign Policy Summer Program. 3-4 Credits.
The institutions and ideas that shape U.S. foreign policy, including the U.S. Congress and administration, foreign embassies, international organizations, think tanks, interest groups, and media outlets. A separate section of the course covers issues of reporting on foreign policy issues. The program has special admission criteria.

IAFF 3179. Special Topics in Science and Technology Policy. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3180. Special Topics in Security Policy. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3180W. Spec Topics in Security Policy. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3181. Special Topics in Conflict Resolution. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3182. Special Topics in Foreign Policy. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3183. Special Topics in Development Policy. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3184. Special Topics in Trade and International Economic Policy. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3185. Special Topics in European and Eurasian Studies. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3186. Special Topics in Asian Studies. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3186W. SpecialTopics in Asian Studies. 0-3 Credits.

IAFF 3187. Special Topics in Latin American and Hemispheric Studies. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3188. Special Topics in Middle East Studies. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3189. Special Topics in African Studies. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3190. Special Topics in International Affairs. 0-3 Credits.
The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3190W. Special Topics. 0-3 Credits.

IAFF 3192. ESIA Undergraduate Scholars Workshop. 1 Credit.
For Elliott School juniors and seniors who have applied to and been accepted into the ESIA Undergraduate Scholars Program. Students fine-tune their research questions, conduct the bulk of their research, draft abstracts, and outline their papers. See http://elliott.gwu.edu/academics/ugrad/scholars/index.cfm for more information.

IAFF 3193W. ESIA UG Scholars Course. 3 Credits.

IAFF 3195. Internship. 0-3 Credits.
Internships in public, private, and nonprofit organizations concerned with international affairs. Students must meet selection criteria, find a sponsoring faculty member, and receive approval from the Elliott School Office of Academic Advising and Student Services. May be repeated for up to 6 credits with permission.

IAFF 3198. Independent Study and Research. 1-3 Credits.
For juniors and seniors with a minimum grade-point average of 3.0. Students must find a sponsoring faculty member and receive approval from the Elliott School Office of Academic Advising and Student Services. May be repeated for credit with permission of the dean.

IAFF 4191. Research Seminar. 3 Credits.
Intensive readings, discussion, research, and writing. Students must meet selection criteria and receive advisor approval. For Elliott School juniors and seniors only. Restricted to For Elliott School juniors and seniors only.

IAFF 4191W. Research Seminar. 3 Credits.
Intensive readings, discussion, research, and writing. Students must meet selection criteria and receive advisor approval. For Elliott School juniors and seniors only.

IAFF 4199. Senior Thesis. 3 Credits.
For Elliott School seniors only. Students must meet selection criteria, find a sponsoring faculty member, and receive approval from the Elliott School Office of Academic Advising and Student Services.

IAFF 5700. Special Topics. 3 Credits.

IAFF 6101. IA Cornerstone. 3 Credits.
Political, economic, and social theories of international relations and their applications to practice.

IAFF 6102. Global Gender Policy. 3 Credits.
An interdisciplinary and comparative approach to examination of policies targeted at achieving gender equality and of the costs of policies that are not gender-specific. Topics include poverty reduction, environmental sustainability, social justice, global and personal security, and prevention of and responses to extreme calamities and crises. How global gender policies are rationalized, adopted, implemented, and assessed. Focus on "what works" and why it works; gaps that remain in achieving global gender equality.

IAFF 6106. Nuclear Weapons. 3 Credits.
The technology and politics associated with nuclear weapons. Strategy and deterrence, force planning and operations, and the prospect of nuclear terrorism.

IAFF 6118. Special Topics in International Affairs. 3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6121. International Development Studies Cornerstone. 3 Credits.
Introduction to the concepts and methods of international development. Open only to M.A. candidates in international development studies.

IAFF 6122. Development Policy and Practice. 3 Credits.
An overview of economic development in developing countries; key challenges of economic growth, poverty alleviation, and development.

IAFF 6136. Gender and Development. 3 Credits.
Theoretical approaches to gender and development and debates over how to promote gender equity and rights across the gender spectrum. Key issues in gender and development and the range of actors who are involved in promoting gender equality. General patterns, lessons with broader applications, and challenges and differences within and between societies.

IAFF 6137. Development Studies Pre-Capstone Workshop. 1 Credit.
Students work in teams to find a suitable client and negotiate a project, with detailed terms of reference and a work plan to be carried out in the spring semester. Open only to M.A. candidates in international development studies.

IAFF 6138. Special Topics in International Development Studies. 0-3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6139. International Development Studies Capstone. 3 Credits.
A project-oriented development course abroad, designed to synthesize the skills and knowledge that students have acquired in their graduate study. Open only to M.A. candidates in international development studies.

IAFF 6141. International Science and Technology Policy Cornerstone. 3 Credits.
Introduction to the study of international science and technology policy; focus on policy issues that arise from interactions between scientific and technological developments and government activity.

IAFF 6142. Technology Creation/Diffusion. 3 Credits.
Examination of the relationship between invention (inception), innovation (first application), and dissemination (diffusion) of technological knowledge; focus on the technological environment prevailing in the major developed market economies.

IAFF 6145. U.S. Space Policy. 3 Credits.
Origins, evolution, current status, and future prospects of U.S. space policies and programs. U.S. civilian, military, and national security space programs and space activities of the U.S. private sector.

IAFF 6146. Space Law. 3 Credits.
The underlying principles of international space law, with emphasis on issues of particular concern as the uses of space increase for exploration, commerce, and security.

IAFF 6148. Special Topics in Space Policy. 3 Credits.
Topic announced in the Schedule of Classes.

IAFF 6151. Environmental Policy. 3 Credits.
Examination of public policies designed to protect the human and physical environment; focus on the ways science and technology can simultaneously create new environmental problems and contribute to their mitigation and prevention.

IAFF 6153. Science, Technology, and National Security. 3 Credits.
The contributions of science and technology to U.S. security in military, intelligence, and homeland security activities.

IAFF 6158. Special Topics in International Science and Technology Policy. 0-3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6159. ISTP Capstone Project. 3 Credits.
A seminar designed to synthesize the skills and knowledge that students have acquired in their graduate study. Open only to M.A. candidates in science and technology policy.

IAFF 6160. Defense Policy and Program Analysis. 3 Credits.
Examination of how national security policy is formulated and translated into a defense budget, program priorities, and force structure. Focus on nuclear forces.

IAFF 6163. Transnational Security. 3 Credits.
Overview of security concerns that transcend state borders, including terrorism, drug trafficking, organized crime, weapons proliferation, migration, and environmental degradation.

IAFF 6165. Fundamentals of Intelligence. 3 Credits.
The institutional structure of the intelligence community; the intelligence production cycle, including tasking, collection, analysis, covert action, and counterintelligence; and relations between the intelligence and policy communities.

IAFF 6167. DefensePolicy&ProgAnalysis II. 3 Credits.
Analysis of the development of national security policy and analytic techniques to derive a defense program and force structure from it. Special attention to general-purpose forces.

IAFF 6169. Homeland Security. 3 Credits.
The central missions of a homeland security agency: domestic security, emergency preparedness, technology policy, timely intelligence, counterintelligence, and preemptive actions. How the U.S. has dealt historically with internal security matters; contemporary approaches to security problems.

IAFF 6171. Introduction to Conflict Resolution. 3 Credits.
Interstate disputes, contemporary civil wars, complex political emergencies, and other forms of organized violence.

IAFF 6173. Security and Development. 3 Credits.
Consideration of the relationship between security and development reflecting the growing interest from the security field in issues that have traditionally been the purview of development, and vice versa.

IAFF 6186. Special Topics in Security Policy Studies. 3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6189. Security Policy Studies Capstone. 3 Credits.
A project-oriented course, designed to synthesize the skills and knowledge that students have acquired in their graduate study. Open only to M.A. candidates in security policy studies.

IAFF 6198. Special Topics in International Trade and Investment Policy. 0-3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6199. International Trade and Investment Policy Capstone. 1 Credit.
A project-oriented course, designed to synthesize the skills and knowledge that students have acquired in their graduate study. Open only to M.A. candidates in international trade and investment policy.

IAFF 6208. Special Topics in Global Communication. 0-3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6209. Global Communication Capstone. 3 Credits.
A project-oriented course, designed to synthesize the skills and knowledge that students have acquired in their graduate study. Open only to M.A. candidates in global communication.

IAFF 6211. MIPP Practicum. 3 Credits.
For Master of International Policy and Practice degree candidates only.

IAFF 6302. Taiwan: Internal Development and Foreign Policy. 3 Credits.
The social, political, and economic development in Taiwan since World War II; Taiwan's foreign affairs.

IAFF 6305. U.S.-South Asia Relations. 3 Credits.
The nature of challenges and opportunities facing the South Asia region and the U.S. policy response. The rise of India as a global actor; relations between India and Pakistan; political transformation in the countries of the region, including Nepal and Sri Lanka.

IAFF 6308. Intl Relations of South Asia. 3 Credits.

IAFF 6318. Special Topics in Asian Studies. 0-3 Credits.
Topics announced in Schedule of Classes.

IAFF 6321. European and Eurasian Studies Cornerstone. 3 Credits.
Survey of current research on Europe and Eurasia. Research paper required. Required of M.A. candidates in European and Eurasian studies; open to others with permission of the instructor.

IAFF 6338. Special Topics in European and Eurasian Studies. 0-3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6339. European and Eurasian Studies Capstone. 3 Credits.
Survey of current research on Europe and Eurasia. Research paper required. Required of M.A. candidates in European and Eurasian studies; open to others with permission of the instructor.

IAFF 6341. Latin American and Hemispheric Studies Cornerstone. 3 Credits.
Multidisciplinary foundation course for the Latin American and hemispheric studies program.

IAFF 6342. Drug Trafficking in the Americas. 3 Credits.
A historical, comparative, and contemporary picture of drug trafficking in the Americas and the anti-narcotics policies to combat this trade.

IAFF 6343. Indigenous Social Movements. 3 Credits.

IAFF 6357. Pre-Capstone Workshop. 1 Credit.

IAFF 6358. Special Topics in Latin American and Hemispheric Studies. 0-3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6359. Latin American and Hemispheric Studies Capstone. 3 Credits.
A project-oriented course, designed to apply the skills and synthesize the knowledge that students have acquired in their graduate study. Open only to M.A. candidates in Latin American and hemispheric studies.

IAFF 6361. Middle East Studies Cornerstone. 1 Credit.
Multidisciplinary foundation course for the Middle East studies program. Introduction to key issues.

IAFF 6362. RegionalSecurity in MiddleEast. 3 Credits.
The nature, elements, and future of security in the Middle East region. Various analytical frameworks are examined to consider the interplay of national interests, ideology, and regionalism. Issues in regional security.

IAFF 6363. PoliticalEconomy/Middle East. 3 Credits.
Current political economy of the Middle East, including an overview of Islamic economic concepts and political organizations.

IAFF 6364. Religion and Society in the Modern Middle East. 3 Credits.
Comparative overview, both historical and current, of religious and social trends in the Middle East.

IAFF 6378. Special Topics in Middle East Studies. 0-3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6379. Middle East Studies Capstone. 3 Credits.
A project-oriented course, designed to synthesize the skills and knowledge that students have acquired in their graduate study. Open only to M.A. candidates in Middle East studies.

IAFF 6501. Quant Analysis Int'l Aff Prac. 3 Credits.
Overview of quantitative measurement, data summary, statistical inference, and elementary modeling such as linear regression.

IAFF 6502. Professional Skills I. 1 Credit.
Short courses that focus on developing specialized skills for international affairs professionals. Topics announced in the Schedule of Classes.

IAFF 6503. Professional Skills II. 1 Credit.
Continuation of IAFF 6502. Short courses that focus on developing specialized skills for international affairs professionals. Topics announced in the Schedule of Classes.

IAFF 6504. Intermediate Conversation. 1 Credit.
Short courses designed to develop professional language skills for international affairs students. Specific languages announced in the Schedule of Classes.

IAFF 6505. Elliott School Seminars. 0-3 Credits.
Topics announced in the Schedule of Classes.

IAFF 6515. Graduate Internship in International Affairs. 0 Credits.
Limited to Elliott School M.A. degree candidates. Internship and research paper involving experience at an international organization or with international issues.

IAFF 6516. Independent Study and Research. 1-3 Credits.
Limited to Elliott School M.A. degree candidates. Written permission of instructor required.

IAFF 6517. Independent Study and Research. 1-3 Credits.

IAFF 6521. U.S. Foreign Policy Summer Program. 3-4 Credits.
The institutions and ideas that shape U.S. foreign policy, including the U.S. Congress and administration, foreign embassies, international organizations, think tanks, interest groups, and media outlets. A separate section of the course covers issues of reporting on foreign policy issues.

IAFF 6898. Capstone Workshop. 1 Credit.
The first part of a two-semester project that addresses a concrete policy problem or issue in international affairs. In small teams, students refine the policy question of the capstone project, develop a research strategy, select appropriate research methods, and begin research.

IAFF 6899. Capstone Course. 3 Credits.
Completion of the capstone sequence by conduct of the group's research, completion of the capstone report, and oral presentation of research findings and recommendations. Prerequisites: IAFF 6898.

IAFF 6998. Thesis. 3 Credits.
Open to Elliott School M.A. candidates who have selected the thesis option.

IAFF 6999. Thesis. 3 Credits.
Open to Elliott School M.A. candidates who have selected the thesis option.

UNDERGRADUATE PROGRAMS

Bachelor's programs

- Bachelor of Arts with a major in Asian studies (p. 709)
- Bachelor of Arts with a major in international affairs (p. 711)
- Bachelor of Arts with a major in Latin American and hemispheric studies (p. 712)
- Bachelor of Arts with a major in Middle East studies (p. 713)

Minors

- Minors (p. 714)

BACHELOR OF ARTS WITH A MAJOR IN ASIAN STUDIES

GENERAL REQUIREMENTS

Curriculum Requirements for the First Two Years

Curriculum requirements that Elliott School students should try to address in their freshman and sophomore years are listed below. Consult the Elliott School Undergraduate General Requirements (http://elliott.gwu.edu/undergraduate-programs/requirements) before choosing courses to fulfill these requirements. Information on credit by examination or waiving curriculum requirements is available from academic advisors in the Elliott School.

As a basis for all Elliott School Bachelor of Arts programs, students take:

Code	Title	Credits
IAFF 1005	Introduction to International Affairs: A Washington Perspective	
ECON 1011	Principles of Economics I *	
ECON 1012	Principles of Economics II *	
PSC 1001	Introduction to Comparative Politics *	
HIST 1011	World History, 1500-Present **	
ANTH 1002	Sociocultural Anthropology *	
or GEOG 1001	Introduction to Human Geography	

UW 1020	University Writing *
One course in mathematics ***	
One course in science (lab required) ***	
Humanities/Creative Arts (9 credits of humanities or 6 credits of humanities plus 3 credits of creative arts courses) ***	
Third year proficiency in a modern foreign language ***	

*These courses satisfy many of the University General Education Requirement (p. 38).
** While HIST 1011 satisfies the university general education requirement in humanities, it does not meet the Elliott School's school-specific requirement for humanities/creative arts. A list of courses that fulfill the humanities and creative arts requirements (p. 38) can be found online.
***Additional university- and school-specific general education courses are required for all Elliott School undergraduates. A list of the courses that fulfill the quantitative reasoning, scientific reasoning, humanities and /or creative arts requirements can be found on the Elliott School Undergraduate Programs website (http://elliott.gwu.edu/undergraduate-programs/supporting-courses).

MAJOR REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Elliott School of International Affairs, Undergraduate Degree Requirements (p. 701).

A list of designated courses that fulfill major requirements can be found on the Asian Studies major webpage (http://elliott.gwu.edu/asian-studies-major). With approval of the advisor or program director, pertinent special topics or other courses may be taken in place of those listed.

Required courses for the major:

IAFF 2091	East Asia-Past and Present
ECON 2151	Economic Development
ECON 2169	Introduction to the Economy of China
ECON 2170	Intro to the Economy of Japan
Three courses from a list of approved history and culture courses	
Two approved courses from the following:	
PSC 2369	Comparative Politics of South Asia
PSC 2370	Comparative Politics of China and Northeast Asia
PSC 2371	Politics and Foreign Policy of China
PSC 2373	Comparative Politics of Southeast Asia
PSC 2374	Politics and Foreign Policy of Japan
PSC 2377	Comparative Politics of the Middle East
PSC 2377W	Comparative Politics of the Middle East
PSC 2379	Politics and Foreign Policy of Israel
PSC 2381	Comparative Politics of Middle and Southern Africa
PSC 2383	Comparative Politics of Latin America
PSC 2439	International Political Economy
PSC 2440	Theories of International Politics
PSC 2442	International Organizations
PSC 2442W	International Organizations
PSC 2444	Public International Law
PSC 2446	U.S. Foreign Policy
PSC 2449	International Security Politics
PSC 2449W	International Security Politics
PSC 2461	European-Atlantic Relations
PSC 2468	Post-Soviet Foreign Policy
PSC 2475	International Relations of East Asia
GEOG 3165	Geography of South Asia
One course in Asian literature	
Three upper-division Asia-related courses selected in consultation with the program director	
The program must include a research methods course and a regional foundation course on a region other than the student's major	
Completion of third-year–level language proficiency in an approved Asian language is required	

BACHELOR OF ARTS WITH A MAJOR IN INTERNATIONAL AFFAIRS

GENERAL REQUIREMENTS

Curriculum Requirements for the First Two Years

Curriculum requirements that Elliott School students should try to address in their freshman and sophomore years are listed below. Consult the Elliott School Undergraduate General Requirements (http://elliott.gwu.edu/undergraduate-programs/requirements) before choosing courses to fulfill these requirements. Information on credit by examination or waiving curriculum requirements is available from academic advisors in the Elliott School.

As a basis for all Elliott School Bachelor of Arts programs, students take:

Code	Title	Credits
IAFF 1005	Introduction to International Affairs: A Washington Perspective	
ECON 1011	Principles of Economics I *	
ECON 1012	Principles of Economics II *	
PSC 1001	Introduction to Comparative Politics *	
HIST 1011	World History, 1500-Present **	
ANTH 1002	Sociocultural Anthropology *	
or GEOG 1001	Introduction to Human Geography	
UW 1020	University Writing *	
One course in mathematics ***		
One course in science (lab required) ***		
Humanities/Creative Arts (9 credits of humanities or 6 credits of humanities plus 3 credits of creative arts courses) ***		
Third year proficiency in a modern foreign language ***		

*These courses satisfy many of the University General Education Requirement (p. 38).
** While HIST 1011 satisfies the university general education requirement in humanities, it does not meet the Elliott School's school-specific requirement for humanities/creative arts. A list of courses that fulfill the humanities and creative arts requirements (p. 38) can be found online.
***Additional university- and school-specific general education courses are required for all Elliott School undergraduates. A list of the courses that fulfill the quantitative reasoning, scientific reasoning, humanities and /or creative arts requirements can be found on the Elliott School Undergraduate Programs website (http://elliott.gwu.edu/undergraduate-programs/supporting-courses).

MAJOR REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Elliott School of International Affairs, Undergraduate Programs (p. 701).

A list of designated courses that fulfill major requirements is at the International Affairs major webpage (http://elliott.gwu.edu/international-affairs-major/fundamentals). With approval of the advisor or program director, pertinent special topics or other courses may be taken in place of those listed.

Requirements for the major:

ECON 2180	Survey of International Economics
or ECON 2181	International Trade Theory and Policy
ECON 2182	International Macroeconomic Theory and Policy
One upper-division course from designated lists for each of the following:	
Research methods (from ANTH, ECON, GEOG, IAFF, PSC, PSYC, PUBH, SOC, STAT)	
International and comparative politics (from PSC or IAFF)	
Historical analysis: U.S. foreign policy (from HIST)	
An ANTH or GEOG course	
Demonstrate third-year proficiency in an appropriate modern foreign language by course work or examination	
Two regional foundational courses covering different regions	
15 credits of additional course work in either a functional or regional concentration:	
Functional concentrations are international politics; international economics; comparative political, economic, and social systems; international development; contemporary cultures and societies; conflict resolution; security policy; global public health; international environmental studies	
Regional concentrations are Africa, Asia, Europe and Eurasia, Latin America, Middle East	

BACHELOR OF ARTS WITH A MAJOR IN LATIN AMERICAN AND HEMISPHERIC STUDIES

GENERAL REQUIREMENTS

Curriculum Requirements for the First Two Years

Curriculum requirements that Elliott School students should try to address in their freshman and sophomore years are listed below. Consult the Elliott School Undergraduate General Requirements (http://elliott.gwu.edu/undergraduate-programs/requirements) before choosing courses to fulfill these requirements. Information on credit by examination or waiving curriculum requirements is available from academic advisors in the Elliott School.

As a basis for all Elliott School Bachelor of Arts programs, students take:

Code	Title	Credits

** While HIST 1011 satisfies the university general education requirement in humanities, it does not meet the Elliott School's school-specific requirement for humanities/creative arts. A list of courses that fulfill the humanities and creative arts requirements (p. 38) can be found online.
***Additional university- and school-specific general education courses are required for all Elliott School undergraduates. A list of the courses that fulfill the quantitative reasoning, scientific reasoning, humanities and /or creative arts requirements can be found on the Elliott School Undergraduate Programs website (http://elliott.gwu.edu/undergraduate-programs/supporting-courses).

MAJOR REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Elliott School of International Affairs, Undergraduate Degree Requirements (p. 701).

A list of designated courses that fulfill major requirements is at the Middle East Studies major webpage (http://elliott.gwu.edu/middle-east-studies-major). With approval of the advisor or program director, pertinent Special Topics or other courses may be taken in place of those listed.

Required courses for the major:

IAFF 2040	Basic Topics in International Affairs (Middle East) (as a foundation course)
Two of the following:	
HIST 2803	The Ancient Near East and Egypt to 322 B.C.
HIST 2804	History of Ancient Israel
HIST 3060	Modern Jewish History
HIST 3801	Topics in Middle Eastern History
HIST 3810	History of the Middle East to 1800
HIST 3811	The Middle East in the 20th Century
Two of the following:	
PSC 2377	Comparative Politics of the Middle East
PSC 2379	Politics and Foreign Policy of Israel
PSC 2476	The Arab-Israeli Conflict
PSC 2478	International Relations of the Middle East
Two of the following:	
REL 1009	The Hebrew Scriptures
REL 2211	Rabbinic Thought
REL 2401	Islam
REL 3414	Islamic Philosophy and Theology
REL 3431	Sufism (Islamic Mysticism)
REL 3475	Islamic Religion and Art
REL 3481	Women in Islam

One of the following:	
ECON 2136	Environmental and Natural Resource Economics
ECON 2151	Economic Development
ECON 2180	Survey of International Economics
ECON 2181 & ECON 2182	International Trade Theory and Policy and International Macroeconomic Theory and Policy
One of the following literature courses:	
ARAB 3501	Arabic and Arab Identity
ARAB 4001	Genres in Modern Arabic Literature
ARAB 4002	Arabic Narratives Through the Ages
HEBR 4001 & HEBR 4002	Advanced Hebrew Literature I and Advanced Hebrew Literature II
Two additional courses related to the Middle East from any discipline, selected in consultation with the program director	
A research methods course and a regional foundation course on a region other than the student's major	
Completion of third-year–level language proficiency in one of the following:	
ARAB 3301	Modern Arabic Literature
ARAB 3302	Media Arabic
ARAB 3311	Business Arabic
HEBR 3301	Modern Hebrew Fiction
or HEBR 3302	The Israeli Media
PERS 3002	Media Persian

MINORS

Elliott School students may take a minor, such as business, economics, or languages, in other schools of the University.

Students from other schools of the University may take a minor in international affairs in the Elliott School. Contact the Office of Academic Advising (http://elliott.gwu.edu/undergraduate-advising) in the Elliott School.

The minor is 18-21 credits, plus 0-8 credits of foreign language, and consists of the requirements listed below.

Foreign Language Requirement

Students must prove first-year proficiency in a modern foreign language by course work or examination (0-8 credits).

A student who thinks they are beyond the first year of a modern foreign language, but cannot demonstrate this by course work at GW, should contact their Elliott School academic advisor (http://elliott.gwu.edu/academics/ugrad/advising/advisors.cfm).

ITAL 1001	Basic Italian I
ITAL 1002	Basic Italian 2
JAPN 1001	Beginning Japanese I
JAPN 1002	Beginning Japanese II
KOR 1001	Beginning Korean I
KOR 1002	Beginning Korean II
PERS 1001	Beginning Persian I
PERS 1002	Beginning Persian II
SLAV 1001	First-Year Russian I
SLAV 1002	First-Year Russian II
SPAN 1001	
SPAN 1002	
ARAB 1001	Beginning Arabic I
ARAB 1002	Beginning Arabic II
ARAB 1201	Intensive Elementary Arabic I
ARAB 1202	Intensive Elementary Arabic II
CHIN 1001	Beginning Chinese I
CHIN 1002	Beginning Chinese II
FREN 1001	Basic French I
FREN 1002	Basic French II
GER 1001	First-Year German I
GER 1002	First-Year German II
HEBR 1001	Beginning Hebrew I
HEBR 1002	Beginning Hebrew II

Advanced Fundamentals and Regional Foundations

- Anthropology or geography (https://elliott.gwu.edu/international-affairs-minor/#anthro) (3 credits)
- Historical analysis: U.S. foreign policy (https://elliott.gwu.edu/international-affairs-minor/#hist) (3 credits)

- International and comparative politics (https://elliott.gwu.edu/international-affairs-minor/#poli) (3 credits)
- International economics (https://elliott.gwu.edu/international-affairs-minor/#econ) (3 or 6 credits)
- Regional foundations (https://elliott.gwu.edu/international-affairs-minor/#regional) (6 credits)

Anthropology or Geography (3 credits)
Students must complete one course in anthropology or geography that is relevant to international affairs.

Note that ANTH 1002 (http://www.gwu.edu/~bulletin/ugrad/anth.html#1002): Sociocultural Anthropology is a prerequisite to most of the ANTH courses, and GEOG 1001 (http://www.gwu.edu/~bulletin/ugrad/geog.html#1001): Human Geography is a prerequisite to many of the GEOG courses shown below:

Select one:

ANTH 2506	Religion, Myth, and Magic
ANTH 3501	Anthropology of Development
ANTH 3502	Cultural Ecology
ANTH 3503	Psychological Anthropology
ANTH 3504	Illness, Healing, and Culture
ANTH 3506	Politics, Ethnicity, and Nationalism
ANTH 3507	Kinship, Family, and Community
ANTH 3508	Art and Culture
ANTH 3513	Anthropology of Human Rights
ANTH 3601	Language, Culture, and Cognition
GEOG 2110	Climate and Human Ecology
GEOG 2125	Transportation Systems and Networks
GEOG 2127	Population Geography
GEOG 2133	People, Land, and Food
GEOG 2134	Energy Resources
GEOG 2137	Environmental Hazards
GEOG 2141	Cities in the Developing World
GEOG 2145	The Cultural Landscape
GEOG 2146	Political Geography
GEOG 2147	Military Geography
GEOG 2148	Economic Geography
GEOG 3132	Environmental Quality and Management
GEOG 3143	Urban Sustainability
GEOG 3810	Planning Cities

Historical Analysis: U.S. Foreign Policy (3 credits)
Students must complete one course pertaining to the history of the United States as it relates to to contemporary international affairs.

Select one:

HIST 2340	US Diplomatic History
HIST 2710	The United States in Global Context, 1898–Present
AMST 2710	The United States in Global Context, 1898–Present
HIST 3035	The United States and the Wars in Indochina, 1945–1975
HIST 3332	History of American Foreign Policy Since World War II
HIST 3333	History of American Foreign Policy Since World War II

International and Comparative Politics (3 credits)
Students must complete one course pertaining to international political issues and theories from either an international relations or comparative politics perspective.

Note that PSC 1001 (http://www.gwu.edu/~bulletin/ugrad/psc.html#1001): Introduction to Comparative Politics or PSC 1003 (http://www.gwu.edu/~bulletin/ugrad/psc.html#1003): Introduction to International Relations is a prerequisite to the courses below:

Select one:

IAFF 3190	Special Topics in International Affairs (International Law)
IAFF 4191	Research Seminar (International Politics and Security Policy)
PSC 2334	Global Perspectives on Democracy
PSC 2337	Development Politics
PSC 2338	Nationalism
PSC 2439	International Political Economy
PSC 2440	Theories of International Politics
PSC 2442	International Organizations

PSC 2444	Public International Law
PSC 2446	U.S. Foreign Policy
PSC 2449	International Security Politics
PSC 2990	Selected Topics (Ethics in International Affairs)
IAFF 2040	Basic Topics in International Affairs (Ethics in International Affairs)

International Economics (3 or 6 credits)
Students must complete one or two courses pertaining to the theory of international economics.

ECON 1011	Principles of Economics I
ECON 1012	Principles of Economics II
ECON 2180	Survey of International Economics

– OR –

ECON 2181	International Trade Theory and Policy
AND	
ECON 2182	International Macroeconomic Theory and Policy

Regional Foundations (6 credits)
Students must take two courses from the lists below to gain an understanding of two regions of the world outside of the United States. The courses must represent two different regions.

Select two regions:
Africa

ANTH 3708	Anthropology of Africa
GEOG 3164	The Geography of Africa
HIST 3501	Topics: Africa
HIST 3540	West Africa to Independence
IAFF 2093	Africa: Problems and Prospects
IAFF 2190W	Special Topics (North Africa and the World)
IAFF 3189	Special Topics in African Studies (Transnational Justice in Africa)
PSC 2381	Comparative Politics of Sub-Saharan Africa
PSC 2482	African International Politics

Academic advisor approval is required for courses not listed above.

Latin America

ANTH 3702	Anthropology of Latin America
ECON 2185	Economic History and Problems of Latin America
GEOG 3161	Geography of Latin America
HIST 3701	Topics in Latin American History (Latin America and the World since 1820)
HIST 3711	History of Latin America II
IAFF 2090	Latin America: Problems and Promise
IAFF 2190W	Special Topics (Latin American Populism)
IAFF 3187	Special Topics in Latin American and Hemispheric Studies (Political Economy of Latin America)
PSC 2383	Comparative Politics of Latin America
PSC 2484	International Relations of Latin America

Academic advisor approval is required for courses not listed above.

Asia

ANTH 3704	Cultures of Southeast Asia
ANTH 3705	Anthropology of East Asia
GEOG 3165	Geography of South Asia
HIST 3601	Topics: Asian History (Modern Asia: 1750 to present)
HIST 3640	History of Southeast Asia
HIST 3840	History of Central Asia
IAFF 2091	East Asia-Past and Present
IAFF 3186	Special Topics in Asian Studies (Development issues in Southeast Asia; History and Politics of South Asia; Politics and Conflict of South Asia)
IAFF 3190	Special Topics in International Affairs (Human Rights and Democracy in Southeast Asia)
PSC 2369	Comparative Politics of South Asia
PSC 2373	Comparative Politics of Southeast Asia
PSC 2475	International Relations of East Asia

Academic advisor approval is required for courses not listed above.

Europe and Eurasia

IAFF 2092	Russia and Eastern Europe: An Introduction
IAFF 2094	Europe: International and Domestic Interactions
HIST 1121	The War of Ideas in European and International History, 1750–Present
HIST 3126	European Integration: A History
HIST 3168	Divided and United Germany Since 1945
HIST 3178	The Making of the Modern Balkans
HIST 3601	Topics: Asian History
PSC 2330	Comparative Politics of Western Europe
PSC 2331	Comparative Politics of Central and Eastern Europe

Academic advisor approval is required for courses not listed above.

Middle East

ANTH 3703	Cultures of the Pacific
GEOG 3154	Geography of the Middle East and North Africa
HIST 3801	Topics in Middle Eastern History
HIST 3811	The Middle East in the 20th Century
IAFF 2040	Basic Topics in International Affairs (Middle East: An International Affairs Survey)
IAFF 2190W	Special Topics (Arab Politics; Challenges and Change in the Middle East; Politics and Culture in the Middle East)
IAFF 3188	Special Topics in Middle East Studies (Political Islam)
PSC 2377	Comparative Politics of the Middle East
PSC 2478	International Relations of the Middle East

Academic advisor approval is required for courses not listed above.

GRADUATE PROGRAMS

Master's programs

- Master of Arts in the field of Asian studies (p. 717)
- Master of Arts in the field of European and Eurasian studies (p. 724)
- Master of Arts in the field of global communication (p. 729)

- Master of Arts in the field of security policy studies (p. 754)
- Master of International Policy and Practice (p. 756)
- Master of International Studies (p. 756)

Combined programs

- Dual Master of Arts and Master of Public Health (p. 757)
- Joint Master of Arts and Juris Doctor (p. 757)
- Joint Master of Arts and Master of Business Administration (p. 757)

MASTER OF ARTS IN THE FIELD OF ASIAN STUDIES

The Elliott School's Asian Studies degree program trains students to navigate the dynamic environment that is Asia, a continent whose diverse populations drive its changing needs and roles in the global arena. The curriculum prepares students to keep pace with a region on the path to sustained economic development as urban migration and international trade are exploding. Graduates of the program are equipped to address complex diplomatic, economic, security, and cultural issues coupled with an unprecedented rate of growth.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Prerequisite: a bachelor's degree in a related field and at least two years of study of an appropriate Asian language

The multidisciplinary program requires 40 credits including:

9 credits in core courses
9 credits in regional specialization

9 credits in thematic or professional specialization
9 credits in electives
4 credits in capstone course sequence
Foreign language proficiency (http://elliott.gwu.edu/asian-studies/foreign-language)

All Elliott School master's degree students (except MIPP students) are required to complete the capstone. Those students who wish to complete a thesis must do so in addition to the capstone requirement. Students pursuing a thesis need a minimum of a 3.5 GPA and approval from the faculty member they wish to have serve as their thesis director. Thesis students also need to complete at least one research methods course. Thesis credits will be counted as elective or specialization credits with Program Director approval.

As part of the degree requirements, students must select a regional specialization from the following:

- East Asia;
- South Asia; or
- Southeast Asia

Students must select a thematic or professional specialization from the following:

- Thematic specialization includes:
  - History of Modern Asia;
  - Politics and Policy in Asia;
  - International Relations of Asia;
  - Asian Business and Development; or
  - Culture, Art, and Religions of Asia
- Professional specialization includes:
  - Conflict and Conflict Resolution;
  - International Development;
  - International Economics;
  - Political Economy and Business;
  - International Health Policy;
  - International Organization, Diplomacy, and Globalization;
  - International Security Policy
  - Research Methods; or
  - Science, Technology, and International Affairs

Note: Courses selected for the regional specialization cannot overlap with those taken for thematic or professional specializations.

Program Requirements

Code	Title	Credits
9 credits in core courses		
Two of the following:		
HIST 6601	Topics: Asian History	
PSC 6388	Topics in Comparative Politics	
IAFF 6318	Special Topics in Asian Studies (Asian Business and Development)	
One of the following:		
PSC 6475	International Politics of East Asia	
IAFF 6318	Special Topics in Asian Studies (International Relations of South Asia)	
9 credits in a regional specialization chosen from one of the regional specializations below		
Courses selected for the regional specialization cannot overlap with those taken for thematic or professional specializations.		
9 credits in a thematic or professional specialization as detailed below		
Courses taken for the thematic specialization cannot overlap with those taken for the required regional specialization.		
9 credits in electives		
Students may use additional credits for foreign language or background coursework or one-credit skills courses. The Elliott School's skills courses are designed to supplement substantive graduate coursework with practical skills and knowledge that students need to perform effectively in the workplace. A maximum of three one-credit skills courses may be taken in this M.A. program.		
4 credits in capstone course sequence		
IAFF 6898	Capstone Workshop	
IAFF 6899	Capstone Course	
Foreign Language Proficiency		

Students in the M.A. regional studies programs are required to fulfill their foreign-language requirement by passing a reading and speaking proficiency examination administered by the Elliott School at the currently required level of proficiency. All M.A. regional studies students are required to pass both the reading and speaking parts of the language examination; advanced-level language coursework during or prior to enrollment at GW cannot substitute. Foreign-language proficiency examinations will continue to be offered during the fall and spring semesters. Students may take the examination at any point during their enrollment. Effective immediately, students in all programs (including regional studies) no longer have to wait until the completion of 20 credits to take the proficiency examination. Students will have three opportunities to pass the proficiency examination administered by the Elliott School. Failure to pass the exam for a third time will result in dismissal from the program.

Independent Study

If a core course is not offered during a student's time at GW, or if a student wishes to study a topic on which no course are offered at GW, that student may confer with the director of Asian Studies regarding the possibility of pursuing an independent study with a member of GW's faculty.

Regional Specializations

East Asia Specialization

Code	Title	Credits
Required		
At least three of the following:		
ECON 6269	Economy of China I

MASTER OF ARTS IN THE FIELD OF EUROPEAN AND EURASIAN STUDIES

In the vast geopolitical realm that stretches from the British Isles to Siberia and from the Nordic regions to the Mediterranean, powerful forces are pushing for political, social, and economic change. The European Union (EU) faces the continuing imperative of balancing supranationalism and national sovereignty, while simultaneously deepening its integrative activities and widening its membership.

EU member states and their neighbors confront a host of domestic challenges ranging from economic reform and

social diversity to terrorism and separatism. Russia and other members of the Commonwealth of Independent States stand at different points along the path of transition from communism to new political institutions. At the same time, a web of political, economic, security, and societal connections increasingly links the various parts of Europe and Eurasia with one another, as well as with the United States, the Islamic world, China, and other parts of the global community. In view of these dynamic interactions, it is essential to study Europe and Eurasia together.

The European and Eurasian Studies (EES) master of arts degree program at the Elliott School of International Affairs provides an interdisciplinary approach to understanding these important regions. The EES curriculum combines several required courses with a wide variety of additional courses and optional fields that can be selected to suit an individual student's professional goals and intellectual interests. This multifaceted program encompasses academic approaches to European and Eurasian affairs and develops practical analytical skills that are essential in the professional world of international affairs.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://elliott.gwu.edu/european-and-eurasian-studies) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 40 credits, including:

3 credits of cornerstone courses
3 credits of international economics courses
15 credits of core courses
9 credits of professional specialization
1 credit skills workshop
6 credits of electives
3 credits of capstone course sequence
Foreign language proficiency (http://elliott.gwu.edu/european-and-eurasian-studies/foreign-language)

All Elliott School master's degree students (except MIPP students) are required to complete the capstone. Those students who wish to complete a thesis must do so in addition to the capstone requirement. Students pursuing a thesis must have a minimum of a 3.5 GPA and approval from the faculty member whom they wish to serve as their thesis director. Thesis students also need to complete at least one research methods course. Thesis credits are counted as elective or specialization credits with Program Director approval.

As part of the degree requirements, students must select a professional specialization from the following:

- Academics
- European and Eurasian Cultures
- International Economics, Political Economy and Business
- International Education
- International Health Policy and Programs
- International Organization, Diplomacy and Globalization
- International Security Policy
- Science, Technology and International Affairs

Program Requirements

Code	Title	Credits

IAFF 6338	Special Topics in European and Eurasian Studies (History and Politics of the Caucasus)
IAFF 6338	Special Topics in European and Eurasian Studies (Security in Russia and Eurasia)
PSC 6333	Comparative Politics of Russia and Eurasia
PSC 6366	Government and Politics of Russia

9 credits of professional specialization

Three courses selected from one professional specialization field as listed below

Students may design their own field with the approval of the Program Director, or select one of the following fields:

1 credit skills workshop

IAFF 6502/6503	Professional Skills I

6 credits of electives

3 credits of capstone course sequence

IAFF 6339	European and Eurasian Studies Capstone

Foreign Language Proficiency

Students in the regional studies M.A. programs are required to be proficient in a modern foreign language that is used in their region of study to receive the degree. They must fulfill this foreign-language requirement by passing both the reading and the speaking proficiency examinations administered by the Elliott School at a level required by the academic program. Advanced-level language coursework during or prior to enrollment at GW cannot substitute. Foreign-language proficiency examinations will be offered during the fall and spring semesters. Students may take the examination at any point during their enrollment and will have three opportunities to pass the proficiency examination administered by the Elliott School. Failure to pass the exam for a third time will result in dismissal from the program.

NOTE: When a student's native language is not English, and is not a language used in their region of study (for example a student who is a native speaker of Chinese in the Middle East Studies program), that student must still demonstrate proficiency in a modern language used in their region of study by passing the Elliott School language proficiency examination. Students in the European and Eurasian Studies M.A. program may take any major European language other than English.

Professional Specializations

Academics Specialization

Code	Title	Credits
This field is designed for students who plan to pursue a doctoral degree in Economics, History, Political Science or some other discipline. With the advice of the Program Director and other faculty members, students choose three courses that will enhance their qualifications for admission into a Ph.D. program.		

European & Eurasian Cultures Specialization

Code	Title	Credits
Required		
At least three of the following:		
At least two courses must be foreign-language based, not in English. All courses listed below are undergraduate courses and will require extra work for graduate credit, to be arranged with the instructor and the Program Director.		
FREN 3550	Studies in 20th-Century French Literature (in French)	
FREN 3600	Special Topics in French Literature (in French)	
FREN 4600	Special Topics in French Literature (in French)	
FREN 3700	History of French Cinema (in French)	
GER 2161	German Culture–in English I (in English)	
GER 2162	German Culture–in English II (in English)	
GER 3181	History of German Cinema–in English (in English)	
GER 3183	Berlin Before & After the Wall (in English)	
GER 3184	German Thought - in English (in English)	
GER 3186	German Women Writers of the 19th and 20th Centuries (in German)	
GER 4175	Literature of two Germanies (in German)	
ITAL 4560	Modern Italian Novel (in Italian)	
SLAV 2015	Readings in the Russian Press I (in Russian)	
SLAV 2365	20th-Century Russian Literature to World War II (in English)	
SLAV 2366	Russian Literature from World War II to the Present (in English)	
SLAV 2473	20th-Century Russian Prose (in Russian)	
SLAV 2474	20th-Century Russian Poetry (in Russian)	
SLAV 2785	Introduction to Russian Cinema I (in English)	
SLAV 2786	Introduction to Russian Cinema II (in English)	
SPAN 3400	Theatre of Spain and Latin America (in Spanish)	
SPAN 3600	Special Topics (in Spanish)	
SPAN 3700	Cinema of Spain and Latin America (in Spanish)	
SPAN 4540	The Myth of the Two Spains (in Spanish)	

International Economics, Political Economy and Business Specialization

Code	Title	Credits
Required		
At least three of the following:		
ECON 6217	Survey of Economics I	
ECON 6283	Survey of International Trade Theory and Policy	
ECON 6284	Survey of International Macroeconomics and Finance Theory and Policy	
ECON 6295	Special Topics (East European Economies in Comparative Perspective)

MASTER OF ARTS IN THE FIELD OF GLOBAL COMMUNICATION

Offered jointly by GW's Elliott School of International Affairs and the Columbian College of Arts and Sciences' School of Media and Public Affairs (http://www.gwu.edu/~smpa) (SMPA), the master of arts in the field of global communication degree program combines the Elliott School's academic excellence in international affairs with SMPA's strengths as a school of communication and journalism. The graduate program trains students to understand the complex global information environment; its implications for governance, security, and business; and how to communicate effectively to global audiences.

A core curriculum focuses on communication, international politics, international economics, and research methods. Required skills courses cover topics such as developing communication strategies, cross-cultural communication, public speaking, and editing. Students also choose one of twelve specializations to build expertise on a major world region or global issue. In the final year, a capstone course tests students' ability to address a real-world problem using the skills and knowledge acquired during their course of study. The rigorous academic program prepares students both intellectually and professionally for exciting careers in the public, private, and nonprofit sectors.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Prerequisite: a bachelor's degree in a related field, with introductory macro- and microeconomics and at least two years of a modern foreign language

The program requires 40 credits including:

15 credits in core courses
9 credits in specialization
3 credits in skills courses
9 credits in electives
4 credits in capstone course sequence
Foreign language proficiency

All Elliott School master's degree students (except MIPP students) are required to complete the capstone. Those students who wish to complete a thesis must do so in addition to the capstone requirement. Students pursuing a thesis need a minimum of a 3.5 GPA and approval from the faculty member they wish to serve as their thesis director. Thesis students also need to complete at least one research methods course. Thesis credits will be counted as elective or specialization credits with Program Director approval.

Core Courses

15 credits in core courses

SMPA 6210	Media & Foreign Policy
SMPA 6241	Research Design
IAFF 6101	IA Cornerstone
ECON 6280	Survey of International Economics
or ECON 6250	Survey of Economic Development
One of the following:	
SMPA 6202	Media Effects, Public Opinion, and Persuasion
SMPA 6204	Strategic Political Communication

HIST 6030	History and Its Uses in International Affairs

Global Issues Specializations

9 credits in specialization

Specialization determined in consultation with director within either the global issues specialization or the regional focus specialization, all nine credits must taken in one subtopic; the exception is the international development (see below). The following course lists are meant as suggestions only and are not exhaustive.

Communication and Information Technology in International Affairs Specialization

Required

Nine credits from the following:	
ECON 6255	Economics of Technological Change
IAFF 6142	Technology Creation/Diffusion
IAFF 6151	Environmental Policy
IAFF 6153	Science, Technology, and National Security
IAFF 6158	Special Topics in International Science and Technology Policy
IAFF 6501	Quant Analysis Int'l Aff Prac
LAW 6412	Communications Law
LAW 6414	Develpmnt in Telecomm Law
PPPA 6018	Public Policy, Governance, and the Global Market
PSPR 6201	Public Relations Principles and Practices
PSPR 6204	Media Relations in the New Media World
PSPR 6208	Integrated Marketing Communications
SMPA 6250	Topics in Media Processes and Institutions (Information, Media and National Security)
SMPA 6250	Topics in Media Processes and Institutions (Changing Media Technology)
SMPA 6250	Topics in Media Processes and Institutions (International Communication)
SMPA 6250	Topics in Media Processes and Institutions (Electronic Media Policy)
SMPA 6250	Topics in Media Processes and Institutions (Public Affairs and Government Information)

Conflict and Conflict Resolution Specialization

Required

Nine credits from the following:	
ANTH 6507	Nationalism and Ethnicity
GEOG 6224	Seminar:Political Geography
HIST 6822	Nationalism in the Middle East
IAFF 6118	Special Topics in International Affairs (Ethics and International Politics)
IAFF 6118	Special Topics in International Affairs (Nation Building: Theory and Practice)
IAFF 6118	Special Topics in International Affairs (Religion and International Affairs)
IAFF 6118	Special Topics in International Affairs (Reinventing the United Nations)
IAFF 6118	Special Topics in International Affairs (Theory and Practice of International Negotiations)
IAFF 6186	Special Topics in Security Policy Studies (Food, Globalization, and Conflict)
IAFF 6186	Special Topics in Security Policy Studies (Military and Post-Conflict Intervention)
IAFF 6186	Special Topics in Security Policy Studies (Responses to Terrorism)
IAFF 6186	Special Topics in Security Policy Studies (War to Peace Transition)
MGT 6215	Conflict Management and Negotiations
PPSY 6103	Political Violence and Terrorism
PSC 6442	Politics and Practice of International Institutions
PSC 6444	Politics of International Law
PSC 6349	International Security Politics
PSC 6351	Civil-Military Relations
PSC 6476	The Arab-Israeli Conflict

PSC 8388	Selected Topics in Comparative Politics (Nationalism in Former Soviet Republics)
SMPA 6250	Topics in Media Processes and Institutions (Race, Media and Politics)

Global Gender Policy Specialization

Required

Nine credits from the following:	
ANTH 6501	Gender and Sexuality
IAFF 2190W	Special Topics
IAFF 3183	Special Topics in Development Policy (Human Trafficking)
IAFF 6102	Global Gender Policy
IAFF 6122	Development Policy and Practice
IAFF 6136	Gender and Development
PHIL 6238	Feminist Ethics and Policy Implications
PSYC 8275	Women and Health
SMPA 6205	Media, Development, and Globalization
SOC 6265	Women, Welfare & Poverty
SOC 6268	Race, Gender and Class
SOC 6271	Gender and Society
SOC 6273	The Sex Industry
WSTU 6225	Contemporary Feminist Theory
WSTU 6230	Global Feminisms
WSTU 6240	Women and Public Policy
WSTU 6257	Gender and Sexuality
WSTU 6265	Women, Welfare & Poverty
WSTU 6266	Gender & Criminal Justice
WSTU 6268	Race, Gender and Class
WSTU 8275	Women and Health

Global Health Specialization

Required

Nine credits from the following:	
ANTH 6302	Issues in Development
ANTH 6505	Medical Anthropology
ANTH 6591	Topics in Sociocultural Anthropology
ECON 6248	Health Economics
GEOG 6223	Seminar: Population and Health
PUBH 6430	Theories for Global Health Communication Interventions
PUBH 6435	Global Health Program Development and Implementation
PUBH 6437	Global Health Program Evaluation
PUBH 6442	Comparative Global Health Systems
PUBH 6503	Introduction to Public Health Communication and Marketing

International Development Specialization

Required

Nine credits from among any combination of the following subtopics:	
Anthropology	
ANTH 6301	The Anthropology of Development
ANTH 6302	Issues in Development
ANTH 6331	Research Methods in Development Anthropology
ANTH 6391	Anthropology and Contemporary Problems
ANTH 6505	Medical Anthropology
ANTH 6507	Nationalism and Ethnicity
ANTH 6591	Topics in Sociocultural Anthropology
ECON 6291	Methods of Demographic Analysis
GEOG 6291	Methods of Demographic Analysis
STAT 6291	Methods of Demographic Analysis
PPPA 6006	Policy Analysis
PPPA 6002	Research Methods and Applied Statistics
PPPA 6016	Public and Nonprofit Program Evaluation
PSPR 6204	Media Relations in the New Media World

PSPR 6208	Integrated Marketing Communications
SOC 6230	Sociological Research Methods
SOC 6232	Qualitative Methodology: Doing Field Research
Environment	
EMSE 6200	Policy Factors in Environmental and Energy Management
IAFF 6151	Environmental Policy
GEOG 6222	Seminar: Resources and the Environment
GEOG 6223	Seminar: Population and Health
GEOG 6230	Seminar: Environmental Issues in Development
GEOG 6250	Geographical Perspectives on Development
PPPA 6066	Environmental Policy
PHIL 6281	Environmental Philosophy and Policy
Humanitarian Assistance	
EMSE 6305	Crisis and Emergency Management
EMSE 6320	International Disaster Management
GEOG 6224	Seminar:Political Geography
PUBH 6430	Theories for Global Health Communication Interventions
PUBH 6442	Comparative Global Health Systems
PUBH 6503	Introduction to Public Health Communication and Marketing
International Development Management	
IBUS 6402	Managing in Developing Countries
PPPA 6025	Ethics and Public Values
PPPA 6057	International Development Administration
PPPA 6058	International Development NGO Management
PPPA 6059	International Development Management Processes and Tools
PPPA 6016	Public and Nonprofit Program Evaluation
PPPA 6018	Public Policy, Governance, and the Global Market
SMPA 6250	Topics in Media Processes and Institutions (Media in the Developing World)
International Education	
EDUC 6100	Experimental Courses (Technology and Development in International Education)
EDUC 6601	International and Comparative Education
EDUC 6602	Regional Studies in International Education
EDUC 6610	Programs and Policies in International Education
EDUC 6620	Strategies and Analysis in International Education
EDUC 6640	Selected Topics in International Education
EDUC 6650	Education and National Development
Global Health	
ANTH 6505	Medical Anthropology
PUBH 6430	Theories for Global Health Communication Interventions
PUBH 6442	Comparative Global Health Systems

IBUS 6404	New Global Competitive Framewk
IBUS 6403	International Business Negotiations
PSC 6439	International Political Economy
PSC 6442	Politics and Practice of International Institutions

PSC 8388	Selected Topics in Comparative Politics (Politics of Development)
PSPR 6208	Integrated Marketing Communications
Women and Development	
ANTH 6501	Gender and Sexuality
GEOG 6223	Seminar: Population and Health
SOC 6273	The Sex Industry
WSTU 6230	Global Feminisms
WSTU 6270	Seminar: Selected Topics (Global/ Domestic Labor Studies)
WSTU 6270	Seminar: Selected Topics (Global Islamic Feminisms)
WSTU 6270	Seminar: Selected Topics (Women and Entrepreneurial Leadership)
WSTU 6270	Seminar: Selected Topics (Women, Development, and Rights)

International Economic Affairs Specialization

Required

Nine credits from the following:	
ECON 6250	Survey of Economic Development
ECON 6255	Economics of Technological Change
ECON 6269	Economy of China I
ECON 6271	Economy of Japan
ECON 6285	Economic Development of Latin America
ECON 6295	Special Topics (Economic Analysis of International Trade Law)
ECON 6295	Special Topics (International Economic Integration)
ECON 6295	Special Topics (Industrial and Technology Policy in Developing Countries)
ECON 6295	Special Topics (Economics of the European Union)
ECON 6295	Special Topics (Economics of U.S. Trade Policy)
ECON 6295	Special Topics (Economics of U.S. Trade Law)
ECON 6295	Special Topics (Emerging Market Financial Crises)
IAFF 6138	Special Topics in International Development Studies (U.S Aid and Trade in the Developing World)
IAFF 6318	Special Topics in Asian Studies (Political Economy of South Asia)
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Political Economy of Latin America)
IBUS 6301	International Business Finance
IBUS 6302	Seminar: International Banking
IBUS 6303	External Development Financing
IBUS 6306	Seminar: International Financial Markets
IBUS 6404	New Global Competitive Framewk
IBUS 6405	Legal Aspects of International and Multinational Business
PSC 6439	International Political Economy

3 credits in skills courses

IAFF 6502	Professional Skills I
or IAFF 6503	Professional Skills II

In one of the following topics:

Cross Cultural Communication
Developing Communication Strategies
Formal Briefing
Introduction to Editing
Negotiating Skills
Op-Ed Writing Skills
Public Speaking
Writing for International Affairs Professionals

9 credits in electives

Courses relating to international affairs or communication, with approval of the program director.

4 credits in capstone course sequence

IAFF 6898	Capstone Workshop
IAFF 6899	Capstone Course

Alternative capstone option

The traditional capstone model specifically designed for Global Communication student is completed over one semester

through the development of a strategic communication plan for an external client. Students must take an additional professional skills course (total of 4 skills courses) to complete their degree through this option.

Foreign Language Proficiency

Completion of the M.A. in Global Communication requires a demonstrated oral and reading proficiency in a modern foreign language (http://elliott.gwu.edu/global-communication/foreign-language).

Fore more information on areas of specialization in global issues (http://elliott.gwu.edu/global-communication/global-issues) or regional fields (http://elliott.gwu.edu/global-communication/regional-fields), skills courses (http://elliott.gwu.edu/graduate-course-descriptions/professional-skills), or capstone options (http://elliott.gwu.edu/global-communication/capstone) visit the program website (http://elliott.gwu.edu/global-communication).

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL AFFAIRS

The Elliott School's master of arts in the field of international affairs degree program is designed to provide students with a broad understanding of the contemporary issues in international affairs as they develop in-depth knowledge of at least one or more areas of specialization. For their concentration, students may choose from among several fields of global issues or one of the regions of the world. Graduates of the program have pursued exciting careers in diplomacy and public service, business, security, conflict resolution, development, and public health.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://elliott.gwu.edu/international-affairs-masters) for additional information.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Prerequisite: a bachelor's degree in a related field, including introductory micro- and macroeconomics and at least two years of undergraduate study of a modern foreign language.

The multidisciplinary program requires 40 credits including:

9-12 credits in core field
12 credits in major field
9-12 credits in electives
3 credits in skills courses
4 credits in capstone course sequence

Foreign language proficiency (http://elliott.gwu.edu/international-affairs-masters/foreign-language)

All Elliott School master's degree students (except MIPP students) are required to complete the capstone. Those students who wish to complete a thesis must do so in addition to the capstone requirement. Students pursuing a thesis need a minimum of a 3.5 GPA and approval from the faculty member they wish to serve as their thesis director. Thesis students also need to complete at least one research methods course. Thesis credits will be counted as elective or specialization credits with Program Director approval.

Program Requirements

Code	Title	Credits
9-12 credits in core field courses		
IAFF 6101	IA Cornerstone	
HIST 6030	History and Its Uses in International Affairs	
Either		
ECON 6280	Survey of International Economics	
And three additional elective or major field credits		
Or		
ECON 6283 & ECON 6284	Survey of International Trade Theory and Policy and Survey of International Macroeconomics and Finance Theory and Policy	
12 credits in either a Global Issues or Regional Focus major field (as outlined below)		
9-12 credits in electives		
May include up to 6 credits of foreign language study, a second field of expertise, or other relevant course work		
Students are strongly encouraged to take IAFF 6501 (or its equivalent)		
3 credits in skills courses		
Skill-based professional workshops (1 credit each)		
4 credits in capstone course sequence		
IAFF 6898 & IAFF 6899	Capstone Workshop and Capstone Course	
Thesis option		

Three credits of electives may be used to pursue a thesis. To propose a thesis, a student must have a GPA of a least a 3.5 after completing 20 credit hours in the M.A. program. The thesis subject must be approved in advance by a faculty member who has agreed to direct the thesis, a second faculty member who will servce as an additional reader, and the Program Director. Thesis requirements are outlined in full in the Graduate Bulletin. Students must take an additional professional skills course (total of 4 skills courses) to complete their degree through this option

IAFF 6378	Special Topics in Middle East Studies (Politics and Religion in Post-Revolutionary Iran)	
IAFF 6378	Special Topics in Middle East Studies (U.S. Policy in the Gulf)	

*Students should consult the Elliott School Academic Advising & Student Services office before enrolling in Law School courses

**Law School course – Students may, with permission of their advisor, include courses in the GW Law School (http://www.law.gwu.edu) in their major field. Enrolling in a Law School course also requires permission of the Law School dean of students. Students should consult the Elliott School Academic Advising & Student Services (http://elliott.gwu.edu/graduate-advising) office before enrolling in Law School courses.

Language Proficiency

Students must demonstrate proficiency in a modern foreign language (http://elliott.gwu.edu/international-affairs-masters/foreign-language). The ability to communicate across cultures in more than one language is both a distinguishing and expected skill of the international affairs professional. Therefore, completion of the M.A. in International Affairs requires a demonstrated oral and reading proficiency in a modern foreign language.

Additional information available on the program website (http://elliott.gwu.edu/international-affairs-masters).

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL DEVELOPMENT STUDIES

The master of arts in the field of international development studies (IDS) degree program prepare students for professional careers in the field of international development through interdisciplinary course work that includes the study of economics, research methods, policy analysis, and management. Students focus their studies by creating their own area of specialization in coordination with their faculty mentor.

The IDS program culminates in a capstone project where students work on a real-world consulting experience with a development organization. In past years, capstone projects have addressed a broad range of topics, including private sector development, rural education, microfinance, HIV/AIDS, environmental conservation, gender-based violence, municipal planning, and many others. Teams have pursued these projects and conducted fieldwork in Africa, Asia, Latin America, and Eastern Europe. Previous capstone reports can be found on the program's capstone website (http://elliott.gwu.edu/international-development-studies/capstone-reports).

In addition to their regular course work, most graduate students in the IDS program are employed full- or part-time in a job or internship directly related to their studies.

Employers include USAID, World Bank, Organization of American States, Peace Corps, IREX, Ashoka, Management Systems International, the Woodrow Wilson Center, Chemonics International, and many others.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://elliott.gwu.edu/international-development-studies) for additional information.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs)

Prerequisite: a bachelor's degree including introductory microeconomics, a course in statistics, and at least two years of study of a modern foreign language

The multidisciplinary program requires 40 credits including:

10 credits in core courses
12 credits in analytical courses
18 credits in an area of specialization
Foreign language proficiency (http://elliott.gwu.edu/international-development-studies/foreign-language)

The following requirements must be fulfilled:

International Development Studies

Core Courses (10 credits):	
IAFF 6121	International Development Studies Cornerstone
IAFF 6122	Development Policy and Practice
IAFF 6137	Development Studies Pre-Capstone Workshop
IAFF 6139	International Development Studies Capstone
Analytical Courses (12 credits):	
ECON 6250	Survey of Economic Development
A management course selected from the following:	
EDUC 6381	Program Evaluation: Theory and Practice
EDUC 6620	Strategies and Analysis in International Education (Managing International Education Development Projects)
EMSE 6220	Environmental Management
EMSE 6260	Energy Management
EMSE 6285	Analytical Tools for Energy Management
EMSE 6305	Crisis and Emergency Management
EMSE 6310	Information Technology in Crisis and Emergency Management
EMSE 6320	International Disaster Management
EMSE 6325	Medical and Public Health Emergency Management
EMSE 6820	Program and Project Management
GEOG 6293	Special Topics (Water Resources Policy & Management)
IAFF 6138	Special Topics in International Development Studies
IBUS 6297	International Management Experience
IBUS 6402	Managing in Developing Countries
MGT 4101	
MGT 6216	Cross-Cultural Management
PPPA 6031	Governing and Managing Nonprofit Organizations
PPPA 6032	Managing Fund Raising and Philanthropy
PPPA 6057	International Development Administration
PPPA 6058	International Development NGO Management
PPPA 6059	International Development Management Processes and Tools
PPPA 6077	Case Studies in Public Policy
PUBH 6006	Management and Policy Approaches to Public Health
PUBH 6435	Global Health Program Development and Implementation
PUBH 6436	Global Health Program Management and Leadership
PUBH 6437	Global Health Program Evaluation
PUBH 6513	Community Health Management
SMPP 6210	Strategic Environmental Management

A research methods course selected from the following:

ANTH 6331	Research Methods in Development Anthropology
ANTH 6591	Topics in Sociocultural Anthropology
EDUC 6114	Introduction to Quantitative Research
EDUC 6116	Introduction to Educational Statistics
EDUC 8130	Survey Research Methods
EDUC 8131	Case Study Research Methods
EDUC 8140	Ethnographic Research Methods
EDUC 8142	Phenomenological Research Methods
EDUC 8170	Educational Measurement
EDUC 8171	Predictive Designs and Analyses
IAFF 6138	Special Topics in International Development Studies
IAFF 6501	Quant Analysis Int'l Aff Prac
PPPA 6002	Research Methods and Applied Statistics
PUBH 6247	Design of Health Studies
PPPA 6013	Econometrics–Policy Research I
PPPA 6016	Public and Nonprofit Program Evaluation
PUBH 6249	StatPackages/DataMgt&DataAnlys
PUBH 6260	Adv DataAnalysis-Public Health
PUBH 6264	Quantitative Methods
PUBH 6266	Biostatistical Methods
PUBH 6410	Global Health Study Design
PUBH 6411	Global Health Qualitative Research Methods
PUBH 6412	Global Health Quantitative Research Methods
PUBH 6533	Design of Comm Health Surveys
SOC 6230	Sociological Research Methods
SOC 6231	Data Analysis
SOC 6232	Qualitative Methodology: Doing Field Research
SOC 6240	Field Research in Organizational Settings

A policy analysis course selected from the following*:	
*in lieu of a policy analysis course, students can select a second research methods course.	
EDUC 6100	Experimental Courses (Policy Design: Accountability)
EDUC 6371	Education Policy
EDUC 6388	Analysis of Education Policy Issues
EDUC 6610	Programs and Policies in International Education
EDUC 8322	Education Policy Implementation
EDUC 8340	Methods of Policy Analysis in Education
IAFF 6378	Special Topics in Middle East Studies
PPPA 6006	Policy Analysis
PPPA 6014	Economics in Policy Analysis
PPPA 6085	Special Topics in Public Policy
PSC 6346	The Politics of U.S. Foreign Policy
PSC 6349	International Security Politics
PUBH 6305	Fundamentals for Health Policy: Public Health and Health Care
PUBH 6310	Statistical Analysis in Health Policy
PUBH 6315	Intro-Health Policy Analysis
PUBH 6320	Advanced Health Policy Analysis
PUBH 6325	Federal Policymaking and Policy Advocacy
WSTU 6240	Women and Public Policy
Area of Specialization (18 credits):	
18 credits from a self-designed area of specialization, developed in coordination with a faculty advisor	

Language Proficiency

Students must demonstrate proficiency in a modern foreign language (http://elliott.gwu.edu/international-development-studies/foreign-language). The ability to communicate across cultures in more than one language is a distinguishing and expected skill of the international development professional. For that reason, completion of the M.A. in International Development Studies requires demonstrated oral and reading proficiency in a modern foreign language.

Professional Skills Courses

The Elliott School offers a series of one-credit workshops (http://elliott.gwu.edu/graduate-course-descriptions/professional-skills) on a variety of topics and students are encouraged to explore the possibility of taking up to three of these. Offered throughout the academic year, the skills covered provide students with practical skills and knowledge they will need to perform effectively in a variety of work settings.

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL SCIENCE AND TECHNOLOGY POLICY

Scientific and technological advances provide the basis of international competitiveness and account for the bulk of national growth and the improvement of the quality of life around the world. The ability to create, adapt, and adopt new technologies defines modern societies. In today's global environment, the need for innovation is essential for solving societal problems and staying ahead of competition. Institutions that set science and technology policy govern and shape developments in information technology, space exploration, and genetic modification, as well as advances in material science.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://elliott.gwu.edu/international-science-and-technology-policy) for additional information.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Prerequisite: a bachelor's degree in a social, life, or physical science, or in engineering

The following requirements must be fulfilled:

Core Field (9 credits):	
IAFF 6141	International Science and Technology Policy Cornerstone
IAFF 6159	ISTP Capstone Project
IAFF 6516	Independent Study and Research
Concentration Field (15 credits):	
At least two of the following:	
IAFF 6142	Technology Creation/Diffusion
IAFF 6145	U.S. Space Policy
IAFF 6146	Space Law
IAFF 6148	Special Topics in Space Policy
IAFF 6151	Environmental Policy
IAFF 6153	Science, Technology, and National Security
IAFF 6158	Special Topics in International Science and Technology Policy
ECON 6255	Economics of Technological Change
Remaining courses selected from existing Elliott School concentration fields or designed by the student with approval of the program director	
Analytical competency requirement (6 credits):	
One or more course from sections A, B, or C	
Section A. Policy Analysis and Public Administration	
PPPA 6051	Governmental Budgeting
PPPA 6053	Financial Management for Public and Nonprofit Organizations
PPPA 6016	Public and Nonprofit Program Evaluation
PPPA 6002	Research Methods and Applied Statistics
Section B. Economic Theory and Concepts	
ECON 6217	Survey of Economics I
ECON 6218	Survey of Economics II
Other relevant courses offered by the Economics Department (e.g. microeconomics, industrial organization, environmental economics, regional economics)	
Section C. Research Methods	
STAT 1053	Introduction to Statistics in Social Science
STAT 1111	Business and Economic Statistics I
STAT 2112	Business and Economic Statistics II
STAT 2118	Regression Analysis
STAT 2183	Intermediate Stat Lab/Packages
PPPA 6013	Econometrics–Policy Research I
PPPA 6014	Economics in Policy Analysis
PSC 6103	Approaches to Public Policy Analysis

In instances where proficiency in a foreign language can be shown to be integral to a student's program of study, it may be used to meet the analytical competency requirement. Students must petition for approval from the Program Director. Courses taken to demonstrate language proficiency may not be included in the 40 credit-hours required for the degree.	
Skills course (1 credit):	
IAFF 6502	Professional Skills I
IAFF 6503	Professional Skills II
Eelective field (9 credits):	
9 credit hours selected to complement the background and interests of the individual student	
Courses composing the elective field may be offered through a different Elliott School program, a department in another college within the University, or a combination of the two.	
Up to 3 credits may be taken as skills courses (IAFF 6502 and IAFF 6503)	

For more information visit the program website (http://elliott.gwu.edu/international-science-and-technology-policy).

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL TRADE AND INVESTMENT POLICY

The master of arts (M.A.) in international trade and investment policy (ITIP) degree program trains students in critical areas of the economics, politics, and history of international trade as well as econometrics. The program provides additional specialized training in international economics or international business. Course work in these fields focuses on U.S. trade policy, the effects of international trade on developing countries, emerging market financial crises, and managing firms in developing countries. The program culminates in a one-semester capstone project (http://elliott.gwu.edu/international-trade-and-investment-policy/capstone) in which students work in small teams on a contemporary policy problem.

The faculty conducts research on international trade, finance, and macroeconomic issues, as well as the politics and history of international economics. These scholars and practitioners bring to the classroom intimate knowledge of international economic affairs garnered from their work as consultants and advisors at renowned financial, trade, policymaking, and government institutions.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Prerequisite: a bachelor's degree including one semester each of introductory micro- and macroeconomic principles and at least two years of a modern foreign language. Applicants are strongly advised to take an introductory statistics course and an intermediate micro- and macroeconomics sequence before beginning the program.

The following requirements must be fulfilled:

Core field (12 credits):	
Required courses:	
ECON 6283	Survey of International Trade Theory and Policy
ECON 6284	Survey of International Macroeconomics and Finance Theory and Policy
PSC 6439	International Political Economy
Quantitative methods requirement	
One of the following:	
IAFF 6198	Special Topics in International Trade and Investment Policy
PPPA 6013	Econometrics–Policy Research I
ECON 2123	Introduction to Econometrics
DNSC 6274	Statistical Modeling and Analysis
DNSC 6277	Applied Forecasting and Time-Series Analysis for Managers
Major field (12 credits):	
At least four (4) courses from one of the following areas of study:	
Development Economics	
Finance	
International Business	
International Economic Policy Analysis	
Elective course work (15 credits):	
In accounting and finance, economic analysis, history and political science courses focused on a region, foreign language study (up to 6 credits) or special one-credit skills courses (up to 3 credits)	
Capstone course (1 credit):	

IAFF 6199	International Trade and Investment Policy Capstone

A language proficiency requirement (http://elliott.gwu.edu/international-trade-and-investment-policy/foreign-language) in a modern foreign language. The ability to communicate across cultures in more than one language is a distinguishing and expected skill of the international affairs professional. Therefore, completion of the M.A. in International Trade and Investment Policy requires a demonstrated oral and reading proficiency in a modern foreign language.

Students must have completed intermediate micro- and macroeconomics (http://elliott.gwu.edu/international-trade-and-investment-policy/economic-theory) theory courses prior to receiving the International Trade and Investment Policy degree.

For more information including major fields (http://elliott.gwu.edu/international-trade-investment-policy/major-field), visit the program website (http://elliott.gwu.edu/international-trade-investment-policy).

MASTER OF ARTS IN THE FIELD OF LATIN AMERICAN AND HEMISPHERIC STUDIES

The master of arts in Latin American and hemispheric studies (LAHS) degree program offers an interdisciplinary program designed to provide a broad and deep knowledge of context and place based on sound theory and practice. The program prepares students to develop innovative approaches to the enduring problems and emerging challenges of the hemisphere. This training will allow graduates to grapple with an often contradictory blend of political and economic successes and failures throughout the region.

The internationally recognized faculty, drawn primarily from the Washington, D.C. policy community, provides an insider's perspective on key institutions and policies. The program coordinates a series of events that brings leading policymakers from Washington and the world over to engage with students and faculty on issues facing the hemisphere.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Prerequisite: a bachelor's degree with background course work related to Latin America and at least two years of study of Spanish or another relevant hemispheric language

The following requirements must be fulfilled:

Interdisciplinary cornerstone (3 credits):

IAFF 6341	Latin American and Hemispheric Studies Cornerstone

Core Field (9 credits):

Three of the following:	
ANTH 6702	Issues in Latin American Anthropology
Or another 6000-level anthropology course approved by the advisor	
ECON 6285	Economic Development of Latin America
GEOG 6261	Geographical Perspectives on Latin America
GEOG 6293	Special Topics (Migration and Development)
IAFF 6342	Drug Trafficking in the Americas
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Indigenous Social Movements)
HIST 6701	Topics in Latin American History
PSC 6383	Comparative Politics of Latin America
PSC 6484	International Relations of Latin America
Any Spanish course numbered in the 3400s, 3500s, 4400s, or 4500s that focuses on the literature of Latin America	

Specialized fields (12 credits):

At least two courses in two of the following fields:
Anthropology
Art History, Literature, and Culture
Economic Development
Geography
Global Public Health
History
International Business
Migration
Political Science
Security
Sociology

Courses taken in the Core Field may not be double-counted in a specialized field. Students must receive permission from the Program Director to apply other courses towards a field.

Electives (12 credits):

Approved in advance by the Program Director. May include up to six credits of language course work in Spanish (other foreign languages spoken in Latin America will be considered on a case-by-case basis). They may also include up to 4 credits of one-credit skills courses. Additional courses may also be taken from any of the specialized fields, or in other areas or disciplines where such course would contribute to the student's professional knowledge and development.

Interdisciplinary capstone (4 credits) :

IAFF 6359	Latin American and Hemispheric Studies Capstone (1 credit fall, 3 credits spring)

A language proficiency requirement (http://elliott.gwu.edu/latin-american-studies/foreign-language). The ability to communicate across cultures in more than one language is a distinguishing and expected skill of the international affairs professional. Therefore, completion of the M.A. in Latin American Studies requires a demonstrated oral and reading proficiency in Spanish or Portuguese.

A graduate-level research methods (http://elliott.gwu.edu/latin-american-studies/research-methods) course applicable to the student's area of specialization. We strongly encourage this course be taken within the first three semesters to help prepare students for their capstone in their fourth and final semester.

All Elliott School master's degree students (except MIPP students) are required to complete the capstone. Those students who wish to complete a thesis must do so in addition to the capstone requirement. Students pursuing a thesis need a minimum of a 3.5 GPA and approval from the faculty member they wish to serve as their thesis director. Thesis students also need to complete at least one research methods course. Thesis credits will be counted as elective or specialization credits with Program Director approval.

For more information including the specialized field course (http://elliott.gwu.edu/latin-american-studies/specialized-fields) list visit the program website (http://elliott.gwu.edu/latin-american-studies).

MASTER OF ARTS IN THE FIELD OF MIDDLE EAST STUDIES

The master of arts in Middle East studies degree program combines a rigorous academic foundation with a strong professional orientation. Bridging the theory and practice of international affairs, the program prepares students for careers in government, the private sector, and international and nongovernmental organizations.

The curriculum includes a range of courses covering the history, politics, economics, international relations, and cultures of the societies and nations of the Middle East. In consultation with the program director, each student will develop a program of study that, through a set of core courses, combines a broad overview of the region along with a more specialized field based on the student's specific academic and career interests. In addition, completion of the program requires demonstrated oral and reading proficiency in a language of the Middle East region.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Prerequisite: a bachelor's degree in a related field with at least two years of study of an appropriate language of the region

The following requirements must be fulfilled:

Cornerstone (1 credit):

IAFF 6361	Middle East Studies Cornerstone

Core Courses (12 credits):

Choose four of the following:	
PSC 6377	Comparative Politics of the Middle East
PSC 6478	International Relations of the Middle East
IAFF 6363	PoliticalEconomy/Middle East
IAFF 6364	Religion and Society in the Modern Middle East
HIST 6001	Special Topics (History of Modern Middle East)
or HIST 6801	Topics in Middle Eastern History
ANTH 6707	Issues in Middle East Anthropology
GEOG 6262	Geographical Perspectives on the Middle East

Professional specialization field (12 credits):

Available fields include:

Conflict and Conflict Resolution

Global Health

International Affairs and Development

International Business	
International Economic Affairs	
International Law and Organizations	
International Security Studies	
Management	
Technology Policy and International Affairs	
U.S. Foreign Policy	
Middle East electives (9 credits):	
Three courses related to the Middle East, selected in consultation with the program director. At least three (3) credits must have a language or humanities aspect. May include only three (3) credits of language study, which must be an advanced, content-based course.	
Capstone (3 credits):	
IAFF 6379	Middle East Studies Capstone
Skills courses (3 credits):	
IAFF 6502	Professional Skills I
or IAFF 6503	Professional Skills II

Foreign Language Proficiency

Students must pass a proficiency examination in a major modern Middle Eastern language. No substitutions are permitted.

- Arabic [Modern Standard Arabic] (taught at GW)
- Persian
- Hebrew (taught at GW)
- Kurdish, or
- Turkish

For more information on professional specializations (https://elliott.gwu.edu/middle-east-studies/professional-specialiaztion), Middle East electives (http://elliott.gwu.edu/middle-east-studies/electives), or foreign language proficiency (http://elliott.gwu.edu/academics/grad/mes/language.cfm) visit the program website (http://elliott.gwu.edu/middle-east-studies).

MASTER OF ARTS IN THE FIELD OF SECURITY POLICY STUDIES

The master of arts in the field of security policy studies (SPS) degree program is policy-oriented, focusing on international security issues, with a particular emphasis on the security challenges for the 21st century and how to respond to them. These challenges include, but are not limited to, weapons of mass destruction proliferation, transnational threats, terrorism, changing regional power dynamics, weak and failing states, international crime, effectively linking security and development, and ensuring U.S. national security.

The curriculum provides a strong grounding in the national security and defense policy making process. Students choose two specific concentrations, which can range from transnational security issues to conflict resolution to defense analysis. Students also have the option of emphasizing a particular region, such as East Asia, the Middle East, or Latin America, by selecting a regional field as one of their two concentrations.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Prerequisite: a bachelor's degree with coursework in international affairs or other relevant social sciences, including introductory micro- and macroeconomic principles; study of a modern foreign language is preferred.

The following requirements must be fulfilled: 12 credits in required courses, 9 credits in each of two specialized fields, a 3-credit tool requirement, and 4 credits in a capstone sequence.

Required	
PSC 6349	International Security Politics
IAFF 6160	Defense Policy and Program Analysis
HIST 6032	Rdg/Rsch Sem:Strategy & Policy
One of the following:	
ECON 6280	Survey of International Economics
ECON 6283	Survey of International Trade Theory and Policy
ECON 6284	Survey of International Macroeconomics and Finance Theory and Policy
Students are required to have undergraduate-level background coursework in microeconomics and macroeconomics before enrolling in a graduate course. Undergraduate courses will not count toward the master's degree. If you do not have prior coursework, consult with the Program Director on available options.	
Tool requirement	
Language Option	
If the language option is selected, the student can test out either through coursework or by taking a diagnostic exam prior to their first semester. Students who test out in a language have three extra credits to apply to their concentrations.	

Statistics Option	
This option may be fulfilled by demonstrating proficiency, by a grade of B or better, in one of the following graduate-level statistics courses:	
IAFF 6501	Quant Analysis Int'l Aff Prac
IAFF 6198	Special Topics in International Trade and Investment Policy
Skills requirement	
IAFF 6502	Professional Skills I (taken for a total of 3 credits)
or IAFF 6503	Professional Skills II
Capstone sequence	
IAFF 6898	Capstone Workshop
IAFF 6899	Capstone Course

For more information on specializations (http://elliott.gwu.edu/security-policy-studies/specialized-fields), economics requirements (http://elliott.gwu.edu/security-policy-studies/economics), or tool requirements (http://elliott.gwu.edu/security-policy-studies/tool-requirement) visit the program website (http://elliott.gwu.edu/academics/graduate/sps).

Required	
PSC 6349	International Security Politics
IAFF 6160	Defense Policy and Program Analysis
HIST 6032	Rdg/Rsch Sem:Strategy & Policy
Specialized Field I (9 credits):	
Available fields include:	
Conflict and Conflict Resolution	
Defense Analysis	
Energy Security	
Homeland Security Policy	
Intelligence	
Political Psychology	
Regional Security	
Science, Technology, and National Security Policy	
Security and Development	
Strategic Concepts and Military History	
Transnational Security Issues	
U.S. National Security Policy and Process	
Weapons of Mass Destruction	
Specialized Field II (9 credits): Choose from list above	
Economics Requirement (3 credits):	
One of the following:	
ECON 6280	Survey of International Economics
ECON 6283	Survey of International Trade Theory and Policy
ECON 6284	Survey of International Macroeconomics and Finance Theory and Policy
Students are required to have undergraduate-level background coursework in microeconomics and macroeconomics before enrolling in a graduate course. Undergraduate courses will not count toward the master's degree. If you do not have prior coursework, consult with the Program Director on available options.	
Tool Requirement (3 credits):	
Language Option	
If the language option is selected, the student can test out either through coursework or by taking a diagnostic exam prior to their first semester. Students who test out in a language have three extra credits to apply to their concentrations.	
Statistics Option	
This option may be fulfilled by demonstrating proficiency, by a grade of B or better, in one of the following graduate-level statistics courses.	
IAFF 6501	Quant Analysis Int'l Aff Prac
IAFF 6198	Special Topics in International Trade and Investment Policy
Skills courses (3 credits):	
IAFF 6502	Professional Skills I
or IAFF 6503	Professional Skills II
Capstone sequence (4 credits):	
IAFF 6898	Capstone Workshop
IAFF 6899	Capstone Course

MASTER OF INTERNATIONAL POLICY AND PRACTICE

The Elliott School's master of international policy and practice (MIPP) degree program helps international mid-career professionals develop highly marketable analytical and management skills to formulate and advocate policies on key international issues and to negotiate and work effectively in cross-cultural settings. The program also enhances knowledge of international economic, political, and social trends.

The interdisciplinary curriculum combines three core courses with a wide variety of course options that cover relevant national and international policies and provides insight into a wide range of international issues. Courses are selected to suit the student's professional goals and intellectual interests. Most courses are offered in the late afternoon and early evening to accommodate student work schedules, making it ideal for working professionals.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://elliott.gwu.edu/international-policy-and-practice) for additional information.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

The following requirements must be fulfilled: 27 credits, including 9 credits in required courses and 18 credits in elective courses.

Students are required to have undergraduate-level background coursework in microeconomics and macroeconomics before enrolling in a graduate course. Undergraduate courses do not count toward the master's degree. Students who do not have prior coursework should consult with the Program Director on available options.

Code	Title	Credits
Required		
IAFF 6211	MIPP Leadership Practicum	
One of the following courses in international economics:		
ECON 6250	Survey of Economic Development	
ECON 6280	Survey of International Economics	
ECON 6283	Survey of International Trade Theory and Policy	
ECON 6284	Survey of International Macroeconomics and Finance Theory and Policy	
One of the following foundational courses in international policy, which should support the student's interdisciplinary concentration:		
IAFF 6101	IA Cornerstone *	
IAFF 6102	Global Gender Policy	
IAFF 6122	Development Policy and Practice	
IAFF 6141	International Science and Technology Policy Cornerstone	
IAFF 6171	Introduction to Conflict Resolution	
PSC 6349	International Security Politics	
PSC 6439	International Political Economy *	
PPPA 6057	International Development Administration	
Electives		
18 credits in elective courses selected based on the individual student's needs in consultation with an advisor and the Program Director. These may include up to 3 credits in 1-credit skills-based workshops.		

*Added after publication of the 2016-17 Bulletin.

Students must complete degree requirements within three years of their admission to the program. Students who are temporarily unable to continue their studies may request a leave of absence not to exceed one year. Extensions beyond the three-year period may be granted in exceptional circumstances, but the student will be required to register and pay for Continuous Enrollment.

No transfer credit is accepted into the MIPP program. No more than 6 credits of graduate coursework taken at GW before matriculation in the program, while in degree or nondegree status, including courses taken in the Elliott School, may be included in the MIPP program.

Visit the MIPP program page (http://elliott.gwu.edu/international-policy-and-practice) for additional information, including a complete list of elective courses (http://elliott.gwu.edu/international-policy-and-practice/electives).

MASTER OF INTERNATIONAL STUDIES

The Master of International Studies is a special program open only to students who have completed or are currently enrolled in an approved master's degree program at one of the Elliott School's international partner schools. Master of International Studies students take core courses in economics, history, and political science, plus three courses in an elective field designed with the approval of the program director and a

capstone course. All students must meet the Elliott School language requirement.

Visit the program website (https://elliott.gwu.edu/international-studies-masters) for additional information.

DUAL MASTER OF ARTS AND MASTER OF PUBLIC HEALTH

The Elliott School of International Affairs cooperates with the Milken Institute School of Public Health in offering a dual degree program leading toward the Master of Arts and the Master of Public Health in global health. The dual degree program is offered in all Elliott School fields. The student must be accepted for admission by both the Elliott School and the Milken Institute School of Public Health. Applications should be made separately to each school, with a notice of interest in the combined program. Students may also apply for the dual degree program after they have begun either program.

As part of this program, the Elliott School accepts up to 12 credit hours of course work from the Milken Institute School of Public Health in fulfillment of its degree requirements. The program takes approximately three years of full-time study for completion. Dual degree students may complete the requirements for each degree and receive a diploma for each degree after applying for graduation from each school separately. However, all work on each degree must be completed within five years from the student's entry into that program, unless an extension of time is granted by the respective deans.

JOINT MASTER OF ARTS AND JURIS DOCTOR

The Elliott School of International Affairs cooperates with the Law School in offering a program of study leading to the degrees of Master of Arts and Juris Doctor. A student must be accepted for admission by both the Elliott School and the Law School. Applications should be made separately to each school, with a notice of interest in the combined program. The Law School stipulates that the first year of course work for the Juris Doctor degree must be taken as a unit; students should consult with the Law School's Associate Dean for Student Affairs.

As part of this program, each school accepts up to 12 credit hours of course work from the other school in fulfillment of its degree requirements. The Elliott School M.A. portion of the program may not include a thesis. The joint program takes approximately four years of full-time study for completion. Joint degree students must meet all requirements for both programs and apply for graduation from both schools prior to receiving either diploma. All work for this combined degree program must be completed in five years, unless an extension of time is granted by the respective deans.

JOINT MASTER OF ARTS AND MASTER OF BUSINESS ADMINISTRATION

The Elliott School of International Affairs cooperates with the School of Business in offering a program of study leading to the degrees of master of arts (M.A.) and master of business administration (M.B.A.) with a field of study in international business. The joint degree program is offered in all Elliott School M.A. fields (https://elliott.gwu.edu/graduate-programs), and the M.B.A. is taken with a focus on international business (http://business.gwu.edu/programs/masters-of-business-administration). The student must be accepted for admission by both the Elliott School and the School of Business. Applications should be made separately to each school, with a notice of interest in the combined program. Students may also apply for the joint degree program after they have begun either program.

As part of this program, each school accepts up to 12 credits of course work from the other school in fulfillment of its degree requirements. The joint program takes approximately three years of full-time study for completion. Joint degree students must meet all requirements for each program and apply for graduation from both schools prior to receiving either diploma. All work for this combined degree program must be completed in six years, unless an extension of time is granted by the respective deans.

CERTIFICATE PROGRAMS

The Elliott School of International Affairs offers a series of graduate certificates covering topics of specialized interest. The certificate programs are open to all graduate students presently enrolled in the Elliott School, Columbian College of Arts and Sciences, Graduate School of Education and Human Development, School of Business, and Milken Institute School of Public Health. The programs are also open to graduate students from other universities, individuals who have already earned a graduate degree, and individuals with a bachelor's degree and a minimum of eight years of relevant professional work experience. Applicants who have less than eight years of work experience are eligible to apply but must submit the same application materials required of other M.A. degree programs. Transfer credit from non-GW institutions is not accepted into any graduate certificate program. No more than 6 credits of graduate course work taken in any degree or non-degree status within the University, including the Elliott School, may be included in any graduate certificate program. Additional information is available in the Elliott School Graduate Admissions office (http://elliott.gwu.edu/graduate-admissions).

Graduate certificate programs

- Graduate certificate in global gender policy (p. 758)

- Graduate certificate in international science and technology policy (p. 758)
- Graduate certificate in nuclear policy (p. 759)

GRADUATE CERTIFICATE IN GLOBAL GENDER POLICY

REQUIREMENTS

The following requirements must be fulfilled: 15 credits, including 6 credits in required courses and 9 credits in elective courses.

Code	Title	Credits
Required		
IAFF 6102	Global Gender Policy	
One of the following:		
IAFF 6118	Special Topics in International Affairs (Research Methods in Global Gender Issues)	
IAFF 6502	Professional Skills I (taken for a total of three credits) *	
IAFF 6503	Professional Skills II (taken for a total of three credits)	
Electives		
9 credits from the following:		
ANTH 6501	Gender and Sexuality	
IAFF 6118	Special Topics in International Affairs (Research Methods in Global Gender Issues) **	
IAFF 6136	Gender and Development	
IAFF 6138	Special Topics in International Development Studies (Gender, Tourism, and Development)	
IAFF 6138	Special Topics in International Development Studies (Gender, Disaster & Policy)	
IAFF 6138	Special Topics in International Development Studies (Human Trafficking)	
IAFF 6138	Special Topics in International Development Studies (Violence, Gender & Humanitarian Assistance)	
PHIL 6238	Feminist Ethics and Policy Implications	
PSYC 8275	Women and Health	
SOC 6271	Gender and Society	
SOC 6273	The Sex Industry	
WSTU 6230	Global Feminisms	
Students may take as an elective one of the following undergraduate courses for graduate credit with instructor's permission. The student must perform extra work in the course.		
IAFF 2190W	Special Topics (Women in Global Politics)	
IAFF 3183	Special Topics in Development Policy (Human Trafficking)	
Students may substitute other GW and consortium courses with the approval of the advisor.		
No more than four skills courses can be applied to a graduate certificate.		

*Visit the program website (http://elliott.gwu.edu/graduate-certificates/global-gender-policy) for list of eligible professional skills courses and for additional program information.
**Can only be used as an elective course if not selected as part of core requirement.

GRADUATE CERTIFICATE IN INTERNATIONAL SCIENCE AND TECHNOLOGY POLICY

The graduate certificate in international science and technology policy allows students to understand the role of science and technology in policy-making and how governmental policies, laws, and regulations influence science and technology production from an international perspective. The program is designed for graduate students in related fields or professionals in government, industry, and nonprofits who wish to develop a background in science and technology policy. Students develop basic analytical skills as well as focus on a particular theme, including technology innovation, internet policy, space policy, energy policy, and environmental policy.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://elliott.gwu.edu/graduate-certificates/international-science-technology-policy) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: a minimum of 15 credits, including one 3-credit required course and 12 credits in elective courses.

Required	
IAFF 6141	International Science and Technology Policy Cornerstone
At least two science and technology policy courses:	
IAFF 6142	Technology Creation/Diffusion
IAFF 6145	U.S. Space Policy
IAFF 6158	Special Topics in International Science and Technology Policy *
IAFF 6151	Environmental Policy
ECON 6255	Economics of Technological Change
At lease one analytical competency course:	
ECON 6217	Survey of Economics I
ECON 6218	Survey of Economics II
PPPA 6002	Research Methods and Applied Statistics
PPPA 6003	Economics for Public Decision Making
PPPA 6006	Policy Analysis
PPPA 6010	Politics & The Policy Process
PPPA 6014	Economics in Policy Analysis
PPPA 6016	Public and Nonprofit Program Evaluation
PPPA 6060	Policy Formulation and Administration

*Other relevant courses under the listing IAFF 6158 may be offered in particular years. Consult the Center for International Science and Technology Policy for current listings.
Students may take other courses not on the list of suggested courses with the approval of the Office of Student Services. Some of the analytical competency courses have prerequisites that do not count toward the certificate requirements.

Consult the Center for International Science and Technology Policy (http://www.gwu.edu/~cistp) (CISTP) for current listings and for additional information.

GRADUATE CERTIFICATE IN NUCLEAR POLICY

The graduate certificate in nuclear policy provides a foundation of knowledge and analytical skills relevant to contemporary challenges related to nuclear security, deterrence, arms control, nonproliferation, and nuclear energy to students preparing to contribute to these pursuits as practitioners and analysts.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://elliott.gwu.edu/graduate-certificates/nuclear-policy) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 15 credits, including a 3-credit core course and 12 credits in elective courses.

Code	Title	Credits
Required		
One of the following:		
IAFF 6106	Nuclear Weapons	
IAFF 6118	Special Topics in International Affairs (Science of Nuclear Materials)	
Electives		
Three of the following:		
IAFF 6118	Special Topics in International Affairs (Nuclear Proliferation and Nonproliferation)	
IAFF 6118	Special Topics in International Affairs (Nuclear Energy)	
IAFF 6118	Special Topics in International Affairs (Nuclear Safeguards and Forensics)	
IAFF 6118	Special Topics in International Affairs (Nuclear Security Policy)	

Students are encouraged to consider relevant courses, such as courses on regional security topics, which may be counted toward required supporting courses with the approval of the certificate advisor.

SCHOOL OF MEDICINE AND HEALTH SCIENCES

Dean J. Akman
Senior Associate Dean for Health Sciences J. Bocchino
Associate Deans M. Corcoran, C. Golden

The George Washington University School of Medicine and Health Sciences (SMHS) is dedicated to improving the health of local, national, and global communities by:

- Educating a diverse workforce of tomorrow's leaders in medicine, science, and health sciences.
- Healing through innovative and compassionate care.
- Advancing biomedical, translational, and health services delivery research with an emphasis on multidisciplinary collaboration.
- Promoting a culture of excellence through inclusion, service, and advocacy.

As a globally recognized academic medical center, GW embraces the challenge of eliminating health disparities and transforming health care to enrich and improve the lives of those we serve.

Health Sciences

GW Health Sciences (http://smhs.gwu.edu/academics/health-sciences) comprises three academic departments: Clinical Research and Leadership (http://smhs.gwu.edu/crl), Physician Assistant Studies (http://smhs.gwu.edu/pas), and Physical Therapy and Health Care Sciences (http://smhs.gwu.edu/pths). SMHS health sciences programs prepare professionals for roles in selected specialties within health care. These programs emphasize the interdependent roles and responsibilities of professionals in health care practice, research, and leadership.

The mission of GW Health Sciences is built upon five tenets:

- Interdisciplinary education provides a foundation for the future of health care delivery and generates collaborative structures and models for benchmarking and improvement.
- Clinical training is a foundation for professional development in clinical practice.
- Community service learning applies to communities broadly and is an important component of education for the transformation of communities of practice, research, and access in health care.
- GW Health Sciences is uniquely positioned to cultivate leadership capacity development within the health sciences, medical, and scientific communities that we serve.
- Scholarship among faculty, staff, and students alike contribute to the process of new knowledge creation and are a foundation for advancing translational science in health care.

Medical Programs

For information about GW medical programs, please refer to the medicine and health sciences website (http://smhs.gwu.edu).

REGULATIONS

- **Admission (p. 760)**
  - International Applicants (p. 761)
  - Unclassified Students (p. 761)
  - Readmission (p. 761)
  - Transfer Credit for Graduate Students (p. 761)
  - Transfer Credit/Advanced Standing for Undergraduates (p. 762)
- **Evaluation of Academic Performance (p. 762)**
- **Academic Standing (p. 763)**
- **Programs of Study (p. 764)**
- **Policies and Definitions (p. 764)**
- **Graduation Requirements (p. 765)**
- **Financial Aid (p. 766)**

Admission

To be considered for admission, applicants must submit a completed application form online, together with all required supporting documentation and a non-refundable application fee.

Bachelor of Science in Health Sciences (B.S.H.S.) programs are designed for upper-division transfer students; applicants are expected to have completed a minimum of 60 credit hours of coursework from a regionally accredited post-secondary institution prior to entry. Applicants to the post-baccalaureate and graduate programs must hold a bachelor's degree from a regionally accredited college or university, with the exception of the Ph.D. and O.T.D. programs which require a master's degree or entry-level professional doctorate. Official transcripts must be submitted from each academic institution attended, regardless of whether credit was earned or is desired. The transcript(s) must indicate a minimum cumulative grade-point average of 2.5 on a scale of 4.0 for undergraduate and post-baccalaureate applicants, and a 3.0 on a scale of 4.0 for graduate students. The applicant must be in good standing and eligible to return to the academic institution most recently attended. Dual degree applicants must have a minimum cumulative grade-point average of 3.3 on a scale of 4.0. With evidence of special promise, an applicant whose academic record falls short of the minimum GPA may be accepted on a conditional basis; see Conditional Admission, below. Students who have been suspended or dismissed academically or will not be considered for admission for at least one year from the date of their last suspension or dismissal.

Applicants should refer to the individual program descriptions for information on prerequisites and supporting documents, since these vary by program. It is the responsibility of applicants to ensure that all required application materials are submitted by the designated deadlines. Unofficial copies, facsimiles, or photocopies of transcripts, certificates, or diplomas will not be accepted. All records become the property of the University and cannot be returned.

Conditional Admission—Admission with conditions to one of the health sciences programs may be offered at the discretion of the Health Sciences Dean's Office and the program director. The terms of admission are outlined in the letter of acceptance from the University. When conditions have been not been met, notification is sent from the the Health Sciences Dean's Office. Students dismissed for not meeting the conditions of their admission from non-clinical programs must sit out one calendar year before re-applying. Readmission is not guaranteed. Students enrolled in clinical programs should consult their program handbook for program-specific dismissal policies and procedures.

Advance Tuition Deposit—Upon notification of acceptance, an advance tuition deposit will be required of students in selected programs, including those re-admitted. The deposit is credited toward tuition and is non-refundable. Payment of the orientation fee, if applicable, must be submitted along with the tuition deposit and is also non-refundable.

International Applicants

The following additional requirements pertain to international applicants:

Required Records—Official copies of all required documentation (transcripts, diplomas, and certificates as well as any other records listing subjects studied, grades received, examinations taken, the results of state examinations, and degrees received) must be submitted in the language in which the institution keeps its official records. If these documents are in a language other than English, they must be accompanied by a certified English translation. In addition, an evaluated copy completed by an acceptable international evaluation service must be submitted regardless of whether or not the official record is in English.

Language Tests—Applicants whose native language is not English or who are not citizens of countries where English is the official language must submit official test scores for either academic IELTS or TOEFL or PTE. The following are the minimum scores for admission consideration.

1. Academic IELTS: an overall band score of 7.0, with no individual band score below 6.0.
2. TOEFL: 600 paper-based or 100 Internet-based.
3. PTE: overall score of 68

The IELTS/TOEFL/PTE requirement may be waived for applicants who hold a bachelor's degree or higher from a regionally accredited U.S. college or university; applicants who hold a bachelor's degree or higher from an international higher education institution must demonstrate through an evaluation that the institution is equivalent to a U.S. regionally accredited college or university, and the language of instruction at the institution where the degree was completed is English. Waivers may exist for citizens of countries where the official language is English, as determined by the GW International Services Office.

Financial Certificate—A Financial Certificate must be completed and submitted with the application for admission by all international students planning to study at the University under the authorization of either a student (F) or exchange visitor (J) visa. Satisfactory completion and submission of the Financial Certificate is required for the issuance of a Form I-20 or IAP-66.

Unclassified Students

A student who wishes to take individual courses in health sciences programs must obtain permission to register as an unclassified student in the School of Medicine and Health Sciences. Application is made to the Office of Admissions, Health Sciences Programs. The Health Sciences Dean's Office, in conjunction with the appropriate department chair and program director, will determine if permission to register will be granted to an unclassified student. Permission to take individual courses, if granted, will generally be limited to a total of 6 credit hours.

Credit earned for courses taken as an unclassified student may be transferred to a degree program at the University if the courses are applicable to the program, have been taken for credit, and have been completed with the minimum grade required in the program. This should not exceed 6 credit hours. Successful completion of course work taken as an unclassified student does not guarantee admission to a degree program.

Readmission

Students who were previously registered in a health sciences program at the University, but who did not register during the immediate preceding semester (summer sessions excluded) and who did not receive an approved leave of absence, must apply for readmission. Students who have attended other academic institutions while not enrolled at this University must have complete official transcripts sent directly to the Office of Admissions, Health Sciences Programs, from each institution attended. Applications for readmission are considered on the basis of regulations and curricula currently in effect.

Transfer Credit for Graduate Students

The University reserves the right to refuse transfer credit in part or in whole or to allow credit provisionally. A maximum of one quarter of the credit hours of graduate coursework required for a degree may be approved for transfer to a graduate program in the Health Sciences. These credits may come from

enrollment in non-degree coursework at GW, or from another degree granting school of GW, or another accredited college or university. Eligible coursework must: (a) graduate-level credit, (b) not applied toward completion of requirements for another degree, and (c) earned with a minimum acceptable grade of a *B* (grades of *B-* and below do not transfer). Requests for transfer credit must be submitted in writing and approved by the program director and the Health Sciences Dean's Office after admission to the program. Students in clinical programs or the Ph.D. program should refer to their program handbook for program-specific transfer credit policies and procedures.

Transfer Credit/Advanced Standing for Undergraduates

Advanced standing may be awarded for appropriate course work completed at other regionally accredited institutions provided minimum grade requirements have been met. The minimum acceptable grade is *C* for course work to be applied toward an undergraduate degree (grades of *C-* and below do not transfer). Advanced standing may also be awarded for non-traditional classroom or clinical experience as determined by the individual programs. The University reserves the right to refuse transfer credit in part or in whole or to allow credit provisionally. Health sciences degree programs vary in the amount of advanced standing they will award. For bachelor's programs, no more than 66 credits will be accepted as advanced standing from a two-year institution.

Degree candidates who are currently enrolled at this institution and plan to take courses at other regionally accredited institutions for transfer credit must first obtain the approval of the program director, department chair, and appropriate dean.

Evaluation of Academic Performance

Faculty members are responsible for evaluating the performance of students in a meaningful, useful, and timely manner and for assigning grades on a basis that is rational, just, and unbiased. The authority for assigning grades rests with academic departments or with faculty in the respective programs. Official grades for course work can be obtained from the Office of the Registrar each semester and are not given out by instructors.

Grades in Undergraduate Degree or Certificate and Post-Baccalaureate Certificate Programs—The following grading system is used: *A*, Excellent; *B*, Good; *C*, Satisfactory; *D*, Low Pass; *F*, Fail. At the discretion of the program and individual faculty, "+" or "-" (plus or minus) grades also may be assigned. Except for courses that specifically state that repetition for credit is permitted, a candidate for an undergraduate degree or undergraduate-level certificate (including post-baccalaureate certificate) at this University may not repeat a course in which a grade of *D* or above was received, unless a petition to do so is approved by the appropriate dean and/or chair upon recommendation of the program director. If a course is repeated, the first grade remains on the student's record and is included in the cumulative GPA. Symbols that may appear on the transcript include *CR*, Credit; *AU*, Audit; *P*, Pass; *NP*, No Pass; *I*, Incomplete; *IPG*, In Progress; *W*, Authorized Withdrawal; *Z*, Unauthorized Withdrawal. These symbols are not considered in determining the GPA.

Grades in Graduate Degree and Certificate Programs—The following grading system is used: *A*, Excellent; *B*, Good; *C*, Minimum Pass; *F*, Fail. At the discretion of the program and individual faculty, "+" or "-" (plus or minus) grades also may be assigned. Except for courses that specifically state that repetition is permitted, a candidate for a graduate degree or certificate at this University may not repeat a course in which a grade of *C* or above was received, unless a petition to do so is approved by the appropriate dean and/or chair upon recommendation of the program director. For graduate courses where a grade of *C-* or below was received, the course must be repeated for credit. If a course is repeated, the first grade remains on the student's record and is included in the cumulative GPA. Symbols that may appear on the transcript include *CR*, Credit; *AU*, Audit; *P*, Pass; *NP*, No Pass; *I*, Incomplete; *IPG*, In Progress; *W*, Authorized Withdrawal; *Z*, Unauthorized Withdrawal. These symbols are not considered in determining the GPA.

Incomplete/In Progress—The symbol of *I* indicates that the instructor has received a satisfactory explanation for the student's inability to complete the required work of the course. The grade may be used only if the student's prior performance in the course has been satisfactory. Any failure to complete the work of a course that is not satisfactorily explained to the instructor before the date when grades must be turned will result in the grade of *F* for the course. Incomplete work must be made up by a date agreed upon by the instructor and the student but no later than the last day of the examination period for the semester immediately following the semester or summer session in which the notation of *I* is assigned. An extension of one additional semester can be requested by the student and may be approved by the program director. When work for the course is completed, the grade earned replaces the symbol *I* on the transcript. An Incomplete that is not changed within the allotted time reverts to an *F*.

The symbol of *IPG* is reserved for courses (such as special projects) in which the final class date extends beyond the official University deadline for submitting grades. Once the course has been completed, the *IPG* will be removed from the transcript and the earned grade recorded.

Unauthorized Withdrawal—The symbol of *Z* is assigned when students are registered for a course that they have not attended or have attended only briefly, and in which they have done no graded work. At the end of the academic year, students' records are reviewed; if there is more than one *Z* per semester, a student's record may be encumbered until released by the student's advisor or academic dean. The symbol *Z* is not a grade, but an administrative notation.

The Grade-Point Average—Scholarship is computed in terms of the grade-point average, based only on the student's record in this University. The grade-point average is computed from grades as follows: *A*, 4.0; *A-*, 3.7; *B+*, 3.3; *B*, 3.0; *B-*, 2.7; *C+*, 2.3; *C*, 2.0; *C-*, 1.7; *D+*, 1.3; *D*, 1.0; *D-*, 0.7; *F*, 0, for each credit hour for which the student has registered in a degree program. In undergraduate courses, grades of *F* will be computed in the grade-point average but will not be considered as fulfilling degree requirements. In graduate programs, final course grades below *C-* are recorded as *F*.

Appeal Procedures for Cases of Alleged Improper Academic Evaluation—Students who believe that a grade or evaluation is unjust or inaccurate may use the following appeal procedures:

1. The student must submit a written appeal to the relevant faculty member within 10 calendar days of the time the grade is posted, with a copy to the program director.

2. Resolution should be sought first at the program and departmental levels. A review shall be conducted by the program director and chair, consulting as appropriate the student and faculty involved.

3. If a mutually satisfactory resolution is not achieved, the student may, within five days of the decision being rendered, submit a written letter of appeal to the Senior Associate Dean for Health Sciences. In considering the student's appeal, the Senior Associate Dean will determine whether or not the grading procedures employed were fair, equitable, objective, and consistent.

4. The Senior Associate Dean for Health Sciences may refer the appeal to the Health Sciences Evaluation Committee chair, who will form a three-person committee to serve as a peer review body. The committee will consist of the director of the program and two other members of the Health Sciences Evaluation Committee who are not involved in the case. Should the chair of the Health Sciences Evaluation Committee be the member of the faculty alleged to have made the improper academic evaluation, the appropriate dean will choose the three members of the peer review body from the members of the Health Sciences Evaluation Committee. If a sufficient number of faculty are not available from within the committee, other faculty from the health sciences programs will be appointed.

5. The peer review body will review the student and course materials in order to render a recommendation to the Senior Associate Dean for Health Sciences. In the event that the peer review body chooses to conduct a hearing, the student may not have legal representation present. Students will be allowed to move forward in didactic coursework until the grade appeal is resolved and a final decision rendered. However, students will not be allowed to move forward in clinical coursework until the grade appeal is resolved and a final decision rendered.

6. The peer review body will advise the Senior Associate Dean for Health Sciences on the outcome of their review and recommendations. Final action rests with the Dean for the School of Medicine and Health Sciences.

Academic Standing

An enrolled student is considered to be in good academic standing by the School of Medicine and Health Sciences provided that he or she is not on academic probation or suspension. The policies outlined below apply to all candidates for health sciences programs. In addition, medical laboratory sciences, physician assistant, physical therapy, and translational health sciences students must comply with policies and procedures outlined in their respective student handbooks.

Warning—An undergraduate whose GPA falls between 2.5 and 2.69, and a graduate student whose GPA falls between 3.0 and 3.2 will receive a warning notification from the program. The warning may be delivered to the student the form of an email. A record of warning notifications will be kept with program records and Health Sciences Student Services.

Academic Probation—A full- or part-time undergraduate degree candidate whose cumulative GPA falls below 2.5 will be placed on academic probation and that status noted on the student's transcript. This probation extends over the period during which the student attempts an additional 12 credits of coursework. While on probation, students will be allowed to register for no more than 12 credits per semester, unless approved by the program director and the appropriate dean.

A full- or part-time graduate degree candidate whose cumulative GPA falls below 3.0 will be placed on academic probation. For full-time students, probation extends for one semester of full-time course work as defined by the program; for part-time students, probation extends during the period in which the student attempts 9 credit hours of course work. While on probation, full-time students may register for no more than a total of 9 credits unless an exception is approved by the program director and the appropriate dean; part-time students may register for a combination of 9 credits, but may not register for additional credits, e.g. a part-time student who attempts 6 credits in one semester would be restricted to 3 credits in the following semester of enrollment.

If the program director and department chair determine that extenuating and valid circumstances exist, a student may be granted an extension of the probationary period. If granted, the student will be notified by the program director outlining conditions to be met by the student. The student must return a statement to the program director by email or postal system mail confirming that he/she has read, understands, and agrees to the conditions.

If the student fails to attain the conditions in the time specified, the student will be suspended (see Suspension, below). If the student succeeds in raising his/her cumulative GPA to the minimum scholarship requirements, academic probation will

be lifted. A student who has been placed on probation more than one time will be recommended for dismissal.

Suspension—Students on probation who have not raised their cumulative GPA within the allowed number of credits (12 for undergraduate and 9 for graduate students) may be suspended. A student suspended for poor scholarship may not register for any course work at the University, even as an auditor. The program director mails or emails a Letter of Suspension notifying the student of suspension.

A student who is suspended for failure to raise the cumulative GPA may apply for readmission after one calendar year. Evidence must be presented to the student's program director, demonstrating that the student is better prepared to pursue academic coursework. Any student suspended twice for poor scholarship will not be readmitted. If the student fails to achieve the minimum GPA at the end of the semester following readmission, the program director may recommend that the student be dismissed and further enrollment prohibited; such a recommendation will be reviewed by the appropriate dean, whose recommendation will be forwarded to the Dean of the School of Medicine and Health Sciences.

Dismissal—Any student who has received one or more failing grades in a single semester, or who has been placed on probation more than one time, may be recommended for dismissal by the program director. If the program recommends dismissal, notice will be sent to the student via email or conventional mail informing him/her that the recommendation for dismissal is being reviewed by the Senior Associate Dean for Health Sciences in consultation with the program director and chair. At the discretion of the Senior Associate Dean, the recommendation may also be forwarded to the Health Sciences Evaluation Committee before sending to the Dean for the School of Medicine and Health Sciences. The final decision about dismissal rests with the Dean for the School of Medicine and Health Sciences. A student who is dismissed from non-clinical programs may apply for readmission after the lapse of one calendar year. Readmission is not guaranteed. Students enrolled in clinical programs should consult their program handbook for program-specific dismissal policies and procedures.

Programs of Study

Students enrolled in undergraduate degree or undergraduate-level certificate programs (including post-baccalaureate certificates) must meet with their academic advisor (in person or electronically) to review a program of study, listing all course work required for the degree or certificate, including applicable transfer credit. Changes to the program of study can be made through petition to the program. Changes may require approval of Senior Associate Dean for Health Sciences.

Transfer Within Health Sciences Programs—To apply for a transfer from one health sciences program to another, a written request must be submitted to the Office of Student Services, Health Sciences Programs, along with the necessary supporting documentation required by the program. To change from certificate to degree program may require an admissions application.

Transfer Outside Health Sciences Programs—No internal transfers are permitted from a health sciences program to another GW school or college. To transfer outside of of the health sciences, a student must follow the full admission processes for the other GW program.

Changes Within Health Sciences Programs—A student may not substitute one course for another without approval of the program director, the department chair, and the appropriate dean. After the deadlines for adding or dropping courses, a student must obtain the permission of the course instructor, the program director, and the appropriate dean to withdraw from a course or to change status from credit to audit or audit to credit.

Adding and Dropping Courses—During the registration period (before the end of the second week of classes) students may add or drop courses using GWeb. After the second week of classes, students who wish to add or drop a course must complete a Registration Transaction Form (http://smhs.gwu.edu/academics/health-sciences/students/forms-policies) and submit the form to the Student Services Office. Adding a course after the second week requires a signature of the instructor or other authorized member of the department.

A course dropped during the first four weeks of classes will not appear on the student's transcript. A course dropped after the fourth week but before the end of the eighth week will be assigned a notation of W (Authorized Withdrawal). Deadlines for a summer or short course may vary.

The deadline for dropping a course without academic penalty is the end of the eighth week of classes. After the end of the eighth week of classes, dropping a course without academic penalty is only possible after the student presents a petition to the Senior Associate Dean for Health Sciences and receives written permission. Deadlines for a summer or short course may vary.

All charges for courses from which the student withdraws are subject to the refund policy listed under Fees and Financial Regulations in this Bulletin. Failure to withdraw by these procedures can result in an extended financial obligation and the recording of a grade of *F* (Failure) or a notation of *Z* (Unauthorized Withdrawal).

Policies and Definitions

Credit—Credit is awarded only after registration for a course and satisfactory completion of the required work, or upon assignment of advanced standing.

Auditing—A student who has been admitted to a health sciences program may register as an auditor in a class only with the permission of the instructor, the faculty advisor, and the appropriate dean. An auditor receives no academic credit

and is not required to take active part in the class or to pass examinations. A student who takes a course as an auditor may not repeat it later for credit. The regular program tuition rate is charged for audited courses.

Attendance—Students may attend only those classes for which they are officially registered. Regular attendance is expected. A student suspended for any cause may not attend classes during the period of suspension. Students are held responsible for all of the work of the courses in which they are registered, and all absences must be excused by the instructor before provision is made to make up the work missed.

Transcripts of Record—Official transcript of student records are issued by the Office of the Registrar and may be requested through GWeb by any student or former student who has paid all charges, including any outstanding student loan installments, due the University at the time of the request. A fee is charged for each transcript. Partial transcripts are not issued.

Continuous Enrollment—Once entered in a degree or certificate program, a student is expected to be continuously enrolled and actively engaged in fulfilling the requirements each semester of the academic year until such time as the degree is conferred or certificate completed. Students who break continuous enrollment at the University and do not request and receive a leave of absence (see below) must apply for readmission and, if granted, are subject to the requirements and regulations then in force. Students who plan to attend other institutions and apply credit earned toward graduation from this University must first obtain written approval from the program director and the appropriate dean.

Leave of Absence—A student who must interrupt active pursuit of the degree or certificate may petition the appropriate dean, through the program director, for a leave of absence for a specified period of time, generally limited to one calendar year. If the petition is approved, the student must register for leave of absence in each fall and spring semester, following regular registration procedures. The request should be made using the Petition Request Form (http://smhs.gwu.edu/academics/health-sciences/students/forms-policies). Students who discontinue their studies without being granted a leave of absence and students granted leaves who do not return to active study at the close of the period of approved absence must apply for readmission and are subject to the regulations and requirements then in force. The right to use University facilities is suspended while the leave is in effect.

Policy Regarding Students Called to Active Military Duty—Any student who is a member of a military reserve unit or the National Guard and is activated or called to active duty early in a semester or summer session automatically will be entitled to a full refund of all tuition and fees that he or she has paid toward the expenses of that academic term. If the notification of the call to active duty comes after the mid-term examinations or after other substantial graded work has been completed, the student will have the option of either taking a full refund of tuition and fees or taking an Incomplete in his or her courses with the privilege of returning to complete all required coursework at some future date without payment of any further tuition and fee charges. It is the responsibility of the student to present evidence of his or her activation to the Health Sciences Student Services and the Office of Student Accounts and to request the appropriate refund.

Should a degree student called up for active duty find it necessary to interrupt active pursuit of the degree he or she may petition the Senior Associate Dean for Health Sciences for a leave of absence for a specified period of time, generally limited to one calendar year. Deans are encouraged to grant any request to extend the leave of absence for longer than the customary period should military service require an absence of more than one year.

All students on active duty will be automatically exempted from the request for a $50 voluntary library contribution without requiring any communication from them or their initials on the bill.

Right to Change Rules and Programs—The University reserves the right to modify or change requirements, rules, and fees. Such regulations shall go into force whenever the proper authorities may determine. The right is reserved by the University to make changes in programs without notice whenever circumstances warrant such changes. For the most up to date requirements, rules, and fees contact the Health Sciences Dean's Office (http://smhs.gwu.edu/academics/health-sciences).

Complete Withdrawal From the University—A student who wishes to withdraw from all courses, and the university must complete a Complete Withdrawal Form (http://registrar.gwu.edu) and submit it to the Office of the Registrar. The deadline for complete withdrawal from all courses without academic penalty is the end of the eighth week of classes, with the exception of summer and short courses, which may have different deadlines. Complete withdrawal after the eighth week requires a petition to the appropriate dean. A student who wishes to withdraw from one or all courses, but not the university, should submit a Registration Transaction Form. A student who wishes to withdraw from the University upon completion of currently registered courses should notify their program director and Health Sciences Student Services.

All charges for courses from which the student withdraws are subject to the refund policy listed under Fees and Financial Regulations in this Bulletin. Failure to complete a Complete Withdrawal Form can result in an extended financial obligation and the recording of grades of *F* (Failure) or notations of *Z* (Unauthorized Withdrawal).

Graduation Requirements

Degrees are conferred in January, May, and August. Degree-seeking students graduating from health sciences may

participate in the commencement ceremony held each year in May.

To be recommended for graduation by the faculty, students must have met admission requirements; have completed satisfactorily the scholarship, curriculum, residence, and other requirements for the degree; have filed an application for graduation prior to the published deadline; and be free from all indebtedness to the University. Registration, either for course work or for continuous enrollment, is required for the semester or summer session at the close of which the degree is to be conferred.

Applications for graduation must be filed by October 1 for fall graduation, February 1 for spring graduation, and July 1 for summer graduation.

Undergraduate Residence Requirements– Bachelor of Science in Health Sciences programs follow the Residence Requirement under University Regulations (http://bulletin.gwu.edu/university-regulations).

Graduate and Doctoral Residence Requirements– Graduate and doctoral programs may set higher residency requirements; students should consult the program office or program handbook, if applicable.

Honors—Bachelor's degrees with honors are awarded to students whose academic records give evidence of particular merit. The student's grade-point average determines the level of honors as follows: *cum laude*, 3.4-3.59; *magna cum laude*, 3.6-3.79; *summa cum laude*, 3.8-4.0. The grade-point average includes all course work completed at GW and is not rounded off. To be eligible for an honors designation, a student must complete at least 60 hours of coursework at GW.

The grade-point average is calculated by the Office of the Registrar, and the honors designation is entered on the transcript and the diploma of those students who earn an honors designation. If honors are entered in the commencement program, honors status will be determined on the basis of work completed by the end of the seventh term and entered only for those students who have completed seven-eighths of the credit hours required for the degree. Honors indicated on the diploma are calculated on the basis of all course work completed. The diploma and transcript are the official indication that a degree was conferred and honors awarded.

Certificate Completion—Students planning to complete a certificate by the end of a semester must submit a certificate completion form (http://registrar.gwu.edu/certificate-completion) by April 1 for spring semester, July 1 for summer semester, and December 1 for fall semester. Students completing a certificate are not recognized at the university commencement and are not issued tickets to the ceremony.

Financial Aid

The George Washington University financial assistance for undergraduate students is described in *Financial Aid Sourcebook* from The George Washington University Office of Student Financial Assistance (http://financialaid.gwu.edu). Undergraduate aid consists of two basic types: awards for academic achievement or talent without reference to financial circumstances (merit scholarships) and scholarships, grants, loans, and employment based on academic achievement and demonstrated financial need. All undergraduate gift aid (institutional scholarships and grants, and federal grants) requires that the recipient be working on the first undergraduate degree and be registered for a full-time course load at GW. Students are limited to eight semesters of institutional aid. Institutional aid is not available for online programs nor graduate programs. Loans and resident assistantships not based on financial need are available.

Several offices on campus provide information on financial assistance for graduate and certificate students. Information about funding opportunities is provided by the Office of Graduate Student Assistantships and Fellowships (http://www.gwu.edu/~fellows). Forms and information on federal loans for graduate students can be obtained from the Office of Student Financial Assistance. (http://financialaid.gwu.edu) Information on the Federal Work-Study Program, cooperative education opportunities, and on- and off-campus employment is available from the GW Career Center (http://careerservices.gwu.edu). Gift aid (scholarships, grants, fellowships, assistantships, etc.) is taxable to the extent that it exceeds the allowable costs of tuition, fees, and required books and supplies or is dedicated to other costs, such as room and board. Federal grants may be taxable if, together with other gift assistance, they exceed the allowable costs. In the case of a student who is awarded tuition scholarships, grants, or awards from more than one source, the combined amount cannot exceed tuition charges; institutional aid will be adjusted to this limit.

In general, consideration for financial aid is restricted to students in good academic standing who meet the minimum grade-point average for particular awards and are not financially encumbered by any other University office. Applications for institutional or federal aid cannot be processed if the relevant tax returns have not been filed in accordance with the IRS Code. Documents submitted as part of aid applications become the property of the University and cannot be returned. Federal regulations require that the University report suspected cases of fraud or misrepresentation to the appropriate federal, state, and local authorities.

Information on financial aid is accurate at the time each Bulletin is prepared for press. Future changes in federal regulations or institutional policies may alter the application requirements or program guidelines.

UNDERGRADUATE

Associate's programs

- Associate in Science in the field of health sciences (p. 769)
- Associate in Science in the field of health sciences laboratory technology (p. 770)

Bachelor's programs

- Bachelor of Science in Health Sciences with a major in bioinformatics (p. 771)
- Bachelor of Science in Health Sciences with a major in clinical health sciences (p. 772)
- Bachelor of Science in Health Sciences with a major in clinical management and leadership (p. 773)
- Bachelor of Science in Health Sciences with a major in clinical research administration
- Bachelor of Science in Health Sciences in the field of cytotechnology (p. 775)**(military contract)**
- Bachelor of Science in Health Sciences with a major in emergency medical services management
- Bachelor of Science in Health Sciences with a major in health intervention and disaster response
- Bachelor of Science in Health Sciences with a major in medical informatics (p. 778)
- Bachelor of Science in Health Sciences with a major in medical laboratory science

Combined programs

- Bachelor of Science in Health Sciences and Master of Science in Health Sciences in the field of clinical management and leadership
- Bachelor of Science in Health Sciences in the field of clinical management and leadership and Master of Science in Health Sciences in the field of health care quality
- Bachelor of Science in Health Sciences and Master of Science in Health Sciences in the field of clinical research administration
- Bachelor of Science in Health Sciences in the field of clinical research administration and Master of Science in Health Science in the field of regulatory affairs
- Bachelor of Science in Health Sciences in the field of emergency medical services management and Master of Science in Health Sciences in the field of clinical management and leadership

Minors

- Minor in anatomy (p. 785)
- Minor in blood banking for medical laboratory science (p. 785)
- Minor in chemistry for medical laboratory science (p. 785)
- Minor in clinical research administration (p. 785)
- Minor in emergency health services
- Minor in health sciences (p. 786)
- Minor in hematology for medical laboratory science (p. 786)
- Minor in microbiology for medical laboratory science (p. 786)

GRADUATE

Master's programs

- Master of Science in Health Sciences in the field of clinical management and leadership (p. 787)
- Master of Science in Health Sciences in the field of clinical microbiology (p. 788)
- Master of Science in Health Sciences in the field of clinical research administration
- Master of Science in Health Sciences in the field of clinical and translational research
- Master of Science in Health Sciences in the field of emergency medical services leadership
- Master of Science in Health Sciences in the field of health care quality (p. 790)
- Master of Science in Health Sciences in the field of immunohematology and biotechnology (p. 792)
- Master of Science in Health Sciences in the field of integrative medicine (p. 792)
- Master of Science in Health Sciences in the field of medical laboratory science (p. 793)
- Master of Science in Health Sciences in the field of molecular diagnostic science (p. 793)
- Master of Science in Health Sciences in the field of regulatory affairs (p. 795)
- Master of Science in Health Sciences in the field of physician assistant (p. 794)
- Master of Science in Health Sciences in the field of translational microbiology (p. 795)

Dual degree program

- Master of Science in Health Sciences in the field of physician assistant and Master of Public Health (Milken Institute School of Public Health) (p. 796)

Military contract programs

- Master of Science in Health Sciences in the field of immunohematology (p. 791)

Doctoral programs

- Doctor of Philosophy in the field of translational health sciences (p. 799)
- Doctor of Physical Therapy (p. 800)
- Advanced Practice Clinical Doctorate in Occupational Therapy (p. 801)

CERTIFICATES

Post-baccalaureate certificates

- Post-baccalaureate certificate in medical laboratory science (p. 804)
- Post-baccalaureate certificate in blood banking for medical laboratory science (p. 802)
- Post-baccalaureate certificate in chemistry for medical laboratory science (p. 803)
- Post-baccalaureate certificate in hematology for medical laboratory science (p. 804)
- Post-baccalaureate certificate in microbiology for medical laboratory science (p. 805)
- Post-baccalaureate certificate in pre-medicine (p. 805)

Graduate certificates

- Graduate certificate in clinical research administration (p. 805)
- Graduate certificate in clinical and translational research (p. 806)
- Graduate certificate in clinical research practice (p. 806)
- Graduate certificate in health care quality (p. 806)
- Graduate certificate in integrative medicine (p. 807)
- Graduate certificate in regulatory affairs (p. 807)

Undergraduate certificate (military contract)

- Undergraduate certificate in the field of health sciences laboratory science (p. 803)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

- Anatomy & Regenerative Biology (ANAT) (p. 1027)
- Clinical Management Leadership (CML) (p. 1073)
- Clinical Research and Administration (CRA) (p. 1074)
- Emergency Health Services (EHS) (p. 1194)
- Health Care Quality (HCQ) (p. 1245)
- Health Sciences (HSCI) (p. 1247)
- Medical Laboratory Science (MLS) (p. 1349)
- Occupational Therapy (OT) (p. 1367)
- Pharmacogenomics (PHRG) (p. 1369)
- Physician Assistant (PA) (p. 1379)
- Physical Therapy (PT) (p. 1376)
- Regulatory Affairs (RAFF) (p. 1442)
- Translational Health Sciences (THS) (p. 1483)

UNDERGRADUATE PROGRAMS

Associate's programs

- Associate in Science in the field of health sciences (p. 769)
- Associate in Science in the field of health sciences laboratory technology (p. 770)

Bachelor's programs

- Bachelor of Science in Health Sciences with a major in bioinformatics (p. 771)
- Bachelor of Science in Health Sciences with a major in clinical health sciences (p. 772)
- Bachelor of Science in Health Sciences with a major in clinical management and leadership (p. 773)
- Bachelor of Science in Health Sciences with a major in clinical research administration
- Bachelor of Science in Health Sciences in the field of cytotechnology (p. 775)**(military contract)**
- Bachelor of Science in Health Sciences with a major in emergency medical services management
- Bachelor of Science in Health Sciences with a major in health intervention and disaster response
- Bachelor of Science in Health Sciences with a major in medical informatics (p. 778)
- Bachelor of Science in Health Sciences with a major in medical laboratory science

Combined programs

- Bachelor of Science in Health Sciences and Master of Science in Health Sciences in the field of clinical management and leadership
- Bachelor of Science in Health Sciences in the field of clinical management and leadership and Master of Science in Health Sciences in the field of health care quality
- Bachelor of Science in Health Sciences and Master of Science in Health Sciences in the field of clinical research administration
- Bachelor of Science in Health Sciences in the field of clinical research administration and Master of Science in Health Science in the field of regulatory affairs
- Bachelor of Science in Health Sciences in the field of emergency medical services management and Master of Science in Health Sciences in the field of clinical management and leadership

Minors

- Minor in anatomy (p. 785)

- Minor in blood banking for medical laboratory science (p. 785)
- Minor in chemistry for medical laboratory science (p. 785)
- Minor in clinical research administration (p. 785)
- Minor in emergency health services
- Minor in health sciences (p. 786)
- Minor in hematology for medical laboratory science (p. 786)
- Minor in microbiology for medical laboratory science (p. 786)

ASSOCIATE IN SCIENCE IN THE FIELD OF HISTOTECHNOLOGY

This program provides formal training for histopathology technicians who are assigned to a medical treatment facility (MTF). The course combines didactic classroom instruction, hands-on experience and clinical rotations in an MTF. The instruction also assists graduates in preparing for the histotechnician (HT) certification examination. Instruction is presented in the following major areas: introduction to histotechnology, basic scientific information, specimen processing for histological study, routine technical procedures, special stains for histologic study, anatomy and tissue identification, autopsy procedures, cytopreparatory techniques, immunohistochemistry, practical histotechnician training, and clinical practicum.

REQUIREMENTS

The following requirements must be fulfilled: 63 credits, including 18 credits in general education courses, and 45 credits from courses in the major. The general education requirements may be completed by taking coursework at GW or another regionally accredited institution.

General Education (18 Credits)

6 credits English composition

3 credits college mathematics

3 credits social sciences

3 credits humanities

3 credits chemistry

Courses in the Major (45 credits)

MLS 1040 - Introduction to Histotechnology

MLS 1041 - Basic Scientific Information

MLS 1042 - Specimen Processing for Histological Study

MLS 1043 - Routine Technical Procedures

MLS 1044 - Special Stains for Histological Study

MLS 1045 - Anatomy and Tissue Identification

MLS 1046 - Autopsy Procedures

MLS 1047 - Cytopreparatory Techniques

MLS 1048 - Immunohistochemistry

MLS 1049 - Practical Histotechnician Training

MLS 1050 - Histo Clinical Practicum

ASSOCIATE IN SCIENCE IN THE FIELD OF HEALTH SCIENCES

The associate in science (A.S.) in health sciences (http://smhs.gwu.edu/military-affiliated-programs/health-sciences) is a degree completion program restricted to current and former Army 18D, Navy IDCs, Air Force IDMTs, and Army or Navy MLTs. Additional military occupations may be reviewed for consideration.

Visit the program website (http://smhs.gwu.edu/military-affiliated-programs/health-sciences/admissions) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 69 credits, including 44 credits in advanced standing, 19 credits in general education, and 6 credits in health sciences courses.

Code	Title	Credits
44 credits of advanced standing		
Advanced standing for military courses will be noted on the student's record and applied towards the associate's degree during the first semester of the student's enrollment in the program.		
19 credits of general education including:		
3 credits of English composition		
3 credits of mathematics or statistics		
3 credits of humanities		
6 credits of social sciences		
4 credits of natural or physical science		

For students who have not completed all general education coursework prior to entering the program, GW offers via distance learning all courses needed to satisfy this requirement. Those planning to apply to B.S.H.S. programs are strongly encouraged to take unfulfilled general education coursework at GW by taking the recommended courses shown below.

6 credits of health sciences courses		

Code	Title	Credits
General education courses offered by GW		
For students who have not completed all general education course requirements prior to enrollment, the following course offered by GW are recommended:		
English composition		
HSCI 2100	Writing and Composition in the Health Sciences	
Mathematics or statistics		
HSCI 2115	Intro Biostatistics-Health Sci	
HSCI 2117	Introduction to Statistics for Health Sciences	
Humanities		
HSCI 2107	Health Care in Literature	
Social sciences		
HSCI 2103	Health Policy and the Health Care System	
HSCI 2111	Dev/Health Care Professions	

Code	Title	Credits
Required GW health sciences distance learning courses		
Two of the following:		
HSCI 2101	Psychosocial Aspects of Health and Illness	
HSCI 2102	Pathophysiology	
HSCI 2105	Current Issus in Bioethics	

Transfer of credits

For an assessment on the transferability of your previous coursework contact the program office (http://smhs.gwu.edu/crl/programs/chs/curriculum/as). To be eligible for transfer, courses must be:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a grade of C or better (C- grades do not transfer)

ASSOCIATE IN SCIENCE IN THE FIELD OF HEALTH SCIENCES LABORATORY TECHNOLOGY

Admission to the associate in science (A.S.) in health science laboratory technology (HSLT) (http://smhs.gwu.edu/military-affiliated-programs/as-mlt) program is restricted to students who have completed the MLT I: certificate in health sciences laboratory technology (http://smhs.gwu.edu/military-affiliated-programs/cert-mlt) at GW, within the past five years. The program offers Army and Navy medical laboratory technicians (MLTs) the opportunity to enhance their skills, obtain the credentials to pursue advanced study, and be eligible for promotion within the military.

Visit the military affiliated programs website (http://smhs.gwu.edu/military-affiliated-programs) for more information.

REQUIREMENTS

The following requirements must be fulfilled: 75 credits, 60 of which are awarded for completion of the MLT I: certificate in health sciences laboratory technology (http://smhs.gwu.edu/military-affiliated-programs/cert-mlt), and 15 credits in general education courses. The general education requirements may be completed by taking coursework at GW or another regionally accredited institution.

Code	Title	Credits
15 credits of general education including:		
3 credits of English composition		
3 credits of college algebra or statistics or higher		
3 credits of social sciences		
3 credits of humanities		
3 credits of biology or chemistry		
Recommended general education courses at GW that fulfill these requirements:		
English composition		
HSCI 2100	Writing and Composition in the Health Sciences	
Statistics		
HSCI 2115	Intro Biostatistics-Health Sci	
HSCI 2117	Introduction to Statistics for Health Sciences	
Social sciences		

HSCI 2101	Psychosocial Aspects of Health and Illness
HSCI 2103	Health Policy and the Health Care System
Humanities	
HSCI 2105	Current Issus in Bioethics
HSCI 2107	Health Care in Literature
Biology or Chemistry	
MLS 2000	Biology for Health Sciences
MLS 2001	Chemistry for Health Sciences

Transferring credits

For an assessment on the transferability of your previous coursework, please contact the program office (http://smhs.gwu.edu/crl/programs/military/as-mlt). Coursework will be evaluated for transfer using the following criteria:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a grade of C or better (C- grades do not transfer)

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN BIOINFORMATICS

Bioinformaticists use computers to analyze, organize, and visualize biological data in ways that increase the understanding of this data and lead to new discoveries. Graduates of this program will be well-qualified for many rewarding careers, including those in bioinformatics software development, biomedical research, biotechnology, comparative genomics, genomics, molecular imaging, pharmaceutical research and development, proteomics, and vaccine development.

REQUIREMENTS

The following requirements must be fulfilled:

Code	Title	Credits
60 credits of general education including:		
3 credits English composition		
3 credits humanities		
6 credits social science		
8 credits biology with lab		
8 credits of general or inorganic chemistry with lab		
4 credits of organic chemistry with lab or 4 credits of genetics with lab		
8 credits in computer science (or related coursework in programming languages)		
4 credits in calculus		
3 credits in statistics		
13 credits in elective courses. Additional courses in biology, chemistry, computer science, mathematics, and/or statistics are recommended.		
Required		
HSCI 2105	Current Issus in Bioethics	
HSCI 2112W	Writing in the Health Sciences	
HSCI 4106	Intro to Epidemiology for HS	
HSCI 4112W	Rsrch/Wrtng in Health Sciences	
INFR 3101	Introduction to Bioinformatics	
INFR 3102	Scripting	
INFR 3103	Genomics	
INFR 4120	Bioinformatics Algorithms	
INFR 4121	High Performance Computing	
INFR 4122	Advanced Scripting	
INFR 4123	Statistical Genetics	
INFR 4203	Seminar in Computational Biology	
6 credits from the following (may be repeated for credit):		
INFR 4204	Bioinformatics Internship	
INFR 4205	Bioinformatics Research Project	
Electives		
9 credits from the following:		
INFR 3104	Human Genetics	
HSCI 3105	Biochemistry	
HSCI 3106	Microbiology for Health Sciences	
HSCI 3117	Principles of Biostatistics for Health Sciences	

9 credits from the following:	
INFR 4101	Introduction to Medical Informatics
INFR 4102	Survey of Medicine for Informaticians
INFR 4104	Medical Informatics Terminology & Standards
INFR 4105	Consumer Health Informatics
INFR 4106	Population Health for Medical Informatics

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN CLINICAL HEALTH SCIENCES

The bachelor of science in health sciences (B.S.H.S.) with a major in clinical health sciences degree program is available only to active-duty Navy IDCs, Army 18Ds, and Air Force IDMTs. Coast Guardsmen who completed a Navy IDC School may be eligible, depending on their current duty assignment.

This distance learning program offers active-duty Navy IDCs, Army Special Forces Medical Sergeants (18Ds), and Air Force Independent Medical Technicians (IDMTs) a way to formalize their specialized military training with a GW degree. All courses are offered online in a flexible, asynchronous format allowing students to pursue their degree, regardless of time zone, station, or overseas assignment. The clinical rotations are arranged by students in their current duty station or location.

Visit the program website (https://smhs.gwu.edu/medical-laboratory-sciences/programs/bshs/curriculum) for additional information.

REQUIREMENTS

The BSHS with a major in Clinical Health Sciences (http://smhs.gwu.edu/crl/military) is a degree completion program that requires successful completion of **120 credit hours**, divided into three degree components.

The following requirements must be fulfilled:

Code	Title	Credits
Advanced standing and electives (60 credits):		
During the first semester the student is enrolled in the program, advanced standing for eligible military courses will be noted on the student's record and applied towards the bachelor's degree.		
General education (24 credits):		
3 credits of English composition		
4 credits of natural or physical science with lab		
8 credits of mathematics, science, or statistics		
6 credits of social sciences		
3 credits of humanities		

If a student still needs general education coursework, GW offers online coursework for some of these requirements.

Code	Title	Credits
Recommended coursework at GW (for those missing general education requirements)		
General education		
English composition		
HSCI 2100	Writing and Composition in the Health Sciences	
Humanities		
HSCI 2107	Health Care in Literature	
Social sciences		
HSCI 2103	Health Policy and the Health Care System	
HSCI 2111	Dev/Health Care Professions	
HSCI 4103	Health Care Law/Regulation	
Science or statistics		
HSCI 2117	Introduction to Statistics for Health Sciences	
MLS 2000	Biology for Health Sciences	
MLS 2001	Chemistry for Health Sciences	

Code	Title	Credits
At least 36 credits of GW coursework including:		
Foundation courses		
HSCI 2101	Psychosocial Aspects of Health and Illness	
HSCI 2102	Pathophysiology	
HSCI 2105	Current Issus in Bioethics	
HSCI 2112W	Writing in the Health Sciences	

HSCI 2130	Primary Care Skills Practicum *
HSCI 2131	Adult Primary Care Practicum *
HSCI 2133	Specialized Clinicl Experience *
HSCI 3117	Principles of Biostatistics for Health Sciences
HSCI 4102	HumanPhysiology/ExtremeEnviro
HSCI 4112W	Rsrch/Wrtng in Health Sciences
MLS 4141	Immunology and Serology
Capstone	
One of the following	
CML 4144	Seminar/Health Sci Leadership
EHS 4101	Humanitarian Relief Ops
Electives	
One of the following selected in consultation with advisor	
EHS 2211	Intro to Telemedicine
HSCI 2103	Health Policy and the Health Care System
HSCI 2108	Quality Improvement in Health Care
HSCI 2110	Disease Prev/Health Promotion
HSCI 2114	Healthcare/Developing Nations
HSCI 4106	Intro to Epidemiology for HS

*Must be completed while on active-duty. Students arrange rotations at their current duty stations. All rotations require a MD or PA preceptor.

HSCI 2103 Health Policy and the Health Care System cannot be double-counted for a general education requirement and an elective; it may only be used to complete one requirement.

Transferable Coursework (84 credit hour maximum)

For an assessment on the transferability of your previous coursework, please contact the program office. Coursework will be evaluated for transfer using the following criteria:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a C or better (C- grades do not transfer)

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN CLINICAL MANAGEMENT AND LEADERSHIP

The bachelor of science in health sciences with a major in clinical management and leadership degree program is designed for working health science professionals who may be seeking career advancement, future graduate study, enhanced performance in a current position, or simply to broaden knowledge and skills. Courses focus on communication skills, leadership and group effectiveness, administrative functions, operations and information management, consumer needs, and the changing face of health care.

REQUIREMENTS

The Bachelor of Health Sciences with a major in the field of clinical management and leadershi (http://smhs.gwu.edu/crl/programs/cml)p is a degree completion program that requires successful completion of 120 credits, 60 of which must be completed at GW. Up to 60 credits of course work may be transferable from course work taken elsewhere.

The following requirements must be fulfilled:

Code	Title	Credits
60 credits of general education and advanced standing:		
3 credits of English composition		
4 credits of natural or physical science with lab		
6 credits of social sciences		
3 credits of humanities		
44 credits of advanced standing*		
* Additional academic coursework. Non-traditional credit sources may be considered on a case-by-case basis (i.e. military coursework, credit-by-exam, and non-college based health programs).		
Requirements for the major:		
At least 60 credits of GW coursework including:		
CML 2140	Mgt of HR in Health Sci Org	
CML 2141	Planning&Mktg/Health Sciences	
CML 2142	Financial Mgt/Health Sciences	
CML 2143	Current Issues/Hlth Sci Mgt	
CML 4144	Seminar/Health Sci Leadership	

HSCI 2103	Health Policy and the Health Care System
HSCI 2104	Management of Health Science Services
HSCI 2105	Current Issus in Bioethics
HSCI 2107	Health Care in Literature
HSCI 2108	Quality Improvement in Health Care
HSCI 2112W	Writing in the Health Sciences
HSCI 2113	Informatics in the HSci
HSCI 2117	Introduction to Statistics for Health Sciences
HSCI 4103	Health Care Law/Regulation
HSCI 4105	Case Studies in Health Care
HSCI 4106	Intro to Epidemiology for HS
HSCI 4112W	Rsrch/Wrtng in Health Sciences
Three courses selected from the following (advisor approval is required):	
HSCI 2101	Psychosocial Aspects of Health and Illness
HSCI 2102	Pathophysiology
HSCI 2110	Disease Prev/Health Promotion
HSCI 2111	Dev/Health Care Professions
HSCI 3117	Principles of Biostatistics for Health Sciences

Transferring credits

Up to 60 credits may be transferrable from courses taken elsewhere. For an assessment on the transferability of your previous coursework, please contact the program office. Coursework will be evaluated for transfer using the following criteria:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a grade of C or better (C- grades do not transfer)

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN CLINICAL RESEARCH ADMINISTRATION

Offered in a distance learning format, the bachelor of science in health sciences with a major in clinical research administration prepares health sciences professionals to work in a vast and expanding field that involves the processes by which products (drugs, devices, biologics) and treatment protocols are developed for improving patient care.

REQUIREMENTS

The bachelor of science in the health sciences with a major in clinical research administration (http://smhs.gwu.edu/crl/programs/cra) is a degree completion program that requires successful completion of **120 credits,** 60 credits of which must be completed at GW. Up to 60 credits of coursework may be transferable from coursework taken elsewhere.

The following requirements must be fulfilled:

Code	Title	Credits
60 credits of general education and advanced standing including:		
3 credits of English composition		
4 credits of natural or physical science with lab		
6 credits of social sciences		
3 credits of humanities		
44 credits of advanced standing*		
* Additional academic coursework. Non-traditional credit sources may be considered on a case-by-case basis (i.e. military coursework, credit-by-exam, and non-college based health programs).		
Requirements for the major:		
At least 60 credits of GW coursework including:		
CRA 2101	Basics of Clinical Research	
CRA 2102	Processes of Clinical Research	
CRA 2103	Good Clinical Practices	
CRA 2104	Business of Clinical Research	
CRA 2105	Topics in Clinical Research	
CRA 2107	Intro Monitoring Clin. Trials	
HSCI 2102	Pathophysiology	

HSCI 2103	Health Policy and the Health Care System
HSCI 2105	Current Issus in Bioethics
HSCI 2107	Health Care in Literature
HSCI 2112W	Writing in the Health Sciences
HSCI 2113	Informatics in the HSci
HSCI 3117	Principles of Biostatistics for Health Sciences
HSCI 4103	Health Care Law/Regulation
HSCI 4105	Case Studies in Health Care
HSCI 4106	Intro to Epidemiology for HS
HSCI 4112W	Rsrch/Wrtng in Health Sciences
Electives	
3 courses from the following with advisor approval:	
CML 2143	Current Issues/Hlth Sci Mgt
HSCI 2104	Management of Health Science Services
HSCI 2108	Quality Improvement in Health Care
HSCI 2110	Disease Prev/Health Promotion
HSCI 2117	Introduction to Statistics for Health Sciences

Transferring credits

Up to 60 credits of coursework may be transferable from coursework taken elsewhere. For an assessment on the transferability of your previous coursework, please contact the program office. Coursework will be evaluated for transfer using the following criteria:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a grade of C or better (C- grades do not transfer)

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN CYTOTECHNOLOGY

Established between GW and the Medical Education Training Campus (METC), the bachelor of science in health sciences with a major in cytotechnology degree program (http://smhs.gwu.edu/military-affiliated-programs/cytotechnology) is restricted to pre-selected military service members.

This contract program provides GW educational services to eligible active duty U.S. Army service members, including:

- Academic advising for students who have outstanding prerequisites for eligibility.
- Application and registration services.
- Academic record maintenance.
- Conferral of a bachelor of science in health sciences degree to students upon successful completion of 126 credits in the required program.

REQUIREMENTS

The following requirements must be fulfilled: 126 credits including 49 credits in general education, 27 credits in advanced standing and electives and 50 credits in distance education clinical laboratory sciences and health sciences courses. The B.S.H.S. in cytotechnology is a one-year program.

The BSHS in Cytotechnology is a 126 credit hour degree program divided into three components: general education (49 credit hours), advanced standing and electives (27 credit hours), and distance education clinical laboratory sciences and health sciences courses (50 credit hours). The BSHS in Cytotechnology is a one-year program.

General education (49 credits)

- Biology* (20 credits)
- Chemistry* (8 credits)
- College Algebra, Statistics, or higher (3 credits)
- Humanities or Social Sciences (12 credits)
- English Composition (6 credits)

*Students with the MLT Certificate will have these transfer credits applied to fulfill all of the biology, chemistry, and elective requirements for the degree program.

Electives (27 credits)

Previously earned college-level coursework will be evaluated for transfer as elective credit. Acceptable transfer coursework must be:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a C or better (C- grades do not transfer)

Code	Title	Credits
Major courses		
Clinical laboratory coursework		
MLS 4101	Introduction to Cytotechnology	
MLS 4102	Gynecologic Cytology	

MLS 4103	Abnormal Gynecologic Cytology
MLS 4104	Pulmonary Cytology
MLS 4105	Cytology of the Gastrointestinal Tract, Liver, and Pancreas
MLS 4106	Urogenital System Cytology
MLS 4107	Body Cavity Fluid Cytology
MLS 4108	Fine Needle Aspiration
MLS 4109	Cytotechnology Clinical Practicum
MLS 4110	Independent Study in Cytotechnology
GW coursework - completed through GW distance education coursework	
HSCI 2112	Writing in the Health Sciences
MLS 4151	Molecular Diagnostics

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN EMERGENCY MEDICAL SERVICES MANAGEMENT

Emergency Medical Services (EMS) is a challenging and rapidly emerging discipline at the intersection of traditional EMS, public health, public safety, and health care. The bachelor of science in health sciences in emergency medical services management (EMSM) is designed to prepare students for leadership positions in the field that will improve the quality of out-of-hospital care domestically and internationally.

REQUIREMENTS

The following requirements must be fulfilled:

Code	Title	Credits
60 credits of general education and advanced standing including:		
3 credits of English composition		
4 credits of natural or physical science with lab		
6 credits of social sciences		
3 credits of humanities		
44 credits of advanced standing*		

* Additional academic coursework. Non-traditional credit sources may be considered on a case-by-case basis (i.e. military coursework, credit-by-exam, and non-college based health programs).

Requirements for the major:	
At least 60 credits of GW coursework including:	
CML 2140	Mgt of HR in Health Sci Org
CML 2142	Financial Mgt/Health Sciences
EHS 2174	Foundations of Emergency Health Services Systems
EHS 2175	Community Risk Management and Safety in EHS
EHS 4110	Operations Mgt in EHS Systems
EHS 4111	Leadership Concepts in EHS
EHS 4112	Special Ops and Disaster Mgt
EHS 4144	Seminar in EHS Leadership
HSCI 2103	Health Policy and the Health Care System
HSCI 2104	Management of Health Science Services
HSCI 2105	Current Issus in Bioethics
HSCI 2108	Quality Improvement in Health Care
HSCI 2112W	Writing in the Health Sciences
HSCI 2117	Introduction to Statistics for Health Sciences
HSCI 4103	Health Care Law/Regulation
HSCI 4106	Intro to Epidemiology for HS
HSCI 4112W	Rsrch/Wrtng in Health Sciences
Three elective courses from the following (advisor approval is required):	
EHS 2211	Intro to Telemedicine
EHS 4101	Humanitarian Relief Ops
HSCI 2101	Psychosocial Aspects of Health and Illness
HSCI 2102	Pathophysiology
HSCI 2110	Disease Prev/Health Promotion
HSCI 2111	Dev/Health Care Professions

HSCI 3117	Principles of Biostatistics for Health Sciences
HSCI 4102	HumanPhysiology/ExtremeEnviro
HSCI 4105	Case Studies in Health Care

Transferring credits

Up to 60 credits of coursework may be transferable from coursework taken elsewhere provided it is:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a grade of C or better (C- grades do not transfer)

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN HEALTH INTERVENTION AND DISASTER RESPONSE

Offered in a distance learning format, the bachelor of science in health sciences (B.S.H.S.) in health intervention and disaster response is available to active-duty and veteran service members from the civil affairs medic community or related healthcare fields and to civilians in the health care fields with international experience and interest. All courses are offered online in a flexible, asynchronous format allowing students to pursue their degree, regardless of time zone, station, or overseas assignment.

Drawing heavily from both civilian and military challenges and successes experienced during natural as well as man-made disaster and crisis events, both domestically and internationally, the program allows civil affairs medics to build on their existing academic, military, and training experiences. Students are called upon to work individually as well as collaboratively in the development of broadened view of and holistic approach to delivery of aid and relief to the individuals, families, and communities affected by catastrophic events.

REQUIREMENTS

The bachelor of science in health sciences with a major in health intervention and disaster response (http://smhs.gwu.edu/crl/programs/hidr) is a distance learning degree completion program that requires successful completion of 120 credits, 60 of which must be completed at GW. Up to 60 credits of coursework may be transferred from coursework taken elsewhere.

The following requirements must be fulfilled:

Code	Title	Credits
60 credits of general education and advanced standing including:		
3 credits of English composition		
4 credits of natural or physical science with lab		
6 credits of social sciences		
3 credits of humanities		
44 credits of advanced standing*		
Required		
At least 60 credits of GW courses including		
CML 2143	Current Issues/Hlth Sci Mgt	
EHS 2211	Intro to Telemedicine	
EHS 4101	Humanitarian Relief Ops	
HSCI 2101	Psychosocial Aspects of Health and Illness	
HSCI 2102	Pathophysiology	
HSCI 2104	Management of Health Science Services	
HSCI 2105	Current Issus in Bioethics	
HSCI 2110	Disease Prev/Health Promotion	
HSCI 2112W	Writing in the Health Sciences	
HSCI 2113	Informatics in the HSci	
HSCI 2114	Healthcare/Developing Nations	
HSCI 2117	Introduction to Statistics for Health Sciences	
HSCI 4102	HumanPhysiology/ExtremeEnviro	
HSCI 4106	Intro to Epidemiology for HS	
HSCI 4112W	Rsrch/Wrtng in Health Sciences	
MLS 4114	Clinical Microbiology	
MLS 4115	Parasitology and Mycology	
MLS 4141	Immunology and Serology	
Elective		
Three of the following with advisor approval:		
CML 2142	Financial Mgt/Health Sciences	

EHS 2175	Community Risk Management and Safety in EHS
EHS 4112	Special Ops and Disaster Mgt
HSCI 2103	Health Policy and the Health Care System
HSCI 2111	Dev/Health Care Professions
HSCI 3117	Principles of Biostatistics for Health Sciences
HSCI 4105	Case Studies in Health Care

*Additional academic coursework. Non-traditional credit sources may be considered on a case-by-case basis (i.e., military coursework, credit-by-exam, and non-college based health programs).

Transferring credits

Up to 60 credits of coursework may be transferable from coursework taken elsewhere. For an assessment on the transferability of your previous coursework, please contact the program office. Coursework will be evaluated for transfer using the following criteria:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a grade of C or better (C- grades do not transfer)

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN MEDICAL INFORMATICS

The bachelor of science in health sciences (B.S.H.S.) in the field of medical Informatics helps prepare students for rewarding careers such as health data analysts, system evaluators, and annotators. The emerging field of medical informatics serves as the bridge between human–computer interactions in the health care space and focuses on how data collected in these settings can be leveraged to improve patient safety, outcomes, and quality. Full- and part-time programs of study are available.

REQUIREMENTS

The bachelor of health sciences (B.S.H.S.) with a major in the field of medical informatics (https://smhs.gwu.edu/medical-informatics) is a degree completion program that requires successful completion of 120 credits, 60 of which must be completed at GW. Up to 60 credits of course work may be transferable from course work taken elsewhere.

The following requirements must be fulfilled:

General education and advanced standing (60 credits)

- 3 credits English composition
- 3 credits humanities
- 6 credits social science (psychology recommended)
- 4 credits biology with lab (anatomy and physiology with lab also acceptable)
- 3 credits in statistics
- 41 credits of electives (experience/coursework in programming languages is highly recommended. Additional biology, computer science, math, and cognitive science courses also recommended.)

Code	Title	Credits
Required GW courses		
HSCI 2105	Current Issus in Bioethics	
HSCI 2108	Quality Improvement in Health Care	
HSCI 2112W	Writing in the Health Sciences	
HSCI 3117	Principles of Biostatistics for Health Sciences	
HSCI 4106	Intro to Epidemiology for HS	
HSCI 4112W	Rsrch/Wrtng in Health Sciences	
INFR 4101	Introduction to Medical Informatics	
INFR 4102	Survey of Medicine for Informaticians	
INFR 4103	Programming for Informaticians	
INFR 4104	Medical Informatics Terminology & Standards	
INFR 4105	Consumer Health Informatics	
INFR 4106	Population Health for Medical Informatics	
INFR 4107	Clinical Decision Support	
INFR 4108	Information Extraction for Medical Informatics	
INFR 4109	Evaluation Methods in Medical Informatics	
INFR 4110	Biomedical Data Science	
INFR 4197	Medical Informatics Internship	
or INFR 4198	Medical Informatics Research Project	
Electives		

9 credits from the following:	
INFR 4197	Medical Informatics Internship
INFR 4198	Medical Informatics Research Project
HSCI 2101	Psychosocial Aspects of Health and Illness
HSCI 2102	Pathophysiology
HSCI 2103	Health Policy and the Health Care System
HSCI 4103	Health Care Law/Regulation

Transferable Coursework (60 credit maximum)

For an assessment on the transferability of your previous coursework, please contact the program office. Coursework will be evaluated for transfer using the following criteria:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a C or better (C- grades do not transfer)

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN MEDICAL LABORATORY SCIENCE

Medical laboratory sciences combines medicine, basic sciences, and clinical sciences. Professionals in the field investigate and determine the causes of disease, using the latest biomedical instruments and molecular techniques to perform both routine and complex testing. The bachelor of science in health sciences (B.S.H.S.) with a major in medical laboratory science (MLS) is a degree completion program that is offered in two formats: distance learning or a hybrid of distance learning and on-campus study:

- B.S.H.S. in Medical Laboratory Science—Fully Online: (http://smhs.gwu.edu/medical-laboratory-sciences/programs/bshs/fully-online-mlt/mlt-mls-bshs-medical-laboratory-science-fully-online) Offered entirely via distance learning, the B.S.H.S. in MLS is for students who have successfully completed a medical laboratory technician (MLS) program and are currently certified MLTs.
- B.S.H.S. in Medical Laboratory Science—Blended: (http://smhs.gwu.edu/medical-laboratory-sciences/programs/bshs/curriculum)The blended B.S.H.S. in MLS is for students who have completed 60 credits towards an associate's degree or who have earned an associate's degree along with the required prerequisite science and general education courses.

This program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS) (http://bulletin.gwu.edu/medicine-health-sciences/undergraduate-programs/bshs-medical-laboratory-science/%20http://www.naacls.org).

Visit the program website (http://smhs.gwu.edu/medical-laboratory-sciences/programs/bshs) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 120 credits, including a minimum of 60 credits in required courses completed at GW and up to 60 transfer credits in courses taken elsewhere. Eligible students admitted through approved SMHS Guaranteed Admission Agreements (http://smhs.gwu.edu/academics/health-sciences-programs/guaranteed-admission-agreements) partnerships must complete a minimum of 52 required credits at GW; eligibility is reviewed on a case-by-case basis.

Code	Title	Credits
60 credits of general education and advanced standing, including:		
3 credits in English composition		
8 credits in biology with lab*		
8 credits general or inorganic chemistry with lab*		
4 credits in microbiology with lab*		
3 credits in organic chemistry or biochemistry*		
3 credits in college mathematics (college algebra, statistics or higher)		
3 credits in humanities		
6 credits in social sciences		
22 credits of advanced standing**		
Requirements for the major		
HSCI 2112W	Writing in the Health Sciences	
HSCI 4112W	Rsrch/Wrtng in Health Sciences	
MLS 4115	Parasitology and Mycology	
MLS 4123	Clinical Microbiology I	
MLS 4124	Clinical Microbiology II	
MLS 4128	Hematology I	
MLS 4129	Hematology II	
MLS 4141	Immunology and Serology	

MLS 4145	Clinical Biochemistry I
MLS 4146	Clinical Biochemistry II
MLS 4158	Laboratory Management and Operations
MLS 4150	Immunohematology
MLS 4151	Molecular Diagnostics
MLS 4159	Capstone Seminar
Additional requirements for students in the fully online B.S.H.S. program	
HSCI 2102	Pathophysiology
HSCI 2105	Current Issus in Bioethics
MLS 4136	Clinical Experience I
MLS 4137	Clinical Experience II
MLS 4138	Clinical Experience III
MLS 4139	Clinical Experience IV
One of the following:	
HSCI 2101	Psychosocial Aspects of Health and Illness
HSCI 2107	Health Care in Literature
HSCI 4106	Intro to Epidemiology for HS
Additional requirements for students in the hybrid B.S.H.S. program	
MLS 4160	Blood Bank Practicum
MLS 4161	Clinical Biochemistry Practicum
MLS 4162	Hematology Practicum
MLS 4164	ClinicalMicrobiology Practicum
MLS 4165	Urinalysis Practicum
MLS 4166	Coagulation Practicum
9 credits from the following:	
MLS 4214	Clinical Microbiology I Laboratory
MLS 4215	Clinical Parasitology and Mycology Laboratory
MLS 4224	Clinical Microbiology II Laboratory
MLS 4228	Hematology I Laboratory
MLS 4229	Hematology II Laboratory
MLS 4250	Immunohematology Laboratory
MLS 4251	Molecular Diagnostics Laboratory
MLS 4245	Clinical Biochemistry I Laboratory
MLS 4255	Clinical Biochemistry II Laboratory

*Medical laboratory technicians (MLTs) may receive transfer credit for biological sciences, general microbiology, general chemistry, and organic chemistry/biochemistry courses.
**Additional academic coursework. Non-traditional credit sources may be considered on a case-by-case basis (i.e. military coursework, credit-by-exam, and non-college based health programs). Students should have previous coursework in ethics and cultural or global perspectives.

DUAL BACHELOR OF SCIENCE IN HEALTH SCIENCES AND MASTER OF SCIENCE IN HEALTH SCIENCES IN CLINICAL RESEARCH ADMINISTRATION

Clinical Research Administration continues to evolve into a more global and complex set of integrated research and business processes. The online dual degree programs provide students with the knowledge, abilities, and vision to move health sciences organizations effectively into the future. For professionals who need to complete a bachelor's program but are also thinking about graduate study, the online dual degree program is a perfect fit! This multi-level dual degree program offers academically qualified individuals a seamless and accelerated pathway for completing both the online bachelor of science in health sciences and the online master of science in health sciences programs.

REQUIREMENTS

This multi-level online dual degree program offers academically qualified individuals a seamless and accelerated pathway for completing both the Bachelor of Science in Health Sciences (BSHS) in Clinical Research Administration and the Master of Science in Health Sciences (MSHS) in Clinical Research Administration (CRA) (http://smhs.gwu.edu/crl/programs/cra). Undergraduate and graduate degrees will be conferred sequentially, with the BSHS awarded upon completion of 120 credits (nine of which are taken for graduate credit). The MSHS is awarded following completion of an additional 27 credits of graduate course work.

BSHS in Clinical Research Administration

The BSHS with a major in Clinical Research Administration is a degree completion program that requires successful completion of 120 credits, divided into three degree

components, 60 credits of which must be completed at GW. Up to 60 credits of course work may be transferable from course work taken elsewhere.

Code	Title	Credits
The following requirements must be fulfilled:		
60 credits of general education and advanced standing including:		
3 credits of English composition		
4 credits of natural or physical science with lab		
6 credits of social science		
3 credits of humanities		
44 credits of advanced standing*		
*Additional academic coursework. Non-traditional credit sources may be considered on a case-by-case basis (i.e. military coursework, credit-by-exam, and non-college based health programs).		

Code	Title	Credits
Requirements for the major:		
At least 60 credits of GW coursework including:		
Health sciences distance education courses		
CRA 2101	Basics of Clinical Research	
CRA 2102	Processes of Clinical Research	
CRA 2103	Good Clinical Practices	
CRA 2104	Business of Clinical Research	
CRA 2105	Topics in Clinical Research	
CRA 2107	Intro Monitoring Clin. Trials	
HSCI 2102	Pathophysiology	
HSCI 2103	Health Policy and the Health Care System	
HSCI 2105	Current Issus in Bioethics	
HSCI 2107	Health Care in Literature	
HSCI 2112W	Writing in the Health Sciences	
HSCI 2113	Informatics in the HSci	
HSCI 3117	Principles of Biostatistics for Health Sciences

Elective course (one from the following)		
CRA 6208	International Clinical Rsrch	
CRA 6209	Monitoring Clinical Research (Strategic leadership courses)	

Credit for HSCI 6223, HSCI 6240, and CRA 6201 is applied to both the BSHS and MSHS degrees.

Transferring credits

Up to 60 credits of coursework may be transferable from coursework taken elsewhere. For an assessment on the transferability of your previous coursework, please contact the

program office. Coursework will be evaluated for transfer using the following criteria:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a grade of C or better (C- grades do not transfer)

DUAL BACHELOR OF SCIENCE IN HEALTH SCIENCES IN CLINICAL MANAGEMENT AND LEADERSHIP AND MASTER OF SCIENCE IN HEALTH SCIENCES IN HEALTH CARE QUALITY

This multi-level dual degree program offers academically qualified individuals a seamless and accelerated pathway for completing both the bachelor of science in health sciences (B.S.H.S.) in clinical management and leadership and the master of science in health sciences (M.S.H.S.) in health care quality. Undergraduate and graduate degrees are conferred sequentially, with the B.S.H.S. awarded upon completion of 120 credits (9 of which are taken for graduate credit). The M.S.H.S. is awarded following completion of an additional 27 credits of graduate coursework.

REQUIREMENTS

This multi-level dual degree program (http://smhs.gwu.edu/crl/programs/cml/curriculum/cml-hcq-dual-degree) offers academically qualified individuals a seamless and accelerated pathway for completing both the Bachelor of Science in Health Sciences (BSHS) in Clinical Management and Leadership (http://smhs.gwu.edu/crl/programs/cml) and the Master of Science in Health Sciences (MSHS) in Health Care Quality (http://smhs.gwu.edu/crl/programs/health-care-quality). Undergraduate and graduate degrees will be conferred sequentially, with the BSHS awarded upon completion of 120 credits (nine of which are taken for graduate credit). The MSHS is awarded following completion of an additional 27 credits of graduate coursework.

BSHS in Clinical Management & Leadership

The BSHS with a major in Clinical Management and Leadership is a degree completion program that requires successful completion of **120 credit hours**, divided into three degree components, 60 credits of which must be completed at GW. Up to 60 credits of coursework may be transferable from coursework taken elsewhere.

Code	Title	Credits

- Earned with a grade of C or better (C- grades do not transfer)

DUAL BACHELOR OF SCIENCE IN HEALTH SCIENCES IN CLINICAL RESEARCH ADMINISTRATION AND MASTER OF SCIENCE IN HEALTH SCIENCES IN REGULATORY AFFAIRS

Offered in a distance learning format, the dual bachelor of science in health sciences in clinical research administration and master of science in health sciences in regulatory affairs degree programs provides students with the knowledge, abilities, and vision to move health sciences organizations effectively into the future.

REQUIREMENTS

This multi-level online dual degree program offers academically qualified individuals a seamless and accelerated pathway for completing both the Bachelor of Science in Health Sciences (B.S.H.S.) in Clinical Research Administration (C.R.A.) (http://smhs.gwu.edu/crl/programs/cra) and the Master of Science in Health Sciences (M.S.H.S.) in Regulatory Affairs (R.A.F.F.) (http://smhs.gwu.edu/crl/programs/regulatory-affairs/curriculum). Undergraduate and graduate degrees are conferred sequentially, with the B.S.H.S. awarded upon completion of 120 credits (9 of which are taken for graduate credit). The MSHS is awarded following completion of an additional 27 credits of graduate coursework.

B.S.H.S. in Clinical Research Administration

The B.S.H.S. with a major in clinical research administration is a degree completion program that requires successful completion of 120 credits, divided into three degree components, 60 credits of which must be completed at GW. Up to 60 credits of coursework earned elsewhere may be transferable.

Code	Title	Credits
The following requirements must be fulfilled:		
60 credits of general education and advanced standing including:		
3 credits in English composition		
4 credits in natural or physical science with laboratory experience		
6 credits in the social sciences		
3 credits in the humanities		

44 credits of advanced standing*

* Additional academic coursework. Non-traditional credit sources may be considered on a case-by-case basis (i.e. military coursework, credit by examanination, and non-college based health programs).

Code	Title	Credits
Requirements for the major:		
At least 60 credits of GW coursework including:		
Health sciences distance education courses		
CRA 2101	Basics of Clinical Research	
CRA 2102	Processes of Clinical Research	
CRA 2103	Good Clinical Practices	
CRA 2104	Business of Clinical Research	
CRA 2105	Topics in Clinical Research	
CRA 2107	Intro Monitoring Clin. Trials	
HSCI 2102	Pathophysiology	
HSCI 2103	Health Policy and the Health Care System	
HSCI 2105	Current Issus in Bioethics	
HSCI 2107	Health Care in Literature	
HSCI 2112W	Writing in the Health Sciences	
HSCI 2113	Informatics in the HSci	
HSCI 3117	Principles of Biostatistics for Health Sciences	
HSCI 4103	Health Care Law/Regulation	
HSCI 4105	Case Studies in Health Care	
HSCI 4106	Intro to Epidemiology for HS	
HSCI 4112W	Rsrch/Wrtng in Health Sciences	
Graduate strategic leadership courses		
HSCI 6223	Topics -Health Care Leadership (*)	
HSCI 6240	Issues & Trends in Health Syst (*)	
Regulatory affairs field		
RAFF 6201	Introduction to Global Regulatory Affairs (*)	

M.S.H.S. in Regulatory Affairs

The M.S.H.S. in regulatory affairs requires successful completion of an additional 27 credits of graduate coursework, including 6 credits in research.

Code	Title	Credits
Research core		
HSCI 6263	Biostatistics Transl Research	
HSCI 6264	Epidemiology Translational Res	
Professional core		
HSCI 6223	Topics -Health Care Leadership (*)	
HSCI 6240	Issues & Trends in Health Syst (*)	
HSCI 6241	The Health Care Enterprise	
Regulatory affairs field		
RAFF 6201	Introduction to Global Regulatory Affairs (*)	
RAFF 6202	Regulatory Drug Biologics	
RAFF 6203	Regulatory Device Diagnostics	
RAFF 6204	Clinical Research for Regulatory Affairs	
RAFF 6205	Regulatory Affairs Compliance	
RAFF 6275	Leadership inRegulatoryAffairs	
Elective courses in clinical management and leadership		
one from the following		
CML 6274	Health Economics and Finance	
CRA 6203	Partnerships with Human Subjects	
CRA 6208	International Clinical Rsrch	
CRA 6209	Quality and Risk Management	
CRA 6210	MedicalWriting/ClinicalResrch	
HCQ 6201	Building a Quality Culture	

*Course taken as an undergraduate and applied to both the B.S.H.S. and M.S.H.S. curriculum.

Transferring credits: Up to 60 credits of coursework taken elsewhere may be transferable. For an assessment on the transferability of previous coursework, contact the program office. Coursework is evaluated for transfer using the following criteria:

- College-level

- Academic in nature
- Completed at a regionally accredited institution
- Earned with a minimum grade of *C* (credits earned with a grade of *C-* do not transfer)

DUAL BACHELOR OF SCIENCE IN HEALTH SCIENCES IN EMERGENCY HEALTH SERVICES MANAGEMENT AND MASTER OF SCIENCE IN HEALTH SCIENCES IN CLINICAL MANAGEMENT AND LEADERSHIP

The dual bachelor of science in health sciences in emergency health services management (p. 776) and master of science in health sciences in clinical management and leadership (http://bulletin.gwu.edu/medicine-health-sciences/graduate-programs/ms-clinical-management-leadership) is a combined degree program that allows students to count a specified number of credits toward both programs. The dual degrees are typically granted in a shorter period of time and at lower cost than if both programs were pursued separately. Visit the program website (http://smhs.gwu.edu/crl/programs/ems) for additional information.

MINOR IN ANATOMY

The Department of Anatomy and Regenerative Biology (http://smhs.gwu.edu/anatomy) in the School of Medicine and Health Sciences (http://smhs.gwu.edu) offers courses required for the 12-credit minor in human anatomy.

Code	Title	Credits
ANAT 2130	Human Embryology	
ANAT 2150	Human Microscopic Anatomy	
ANAT 2160	Human Functional Neuroanatomy	
ANAT 2181	Human Gross Anatomy	

MINOR IN BLOOD BANKING FOR MEDICAL LABORATORY SCIENCE

REQUIREMENTS

Requirements for blood banking in the medical laboratory science minor consists of 16 credits, including a 4-credit practicum course.

Code	Title	Credits
Required		
MLS 4141	Immunology and Serology	
MLS 4150	Immunohematology	
MLS 4151	Molecular Diagnostics	
MLS 4158	Laboratory Management and Operations	
MLS 4160	Blood Bank Practicum	

MINOR IN CLINICAL RESEARCH ADMINISTRATION

REQUIREMENTS

Students must complete the required coursework with a 2.5 GPA or better. The minor requires successful completion of 15 credits.

Required	
CRA 2101	Basics of Clinical Research
CRA 2102	Processes of Clinical Research
CRA 2103	Good Clinical Practices
HSCI 2105	Current Issus in Bioethics
Elective (choose one with advisor approval)	
CRA 2104	Business of Clinical Research
HSCI 2103	Health Policy and the Health Care System

MINOR IN CHEMISTRY FOR MEDICAL LABORATORY SCIENCE

REQUIREMENTS

The minor in chemistry for medical laboratory science consists of 19 credits, including a 4 credit practicum course.

Code	Title	Credits
Required		
MLS 4141	Immunology and Serology	
MLS 4151	Molecular Diagnostics	
MLS 4145	Clinical Biochemistry I	
MLS 4146	Clinical Biochemistry II	
MLS 4158	Laboratory Management and Operations	

MLS 4161	Clinical Biochemistry Practicum

MINOR IN EMERGENCY HEALTH SERVICES

REQUIREMENTS

The minor in emergency health services requires successful completion of at least 15 credits. Students must complete the required course work with a 2.5 GPA or better.

Code	Title	Credits
Required		
EHS 1040	Emergncy Medical Tech-Basic *	
EHS 1041	EMT - Basic Lab *	
EHS 2174	Foundations of Emergency Health Services Systems	
EHS 2175	Community Risk Management and Safety in EHS	
Electives		
At least five credits from the following:		
EHS 1002	CPR & First Aid	
EHS 2107	Theory&Prac ofRsch/ClinclSetng	
EHS 2108	Emergncy Med Clinical Scribe	
EHS 2110	EmergDeptCritCareAsses&Proced.	
EHS 2162	Intro Princpls/Tactical Med	
EHS 2211	Intro to Telemedicine	
EHS 4110	Operations Mgt in EHS Systems	
EHS 4112	Special Ops and Disaster Mgt	

*For students who have EMT-Basic Certification, a minimum of 4 credits in elective courses may be substituted for EHS 1040 and EHS 1041 with the approval of the program.

MINOR IN HEALTH SCIENCES

REQUIREMENTS

The minor in health sciences consists of 15 credits of approved health sciences courses. A minimum GPA of 2.5 in the required course work is required.

Required		
HSCI 2101	Psychosocial Aspects of Health and Illness	
HSCI 2102	Pathophysiology	
HSCI 2103	Health Policy and the Health Care System	
HSCI 2105	Current Issus in Bioethics	
Elective		
Selected in consultation with academic advisor		
HSCI 4103	Health Care Law/Regulation	
or HSCI 4105	Case Studies in Health Care	

MINOR IN HEMATOLOGY FOR MEDICAL LABORATORY SCIENCE

REQUIREMENTS

The following requirements must be fulfilled: 16 credits in required courses, including practica.

Code	Title	Credits
Required		
MLS 4128	Hematology I	
MLS 4129	Hematology II	
MLS 4141	Immunology and Serology	
MLS 4151	Molecular Diagnostics	
MLS 4158	Laboratory Management and Operations	
MLS 4162	Hematology Practicum	
MLS 4166	Coagulation Practicum	

MINOR IN MICROBIOLOGY FOR MEDICAL LABORATORY SCIENCE

REQUIREMENTS

The minor in microbiology for medical laboratory sciences minor consists of 19 credits, including a 4 credit practicum course.

Code	Title	Credits
Required		
MLS 4115	Parasitology and Mycology	

MLS 4123	Clinical Microbiology I
MLS 4124	Clinical Microbiology II
MLS 4141	Immunology and Serology
MLS 4151	Molecular Diagnostics
MLS 4158	Laboratory Management and Operations
MLS 4164	ClinicalMicrobiology Practicum

GRADUATE PROGRAMS

Master's programs

- Master of Science in Health Sciences in the field of clinical management and leadership (p. 787)
- Master of Science in Health Sciences in the field of clinical microbiology (p. 788)
- Master of Science in Health Sciences in the field of clinical research administration
- Master of Science in Health Sciences in the field of clinical and translational research
- Master of Science in Health Sciences in the field of emergency medical services leadership
- Master of Science in Health Sciences in the field of health care quality (p. 790)
- Master of Science in Health Sciences in the field of immunohematology and biotechnology (p. 792)
- Master of Science in Health Sciences in the field of integrative medicine (p. 792)
- Master of Science in Health Sciences in the field of medical laboratory science (p. 793)
- Master of Science in Health Sciences in the field of molecular diagnostic science (p. 793)
- Master of Science in Health Sciences in the field of regulatory affairs (p. 795)
- Master of Science in Health Sciences in the field of physician assistant (p. 794)
- Master of Science in Health Sciences in the field of translational microbiology (p. 795)

Dual degree program

- Master of Science in Health Sciences in the field of physician assistant and Master of Public Health (Milken Institute School of Public Health) (p. 796)

Military contract programs

- Master of Science in Health Sciences in the field of immunohematology (p. 791)

Doctoral programs

- Doctor of Philosophy in the field of translational health sciences (p. 799)
- Doctor of Physical Therapy (p. 800)
- Advanced Practice Clinical Doctorate in Occupational Therapy (p. 801)

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF CLINICAL MANAGEMENT AND LEADERSHIP

The master of science in health sciences in the field of clinical management and leadership program prepares clinicians for leadership positions in all sectors of the health care delivery system. The program was developed to enhance the depth of knowledge in management and leadership skills of professionals from various clinical disciplines.

The distance learning format provides a convenient option for self-disciplined and self-directed students to pursue a degree and prepare for professional advancement while continuing with their work and other commitments. All courses are offered in a flexible, asynchronous format to meet the needs of busy professionals.

Students take courses focused on leadership and change, human resource development, financial management, and marketing of clinical services. Graduates of the program will have the capacity and competence to be successful in mid- and upper-level management positions.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 6 credits in graduate research courses, 9 credits in strategic leadership courses, 18 credits in clinical management and leadership courses, and a 3-credit elective course.

Code	Title	Credits
Required:		
Graduate research		
HSCI 6270	Resear Meth Hlth Prof I	
HSCI 6271	Rsch Meth Hlth Prof II	
Strategic leadership		
HSCI 6223	Topics -Health Care Leadership	
HSCI 6240	Issues & Trends in Health Syst	
HSCI 6241	The Health Care Enterprise	
Clinical management and leadership		
CML 6202	Human Resource Development	
CML 6203	Health Info Quality & Outcomes	

CML 6204	Marketing Clinical Services
CML 6205	CaseStudies/ClinicIMgt&Ldrshp
CML 6274	Health Economics and Finance
CML 6275	Ldrshp&Change in Clinical Mgt
Elective:	
One of the following:	
HSCI 6263	Biostatistics Transl Research
HSCI 6264	Epidemiology Translational Res

Transfer credits

Up to six credits of previously earned graduate-level coursework may be accepted as transfer credit. Contact the program office for the full policy and guidelines. Official transfer credit evaluations are conducted for admitted students only.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF CLINICAL MICROBIOLOGY

The master of science in health sciences in the field of clinical microbiology degree program, which is offered in a distance learning format, provides students with clinical microbiology and laboratory science course work, a hands-on microbiology practicum that will prepare students for a diagnostic microbiology laboratory position, and eligibility for national certification examinations in clinical microbiology. The program includes additional graduate course work to prepare students for careers in research institutions, public health laboratories, biotechnology firms, pharmaceutical companies, or governmental agencies.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits in required courses.

Code	Title	Credits
Required		
HSCI 6263	Biostatistics Transl Research	
HSCI 6264	Epidemiology Translational Res	
MLS 4164	ClinicalMicrobiology Practicum	
MLS 6115	Advanced Clinical Parasitology and Mycology	
MLS 6123	Advanced Clinical Microbiology I	
MLS 6124	Advanced Clinical Microbiology II	
MLS 6141	Advanced Immunology and Serology	
MLS 6151	Advanced Molecular Diagnostics	
MLS 6158	Advanced Laboratory Management and Operations	
MLS 6216	Microbial Pathogenesis	
MLS 6217	Medical Biotechnology	
MLS 6244	Research Ethics & Integrity	
HSCI or MLS elective selected in consultation with the advisor.		

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF CLINICAL RESEARCH ADMINISTRATION

The master of science in health sciences in the field of clinical research administration is designed to prepare health sciences professionals to participate in the science and business of the development process. Our rigorous curriculum focuses on regulatory requirements, ethical issues, processes for product development, the business of clinical research and scientific method processes. The distance education format, offered online, provides a convenient option for self-disciplined and self-directed students to pursue the program and prepare for professional advancement while maintaining their work and other commitments.

Upon completion of the graduate CRA program, the Program Student Learning Outcomes are:

- Apply effective leadership and management practices to effectively lead and/or manage inter-disciplinary teams/projects by applying critical thinking and problem solving skill sets
- Demonstrate a solid grasp of the clinical, regulatory and business requirements in the planning and conduct of a clinical trial.
- Demonstrate research design principles through integrating scientific, medical, regulatory and commercial requirements and creating clinical development plan sections that provide for benefit to risk assessments in the development of a new investigational product.
- Discuss the importance of assuring data integrity in a clinical trial and in the preparation of various clinical/regulatory documents.
- Formulate strategies to address ethical and cultural considerations for effective and compliant domestic or international clinical trial conduct, in relation to key areas

such as human subjects' protection, subject recruitment/retention, data integrity and risk assessment.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

REQUIREMENTS

The MSHS in the field of clinical research administration (CRA (http://smhs.gwu.edu/crl/programs/cra)) requires successful completion of 36 credits, including: 18 credits in clinical research administsration, 9 credits of strategic leadership courses, 6 credits of graduate research coursework, and a 3-credit elective course.

Required	
Clinical research administration courses	
CRA 6201	Critical Analysis Clin Rsch
CRA 6202	Medicines Development
CRA 6203	Partnerships w/Human Subjects
CRA 6204	The Clinical Research Industry
CRA 6210	MedicalWriting/ClinicalResrch
CRA 6275	Ldrshp&Change in ClinRschAdmin

HSCI 6264	Epidemiology Translational Res
Elective	
One of the following	
CRA 6208	International Clinical Rsrch
CRA 6209	Monitoring Clinical Research

Transfer credits

Up to six credits of previously earned graduate-level coursework may be accepted as transfer credit. Please contact the program office for the full policy and guidelines.

Official transfer credit evaluations are conducted only for admitted students.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF CLINICAL AND TRANSLATIONAL RESEARCH

The master of science in health sciences in the field of clinical and translational research program provides graduates with the knowledge to lead broad interdisciplinary research initiatives. Students develop an effective approach to research that integrates basic, biomedical, clinical, community health services, and health policy research.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://smhs.gwu.edu/clinical-translational-research/programs) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits in required courses, including 27 credits in required courses and 9 credits in elective courses.

Up to 6 credits of previously earned graduate-level coursework may be accepted as transfer credit. Official transfer credit evaluations are conducted only for admitted students.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF EMERGENCY MEDICAL SERVICES LEADERSHIP

The master of science in health sciences in the field of emergency medical services leadership program is intended to develop leadership competencies necessary for a successful career in emergency medical services (EMS). The combination of courses is designed to build expertise in leadership, creative problem-solving, team-building, clinical decision-making, and management. Through the EMS programs at GW, students:

- Develop interdisciplinary management and leadership skills necessary to manage administrative-level responsibilities within a local, regional, state, or federal EMS agency;
- Acquire the necessary tools and skills to assume the roles and responsibilities within a multidisciplinary team;
- Leverage regulatory guidelines, organizational strategies, and resources when providing emergency medical services within a community or special population;
- Analyze processes and evaluation practices to support an EMS culture of safety;
- Build a broad foundation from which to assess and respond to trends in emergency medical services and health sciences;
- Demonstrate proficiency in written communication skills necessary to perform as a professional within the field of emergency medical services and to progress to graduate-level work.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 6 credits in research coursework, 9 credits in strategic leadership courses, and 21 credits in the field of emergency medical services.

Up to 6 credits of previously earned graduate-level course work may be accepted as transfer credit. Official transfer credit evaluations are conducted for admitted students only.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF HEALTH CARE QUALITY

The master of science in health sciences in the field of health care quality program is designed to meet an emerging demand for quality and patient safety specialists who have the capacity and competence to grow and sustain a culture of continuous improvement at all levels and within every sector of the health care delivery system. The program helps prepare graduates for quality and patient safety leadership, management, and research positions within health care organizations or policy agencies. Upon completion of this program, students will be able to:

- Develop, implement, and evaluate quality and patient safety improvement initiatives;
- Cultivate strategies to lead organizational change toward a quality-focused culture;
- Translate national quality expectations into daily operations;
- Apply processes and tools to measure, analyze, and interpret quality improvement data;
- Design and implement information technology systems to support quality assurance;
- Conduct research to drive clinical and operational decision-making.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

REQUIREMENTS

The following requirements must be fulfilled: 36 credits in required courses.

Up to 6 credits of previously earned graduate-level coursework may be accepted as transfer credit. Official transfer credit evaluations are conducted only for admitted students.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF IMMUNOHEMATOLOGY

The master of science (M.S.) in health sciences in the field of immunohematology (http://smhs.gwu.edu/crl/programs/military/immunohematology) degree program is a military contract program and open only to service members enrolled in the Military Specialist in Blood Banking Technology program at Walter Reed Army Medical Center, which is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP). The goal of the program is to prepare individuals to be competitive for careers in management, research and education in the area of immunohematology.

The M.S. program includes all aspects of blood transfusion medicine at the graduate level, including research methods, current topics in transfusion medicine, immunology, biochemistry, and genetics of all blood cell markers, as well as the indications, contraindications, and function of all blood components and therapeutic procedures. In addition to this didactic material, practical training in the areas of compatibility testing, donor collection, viral marker testing, component production and distribution, apheresis, education and research methods, histocompatibility testing, progenitor cell preservation, and quality assurance is also provided. Research in an area of immunohematology, culminating in a research project, is an integral part of the program.

REQUIREMENTS

The following requirements must be fulfilled: 55 credits in required courses.

Code	Title	Credits
Required:		
HSCI 6263	Biostatistics Transl Research	
HSCI 6297	Indpendnt Study/Health Profess (taken for 1 credit)	
MLS 6141	Advanced Immunology and Serology	
MLS 6151	Advanced Molecular Diagnostics	
MLS 6158	Advanced Laboratory Management and Operations	
MLS 6203	Clinical Immunohematology I	
MLS 6204	Clinical Immunohematology II	
MLS 6207	Clinicl Pract: Blood Banking I	
MLS 6208	Clinicl Pract: Blood BankingII	
MLS 6209	Clinicl Pract:Blood BankingIII	
MLS 6211	Hematopoiesis &Blood Pathophys	
MLS 6212	Organiz & Mgt of Blood Banks	
MLS 6213	Seminar in Immunohematology	
MLS 6214	Specialized Practicum	
MLS 6245	Current Topics in Medical Laboratory Science	
MLS 6246	Capstone Project	

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF IMMUNOHEMATOLOGY AND BIOTECHNOLOGY

The master of science in health sciences in the field of immunohematology and biotechnology degree program is designed to provide certified blood bankers with a strong foundation in Immunohematology as well as molecular biology and biotechnology. Students develop the theoretical knowledge and practical skills for transfusion medicine research positions within hospital labs or blood centers or to become supervisors or mangers in a blood banking laboratory.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://smhs.gwu.edu/medical-laboratory-sciences/programs/mshs/curriculum/immunohematology-biotechnology) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 35 credits, including 29 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Required		
HSCI 6263	Biostatistics Transl Research	
HSCI 6297	Indpendnt Study/Health Profess

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF INTEGRATIVE MEDICINE

The online master of science in health sciences (M.S.H.S.) in the field of integrative medicine (INTM) degree program provides a curriculum that represents the most progressive, scientifically rigorous, and forward thinking platform for medical wellness. Students develop a foundation and explore various intersections of INTM that contribute to patient wellness. Biostatistics and epidemiology courses provide an opportunity for students to collaborate with professionals from various disciplines, exploring philosophies and practices of translational research in human health. Through a series of practical application courses, students develop patient care plans, conduct case analyses, and evaluate practice standards to demonstrate competence of integrative medicine practice. Additional research course work provides graduates requisite skills needed to participate in evidence-based research of clinical practice and outcomes research as part of a larger INTM network.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits in required courses.

Code	Title	Credits
Required		
HSCI 6241	The Health Care Enterprise	
HSCI 6263	Biostatistics Transl Research	
HSCI 6264	Epidemiology Translational Res	
INTM 6201	Foundations in Integrative Medicine	
INTM 6202	Self Care Methods in Integrative Medicine	
INTM 6203	Nutritional Metabolism and Environmental Exposure	
INTM 6204	Metabolic Networks in Integrative Medicine	

INTM 6205	Clinical Genomics, Proteomics, & Metabolomics
INTM 6206	Legal and Medical Ethics in Integrative Medicine
INTM 6210	Practical Application of Integrative Medicine I
INTM 6211	Practical Application of Integrative Medicine II
INTM 6212	Clinical Research in Integrative Medicine

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF MEDICAL LABORATORY SCIENCE

The master of science in health sciences in the field of medical laboratory science (MLS) program, offered in a distance learning format, is a non-clinical program open only to students who are currently MLT or MLS/MT/CLS certified, specialist certified (e.g., SBB), or with subject technologist certification.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://smhs.gwu.edu/medical-laboratory-sciences/programs/mshs/curriculum/medical-laboratory-sciences) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 15 credits in courses in the field and a mentored research project, 6 credits in strategic leadership courses, 12 credits in graduate research courses, and one 3-credit elective course.

Up to 6 credits of previously earned graduate-level coursework may be accepted as transfer credit. Official transfer credit evaluations are conducted only for admitted students.

Code	Title	Credits
Required		
Medical laboratory science courses		
MLS 6242	Molecular Pathology	
MLS 6243	Education & Assessment in MLS	
MLS 6244	Research Ethics & Integrity	
MLS 6245	Current Topics in Medical Laboratory Science

Graduate research courses		
HSCI 6263	Biostatistics Transl Research	
HSCI 6264	Epidemiology Translational Res	
HSCI 6270	Resear Meth Hlth Prof I	
HSCI 6271	Rsch Meth Hlth Prof II	
Elective		

3 credits selected, in consultation with program advisor, from distance learning graduate courses in medical laboratory sciences, clinical management and leadership, health care quality, regulatory affairs and clinical research administration.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF MOLECULAR DIAGNOSTIC SCIENCE

The master of science in health sciences in the field of molecular diagnostic science program, offered in a distance learning format, prepares students with the theoretical knowledge and practical skills for positions in diagnostic clinical laboratories, public health laboratories, biotechnology companies, government agencies, law enforcement agencies, and research institutes. In addition, students who complete this program are eligible to take the Molecular Biology Board of Certification examination offered by the American Society for Clinical Pathology (ASCP).

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://smhs.gwu.edu/medical-laboratory-sciences/programs/mshs/curriculum/molecular-diagnostic-science) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 35 credits, including 32 credits in required courses and a 3-credit elective course.

Code	Title	Credits
Required		
HSCI 6263	Biostatistics Transl Research	

MLS 6216	Microbial Pathogenesis
MLS 6217	Medical Biotechnology
MLS 6218	Genetics
MLS 6219	Molecular Biology
MLS 6158	Advanced Laboratory Management and Operations
MLS 6166	Molecular Diagnostics Practicum *
MLS 6242	Molecular Pathology
MLS 6244	Research Ethics & Integrity
MLS 6245	Current Topics in Medical Laboratory Science
MLS 6246	Capstone Project
Elective	
One MLS or HSCI course selected in consultation with the academic advisor.	

* May be substituted with an elective course for students with current clinical molecular laboratory experience.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF PHYSICIAN ASSISTANT

The master of science in health sciences in the field of physician assistant program helps health professionals to extend and complement the capabilities of physicians in the delivery of health care. The program curriculum emphasizes a scholarly approach to medicine, development of organizational and critical-thinking skills, and evidence-based medicine.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

REQUIREMENTS

The following requirements must be fulfilled: 104 credits in required courses.

Code	Title	Credits
Required		
ANAT 6215	Anatomy for Health Sciences Students	
PA 6101	Clinical Assessment I	
PA 6102	Clinical Assessment II	
PA 6103	Clinical Assessment III	
PA 6104	Integration into Clinical Concepts I	
PA 6105	Integration into Clinical Concepts II	
PA 6106	Integration into Clinical Concepts III	
PA 6109	Foundations of Medicine	
PA 6110	Evidence Based Practice for PA Students	
or PA 6111	Evidence Based Practice for PA/MPH Students	
PA 6112	Clinical Medicine I	
PA 6113	Clinical Medicine II	
PA 6116	Clinical Skills I	
PA 6117	Clinical Skills II	
PA 6118	Health, Justice, and Society I	
PA 6119	Health, Justice, and Society II

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF REGULATORY AFFAIRS

The master of science in health sciences in the field of regulatory affairs degree program is designed to prepare graduates to facilitate and lead change and innovation in regulatory practice. Throughout the program, students will develop strategies for integrating business needs into regulatory strategic planning and will learn to evaluate the scientific and economic value of bringing new health care products to the global market.

The program helps prepare its graduates to:

- Lead and collaborate with all involved functions and stakeholders for effective development of medical products;
- Develop a broad understanding of the philosophies and roles of the domestic and international regulatory agencies that oversee drug, biologic, device and diagnostic development;
- Provide strategic direction, integrating business needs in matters of regulatory science and affairs.

REQUIREMENTS

The Master of Science in Health Sciences in the field of Regulatory Affairs (RAFF) requires successful completion of 36 credits, including: 9 credits of the research coursework, 6 credits of strategic leadership courses, 18 credits in the field of regulatory affairs, and a 3-credit elective course.

Required	
Regulatory affairs courses	
RAFF 6201	Introduction to Global Regulatory Affairs
RAFF 6202	Regulatory Drug Biologics
RAFF 6203	Regulatory Device Diagnostics
RAFF 6204	Clinical Research for Regulatory Affairs
RAFF 6205	Regulatory Affairs Compliance
RAFF 6275	Leadership inRegulatoryAffairs
Graduate research courses	
HSCI 6263	Biostatistics Transl Research
HSCI 6264	Epidemiology Translational Res
Strategic leadership courses	
HSCI 6223	Topics -Health Care Leadership
HSCI 6240	Issues & Trends in Health Syst
HSCI 6241	The Health Care Enterprise
Electives	
One of the following:	
CML 6274	Health Economics and Finance
CRA 6203	Partnerships w/Human Subjects
CRA 6208	International Clinical Rsrch
CRA 6209	Monitoring Clinical Research
CRA 6210	MedicalWriting/ClinicalResrch
HCQ 6201	Building a Quality Culture

Transfer credits

Up to six credits of previously earned graduate-level coursework may be accepted as transfer credit. Contact the program office for the full policy and guidelines.

Official transfer credit evaluations are conducted only for admitted students.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF TRANSLATIONAL MICROBIOLOGY

The master of science in health sciences in the field of translational microbiology program, offered in a distance learning format, prepares students with the theoretical knowledge and practical skills for research positions in public health microbiology laboratories, biotechnology companies, government agencies, and research institutes. This program is ideal for students who already have microbiology or MLS certification or for individuals who do not have an interest in becoming certified microbiologists.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 30 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Required		
HSCI 6263	Biostatistics Transl Research	

HSCI 6264	Epidemiology Translational Res
HSCI 6270	Resear Meth Hlth Prof I
HSCI 6271	Rsch Meth Hlth Prof II
MLS 6245	Current Topics in Medical Laboratory Science
MLS 6246	Capstone Project
MLS 6244	Research Ethics & Integrity
MLS 6216	Microbial Pathogenesis
MLS 6115	Advanced Clinical Parasitology and Mycology
MLS 6217	Medical Biotechnology
One of the following	
HSCI 6241	The Health Care Enterprise
HSCI 6223	Topics -Health Care Leadership
HSCI 6240	Issues & Trends in Health Syst
Electives	

6 elective credits in Medical Laboratory Science (MLS) courses selected with the approval of program director.

DUAL MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF PHYSICIAN ASSISTANT AND MASTER OF PUBLIC HEALTH

Applicants with a strong interest in public health may wish to consider the dual master of science in health sciences (M.S.H.S.) in the field of physician assistant and master of public health (M.P.H.) dual degree program. The three-year program provides both clinical and academic preparation for careers in medicine and public health. Students receive advanced training in the design of health studies, epidemiological methods, application of computers to public health, community medicine, and techniques of health promotion. Students also design a special research project in collaboration with faculty of the Milken Institute School of Public Health and local, national, or international public health organizations.

For the M.P.H. degree, students choose from among the fields of community-oriented primary care, health policy, and epidemiology.

Visit the master of science in health sciences in the field of physician assistant (http://smhs.gwu.edu/physician-assistant/pa-program) and the master of science in health sciences (http://publichealth.gwu.edu/academics/graduate/masters-programs/#joint) program websites for additional information.

COMMUNITY-ORIENTED PRIMARY CARE

The following requirements must be fulfilled: 137 credits, including 100 credits in physician assistant courses, 13 credits in MPH core, 10 credits in prevention and community health courses, and 14 credits in community oriented primary care track courses.

DOCTOR OF PHILOSOPHY IN THE FIELD OF TRANSLATIONAL HEALTH SCIENCES

The doctor of philosophy in the field of translational health sciences degree program helps prepare graduates to address complex healthcare challenges by conceptualizing health systems broadly in terms of transitions between basic scientific discovery, clinical insights, implications for practice, implications for population health, and improved global health.

The Ph.D. requires 54 credits beyond a master's degree, successful completion of two comprehensive examinations, a proposal defense, and a defended dissertation. The curriculum is blended, integrating didactic and facilitated learning activities from content. It is delivered via distance learning and on campus (two weekends per semester for a total of 32 hours per semester) at the Virginia Science and Technology (VSTC) campus in Ashburn, VA.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://smhs.gwu.edu/translational-health-sciences) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 54 credits, successful completion of two comprehensive examinations, a proposal defense, and a defended dissertation.

Elective	
3 credits of independent study	
HSCI 6297	Indpendnt Study/Health Profess

DOCTOR OF PHYSICAL THERAPY

The doctor of physical therapy program provides quality graduate education committed to developing generalist practitioners who are reflective practitioners, who think critically, and use best evidence to effectively solve problems; compassionate practitioners, who demonstrate excellence in communication and interpersonal skills,a respect for individual and cultural differences, and the core values of the profession; and dedicated practitioners who value the tenets of lifelong learning.

The curriculum consists of 109 credits of professional course work requiring thirty-three months of full-time study beginning in the fall semester. It combines content from the foundational sciences, behavioral sciences, clinical sciences, professional practice expectations, practice management expectations, and critical inquiry. Students develop the skills needed to examine, evaluate, diagnose, prognose, develop a plan of care, and implement and re-evaluate that plan of care for patients with dysfunction in the cardiopulmonary, musculoskeletal, neuromotor, and integumentary systems across the lifespan.

The curriculum is built on the overarching principles of integration and application. Information is integrated and applied through a series of integrative units using "standardized patients" and simulation experiences. Clinical experiences are introduced early in the curriculum in the second and fourth semesters. Three full-time clinical internships occur in semesters six, seven, and eight for a total of 34 weeks of full time clinical experience. Internships are located regionally, nationally, and internationally providing depth and breadth to each student's unique educational experience.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

REQUIREMENTS

The following requirements must be fulfilled: 109 credits to be taken in the following sequence:

DOCTORATE IN OCCUPATIONAL THERAPY

The School of Medicine and Health Sciences' (S.M.H.S.) advanced-practice doctoral degree program in occupational therapy (O.T.D.) is designed for registered occupational therapists who are seeking to advance their clinical reasoning and practice skills. The program enables graduates to transition from the level of generalist to that of a translational occupational therapy clinical scholar. After obtaining this degree, graduates will be able to develop, evaluate, and promote new occupational therapy approaches to assessment and treatment in post-acute and chronic care that are grounded in neuroscience and reflect a transdisciplinary perspective.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 30 credits in required courses and 6 credits in elective courses.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the Health Sciences program website (http://smhs.gwu.edu/academics/health-sciences) for additional information.

CERTIFICATE PROGRAMS

Post-baccalaureate certificates

- Post-baccalaureate certificate in medical laboratory science (p. 804)
- Post-baccalaureate certificate in blood banking for medical laboratory science (p. 802)
- Post-baccalaureate certificate in chemistry for medical laboratory science (p. 803)
- Post-baccalaureate certificate in hematology for medical laboratory science (p. 804)
- Post-baccalaureate certificate in microbiology for medical laboratory science (p. 805)
- Post-baccalaureate certificate in pre-medicine (p. 805)

Graduate certificates

- Graduate certificate in clinical research administration (p. 805)
- Graduate certificate in clinical and translational research (p. 806)
- Graduate certificate in clinical research practice (p. 806)
- Graduate certificate in health care quality (p. 806)
- Graduate certificate in integrative medicine (p. 807)
- Graduate certificate in regulatory affairs (p. 807)

Undergraduate certificate (military contract)

- Undergraduate certificate in the field of health sciences laboratory science (p. 803)

POST-BACCALAUREATE CERTIFICATE IN BLOOD BANKING FOR MEDICAL LABORATORY SCIENCE

REQUIREMENTS

Admitted students complete required courses either on a part-time or full-time basis. Courses in the major are designed to

broaden the student's foundation in the sciences in preparation for the clinical phase of the program. All courses are taught online, with the exception of the clinical practica.

The clinical practica are usually taken on a full-time basis upon completion of didactic course work. Students are typically in a clinical laboratory eight hours per day (daytime hours), five days per week. Admitted students must be able to fulfill the necessary time requirement for the practica.*

Completion of the certificate qualifies the graduate to take the Technologist in Blood Banking examination offered by national certifying agencies.

The following requirements must be fulfilled: 16 credits in required courses, including the clinical practica.

Code	Title	Credits
Required		
MLS 4118	Laboratory Operations	
MLS 4140	Clinical Laboratory Mgt	
MLS 4141	Immunology and Serology	
MLS 4150	Immunohematology	
MLS 4151	Molecular Diagnostics	
MLS 4160	Blood Bank Practicum	

*Clinical rotations, lasting between one to four weeks each, are completed at an approved clinical site. They may vary in length.

POST-BACCALAUREATE CERTIFICATE IN CHEMISTRY FOR MEDICAL LABORATORY SCIENCE

REQUIREMENTS

Admitted students complete required courses either on a part-time or full-time basis. Courses in the major are designed to broaden the student's foundation in the sciences in preparation for the clinical phase of the program. All courses are taught online, with the exception of the clinical practicum.

The clinical practicum is usually taken on a full-time basis upon completion of didactic course work. Students are typically in a clinical laboratory eight hours per day (daytime hours), five days per week. Admitted students must be able to fulfill the necessary time requirement for the practicum.*

The following requirements must be fulfilled: 19 credits in required courses, including the practicum.

Required	
MLS 4118	Laboratory Operations
MLS 4141	Immunology and Serology
MLS 4145	Clinical Biochemistry
MLS 4155	Clinical Biochemistry II
MLS 4151	Molecular Diagnostics
MLS 4161	Clinical Biochemistry Practicum
MLS 4140	Clinical Laboratory Mgt

Clinical rotations are completed at an approved clinical site and vary in length, lasting between 1 to 4 weeks each.

UNDERGRADUATE CERTIFICATE IN THE FIELD OF HEALTH SCIENCES LABORATORY TECHNOLOGY

The certificate in health science laboratory technology program is offered through an inter-service contract with the Medical Education and Training Campus (METC) at Ft. Sam Houston in San Antonio, Texas. This certificate is available exclusively to pre-approved service members in the medical laboratory technology program.

Upon successful completion of the program, students will be awarded a certificate of completion and will have earned 60 college-level credits at GW.

REQUIREMENTS

The following requirements must be fulfilled: 60 credits in required courses.

Students must maintain a minimum grade point-average of 2.0.

Required	
MLS 1070	Clinical Laboratory Rotation I
MLS 1071	Clinical Laboratory RotationII
MLS 1080	Intro to Laboratory Medicine
MLS 1081	Clinical Chemistry I
MLS 1082	Clinical Chemistry II
MLS 1083	Hematology I
MLS 1084	Hematology II
MLS 1085	Urinalysis and Body Fluids
MLS 1086	Clinical Immunology

MLS 1087	Blood Banking I
MLS 1088	Blood Banking II
MLS 1089	Clinical Microbiology I
MLS 1090	Clinical Microbiology II

For students with questions regarding courses taken prior to 2011, please contact the Program Director.

POST-BACCALAUREATE CERTIFICATE IN HEMATOLOGY FOR MEDICAL LABORATORY SCIENCE

REQUIREMENTS

Admitted students complete required courses either on a part-time or full-time basis. Courses in the major are designed to broaden the student's foundation in the sciences in preparation for the clinical phase of the program. All courses are taught online, with the exception of the clinical practicum.

The clinical practicum is usually taken on a full-time basis upon completion of didactic course work. Students are typically in a clinical laboratory eight (daytime) hours per day, five days per week. Admitted students must be able to fulfill the necessary time requirement for the practica.

The following requirements must be fulfilled: 16 credits in required courses, including the practica.*

Code	Title	Credits
Required		
MLS 4141	Immunology and Serology	
MLS 4128	Hematology I	
MLS 4129	Hematology II	
MLS 4151	Molecular Diagnostics	
MLS 4162	Hematology Practicum	
MLS 4166	Coagulation Practicum	
MLS 4158	Laboratory Management and Operations	

*Clinical rotations are completed at an approved clinical site and vary in length, lasting between 1 to 4 weeks each.

POST-BACCALAUREATE CERTIFICATE IN MEDICAL LABORATORY SCIENCE

REQUIREMENTS

Students complete required courses either on a full- or part-time basis. Courses in the major are designed to broaden the student's foundation in the sciences in preparation for the clinical phase of the program. All courses are taken through distance learning, with the exception of the four months of clinical practica.

The clinical practica are usually taken on a full-time basis upon completion of didactic course work. Students are typically in a clinical laboratory eight (daytime) hours per day, five days per week. Admitted students must be able to fulfill the necessary time requirement for the practica.

The following requirements must be fulfilled: 45 credits in required courses, including the practica.

Code	Title	Credits
Required		
MLS 4115	Parasitology and Mycology	
MLS 4123	Clinical Microbiology I	
MLS 4124	Clinical Microbiology II	
MLS 4128	Hematology I	
MLS 4129	Hematology II	
MLS 4141	Immunology and Serology	
MLS 4145	Clinical Biochemistry I	
MLS 4146	Clinical Biochemistry II	
MLS 4158	Laboratory Management and Operations	
MLS 4150	Immunohematology	
MLS 4151	Molecular Diagnostics	
MLS 4159	Capstone Seminar	
MLS 4160	Blood Bank Practicum	
MLS 4161	Clinical Biochemistry Practicum	
MLS 4162	Hematology Practicum	
MLS 4164	ClinicalMicrobiology Practicum	
MLS 4165	Urinalysis Practicum	

MLS 4166	Coagulation Practicum

POST-BACCALAUREATE CERTIFICATE IN MICROBIOLOGY FOR MEDICAL LABORATORY SCIENCE

REQUIREMENTS

Admitted students complete required courses either on a part-time or full-time basis. Courses in the major are designed to broaden the student's foundation in the sciences in preparation for the clinical phase of the program. All courses are taught online, with the exception of the clinical practicum.

The clinical practicum is usually taken on a full-time basis upon completion of didactic course work. Students are typically in a clinical laboratory eight hours per day (daytime hours), five days per week. Admitted students must be able to fulfill the necessary time requirement for the practicum.*

The following requirements must be fulfilled: 19 credits in required courses, including the practicum.

Code	Title	Credits
Required		
MLS 4115	Parasitology and Mycology	
MLS 4123	Clinical Microbiology I	
MLS 4124	Clinical Microbiology II	
MLS 4141	Immunology and Serology	
MLS 4158	Laboratory Management and Operations	
MLS 4151	Molecular Diagnostics	
MLS 4164	ClinicalMicrobiology Practicum	

*Clinical rotations are completed at an approved clinical site and vary in length, lasting between 1 to 4 weeks each.

POST-BACCALAUREATE CERTIFICATE IN PRE-MEDICINE

The post-baccalaureate certificate in pre-medicine (http://smhs.gwu.edu/programs/postbac-premed) is designed to provide students with the foundational course work, standardized test preparation, and access to real-world experience necessary for a successful medical school application. This full-time program is offered at GW's Virginia Science and Technology Campus. The program can be completed in 12 months.

The following requirements must be fulfilled: 35 credits in required courses.

Required	
HSCI 3101	General Chemistry I
HSCI 3102	General Chemistry II
HSCI 3103	Organic Chemistry I
HSCI 3104	Organic Chemistry II
HSCI 3105	Biochemistry
HSCI 3201	Biology I
HSCI 3202	Biology II
HSCI 3301	Physics I
HSCI 3302	Physics II

GRADUATE CERTIFICATE IN CLINICAL RESEARCH ADMINISTRATION

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 15 hours in required courses and one 3-credit elective course. Courses successfully completed in this program are transferable to the master of science in health sciences (M.S.H.S.) in clinical research administration degree program.

Code	Title	Credits
Required		
CRA 6201	Critical Analysis Clin Rsch	
CRA 6202	Medicines Development	
CRA 6203	Partnerships with Human Subjects	
CRA 6204	The Clinical Research Industry	
CRA 6210	MedicalWriting/ClinicalResrch	
Elective		
One of the following		
CRA 6208	International Clinical Rsrch	
CRA 6209	Quality and Risk Management	
HSCI 6263	Biostatistics Transl Research	

HSCI 6264	Epidemiology Translational Res

GRADUATE CERTIFICATE IN CLINICAL RESEARCH PRACTICE

The graduate certificate in clinical research practice capitalizes on the foundational courses of clinical research, health informatics, epidemiology, and biostatistics to prepare the graduate with the requisite knowledge and skills to conduct clinical research in collaboration with sponsored research programs. The program of study has been drawn from the core program of study of the Master of Science in Health Sciences program (http://smhs.gwu.edu/crl/programs/ctr/curriculum/mshs).

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 15 credits in required courses and 3 credits in elective courses.

Code	Title	Credits
Required		
CRA 6201	Critical Analysis Clin Rsch	
CRA 6205	Clinical Investigation	
HSCI 6263	Biostatistics Transl Research	
HSCI 6264	Epidemiology Translational Res	
HSCI 6273	Bioinformatics for Genomics	
Electives		
3 credits of electives selected in consultation with the academic advisor.		

GRADUATE CERTIFICATE IN CLINICAL AND TRANSLATIONAL RESEARCH

The graduate certificate in clinical and translational research is designed to meet the professional development needs of researchers who cannot make the time commitment needed to fulfill the requirements of the full master's degree program. All courses from the graduate certificate are transferable into the master of science in health sciences in the field of clinical and translational research program. (http://bulletin.gwu.edu/medicine-health-sciences/graduate-programs/ms-clinical-translational-research)

REQUIREMENTS

The following requirements must be fulfilled: 21 credits, including 18 credits in required courses and a 3-credit elective course.

Code	Title	Credits
Required		
CRA 6201	Critical Analysis Clin Rsch	
CRA 6205	Clinical Investigation	
HSCI 6261	Fdtn in Clinical/Trans.Rsrch	
HSCI 6265	Grantsmanship in Trans Res	
HSCI 6275	Transdisciplinary Rsrch Prop.	
HSCI 6285	Principles of Collaboration and Team Science	
Electives		
a 3-credit elective course selected in consulation with the advisor.		

GRADUATE CERTIFICATE IN HEALTH CARE QUALITY

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

All credits earned in this program are transferable to the Master of Science in Health Sciences in the field of health care quality (http://bulletin.gwu.edu/medicine-health-sciences/graduate-programs/ms-health-care-quality) degree program.

Required		
HCQ 6200	Introduction to Health Care Quality	
HCQ 6201	Building a Quality Culture	
HCQ 6202	Health Care Quality Landscape	
HCQ 6203	Quality Improvement Science	
HCQ 6204	Health Care Quality Analysis	
HCQ 6205	Patient Safety Systems	

GRADUATE CERTIFICATE IN INTEGRATIVE MEDICINE

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Required	
HSCI 6241	The Health Care Enterprise
INTM 6201	Foundations in Integrative Medicine
INTM 6202	Self Care Methods in Integrative Medicine
INTM 6203	Nutritional Metabolism and Environmental Exposure
INTM 6204	Metabolic Networks in Integrative Medicine
INTM 6205	Clinical Genomics, Proteomics, & Metabolomics
INTM 6206	Legal and Medical Ethics in Integrative Medicine
INTM 6210	Practical Application of Integrative Medicine I

GRADUATE CERTIFICATE IN REGULATORY AFFAIRS

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

All credits earned in this program are transferable to the master of science in health sciences in the field of regulatory affairs (http://bulletin.gwu.edu/medicine-health-sciences/graduate-programs/ms-regulatory-affairs) degree program.

Required	
HSCI 6263	Biostatistics Transl Research
RAFF 6201	Introduction to Global Regulatory Affairs
RAFF 6202	Regulatory Drug Biologics
RAFF 6203	Regulatory Device Diagnostics
RAFF 6204	Clinical Research for Regulatory Affairs
RAFF 6205	Regulatory Affairs Compliance

SCHOOL OF NURSING

Dean P. Jeffries
Senior Associate Dean for Academic Affairs M.J. Schumann
Associate Deans C. Pintz, B. Tebbenhoff

Established in 2010, the School of Nursing (SON) has a proven record of innovation, entrepreneurship, and leadership. SON educates and inspires nurses to provide high quality, compassionate, person-centered health care. It develops leaders who actively engage in health promotion, patient advocacy, and health care innovation, and prepares nurse educators to pursue quality and advance the profession.

School of Nursing programs include the bachelor of science in nursing (B.S.N.), master of science in nursing (M.S.N.), doctor of nursing practice (D.N.P.), and multiple certificate programs. These programs emphasize the integration of nursing practice, research, and policy with a strong focus on solving practical problems. This approach promotes strong nursing practice and leadership skills in SON graduates.

Mission

The mission of the George Washington University School of Nursing is to:

- Inspire nurses to provide high quality, compassionate health care.
- Transform health care through innovative education, research, policy, and practice.
- Develop entrepreneurial leaders and educators who pursue quality and advance the profession.
- Improve the health and well-being of people and communities locally, nationally, and globally.
- Encourage lifelong learning, and its students' advance nursing practice, policy, and education as they make a difference in the world.

Program formats and locations

On-campus programs
The second-degree accelerated B.S.N. and the Veterans B.S.N. are held on GW's Virginia Science and Technology campus (VSTC) in Ashburn, Virginia. Students at the VSTC use SON's skills and simulation laboratory, a sophisticated learning environment. In the lab, students develop competencies using high-technology manikins in multiple simulated health care settings that cross the human life span. Students experience life in a hospital long before their first clinical experience.

Distance learning programs
The M.S.N., D.N.P., and certificate programs are offered via distance learning. Programs for RNs returning to advance their education by obtaining either a BSN or an MSN are also offered as distance education programs.

Foggy Bottom campus
Some components of the distance learning programs are held on GW's Foggy Bottom campus in downtown Washington, D.C. The campus is also home to SON's administrative and academic program offices.

REGULATIONS

- **Admission (p. 808)**
  - Conditional Admission (p. 809)
  - Advance Tuition Deposit (p. 809)
  - International Applicants (p. 809)
  - Unclassified Students (p. 809)
  - Readmission (p. 809)
  - Transfer Credit (p. 809)
  - Criminal Background Check and Urine Drug Screen (p. 810)
- **Financial Regulations (p. 810)**
- **Financial Aid (p. 811)**
- **Health and Safety (p. 811)**
- **Procedures on the Evaluation of Professional Comportment (p. 812)**
- **Academic Regulations (p. 814)**
  - Scholarship Requirements (p. 814)
  - Evaluation of Academic Performance (p. 814)
  - Academic Standing (p. 815)
  - Programs of Study (p. 816)
  - Graduation Requirements (p. 817)
  - Honor Society (p. 817)
  - University Policy on Equal Opportunity (p. 817)

Admission

To be considered for admission to any GW School of Nursing (SON) program, an applicant must complete the Nursing's Centralized Application Service (NursingCAS) (http://www.nursingcas.org) application. Applicants are required to pay an application fee for NursingCAS; the NursingCAS fee will vary based on the number of programs for which the applicant applies. Official transcripts must be submitted to NursingCAS from each academic institution attended, regardless of whether credit was earned or is desired.

Detailed application information is available on the SON website (http://nursing.gwu.edu/how-apply). Applicants should refer to the individual program descriptions for information on prerequisites and supporting documents, since these vary by program. It is the responsibility of applicants to ensure that all required application materials are submitted by the designated deadlines. Unofficial copies, facsimiles, or photocopies of transcripts, certificates, or diplomas will not be accepted. All records become the property of the University and will not be returned. In addition, admitted applicants may need to submit information from a criminal background check, drug screen,

physical examination, and evidence of required immunizations and health insurance coverage depending on the program.

Conditional Admission

Admission with conditions may be offered at the discretion of the admissions committee and the Associate Dean for the Division. The terms of admission are outlined in the letter of acceptance from the University.

Advance Tuition Deposit

Upon notification of acceptance, an advance tuition deposit will be required of students. The deposit is credited toward tuition and is not refundable. Failure to pay this deposit may result in the revocation of a student's admission offer.

International Applicants

The following additional requirements pertain to international applicants:

Required Records
Official copies of all required documentation (transcripts, diplomas, and certificates as well as any other records listing subjects studied, grades received, examinations taken, the results of CHS: keeps its official records. If these documents are in a language other than English, they must be accompanied by a certified English translation. In addition, an evaluated copy completed by an acceptable international evaluation service must be submitted regardless of whether the official record is in English.

Language Tests
Applicants whose native language is not English or who are not citizens of countries where English is an official language must submit official test scores from either TOEFL or academic IELTS. The following are the minimum scores for admission consideration:

- TOEFL: 600 on paper-based; 100 on Internet-based
- Academic IELTS: an overall band score of 7.0, with no individual band score below 6.0

The language test requirement may be waived for applicants who hold a degree from an accredited college or university located in a country in which English is the official language and also the language of instruction at the institution.

Financial Certificate
A Financial Certificate must be completed and submitted with the application for admission for all international students planning to study at the University under the authorization of either a student (F) or exchange visitor (J) visa. Satisfactory completion and submission of the Financial Certificate is required for the issuance of a Form I-20 or IAP-66. Students pursuing distance learning programs are not eligible to apply for or obtain a student visa.

Unclassified Students

A student who wishes to take individual courses in the School of Nursing must obtain permission to register as an unclassified student. Application is made to the Office of Admissions, School of Nursing. The dean's office, in conjunction with the appropriate Associate Dean for the Division, will determine whether the applicant will be granted permission to register as an unclassified student. Permission to take individual courses, if granted, will generally be limited to a total of 6 credits.

Credit earned for courses taken as an unclassified student may be transferred to a degree program at the University if the courses are applicable to the program, have been taken for credit, and have been completed with the minimum grade required in the program. Successful completion of coursework taken as an unclassified student does not guarantee admission to a degree program.

Readmission

Students who were previously registered in a School of Nursing program at the University but did not register during the immediately preceding semester (summer sessions excluded) must apply for readmission. Students who have attended other academic institutions while not enrolled at this University must have complete official transcripts sent directly to the School of Nursing Office of Admissions from each institution attended. Applications for readmission are considered on the basis of regulations currently in effect.

Transfer Credit

Undergraduate Students
Advanced standing may be awarded for appropriate coursework completed at other accredited institutions provided minimum grade requirements have been met. The minimum acceptable grade is '*C*' for coursework to be applied toward an undergraduate degree. Advanced standing may also be awarded for non-traditional classroom or clinical experience as outlined below. GW reserves the right to refuse transfer credit in part or in whole or to allow credit provisionally. The School of Nursing program will award no more than 66 credits accepted as advanced standing from a two-year institution. The School of Nursing will review relevant experiences, licensure, and certification as part of the course NURS 4121 Nursing Advancement Portfolio, to award credit to associate degree prepared nurses applying to the bachelor of science in nursing/master of science in nursing(B.S.N./M.S.N.) nursing advancement program.

Graduate Students
Up to 6 credits of coursework may be accepted as transfer credit for graduate students provided the coursework was completed within the past five years at an accredited college or university with a minimum grade of *B*. A limited amount of additional transfer credit may be approved upon petition to the Senior Associate Dean of Academic Affairs. The University reserves the right to refuse transfer credit in part or in whole or to allow credit provisionally. Students' completing the GW School of Nursing's accelerated B.S.N. program will have up to 12 credits applied to the M.S.N. program at GW. The completed credits are eligible to be used for the School of

Nursing's graduate program, for a period not to exceed five years.

Degree candidates who are currently enrolled at this institution and plan to take courses at other accredited institutions for transfer credit must secure preapproval by the Associate Dean for the Division and the Senior Associate Dean of Academic Affairs.

Credit for College Board College-Level Examination Program (CLEP)
GW grants credit for specific examinations; those examinations that are not accepted include English composition, English composition with essay, and college mathematics. To earn credit, the student must score at the fiftieth percentile on each examination. Arrangements for taking the examinations are the responsibility of the applicant and should be made through the CLEP Board (http://www.collegeboard.com/clep).

Credit is not assigned for any examination that duplicates material studied in previously completed college coursework. Assignment of credit is determined by the School of Nursing Office of Admissions.

Criminal Background Check and Urine Drug Screen

Following acceptance into a clinical program, new students must complete a criminal background check and urine drug screen prior to the first day of their first term. These services are supplied by Castle Branch (https://www.castlebranch.com). Instructions for completing this requirement are provided upon admission. Clinical sites may require that students complete the site's own screening for criminal background and drugs.

Financial Regulations

The following financial regulations were adopted for the academic year 2016-2017. Costs are expected to increase in subsequent years.

University Fees and Financial and Regulations

The following regulations apply to all GW students. Visit the University Financial Fees and Regulations website (p. 47) for additional information. Note that other fees and regulations included therein may not apply to students in the School of Nursing.

- Special fees and deposits (nonrefundable)
- Voluntary Library Gift
- Payment of fees
- Monthly payment plans
- Third-party payments
- Past due accounts
- Dishonored/Returned checks
- Withdrawals and refunds

Drop-Refund Schedule for on-campus students (B.S.N. only):

On or before the end of the first week of classes	90%
On or before the end of the second week of classes	60%
On or before the end of the third week of classes	40%
On or before the end of the fourth week of classes	25%
After the fourth week of classes	None

Drop-Refund schedule for off-campus students (distance learning):

On or before the end of the second week of classes	90%
On or before the end of the fourth week of classes	50%
After the fourth week of classes	None

School of Nursing: State Requirements
Tuition Refund for Oregon Residents Taking Online Courses Only

Oregon residents enrolled in an on-line education course are allowed a modified tuition refund policy in order to meet Oregon State Mandate OAR 583-030-0035(18)(c). An Oregon student who withdraws from an on-line course is eligible for a partial refund through the middle week of the term. Refunds are based on unused instructional time and are prorated on a weekly basis. Students must be current residents of Oregon at the time of course registration and withdrawal to be eligible for this modified refund policy.

Fall and Spring term (15 week), Oregon Residents:

During the first week of classes	100%
On or before the end of the second week of classes	87%
On or before the end of the third week of classes	80%
On or before the end of the fourth week of classes	74%
On or before the end of the fifth week of classes	67%
On or before the end of the sixth week of classes	60%
On or before the end of the seventh week of classes	50%
On or before the end of the eighth week of classes	50%
After the eighth week of classes	None

Summer term (10 week), Oregon Residents:

During the first week of classes	100%
On or before the end of the second week of classes	80%
On or before the end of the third week of classes	70%
On or before the end of the fourth week of classes	60%
On or before the end of the fifth week of classes	50%
After the fifth week of classes	None

Refund policies of the University are in conformity with guidelines for refunds adopted by the American Council

on Education. Federal regulations require that financial aid recipients use such refunds to repay financial aid received for that semester's attendance. This policy applies to institutional aid as well.

In no case will tuition be reduced or refunded because of absence from classes. Authorization to withdraw and certification for work done will not be given to a student who does not have a clear financial record.

Financial Aid

GW offers financial assistance to all eligible students from a variety of resources. Undergraduate aid consists of two basic types: awards for academic achievement or talent without reference to financial circumstances (merit scholarships) and scholarships, grants, loans, and employment based on academic achievement and demonstrated financial need.

GW also participates in federal student aid programs from the U.S. Department of Education and student financial assistance programs from other U.S. government agencies such as the Departments of Veterans Affairs and Defense. Some states offer student financial assistance for undergraduate enrollment at GW.

In general, consideration for student financial assistance is restricted to students who are in good academic standing, meet minimum GPA and satisfactory academic progress requirements for specific awards, and are not financially encumbered by the University. Failure to meet and maintain satisfactory academic progress requirements may result in rescinding of awards.

Students in the accelerated B.S.N. program are only eligible to apply for federal direct and private alternative student loans through the Office of Student Financial Assistance (http://financialaid.gwu.edu). There are no GW grants available for this program. However, students may be eligible to apply for School of Nursing scholarships.

Several offices on campus provide information on financial assistance for graduate and certificate students. A general overview of financing options is provided in the brochure *Graduate Funding Opportunities*, published by the Office of Graduate Student Assistantships and Fellowships (https://graduate.admissions.gwu.edu/financial-assistance),. Forms and information on federal loans for graduate students can be obtained from the Office of Student Financial Assistance. Information on the Federal Work–Study Program, cooperative education opportunities, and on- and off-campus employment is available from the GW Career Center.

Gift aid (scholarships, grants, fellowships, assistantships, etc.) is taxable to the extent that it exceeds the allowable costs of tuition, fees, and required books and supplies or is dedicated to other costs, such as room and board. Federal grants may be taxable if, together with other gift assistance, they exceed the allowable costs. In the case of a student who is awarded tuition scholarships, grants, or awards from more than one source, the combined amount cannot exceed tuition charges; institutional aid will be adjusted to this limit.

In general, consideration for financial aid is restricted to students in good academic standing who are at least half-time and meet the minimum grade-point average for particular awards and are not financially encumbered by any other University office. Applications for institutional or federal aid cannot be processed if the relevant tax returns have not been filed in accordance with the IRS Code. Documents submitted as part of aid applications become the property of GW and cannot be returned. Federal regulations require that GW report suspected cases of fraud or misrepresentation to the appropriate federal, state, and local authorities.

Information on financial aid is assumed to be accurate at the time the current academic year Bulletin is published. Future changes in federal regulations or institutional policies may alter the application requirements or program guidelines.

Health and Safety

Health and Accident Insurance

All GW students are required to have health and accident insurance. Students who fail to maintain such insurance may be placed on Leave of Absence without tuition refund. Undergraduate students are automatically enrolled in GW's student health insurance program through Aetna. Students who have acquired their own insurance must provide the required information to be waived from the program and have this item removed from their bill. Graduate students must submit verification of health insurance coverage to the Clinical Coordinator. (https://nursing.gwu.edu/directory)

Immunization Requirements

It is the law in the District of Columbia that all students under the age of 26 have a record on file with GW Medical Services (https://studenthealth.gwu.edu) documenting immunity to measles, mumps, and rubella (two immunizations with the initial dose given after the first birthday or positive titers), varicella (chickenpox—by immunization, documented history of disease, or positive titers), hepatitis B series, meningococcal vaccine (or meningitis waiver), and a current tetanus/diphtheria booster (within 10 years prior to the beginning of the semester).

In addition, the School of Nursing requires all clinical students to submit verification of health and immunization status prior to commencing any clinical coursework. All undergraduate and graduate students in clinical programs must submit the required documentation to Castle Branch (https://www.castlebranch.com). All students must have a hepatitis screening test (see immunization policy (https://registrar.gwu.edu/vaccination-requirements)). Students are responsible for providing proof of immunity to measles, mumps, rubella, and varicella by titer. Students must show documentation of TdaP (Tetanus, diphtheria, acellular pertussis) within the past seven years. Skin testing for tuberculosis exposure (PPD) is required on an annual basis.

Annual influenza Immunization is required. GW Medical Services is available to provide any needed inoculations on a fee-for-service basis.

Undergraduate students who have not provided proof of necessary immunization by the end of the second week of classes may be removed from classes and will not be permitted to register for the subsequent semester until such proof is provided. Graduate students are not permitted to enroll in clinical courses without completion of immunization requirements.

Verification of Health Status
The School of Nursing requires for all students completion of a full physical examination within the 12 months prior to the beginning of clinical courses.

Compliance with HIPAA and OSHA Guidelines
The sites at which students pursue their clinical experience must comply with federal guidelines for the education of employees regarding prevention of the spread of blood borne pathogens and patient privacy; therefore, such sites require that all students provide evidence of relevant annual training. Undergraduate gain required training as part of their classroom experience. Graduate students must complete the required university module on HIPAA and either provide evidence of having taken OSHA training or complete the School of Nursing's training.

Procedures on the Evaluation of Professional Comportment

1. Preamble
   Students enrolled in undergraduate and graduate degree and certificate nursing programs ("Nursing School students") are required to conform to all rules, regulations, and policies with University-wide applicability, including those contained in the Guide to Student Rights and Responsibilities (https://studentconduct.gwu.edu/guide-student-rights-responsibilities) (hereinafter "Guide"). In this regard, the Guide's *Code of Academic Integrity, Policy on Equal Opportunity*; *Policy on Sexual Harassment*; *Student Grievance Procedures*; *Privacy of Student Records*, and Articles I-IV, VI, and VII of the Guide's *Statement of Student Rights and Responsibilities* apply to Nursing School students; however, owing to the unique curriculum and degree requirements of the School of Nursing, the following procedures govern Nursing School students (hereinafter "Procedures").
   These Procedures supplement certain of the applicable policies established by the Guide. For instance, the process set forth in Section Q(2) of Article VI of this Bulletin is designed to provide protection against improper academic evaluation as guaranteed by Article II, Section B of the Guide (Protection Against Improper Academic Evaluation). However, these Procedures, including the rights and procedures contained in them, supersede the Guide in all instances involving alleged misconduct by Nursing School students, with the exception of matters involving alleged academic dishonesty which are processed under the Guide's *Code of Academic Integrity*.
   All cases involving alleged misconduct (with the exception of those involving alleged academic dishonesty) will be processed solely under these Procedures. Further, Nursing School students accused of misconduct will be bound by only those procedures and rights specifically set out in the Procedures below, unless the School of Nursing Dean or his/her designee (hereinafter "Dean") decides in a particular case to have the case processed under the Guide's Code of Student Conduct. To the extent these Procedures are silent as to a particular right or procedure, such right or procedure is not intended to be afforded under these Procedures. In the case of any inconsistency or ambiguity between these Procedures and University-wide rules, regulations, and policies, including the Guide, these Procedures shall govern.
2. Evaluation of Professional Comportment
   As members of the health care community, Nursing School students are expected to behave in a manner consistent with the principles and obligations inherent to professional practice. Professional maturity, integrity, and competence are expected of students in every aspect of the clinical setting with faculty, preceptors, coworkers, and patients. Students are obliged to practice diligence, loyalty, and discretion in the patient–provider relationship.
   Some behaviors or patterns, either during the didactic or clinical phase, may raise concerns as to the student's suitability to continue in the program of study.
   Inappropriate behaviors for a nursing student may include, but are not limited to, breaching patient confidentiality, using illegal drugs or abusing controlled substances, becoming sexually involved with a patient, undertaking a procedure or scope of practice beyond that of a student, disobeying or showing disrespect for others, threatening verbal or physical behavior toward others—including students, faculty or patients—showing a judgmental attitude toward patients, or revealing a lack of concern or compassion in practice.
   The process described below is intended to address behaviors that are unacceptable to the School of Nursing and raise questions about the student's fitness for the practice of nursing.
   a. When a problem with professional comportment (other than academic dishonesty) regarding a student is perceived, the observer will communicate this concern to the Senior Associate Dean of Academic Affairs. If the communication is verbal, it must be confirmed immediately by a signed written statement or else it will not be pursued further.
   b. Upon receiving such a communication, the Senior Associate Dean of Academic Affairs will create a confidential file in which all documents pertaining to the matter will be placed. The contents of the file will be preserved for a period of time not less than five (5)

years from the date of separation or graduation from the School of Nursing. Access to this file will be restricted to the student under consideration, the Senior Associate Dean of Academic Affairs, the Dean of the School of Nursing and his/her staff, the School of Nursing Ad Hoc Committee, if one is constituted, and attorneys for GW and student.

c. The Dean will notify the student in writing that s/he has received a communication from an individual who perceives that the student has a problem with professional comportment. The notice will include a copy of these Procedures.

d. The Senior Associate Dean of Academic Affairs will meet informally with the student as soon as possible. At that meeting, or as soon thereafter as possible, the Senior Associate Dean of Academic Affairs may do one or more of the following:
   i Advise the student.
   ii Recommend that the student seek professional assistance, at the student's expense.
   iii Develop additional information through contacts with the student, his/her peers, faculty, professional consultants, and/or any other source deemed to have relevant information. With the student's concurrence, s/he may be referred for a medical, psychiatric, and/or psychological evaluation. The cost of such an evaluation will be paid by the University, and the student will be asked to authorize the professional consultant to make a written report to the Senior Associate Dean of Academic Affairs for inclusion in the student's confidential file. This authorization of the release of information regarding a psychiatric or psychological evaluation shall be made only after the student has had an opportunity to review the written report.
   iv Refer the case to a School of Nursing Ad Hoc Committee ("Ad Hoc Committee").
   v Suspend the student pending investigation and recommendation of the Ad Hoc Committee.

e. The involvement of, and actions taken by, the Senior Associate Dean of Academic Affairs may be continuing in nature; Paragraphs 6 through 19 apply if the student is referred to an Ad Hoc Committee.

f. An Ad Hoc Committee and its Chair will be named by the Senior Associate Dean of Academic Affairs. The Ad Hoc Committee, including the Chair, will consist of three faculty members from the School of Nursing.

g. The Senior Associate Dean of Academic Affairs will notify the student, in writing, of the composition of the Ad Hoc Committee. The student will be allowed ten (10) calendar days from the mailing of this notice to object to any person's appointment to the Ad Hoc Committee. Such objection must be sent to the Senior Associate Dean of Academic Affairs in writing. The Senior Associate Dean of Academic Affairs will, at his/her sole discretion, determine whether an objection warrants the appointment of one or more different persons to the Ad Hoc Committee, who shall be selected as set forth in subsection (vi) above.

h. The Ad Hoc Committee will investigate the allegation. The Ad Hoc Committee will review the student's confidential file and interview him or her. The Ad Hoc Committee also may gather and review other material and interview any other person who the Ad Hoc Committee, at its sole discretion, has reason to believe may have relevant information to contribute.

i. The student under review and/or the student's advisor may attend the information gathering sessions. The information sessions will be recorded or transcribed; the method used is at the discretion of the Ad Hoc Committee. The student and/or his or her advisor may submit written questions to be answered by persons interviewed by the Ad Hoc Committee, but the procedure regarding their questioning is left to the sole discretion of the Ad Hoc Committee, including whether the questions submitted by the student and/or his or her advisor will be modified and/or posed to the persons interviewed. The student also may suggest persons to be interviewed by the Ad Hoc Committee, but the decision to interview such persons is left to the sole discretion of the Ad Hoc Committee. The student may speak on his/her behalf and may submit other material. The student's adviser may not speak. The materials and/or testimony to be considered and the weight to be given to them are left to the sole discretion of the Ad Hoc Committee. The information sessions should not become excessively legalistic and are not conducted as criminal or civil trials. The legal rules of evidence, including, but not limited to, those rules regarding relevancy, hearsay, and admissibility are not applicable and the criminal and/or civil standards of due process are not controlling. The student and the student's advisor cannot be present when the Ad Hoc Committee meets in executive session.

j. Meetings of the Ad Hoc Committee are confidential. Minutes of the Ad Hoc Committee will be placed in the student's confidential file upon the completion of the Ad Hoc Committee's review.

k. The Chair and all members will be required to be present for all meetings of the Ad Hoc Committee. Meetings may be conducted by conference call when it is not possible for all members to be present physically.

l. The Ad Hoc Committee will make its final recommendation(s) to the Senior Associate Dean of Academic Affairs. Such recommendation(s) will be in writing and shall include findings of fact and the reasons for the recommendation(s). There is no required format for the recommendation(s). The content of the recommendation(s), including the nature and specificity of the findings and reasons, is left to the sole discretion of the Ad Hoc Committee. The Chair may review and

sign the final recommendation(s) on behalf of the Ad Hoc Committee. The recommendation(s) could include, but is (are) not limited to, one or more of the following:

i Advising the student.

ii Recommending that the student seek professional assistance, at the student's expense.

iii Recommending conditions with which the student must comply in order to continue in the School of Nursing.

iv Recommending temporary suspension from the School of Nursing

v Recommending dismissal from the School of Nursing.

The Ad Hoc Committee must agree that its recommendation(s) is (are) supported by a preponderance of the evidence (more likely than not). The Ad Hoc Committee shall make an additional recommendation regarding whether the confidential file will be made part of the student's permanent academic file.

m. The Ad Hoc Committee will forward its recommendation(s) to the Dean and shall send a copy to the student.

n. The Dean will review the student's confidential file and the recommendation(s) of the Ad Hoc Committee. The Dean, at his/her sole discretion, may meet with the student prior to making his/her determination.

o. The Dean will take whatever action s/he deems appropriate, including dismissal of the student from the School of Nursing. The Dean will inform the student in writing of his/her decision.

p. The student shall have fifteen (15) calendar days in which to appeal the decision of the Dean. Such appeal shall be in writing sent to the Provost and Executive Vice President for Academic Affairs of the University. The scope of this appeal is limited to the Provost and Executive Vice President for Academic Affairs or his/her designee's determination as to whether the procedures set forth in these Procedures have been complied with. Failure to appeal the decision shall be deemed a waiver of any and all rights to challenge the Dean's decision and shall be deemed an acceptance of the decision.

q. The Provost and Executive Vice President for Academic Affairs or his/her designee will make his/her decision in the written record of the proceedings. His/her decision shall be final.

r. At any time during the process, if the student in question selects an attorney as his or her advisor, GW will have its attorney present. The student, therefore, is required to inform the Office of the Dean two (2) days in advance of the hearing if counsel is to be present.

Academic Regulations

Many School of Nursing programs are taught in whole or in part via distance learning. Students enrolled in such programs must have specified hardware and software and meet specific technical requirements. Check your computer's readiness for distance learning (https://it.gwu.edu/tech-commons).

The School of Nursing publishes student handbooks each academic year that contains updated information on policies, regulations, and other matters of concern to matriculated students. It is the responsibility of the student to be aware of the information contained in this Bulletin and the applicable program-specific student handbook.

Scholarship Requirements

In order to graduate, undergraduate students must maintain a minimum GPA of 3.0 in courses required in the major during their degree program. A minimum grade of *B* is required in clinical courses and a minimum grade of *C* is required in didactic courses.

In order to graduate, graduate students must maintain a minimum GPA of 3.0 during their degree program. A minimum grade of *B* is required in clinical courses and in advanced pathophysiology, advanced pharmacology, and advanced health assessment courses and a minimum grade of *C* is required in other didactic courses.

In some cases, programs may establish higher GPA requirements.

Although transfer credit may be assigned, courses taken at other institutions are not considered in computing the GPA. *CR* (Credit); *AU (*Audit) *P* (Pass); *NP* (No Pass); *I* (Incomplete)*; IPG* (In Progress); *W* (Authorized Withdrawal); *and Z* (Unauthorized Withdrawal).

Evaluation of Academic Performance

Faculty members are responsible for evaluating the performance of students in a meaningful, useful, and timely manner and for assigning grades on a basis that is rational, just, and unbiased. The authority for assignment of grades rests with faculty members in the respective programs. Official grades for coursework can be obtained through Degree Map (https://registrar.gwu.edu/degreemap).

Grades in Undergraduate Degree or Certificate and Post-Baccalaureate Certificate Programs

In the School of Nursing, grades that may be assigned are *A*, *A*–, *B*+, *B*, *B*–, *C*+, C, *C*–, *D*+, *D, D*- and *F*. Except for courses that specifically state that repetition for credit is permitted, a candidate for an undergraduate degree in the School of Nursing may not repeat a course in which a grade of *C* or higher was received, or a clinical course in which a grade of B or higher was received, unless a petition to do so is approved by the Senior Associate Dean of Academic Affairs upon recommendation of the Associate Dean for the Division. If a course is repeated, the first grade remains on

the student's record and is included in the cumulative GPA. Please see *Progression* statement for further policy on course repetition. Grades and designations that may appear on the transcript include *CR* (Credit); *AU (*Audit) *P* (Pass); *NP* (No Pass); *I* (Incomplete)*; IPG* (In Progress); *W* (Authorized Withdrawal); *and Z* (Unauthorized Withdrawal). These grades and designations are not considered in determining the GPA.

Grades in Graduate Degree and Certificate Programs
In the School of Nursing, grades that may be assigned are A, *A*–, *B*+, *B*, *B*–, *C*+, C, *C*–, and F. Except for courses that specifically state that repetition is permitted, a candidate for a graduate degree or certificate in the School may not repeat a course in which a grade of *C* or higher was received, or a clinical course in which a grade of B or higher was received, unless a petition to do so is approved by the Senior Associate Dean of Academic Affairs upon recommendation of the Associate Dean for the Division. If a course is repeated, the first grade remains on the student's record and is included in the cumulative GPA. Please see *Progression* statement for further policy on course repetition. Grades and designations that may appear include *CR* (Credit); *AU (*Audit) *P* (Pass); *NP* (No Pass); *I* (Incomplete)*; IPG* (In Progress); *W* (Authorized Withdrawal); *and Z* (Unauthorized Withdrawal). These designations are not considered in determining the GPA.

Incomplete/In Progress
The designation *I* (Incomplete) may be used at the discretion of the instructor. An Incomplete indicates that the instructor has received a satisfactory explanation for the student's inability to complete the required work of the course. The grade may be used only if the student's prior performance in the course has been satisfactory. Any failure to complete the work of a course that is not satisfactorily explained to the instructor before the date when grades must be turned in will be graded *F*. Incomplete work must be made up by a date agreed upon by the instructor and the student, but no later than the last day of the examination period for the semester immediately following the semester or summer session in which the grade of *I* is assigned. An extension of one additional semester can be requested by the student and may be approved by the Associate Dean for the Division. When work for the course is completed, the grade earned will replace the grade of *I* on the student's transcript. An Incomplete that is not changed within the allotted time automatically becomes an *F*.

The symbol of *IPG* is reserved for courses (such as special projects or clinical courses) in which the course requirements may extend beyond the official GW deadline for submitting grades. *IPG* must be completed during semester following the course in which designation was assigned. Once the course has been completed, the *IPG* will be removed from the transcript and the earned grade recorded.

Unauthorized Withdrawal
The symbol of *Z* is assigned when students are registered for a course that they have not attended or have attended only briefly, and in which they have done no graded work. At the end of the academic year, students' records are reviewed; if there is more than one *Z* per semester, a student's record will be encumbered until released by the Associate Dean for the Division or the Senior Associate Dean of Academic Affairs. The symbol of *Z* is not a grade but an administrative notation.

The Grade-Point Average
Scholarship is computed in terms of the grade-point average, based only on the student's record in this University. The grade-point average is computed from grades as follows: *A*, 4.0; *A*–, 3.7; *B*+, 3.3; *B*, 3.0; *B*–, 2.7; *C*+, 2.3; *C*, 2.0; *C*–, 1.7; *D*+, 1.3; *D*, 1.0; *D*–, 0.7; *F*, 0, for each credit hour for which the student has registered in a degree program. Grades below *C* will be computed in the grade-point average but will not be considered as fulfilling degree requirements. Courses in which an *I* or *IPG* has been assigned will be included when a final grade has been recorded.

Dean's List
The name of any full-time undergraduate student who achieves a GPA of 3.5 or higher in any one semester with no grades below *B*– will be placed on the Dean's List for that semester.

Appeal Procedures for Cases of Alleged Improper Academic Evaluation
Students who believe that a grade or evaluation is unjust or inaccurate may submit a petition through the program that offers the course. If a mutually satisfactory resolution is not achieved, the student may use the following appeal procedures:

1. The student must submit a written appeal to the Senior Associate Dean of Academic Affairs within five (5) days of posting the grade.
2. The Senior Associate Dean of Academic Affairs will meet with the student to attempt to resolve the issue.
3. If the issue cannot be resolved, the Senior Associate Dean of Academic Affairs will form a three-person special committee ("Grade Appeal Committee"). The Grade Appeal Committee will consist of three (3) members of the School of Nursing faculty.
4. The Grade Appeal Committee will conduct a hearing at which the student and the faculty member have an opportunity to state, in each other's presence, their views on the academic evaluation at issue.
5. The Grade Appeal Committee will make a recommendation to the Dean regarding how the issue should be resolved. The Dean shall make the final decision regarding the grade appeal and will advise the student and the faculty member in writing of his or her decision.

Academic Standing

An enrolled student is considered to be in good academic standing by the School of Nursing provided that he or she is not on probation nor been suspended.

Warning
An undergraduate student or graduate student whose GPA falls between 3.0 and 3.2 will receive a warning letter from the Senior Associate Dean of Academic Affairs, with a copy to the Associate Dean for the Division.

A graduate student whose GPA falls between 3.0 and 3.2 will receive a warning letter from the Senior Associate Dean of Academic Affairs, with a copy to the Associate Dean for the Division.

Academic Probation
A full-time undergraduate student who has attempted a minimum of 12 credits of coursework and whose cumulative GPA is below 3.0 will be placed on academic probation and will receive a probation letter from the Senior Associate Dean of Academic Affairs, with a copy to the Associate Dean for the Division. This probation extends over the period in which the student attempts an additional 12 credits of coursework. While on probation, the student will be allowed to register for no more than 13 credits per semester, unless approved by the Associate Dean for the Division and the Senior Associate Dean of Academic Affairs.

A part-time undergraduate student who has attempted a minimum of 6 credits of coursework and whose cumulative GPA is below 3.0 will be placed on academic probation and will receive a probation letter from the Senior Associate Dean of Academic Affairs, with a copy to the Associate Dean for the Division. This probation extends over the period in which the student attempts an additional 6 credits of coursework.

A full- or part-time graduate student who's cumulative GPA falls below 3.0 will be placed on academic probation and will receive a probation letter from the Senior Associate Dean of Academic Affairs, with a copy to the Associate Dean for the Division. For full-time students, probation extends for one semester of full-time coursework as defined by the program; for part-time students, probation extends during the period in which the student attempts 9 credits of coursework.

Progression
In undergraduate programs, any grade below a *C* in supporting courses, or below a *B* in clinical courses, is not satisfactory and the student will not be permitted to progress as planned under the original program of study, but will have a new program of study as recommended by the student's advisor and the Associate Dean for the Division of Undergraduate Studies. an unsatisfactory grade or a grade of *F* on a second attempt is grounds for dismissal. B.S.N. students who are absent from their program for one semester or more, regardless of the reason, may be required to be reexamined on clinical competencies before resuming their studies. Accelerated B.S.N. program students must complete their program of study in no more than six (6) semesters of enrollment, excluding leaves of absence.

In graduate programs, any grade below a *C* in supporting courses or less than B in clinical courses, pathophysiology, pharmacology, and advanced health assessment is not satisfactory. A student receiving an unsatisfactory grade may attempt a course a second time; an unsatisfactory grade or a grade of *F* on a second attempt is grounds for dismissal. Any graduate student who earns a grade below a *B* in a clinical course will not progress in the clinical portion of the program until that course is successfully completed. Both grades remain on the student's transcript and are calculated in the final GPA. Graduate students must complete their degree program within five (5) years.

Suspension
An undergraduate student whose cumulative GPA remains below 3.0 after a period of probation may be suspended. A student suspended for poor scholarship may not register for any coursework at the University, even as an auditor. A suspended student may apply for readmission after the lapse of the semester following suspension. Evidence must be presented to the Senior Associate Dean of Academic Affairs, through the Associate Dean for the Division, demonstrating that the student is better prepared to pursue academic coursework. Any student suspended twice for poor scholarship will not be readmitted.

A graduate student who is suspended for failure to raise the cumulative GPA to 3.0 may apply for readmission after the lapse of one calendar year by submitting evidence that he or she is better prepared to pursue graduate coursework. If the student fails to achieve the minimum GPA of 3.0 at the end of the semester following readmission, the Associate Dean for the Division may recommend that graduate study be terminated and further enrollment prohibited.

Dismissal
Any student who has received one or more unsatisfactory grades during a semester may be recommended for dismissal by the Associate Dean for the Division. This will be reviewed by the Senior Associate Dean of Academic Affairs. The final decision regarding dismissal will be made by the Dean.

Programs of Study

Students enrolled in undergraduate, graduate, or certificate programs must meet with their faculty advisor, in person or electronically, in order to review a program of study, listing all coursework required for the degree or certificate, including applicable transfer credit. Changes to the program of study can be made through petition to the program.

Transfer within the School of Nursing
To apply for a transfer from one program to another within the School, a written request must be submitted to the School of Nursing Office of Student Services, along with the necessary supporting documentation required by the program. Transfers will be considered individually by the Associate Dean of the Division and the Senior Associate Dean in consultation with the director of the program within the SON program to which the students wishes to transfer. Consideration will include the

student's prior and current academic performance and the current enrollment within the proposed program.

Changes in course enrollment within the School of Nursing
A student may not substitute one course for another without approval of the Associate Dean for the Division and the Senior Associate Dean of Academic Affairs. After the deadlines for adding or dropping courses, a student must obtain the permission of the course instructor, the Associate Dean for the Division, and the Senior Associate Dean of Academic Affairs to withdraw from a course or to change status from credit to audit or audit to credit.

Adding and Dropping Courses
During the registration period and before the end of the second week of classes students may add or drop courses using GWeb (https://banweb.gwu.edu/PRODCartridge/twbkwbis.P_WWWLogin). After the second week of classes, students who wish to add or drop a course must complete a Registration Transaction Form (http://registrar.gwu.edu/registration-forms) and submit the form to the office of the Dean; forms are available online, at SON offices, and in the Office of the Registrar (http://registrar.gwu.edu). Adding a course after the second week requires a signature of the instructor or other authorized member of the School.

A course dropped during the first four weeks of classes will not appear on the student's transcript. A course dropped after the fourth week but before the end of the eighth week will be assigned a notation of *W* (Authorized Withdrawal). The deadline for dropping a course without academic penalty is the end of the eighth week of classes in the fall and spring semesters. After the end of the eighth week of classes, dropping a course without academic penalty is only possible after the student presents a petition (https://nursing.gwu.edu/forms-policies) to the Senior Associate Dean of Academic Affairs and receives written permission.

All charges for courses from which the student withdraws are subject to the refund policy listed under Fees and Financial Regulations (p. 47) in this Bulletin. Failure to withdraw by these procedures can result in an extended financial obligation and the recording of a grade of *F* or a notation of *Z*.

Graduation Requirements

Degrees are conferred in January, May, and August. Graduating students are strongly encouraged to participate in the commencement ceremony held each year in May.

To be recommended for graduation by the faculty, students must have met admission requirements; completed satisfactorily the scholarship, curriculum, residence, and other requirements for the degree; filed an application for graduation prior to the published deadline; and be free from all indebtedness to the University. Registration, either for coursework or for continuous enrollment, is required for the semester or summer session at the close of which the degree is to be conferred.

Applications (https://registrar.gwu.edu/online-graduation-application-instructions) for graduation must be filed by October 1 for fall graduation, February 1 for spring graduation, and July 1 for summer graduation.

Residence Requirements
A minimum number of credits must be completed satisfactorily in residence in the School of Nursing. See information on the School of Nursing website (https://nursing.gwu.edu) for specific information regarding the accelerated or veteran B.S.N. and the B.S.N./M.S.N. program for associate degree prepared RNs. Students in all other master of science in nursing and doctor of nursing practice programs must take all but 6 of the total required credits in residence. Courses applicable to the degree taken while registered in any division of GW in the semester immediately prior to admission to degree candidacy in the School of Nursing are counted as courses in residence.

Honors
Bachelor's degrees with honors are awarded to students whose academic records give evidence of particular merit. The student's grade-point average determines the level of honors as follows: *cum laude*, 3.4 to 3.59; *magna cum laude*, 3.6 to 3.79; *summa cum laude*, 3.8 to 4.0. The grade-point average includes all coursework completed at GW and is not rounded off. To be eligible for an honors designation, a student must complete at least 60 credits of coursework at GW.

The grade-point average is calculated by the Office of the Registrar, and the honors designation is entered on the transcript and the diploma of those students who earn an honors designation. If honors are entered in the commencement program, honors status will be determined on the basis of work completed by the end of the seventh term and entered only for those students who have completed seven-eighths of the credits required for the degree. Honors indicated on the diploma are calculated on the basis of all coursework completed. The diploma and transcript are the official indication that a degree was conferred and honors awarded.

Honor Society

The School of Nursing Phi Epsilon chapter is a chartered member of Sigma Theta Tau International (http://phiepsilon.nursingsociety.org/phiepsilonchapter/home), the national honor society of nursing. School of Nursing students who meet the qualifications specified by the constitution of Sigma Theta Tau are eligible for membership and may be nominated by an Associate Dean for the Division, faculty member, or a Sigma Theta Tau member.

University Policy on Equal Opportunity

GW does not unlawfully discriminate against any person on any basis prohibited by federal law, the District of Columbia Human Rights Act, or other applicable law, including without limitation, race, color, religion, sex, national origin, age, disability, veteran status, sexual orientation, or gender identity or expression. This policy covers all programs, services, policies, and procedures

of the University, including admission to education programs and employment.

UNDERGRADUATE

Undergraduate programs

- Bachelor of Science in Nursing (p. 829)
- Associate's Degree in Nursing Pathway to Bachelor of Science in Nursing (p. 824)
- Associate's Degree in Nursing Pathway to Bachelor of Science in Nursing and Master of Science in Nursing, Adult-Gerontology Primary Care Nurse Practitioner (p. 825)
- Associate's Degree in Nursing Pathway to Bachelor of Science in Nursing and Master of Science in Nursing, Family Nurse Practitioner (p. 826)
- Associate's Degree in Nursing Pathway to Bachelor of Science in Nursing and Master of Science in Nursing, Nurse-Midwifery (p. 827)
- Associate's Degree in Nursing Pathway to Bachelor of Arts or Bachelor of Science to Master of Science in Nursing (p. 828)

Please note: While it will not affect degree requirements for students entering in 2016-17, the titles and number of credits assigned to Nursing (NURS) courses are subject to change. Please consult the School of Nursing website (https://nursing.gwu.edu) for up-to-date course information.

GRADUATE

Master's programs

- Master of Science in Nursing in the field of Adult-gerontology acute care nurse practitioner (p. 830)
- Master of Science in Nursing in the field of Adult-gerontology primary care nurse practitioner (p. 831)
- Master of Science in Nursing in the field of Family nurse practitioner (p. 832)
- Master of Science in Nursing in the field of Nurse-midwifery (p. 834) (collaborative program between GW School of Nursing and Shenandoah University (http://www.su.edu/nursing/nursing-graduate-programs/nurse-midwifery-programs))
- Master of Science in Nursing in the field of Nursing Leadership and Management (p. 835)

Combined programs

- Dual Master of Science in Nursing in the field of adult-gerontology acute care nurse practitioner and Doctor of Nursing Practice (p. 836)
- Dual Master of Science in Nursing in the field of adult-gerontology primary care nurse practitioner and Doctor of Nursing Practice
- Dual (p. 837)Master of Science in Nursing in the field of family nurse practitioner and Doctor of Nursing Practice (p. 836)

Doctor of Nursing Practice program

- Doctor of Nursing Practice (p. 837)
  - Education concentration
  - Executive leadership
  - Family specialty for nurse practitioners
  - Health care quality
  - Palliative care specialty for nurse practitioners

Please note: While it will not affect degree requirements for students entering in 2016-17, the titles and number of credits assigned to Nursing (NURS) courses are subject to change. Please consult the School of Nursing website (https://nursing.gwu.edu) for up-to-date course information.

CERTIFICATE

In addition to degree programs in which a certificate is awarded along with the degree, the School of Nursing offers post-master's certificate-only programs* in the following specialties:

- Adult-Gerontology Acute Care Nurse Practitioner (p. 840)
- Adult-Gerontology Primary Care Nurse Practitioner (p. 840)
- Family Nurse Practitioner (p. 840)
- Family Specialty for Nurse Practitioners (p. 840)
- Nursing Education (p. 841)
- Palliative Care Nurse Practitioner (p. 841)
- Psychiatric Mental Health Nurse Practitioner (p. 841)

Visit the School of Nursing Office of Admission website (https://nursing.gwu.edu/admissions-financial-aid) for additional information.

*As used in this section, "certificate program" refers to an established program in which just the certificate is awarded upon completion, rather than a degree program in which both a degree and a certificate are awarded at completion.

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students

- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

NURS 3101. Ethical Foundations of Nursing. 3 Credits.
Theories and principles related to common ethical and moral dilemmas faced by nursing professionals in their clinical practice. Methods of analyzing and resolving moral dilemmas using clinical decision making frameworks; methods for increasing awareness by examining and understanding the impact of the nurse's own value system.

NURS 3102. Nutrition for Health Professionals. 3 Credits.
Fundamentals of human nutrition and their scientific foundations. Nutritional requirements related to changing individual and family needs; food choices, health behaviors, food safety, prevention of chronic disease, and nutrition-related public health in the United States and globally.

NURS 3103. Human Anatomy and Physiology I. 4 Credits.
Designed for students entering the allied health professions. Fundamental structures and functions as they relate to the human body, including homeostasis, anatomical language and body organization, tissues and histology, integumentary; and skeletal, muscular, nervous and endocrine systems. Requires a basic background in introductory cell/molecular biology; an equivalent course with a minimum grade of C may be substituted for the prerequisite. Prerequisite: BISC 1111.

NURS 3104. Human Anatomy and Physiology II. 4 Credits.
Continuation of NURS 3103. Fundamental structures and functions as they relate to the human body, including homeostasis, anatomical language and body organization, tissues and histology; and cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems. Requires a basic background in introductory cell/molecular biology. Prerequisite: NURS 3103.

NURS 3110. Transition into the Nursing Profession. 2 Credits.
Historical and evolutionary perspectives in nursing in the context of current issues and trends in health care delivery and professional nursing. Values and characteristics of professional nursing practice by examining legal, regulatory, ethical issues, critical reasoning, evidence-based practice, and nursing self-care. Same as NURS 3110W.

NURS 3110W. Transition: Nursing Profession. 2 Credits.
Historical and evolutionary perspectives in nursing considered in the context of current issues and trends in health care delivery and professional nursing. The values and characteristics of professional nursing practice are examined in terms of legal, regulatory, and ethical issues as well as critical reasoning, evidence-based practice, and nursing self-care.

NURS 3111. Foundations of Health Assessment. 3 Credits.
Development of the knowledge and skills necessary for conducting comprehensive and need-specific health assessments for individuals in the context of their family and community; determining areas in which health promotion activities should be implemented or reinforced. Students use structured interviews to elicit health histories and health practices and perform physical examinations in a systematic manner. Identification of a broad range of normal variations through practice with peers in the laboratory setting. Nursing practice in the laboratory setting, including physical mobility, safety, infection control, drug calculation, medication administration, and other health technologies.

NURS 3112. Nursing Practice and Clinical Reasoning 1: Adult and Aging Acute and Chronic Illness. 3 Credits.
The values, knowledge and competencies at the foundation of safe, evidence-based, professional holistic nursing care of adults with common medical and surgical needs; essentials of the nursing process and disease process; expected outcomes and effects of nursing interventions with adults experiencing selected health conditions at multiple levels of care.

NURS 3113. Clinical Skills Lab: Adult Medical-Surgical 1. 6 Credits.
Foundational values, knowledge, skills, and competencies for safe, evidence-based, professional, and holistic nursing care of adults with common medical and surgical needs, and using critical thinking and effective communication skills to deliver such care in clinical and laboratory environments.

NURS 3114. Nursing Practice and Clinical Reasoning 2: Advanced Adult Medical-Surgical. 3 Credits.
Builds upon the basic concepts introduced in NURS 3112 by introducing complex, multi-system disease processes requiring a higher level of critical thinking. Safe, evidence-based, professional, and holistic nursing care related to the management of clients with advanced medical and surgical needs; knowledge, skills, and competencies for assessing and managing clients/patients in a hospital environment. Prerequisites: NURS 3110, NURS 3111, NURS 3112, NURS 3113 and NURS 3118.

NURS 3115. Clinical Skills Lab: Adult Medical-Surgical 2. 4 Credits.
Builds upon the basic concepts introduced in NURS 3113 by introducing complex, multi-system disease processes requiring a higher level of critical thinking. Safe, evidence-based, professional, and holistic nursing care related to the management of clients with advanced medical and surgical needs; knowledge, skills, and competencies for assessing and managing clients/patients in a hospital environment. Prerequisites: NURS 3110, NURS 3111, NURS 3112, NURS 3113 and NURS 3118.

NURS 3116. Nursing Practice and Clinical Reasoning 3: Psychiatric Mental Health. 3 Credits.
Theoretical principles, concepts, and skills applicable to the provision of safe and effective nursing interventions to clients across the lifespan who are experiencing psychiatric and mental health conditions. Application of scientific principles; assessing, planning, and evaluating nursing interventions; developing therapeutic communication, critical reasoning, analytical skills. Practical learning for promoting wellness of clients in acute and/or community-based psychiatric health care settings. Prerequisites: NURS 3110, NURS 3111, NURS 3112, NURS 3113 and NURS 3118.

NURS 3117. NCPR: 4 Maternity/Women Hlth. 3 Credits.

NURS 3118. Pharmacology 1. 2 Credits.
The underlying principles of pharmacology and medication administration; historical perspective on pharmacotherapy, legal/ethical responsibilities of the nurse in drug administration, regulatory (FDA) drug approval process, major drug classifications, and nursing management required for drug therapy; basic principles of pharmacokinetics, pharmacodynamics, pharmacotherapeutics, medication calculations, drug-drug interactions, contraindications/ precautions, and adverse effects; the nursing process and patient teaching principles as they relate to pharmacologic concepts.

NURS 3119. Pathophysiology. 3 Credits.
Pathophysiology of common disease conditions affecting human beings across the lifespan; regulatory and compensatory mechanisms related to commonly occurring diseases; pathophysiologic bases of common human health alterations, associated clinical manifestations, and diagnostic assessments for each disease process.

NURS 4099. Variable Topics. 1-6 Credits.
Assigned topics determined by the School of Nursing. Restricted to students with prior permission of the undergraduate division of the School of Nursing.

NURS 4116. NPCR 5: Children & Families. 3 Credits.

NURS 4117. NPCR 6:Epidemiology&CommHealth. 3 Credits.

NURS 4118. Pharmacology 2. 1 Credit.
Principles of pharmacology and mechanisms of action of drug prototypes used in clinical practice; drug interactions, side effects, and contraindications as the foundation for clinical judgment and management of patients across the lifespan; dosage calculations for oral and parenteral medications and their safe administration; common pathophysiological disorders and the specific drug classes used in their management; educating patients and families concerning safe medication administration and other topics.

NURS 4119. PatientSafety&HlthCareQuality. 3 Credits.

NURS 4120. Capstone:Transitn to Practice. 6 Credits.

NURS 4121. Nursing Advancement Portfolio. 0-15 Credits.
Upon admission to one of the Associate's Degree in Nursing Pathway to Bachelor of Science in Nursing/Master of Science in Nursing programs, a student's professional portfolio is evaluated and between 0-15 credits are awarded as part of the total credits required for the bachelor's degree. If fewer than 15 credits are awarded, completion of one or more of the following courses may be required, as determined by the program director: NURS 3112, NURS 3113, and NURS 3118. In lieu of tuition, a $500 portfolio evaluation fee is charged for this course.

NURS 4418. Pharmacology 2. 1 Credit.

NURS 6180. Dimensions of Prof. Nursing. 3 Credits.

NURS 6202. Concepts in Population Health. 3 Credits.
Graduate-level nurses integrate and synthesize concepts associated with quality, health promotion, disease prevention, and chronic health problems with communities, the general population, and specific population groups. Issues related to culturally diverse and vulnerable populations.

NURS 6203. Nursing Leadership. 3 Credits.
Evidence-based leadership skills as a core competency in nursing to improve quality in patient care and strengthen nursing as a profession. Emphasis on theories of leadership, personal leadership, skill building, team-building techniques, change, conflict resolution, motivation, and communication skills.

NURS 6204. Health Information and Technology. 3 Credits.
Key issues and concepts related to the use of technology and information management to support the provision of high quality health care and outcomes.

NURS 6205. HealthPolicy,Quality,Political. 3 Credits.
The health policy process and analysis relevant to the three main thrusts of policy: cost, quality and access. Political, social, economic, and population factors that influence this process. Comparisons to health systems in other countries as appropriate. Quality science and informatics in the context of interdisciplinary, coordinated, and ethical health care delivery.

NURS 6207. Evidence-Based Practice for Health Care Researchers. 3 Credits.
The methodological issues of health care research. Appraisal and synthesis of research results and evidence-based methods. Identification and use of appropriate inquiry methodologies; ethical implications of research and translational scholarship.

NURS 6208. Biostatistics for Health Care Research. 3 Credits.
Introduction to the basic ideas and modeling approaches used in biostatistics through the use of health care research data. Descriptive and inferential statistics; identification of appropriate statistical procedures and estimation of appropriate sample size. Application of univariate, bivariate, and multivariate statistical procedures.

NURS 6209. Transitional Care. 3 Credits.
Transitional care planning and implementation, including pertinent health care policy, transitional care models, inter-professional collaboration, quality outcomes, multifaceted interventions, and the patient engagement dynamics that influence patient-centered care transitions in the current health care environment. Recommended background: BSN.

NURS 6210. Building a Quality Culture. 3 Credits.

NURS 6211. Health Care Quality Landscape. 3 Credits.

NURS 6212. Quality Improvement Science. 3 Credits.

NURS 6213. Health Care Quality Analysis. 3 Credits.

NURS 6214. Patient Safety Systems. 3 Credits.

NURS 6220. Advanced Physiology and Pathophysiology. 3 Credits.
System-focused advanced physiology and pathophysiology for analysis of health deviations across the life span. Interpretation of changes in normal function that result in symptoms indicative of illness. This systematic assessment is foundational to clinical decision making and management of health deviations.

NURS 6222. Advanced Health Assessment and Diagnostic Reasoning. 4 Credits.
Nurse Practitioner and nurse-midwifery students will acquire the knowledge, skills and clinical foundation for advanced health assessment and diagnostic reasoning in the ambulatory health care setting. This course is a prerequisite to all other clinical courses and includes a fifteen-week online didactic course, a 75-hour clinical practicum and a three day, on-campus skills training session.

NURS 6224. Adult/Gerontology Primary Care Nurse Practitioner 1, Practice Introduction. 4 Credits.
Theoretical and practical foundations of common primary care conditions in the adult patient. Assessment, diagnosis, and management of culturally diverse adults. Advanced decision making and clinical judgment, evidence-based practice, health promotion and disease prevention. Concurrent clinical practicum in a primary care setting under the supervision of preceptors and faculty. Prerequisites: NURS 6220, NURS 6222, NURS 6234.

NURS 6225. Adult/Gerontology Primary Care Nurse Practitioner 2, Adolescent & Adult. 8 Credits.
Theoretical and practical foundations of primary care of culturally diverse adolescents, adults, and older adults with chronic health problems. Synthesis and integration of advanced decision-making skills, including diagnostic reasoning and clinical judgment, health assessment, health promotion, technology, and evidence-based practice. Concurrent clinical practicum in which students manage patients in a primary care setting under the supervision of preceptors and faculty. A two- to three-day on-campus session is required. Prerequisites: Nurs 6224.

NURS 6226. Primary Care of the Family. 5 Credits.
The theoretical and practical foundations of family primary care.

NURS 6227. Family Nurse Practitioner Clinical Practicum. 1-7 Credits.
Clinical experiences focused on the primary care needs of women, adults, older adults, children, and childbearing families. Students complete a total of 7 credits in this course as their clinical experience.

NURS 6228. Advanced Family Primary Care. 5 Credits.
Seminar and clinical practicum focusing on the integration of the family nurse practitioner role through the application of family theory and evidenced-based practice in primary care settings.

NURS 6229. Adult/Gerontology Primary Care Nurse Practitioner 3, Adult, Older/Frail. 8 Credits.
Theoretical and evidence-based practice foundations for assessment and management of patients across the aging continuum. The physiologic, psychological, socioeconomic, emotional, cultural, and spiritual dimensions of the older adult in relationship to self, family, care-givers, and the health-care system are emphasized. Concurrent clinical practicum in which the student manages patients across the older-age spectrum under the supervision of preceptors and faculty. An on-campus visit is required in which students participate in a Standardized Patient final examination test-out. Prerequisites: Nurs 6225.

NURS 6230. Family Nurse Practitioner 1, Lifespan Primary Care/Diagnosis/Management. 4 Credits.
First clinically based course for family nurse practitioner students. Didactic and clinical experiences in primary care, focusing on prevention and common/chronic health problems across the lifespan. Prerequisites: NURS 6220 Advanced Pathophysiology, NURS 6222 Advanced Health Assessment, NURS 6234 Advanced Pharmacology.

NURS 6231. Family Nurse Practitioner 2, Lifespan Primary Care/Diagnosis/Management. 8 Credits.
Second clinically based course for family nurse practitioner students. Didactic and clinical experiences in family nurse practitioner care, focusing on prevention and common/chronic health problems across the lifespan. Prerequisites: N6220 Advanced Pathophysiology, N6222 Advanced Health Assessment, N6234 Advanced Pharmacology, N6230 FNP I.

NURS 6232. Family Nurse Practitioner 3, Professional Issues/Diagnosis/Management. 8 Credits.
Third course for family nurse practitioner students. Didactic and clinical experiences in primary care, focusing on prevention and common/chronic health problems across the lifespan. Consideration of professional issues for FNPs: Role development, certification, ethical issues in practice, inter-professional collaboration, and health care reimbursement issues are discussed and related to current clinical experiences. Prerequisites: Nurs 6220 Advanced Pathophysiology, Nurs 6222 Advanced Health Assessment, Nurs 6234 Pharmacology, Nurs 6230 FNP I, Nurs 6231 FNP 2.

NURS 6233. Genetics for Healthcare Providers. 3 Credits.
Basic scientific principles of genetics and their clinical applications.

NURS 6234. Advanced Pharm for Nursing. 3 Credits.
This course will cover an introduction to pharmacotherapeutics as it primarily applied to Advanced practice Nurses in Primary Care settins. The course will briefly review key pathophysiologic points, and then will discuss the pharmocotherapeutic interventions that may be considered in the treatment of disease. The course will begin with a general introduction to the foundations for professional practice and the concepts of pharmacoeconomics, pharmacokinetics, pharmacodynamics, and pharmacogenetics will be introduced. Issues surrounding community practices in pharmacotherapeutics will be explored. The course will then focus on pharmacological interventions in the spectrum of disease states seen in primary care practices involving the Nervous system, Immune System, Cardiovascular system, Hematologic system, Genitourinary system, Gastrointestinal system, Respiratory system, Endocrine system, Sensory systems, and the Skin.

NURS 6235. Adult-Gerontology Acute Care Nurse Practitioner 1: Introduction to Practice. 4 Credits.
The second clinical practicum course for adult-gerontology acute care nurse practitioner students. The scientific underpinnings and practical management of complex acute and chronic conditions across a spectrum of care delivery situations from subacute rehabilitation, to urgent care, emergency department, hospital-based care, and critical care; advanced decision making and clinical judgment in the application of evidence-based practice, health promotion, and disease prevention; acute and chronic conditions most commonly encountered across the spectrum of care delivery settings; theoretical, academic, and political elements involved in the evolution of the AGACNP role. In the required clinical practicum students manage patients' acute, chronic, and critical conditions under the supervision of preceptors and faculty. Recommended background: prior completion of NURS 6220, NURS 6234 and NURS 6222.

NURS 6236. Adult-Gerontology Acute Care Nurse Practitioner 2: Complex and Acute Illness. 8 Credits.
The second clinical practicum course for adult-gerontology acute care nurse practitioner students. Management of complex, acute stable and unstable conditions experienced by a variety of age groups from adolescents to middle-aged adults, to the elderly; application of advanced assessment techniques and technology for the diagnosis and management of patients. Both clinical and simulation experiences provide students with opportunities to provide advanced evidence-based interventions. Prerequisites: NURS 6235. Recommended background: prior completion of NURS 6220, NURS 6234 and NURS 6222.

NURS 6237. Adult-Gerontology Acute Care Nurse Practitioner 3: Complex and Chronic Disease Mgt Adolesc/Elderly. 8 Credits.
The third clinical practicum course for adult-gerontology acute care nurse practitioner students. The scientific underpinnings and the practical management of complex acute and chronic conditions across a spectrum of care delivery situations from subacute rehabilitation, to urgent care, emergency department, hospital-based care, and critical care; the scope of practice of the AGACNP is not setting specific; rather, it is based on the needs of patients. Special issues for adolescents and the frail elderly and evaluation of care for adolescents, adults, and the elderly. Prerequisites: NURS 6235 and NURS 6236. Recommended background: prior completion of NURS 6220, NURS 6234 and NURS 6222.

NURS 6239. Bridge to Nurse Midwifery. 1 Credit.

NURS 6241. The Health Care Enterprise. 3 Credits.
Overview of general management business principles related to health care systems. Management of patient-centered care delivery; strategic health care leadership; organizational, marketing, and fiscal management principles. Same as HSCI 6241.

NURS 6242. Psychopharmacology. 3 Credits.
Essential theoretical foundations of neurobiology and psychopharmacology for nurse practitioners to provide safe behavioral health care across the lifespan. Prerequisites: NURS 6220, NURS 6222 and NURS 6234.

NURS 6243. Addiction and Change. 3 Credits.
Principles of addiction and change with a focus on correlating how changes in behavior lead to recovery in addictions. Models of addiction and change, the neurobiology of addiction, behavior change theories and models, and treating addictions through behavioral mechanisms.

NURS 6244. Foundations for Psychiatric-Mental Health Nurse Practitioners. 3 Credits.
The nurse practitioner's role in providing behavioral health care in various health care systems across the lifespan; theoretical foundations for managing all phases of therapeutic relationships; psychosocial and risk assessment that meets clinical standards of care. Prerequisites: NURS 6220, NURS 6222 and NURS 6234.

NURS 6245. Mental Health Diagnostic Assessment Across the Lifespan. 3 Credits.
Assessment framework for formulating accurate diagnoses of mental health disorders across the lifespan using criteria outlined in the Diagnostic and Statistical Manual of Mental Health Disorders-5 (DSM-5). Prerequisites: NURS 6220, NURS 6222 and NURS 6234.

NURS 6246. Psychiatric Mental Health Nurse Practitioner (PMHNP) Clinical Practicum 1. 2 Credits.
Designed to build beginning level psychiatric mental health nurse practitioner skills with patients across the lifespan and in a variety of clinical settings. Students integrate knowledge from didactic and clinical course work to provide safe and competent behavioral healthcare. Prerequisites: NURS 6220, NURS 6222 and NURS 6234.

NURS 6247. Psychiatric Mental Health Nurse Practitioner (PMHNP) Clinical Practicum 2. 2 Credits.
Designed to build psychiatric mental health nurse practitioner skills in a variety of clinical settings. Students integrate foundational knowledge from course work to provide safe and competent behavioral healthcare to individuals across the lifespan. Prerequisites: Nurs 6220, Nurs 6222, Nurs 6234 and NURS 6246.

NURS 6248. Psychiatric Mental Health Nurse Practitioner (PMHNP) Clinical Practicum 3. 3 Credits.
Developing competency in the PMHNP role. Students integrate foundational knowledge from coursework to provide safe and competent behavioral healthcare to individuals across the lifespan. Prerequisites: NURS 6220, NURS 6222, NURS 6234, NURS 6244, NURS 6245, NURS 6246 and NURS 6247.

NURS 6249. Psychotherapeutic Treatment Modalities. 3 Credits.
Evidence-based psychotherapeutic treatment modalities used by the nurse practitioner in providing behavioral health care across the lifespan. Theoretical foundations for selecting and using psychotherapeutic interventions as part of the treatment plan. Prerequisites: NURS 6220, NURS 6222, NURS 6234, NURS 6242, NURS 6243, NURS 6244, NURS 6245, NURS 6246 and NURS 6247.

NURS 6256. Intro to Palliative Care. 3 Credits.

NURS 6258. Leadership Capstone Pract I. 3 Credits.
Nursing 6258 is the first of a two-semester capstone course designed to provide a mentored practicum that offers the opportunity to apply leadership content and refine leadership abilities in a setting and practice area mutually agreed upon by the student and course faculty.

NURS 6259. Leadership Capstone Pract II. 3 Credits.
Nursing 6259 is a continuation of NURS 6258 and is designed to provide a mentored internship practicum, the opportunity to apply leadership content, and refine leadership abilities.

NURS 6260. Foundations of Coaching. 3 Credits.
Nurse coaching methodology and competencies. Leadership and therapeutic relationship skills and the theory and meta-science fundamental to each skill. Assessing readiness for change, building trust and warmth, obtaining and holding the clients agenda, visioning, awareness raising techniques, brainstorming, and goal setting.

NURS 6261. Advanced Coaching Skills. 3 Credits.
Builds on concepts introduced in NURS 6260. Multidisciplinary and nursing theories foundational to nurse coaching. Advanced coaching techniques and common coaching topics and contexts such as weight loss, stress and time management, and executive coaching. Prerequisites: NURS 6260.

NURS 6262. Leadership Coaching in Nursing. 3 Credits.
Theoretical foundations and evidence for leadership coaching in nursing; the different applications of coaching in nursing management. Executive coaching, team coaching, peer coaching, and personal career coaching. Application and evaluation of multiple models, competencies, and methodologies for nursing leadership coaching through learning activities and live demonstration. Creation of a complete evidence-based coaching strategy for a case study.

NURS 6272. HumanResrcDev/HlthProfPractice. 3 Credits.

NURS 6273. Health Info Quality & Outcomes. 3 Credits.

NURS 6274. Health Economics & Finance. 3 Credits.

NURS 6275. Leadership &Change/Health Care. 3 Credits.

NURS 6276. Foundations of Palliative Care. 3 Credits.

NURS 6277. Pain and Suffering. 3 Credits.

NURS 6278. PalliativeCare:Chronic Illness. 3 Credits.

NURS 6279. Palliative Care Practicum I. 1-4 Credits.

NURS 6280. Palliative Care Practicum II. 1-4 Credits.

NURS 6281. PC Leadership and Management. 2 Credits.

NURS 6291. AdvTopics. 1-9 Credits.

NURS 6292. Teachw/Tech.inHealthProfession. 3 Credits.

NURS 6293. Health Ed.for Indiv&Community. 3 Credits.

NURS 6294. SpirtlBelief&Pract/HlthCare. 3 Credits.

NURS 6295. Health Care Quality Process. 3 Credits.

NURS 6296. Ped Health Assess & Pharm. 1 Credit.

NURS 6297. Independent Study. 1-9 Credits.

NURS 6298. NP Clinical Completion. 1-5 Credits.

NURS 8401. Org Concepts in Nursing. 3 Credits.

NURS 8402. Knowledge Managemnt in Nursing. 3 Credits.

NURS 8403. Translating Research into Prac. 3 Credits.

NURS 8404. Research & Policy for Nursing. 3 Credits.

NURS 8405. Healthcare Quality Improvement. 3 Credits.

NURS 8406. Field Exp Adv Nursing Practice. 3 Credits.

NURS 8407. Grant Writing. 3 Credits.

NURS 8408. Topics Pharmacology. 3 Credits.

NURS 8409. Healthcare Quality Practicum. 3 Credits.
Application of quality improvement processes and patient safety theories, models, methods, and tools in health care settings to conceive and execute a quality improvement (QI) project in an organizational setting. The final deliverable is a comprehensive QI project report.

NURS 8410. Executive Presence I. 2 Credits.

NURS 8411. Executive Presence II. 2 Credits.
This is a continuation of Executive Presence I. In this course, the student will examine power shifts in leadership, revisit change as a stimulus for innovation, participate in an interactive session for individuals who can practice communicating their practicum proposals and receiving friendly feedback and constructive input from their peers, and re-evaluate the leadership development plan designed in Executive Presence I.

NURS 8412. HC Finance for Nurse Leaders. 3 Credits.

NURS 8413. Adult-Gerontology Acute Care Nurse Practitioner: Advanced Role Immersion. 3 Credits.
Students develop and integrate bedside with systems and population level competencies; role development, leadership, interdisciplinary collaboration, systems management, and evidenced-based practice are discussed and applied to concurrent clinical experiences; independent practice skills in the context of interdisciplinary teams. Prerequisites: NURS 6235, NURS 6236 and NURS 6237. Recommended background: prior enrollment in NURS 6220, NURS 6234 and NURS 6222.

NURS 8414. DNP Residency. 3 Credits.

NURS 8498. Research Project Proposal. 3 Credits.

NURS 8499. Clinical Research Project. 3 Credits.

UNDERGRADUATE PROGRAMS

Associate's programs

- Associate's Degree in Nursing Pathway to Bachelor of Science in Nursing (p. 824)
- Associate's Degree in Nursing Pathway to Bachelor of Science in Nursing and Master of Science in Nursing, Adult-Gerontology Primary Care Nurse Practitioner (p. 825)
- Associate's Degree in Nursing Pathway to Bachelor of Science in Nursing and Master of Science in Nursing, Family Nurse Practitioner (p. 826)
- Associate's Degree in Nursing Pathway to Bachelor of Science in Nursing and Master of Science in Nursing, Nurse-Midwifery (p. 827)
- Associate's Degree in Nursing Pathway to Bachelor of Arts or Bachelor of Science to Master of Science in Nursing (p. 828)

Bachelor programs

- Bachelor of Science in Nursing (p. 829)

ASSOCIATE'S DEGREE IN NURSING PATHWAY TO BACHELOR OF SCIENCE IN NURSING

A combination of associates degree in nursing (A.D.N.), course work, and courses taken as part of GW's University General Education Requirement (http://nursing.gwu.edu/sites/nursing.gwu.edu/files/downloads/BSNPrerequisiteDescriptions.pdf) allows currently licensed Registered Nurse (RN) students to complete a bachelor of science in nursing (B.S.N.) over three semesters and one summer session. Students attend part time, which allows them to continue working as professional nurses. The B.S.N. curriculum is completed through distance learning, and students complete clinical practicum rotations in the local community with faculty mentoring. Select on-campus experiences provide opportunities for students to interact with faculty members and fellow students. Upon completion of the program some credits earned may be applied toward a GW master of science in nursing degree.

Information for VA Community College Graduates
GW School of Nursing is pleased to provide guaranteed admission to students who have earned associate's degrees from accredited nursing programs at community colleges across Virginia and who meet GW's academic requirements.

Information for Montgomery (MD) Community College Graduates
GW School of Nursing is pleased to provide guaranteed admission to students who have earned associate's degrees from accredited nursing programs at Montgomery Community Colleges in Maryland and who meet GW's academic requirements.

For more information visit the (https://nursing.gwu.edu/rn-bsnmsn-take-classes-online)RN to BSN/MSN webpage. (https://nursing.gwu.edu/online-rn-bsn)

REQUIREMENTS

The following requirements must be fulfilled: 21 credits in required courses; 15 credits toward the University General Education Requirement, which is usually fulfilled by transfer of credits from the A.D.N. program; and up to 15 credits based on review of the student's professional portfolio and awarded through enrollment in NUR 4121. If fewer than 15 credits are awarded, completion of one or more of the following courses may be required, as determined by the program director: NURS 3112, NURS 3113, and NURS 3118.

Code	Title	Credits
Year One		
Semester one: fall		
NURS 6205	HealthPolicy,Quality,Political	
NURS 6203	Nursing Leadership	
Semester two: spring		
NURS 6202	Concepts in Population Health	

NURS 6207	Evidence-Based Practice for Health Care Researchers
Semester three: summer session	
NURS 4117	NPCR 6:Epidemiology&CommHealth
NURS 4119	PatientSafety&HlthCareQuality
NURS 4121	Nursing Advancement Portfolio
Year Two	
Semester four: fall	
NURS 6233	Genetics for Healthcare Providers
or NURS 6260	Foundations of Coaching

ASSOCIATE'S DEGREE IN NURSING PATHWAY TO BACHELOR OF SCIENCE IN NURSING/MASTER OF SCIENCE IN NURSING ADULT-GERONTOLOGY PRIMARY CARE NURSE PRACTITIONER

For newly licensed registered nurse (RN) graduates as well as experienced RNs without a bachelors' degree, the RN to BSN/MSN: adult-gerontology primary care nurse practitioner program prepares RNs for growth in advanced nursing practice. The program is designed to move RNs without a bachelor's degree seamlessly through the BSN program and into MSN coursework, allowing students to complete both degree programs in three years (six semesters and two summer sessions) on a part-time basis.

Students complete coursework via distance learning and faculty-mentored clinical practicum rotations in their local community. This format allows professional nurses to advance their education with access to GW's resources and expert faculty while continuing to work. In addition, students are required to attend four on campus programs:

- New Student Orientation—To assist students in their transition to GW, the School of Nursing hosts a mandatory orientation for all new students. Designed to empower students with the knowledge and tools needed to be successful in the School of Nursing, the orientation program is a vital first step toward academic success. Students become familiar with various campus academic resources, program requirements, course registration, online technology, and student expectations. They will also have the opportunity to meet fellow students, faculty members, consult with advisors, visit the campus, and tour local attractions. Orientation typically takes place the 2nd or 3rd week in August.
- NURS 6222: Advanced Health Assessment and Diagnostic Reasoning—All nurse practitioner students are expected to come to campus towards the end of the health assessment course to be tested on their history and physical examination skills in the simulation center. On-campus training is also provided utilizing GW teaching assistants. Seminars are presented that strengthen diagnostic reasoning skills. This on-campus experience typically takes place over a several day period toward the end of April.
- NURS 6225–AGPCNP II: Adolescent and Adult- All nurse practitioner students are expected to come to campus towards the end of the AGPCNP II/FNP 2 courses to be tested on their clinical reasoning skills in the simulation center. On-campus seminars include reading 12 lead EKGs, radiological interpretation, and a hands on suturing/wound care workshop. This on-campus experience typically takes place over a several day period in November or December.
- NURS 6229–AGPCNP III: Adult, Older/Frail - All nurse practitioner students are required to pass final skills assessment with standardized patients in the simulation center. This on-campus experience typically takes place over several days in April prior to graduation in May.
- Upon completion of the program students will be eligible to sit for the nationally recognized AANP or ANCC certification examination for the adult-gerontology primary care nurse practitioner role and population focus.

Please note that students are responsible for all travel costs. See the University's Visiting Campus website (http://www.gwu.edu/gw-overview).

Information for VA Community College Graduates
GW School of Nursing is pleased to provide guaranteed admission to students who have earned associate's degrees from accredited nursing programs at community colleges across Virginia and who meet GW's academic requirements.

Information for Montgomery (MD) Community College Graduates
GW School of Nursing is pleased to provide guaranteed admission to students who have earned associate's degrees from accredited nursing programs at Montgomery Community Colleges in Maryland and who meet GW's academic requirements.

For more information visit the RN to BSN/MSN program. (https://nursing.gwu.edu/online-rn-bsn)

REQUIREMENTS

For the **Bachelor of Science in Nursing** portion of the program the following requirements must be fulfilled: 21 credits in required courses; 15 credits toward the University General Education Requirement, which is usually fulfilled by transfer

of credits from the ADN program; and up to 15 credits based on review of the student's professional portfolio and awarded through enrollment in NUR 4121. If fewer than 15 credits are awarded, completion of one or more of the following courses may be required, as determined by the program director: NURS 3112, NURS 3113, and NURS 3118.

For the **Master of Science in Nursing in the field of adult-gerontology primary care nurse practitioner** portion of the program **t**he following requirements must be fulfilled: 33 credits in required courses and completion of 625 clinical hours.

Program Requirements

Required for BSN	
NURS 4117	NPCR 6:Epidemiology&CommHealth
NURS 4119	PatientSafety&HlthCareQuality
NURS 4121	Nursing Advancment Portfolio
NURS 6202	Concepts in Population Health
NURS 6203	Nursing Leadership
NURS 6205	HealthPolicy,Quality,Political
NURS 6207	Evidence-Based Practice for Health Care Researchers
NURS 6233	Genetics for HC Providers
Required for MSN	
NURS 6208	Biostatistics for Health Care Research
NURS 6220	Advanced Physiology and Pathophysiology
NURS 6222	Advanced Health Assessment and Diagnostic Reasoning
NURS 6224	Adult/Gerontology Primary Care Nurse Practitioner 1, Practice Introduction
NURS 6225	Adult/Gerontology Primary Care Nurse Practitioner 2, Adolescent & Adult
NURS 6229	Adult/Gerontology Primary Care Nurse Practitioner 3, Adult, Older/Frail
NURS 6234	Advanced Pharm for Nursing

ASSOCIATE'S DEGREE IN NURSING PATHWAY TO BACHELOR OF SCIENCE IN NURSING/MASTER OF SCIENCE IN NURSING FAMILY NURSE PRACTITIONER

For newly licensed registered nurse (RN) graduates as well as experienced RNs without a bachelors' degree, the RN to BSN/MSN: family nurse practitioner program prepares RNs for growth in advanced nursing practice. The program is designed to move RNs without a bachelor's degree seamlessly through the B.S.N. program and into M.S.N. coursework, allowing students to complete both degree programs in three years (six semesters and two summer sessions) on a part-time basis.

Students complete coursework via distance learning and faculty-mentored clinical practicum rotations in their local community. This format allows professional nurses to advance their education with access to GW's resources and expert faculty while continuing to work. In addition, students are required to attend four on campus events:

- New Student Orientation—To assist students in their transition to GW, the School of Nursing hosts a mandatory orientation for all new students. Designed to empower students with the knowledge and tools needed to be successful in the School of Nursing, the orientation program is a vital first step toward academic success. Students become familiar with various campus academic resources, program requirements, course registration, online technology, and student expectations. They will also have the opportunity to meet fellow students, faculty members, consult with advisors, visit the campus, and tour local attractions. Orientation typically takes place the 2nd or 3rd week in August.
- NURS 6222: Advanced Health Assessment and Diagnostic Reasoning—All nurse practitioner students are expected to come to campus towards the end of the health assessment course to be tested on their history and physical examination skills in the simulation center. On-campus training is also provided utilizing GW teaching assistants. Seminars are presented that strengthen diagnostic reasoning skills. This on-campus experience typically takes place over a several day period toward the end of April.
- NURS 6231–FNP 2: Lifespan Primary Care/Diagnosis/Management. All nurse practitioner students are expected to come to campus towards the end of the FNP 2 course to be tested on their clinical reasoning skills in the simulation center. On-campus seminars include reading 12 lead EKGs, radiological interpretation, and a hands on suturing/wound care workshop. This on-campus experience typically takes place over a several day period in November or December.

- NURS 6232- FNP 3: Professional Issues/Diagnosis/Management - All nurse practitioner students are required to pass final skills assessment with standardized patients in the simulation center. This on-campus experience typically takes place over several days in April prior to graduation in May.
- Upon completion of the program students will be eligible to sit for the nationally recognized AANP or ANCC certification examination for the Family Nurse practitioner role and population focus.

Please note that students are responsible for all travel costs. See the University's Visiting Campus website (http://www.gwu.edu/gw-overview).

ASSOCIATE'S DEGREE IN NURSING PATHWAY TO BACHELOR OF SCIENCE IN NURSING/MASTER OF SCIENCE IN NURSING NURSE MIDWIFERY

The Associate's Degree in Nursing Pathway to Bachelor of Science in Nursing/Master of Science in Nursing (ADN to BSN/MSN) in the field of nurse-midwifery program is a collaboration between GW and Shenandoah University (SU). The program applies previously completed ADN credits toward curriculum requirements for the BSN degree, allowing students to earn both the BSN and MSN with a seamless, three-year program of study.

Coursework for the ADN to BSN/MSN program is completed via distance learning, a format that allows professional nurses to advance their education while continuing to work. Students have access to GW and SU resources and expert faculty and attend select on-campus programs. Core-level courses required for the BSN and MSN are completed through GW, which awards the two degrees. The nurse-midwifery

didactic and clinical components of the curriculum are fulfilled through SU, which awards a Certificate of Endorsement in Nurse-Midwifery. Program graduates are eligible to sit for the national certification exam given by the American Midwifery Certification Board.

The Nurse-Midwifery Program at Shenandoah University is fully accredited by the Accreditation Commission for Midwifery Education.

Visit the ADN Pathway to BSN/MSN Nurse-Midwifery website (https://nursing.gwu.edu/nurse-midwifery) (http://nursing.gwu.edu/adn-bsnmsn-concentration-nurse-midwifery)for detailed program information.

Information for VA Community College Graduates
GW School of Nursing is pleased to provide guaranteed admission to students who have earned associate's degrees from accredited nursing programs at community colleges across Virginia and who meet GW's academic requirements.

Information for Montgomery (MD) Community College Graduates
GW School of Nursing is pleased to provide guaranteed admission to students who have earned associate's degrees from accredited nursing programs at Montgomery Community Colleges in Maryland and who meet GW's academic requirements.

For more information visit the (http://nursing.gwu.edu/adn-pathways-online)ADN Pathways webpage. (https://nursing.gwu.edu/online-rn-bsn)

REQUIREMENTS

The following requirements must be fulfilled: 53 credits, including 34 credits in required courses taken at GW and 19 credits of required courses taken at Shenandoah University. In addition, for the Bachelor of Science in Nursing portion of the program, students must complete 15 credits toward the University General Education Requirement, which is usually fulfilled by transfer of credits from the associate degree program; and up to 15 credits based on review of the student's professional portfolio and awarded through enrollment in NUR 4121. If fewer than 15 credits are awarded under NURS 4121, completion of one or more of the following courses may be required, as determined by the program director: NURS 3112, NURS 3113, and NURS 3118

Program Requirements

Required for BSN-GW	
NURS 4117	NPCR 6:Epidemiology&CommHealth
NURS 4119	PatientSafety&HlthCareQuality (course has an on-campus component)
NURS 4121	Nursing Advancment Portfolio
NURS 6202	Concepts in Population Health
NURS 6203	Nursing Leadership
NURS 6205	HealthPolicy,Quality,Political
NURS 6207	Evidence-Based Practice for Health Care Researchers
NURS 6233	Genetics for HC Providers
Required for MSN-GW	
NURS 6208	Biostatistics for Health Care Research
NURS 6220	Advanced Physiology and Pathophysiology
NURS 6222	Advanced Health Assessment and Diagnostic Reasoning (course has an on-campus component)
NURS 6234	Advanced Pharm for Nursing
Required for Nurse-Midwifery certificate-SU	
NM 610 - Primary Care of Women (3)	
NM 620 - Comprehensive Antepartal Care (3)	
NM 630 - Midwifery Practicum (3)	
NM 640 - Comprehensive Perinatal Care (3)	
NM 651 - Integrated Midwifery Internship (5)	
NM 652 - Evidence Based Practice Project (1)	
NM 660 - Advanced Nurse-Midwifery Role Development (1)	

ASSOCIATE'S DEGREE IN NURSING PATHWAY TO MASTER OF SCIENCE IN NURSING

ADN to MSN Bridge

The Associate Degree in Nursing to Master of Science in Nursing bridge option is designed for nurses with an A.D.N. and a B.A. or B.S. in a non-nursing field who wish to pursue graduate study. Students go straight into a master's program by taking a "bridge course," NURS 3110 Transition into the Nursing Profession , the summer before matriculation in the M.S.N. program.

The A.D.N. to M.S.N. bridge option is available in the fields listed below. For more information visit the program website (http://nursing.gwu.edu/adn-msn-bridge):

Adult-Gerontology Primary Care Nurse Practitioner (https://nursing.gwu.edu/node/123)
Family Nurse Practitioner (https://nursing.gwu.edu/node/125)

Nurse-Midwifery (with Shenandoah University) (https://nursing.gwu.edu/nurse-midwifery)
Nursing Leadership and Management (https://nursing.gwu.edu/node/127)

BACHELOR OF SCIENCE IN NURSING

Through the school's accelerated bachelor of science in nursing (A.B.S.N.) program, students who already have a bachelor's degree in a non-nursing field can pursue professional nursing. The Veterans B.S.N. (V.B.S.N.) program is an option for military veterans seeking to capitalize on their military training and experience, for which they are eligible to receive academic credit. These 15-month, full-time programs draw upon students' previous knowledge from the natural and behavioral sciences, the humanities, and nursing theory to critically analyze and synthesize responses to health problems and provide appropriate nursing interventions. Taught to practice in a multicultural world, students learn to use the nursing process to support and promote health in diverse individuals, families, groups, and communities.

Graduates of the A.B.S.N. and V.B.S.N. degree programs are equipped with the knowledge, skills, and practical experience needed to enter the nursing profession with high ethical, legal, and professional values. What's more, upon completion, students will have earned 12 graduate credits, with at least 9 graduate credits eligible to be applied to any of GW's master of science in nursing (M.S.N.) degree programs within five years.

Housed at GW's Virginia Science and Technology Campus, the programs offer the unique opportunity to put theory into practice through the school's Skills and Simulation Laboratory (http://nursing.gwu.edu/skills-and-simulation-laboratories), a sophisticated and innovative learning environment in which students gain hands-on experience even before entering a clinical facility.

As the curriculum advances, students are placed in clinical rotations in top-rated facilities in the greater Washington, D.C., area, including Northern Virginia. This gives students highly valued exposure to medical and surgical nursing, obstetrics, pediatrics, psychiatric nursing, and community health. The combination of learning in a traditional classroom setting, in a premier simulation lab, through online courses, and in myriad clinical environments makes GW's A.B.S.N. and V.B.S.N. programs exceptional choices for aspiring nurses.

REQUIREMENTS

The followed requirements must be fulfilled: 60 credit hours including the required curriculum and at least 700 clinical hours; clinical hours are a component of some required courses.

Code	Title	Credits
Required		
NURS 3110	Transition into the Nursing Profession	
NURS 3111	Foundations of Health Assessment	
NURS 3112	Nursing Practice and Clinical Reasoning 1: Adult and Aging Acute and Chronic Illness	
NURS 3113	Clinical Skills Lab: Adult Medical-Surgical 1	
NURS 3114	Nursing Practice and Clinical Reasoning 2: Advanced Adult Medical-Surgical	
NURS 3115	Clinical Skills Lab: Adult Medical-Surgical 2	
NURS 3116	Nursing Practice and Clinical Reasoning 3: Psychiatric Mental Health	
NURS 3117	NCPR: 4 Maternity/Women Hlth	
NURS 3118	Pharmacology 1	
NURS 3119	Pathophysiology	
NURS 4116	NPCR 5: Children & Families

NURS 6204	Health Information and Technology *	
NURS 6205	HealthPolicy,Quality,Political *	
NURS 6207	Evidence-Based Practice for Health Care Researchers *	

*May be applied to the Master of Science in Nursing programs at The George Washington University.

GRADUATE PROGRAMS

Master's programs

- Master of Science in Nursing in the field of Adult-gerontology acute care nurse practitioner (p. 830)
- Master of Science in Nursing in the field of Adult-gerontology primary care nurse practitioner (p. 831)
- Master of Science in Nursing in the field of Family nurse practitioner (p. 832)

- Master of Science in Nursing in the field of Nurse-midwifery (p. 834) (collaborative program between GW School of Nursing (https://nursing.gwu.edu) and Shenandoah University (http://www.su.edu/nursing/nursing-graduate-programs/nurse-midwifery-programs))
- Master of Science in Nursing in the field of Nursing Leadership and Management (p. 835)

Combined programs

- Dual Master of Science in Nursing in the field of adult-gerontology acute care nurse practitioner and Doctor of Nursing Practice (p. 836)
- Dual Master of Science in Nursing in the field of adult-gerontology primary care nurse practitioner and Doctor of Nursing Practice (visit the School of Nursing website (https://nursing.gwu.edu) for more information)
- Dual Master of Science in Nursing in the field of family nurse practitioner and Doctor of Nursing Practice (visit the School of Nursing website (https://nursing.gwu.edu) for more information)

Doctor of Nursing Practice program

- Doctor of Nursing Practice (p. 837)
  - Education concentration
  - Executive leadership
  - Family specialty for nurse practitioners
  - Health care quality
  - Palliative care specialty for nurse practitioners

MASTER OF SCIENCE IN NURSING IN THE FIELD OF ADULT-GERONTOLOGY ACUTE CARE NURSE PRACTITIONER

The master of science in nursing (M.S.N.) in the field of adult-gerontology acute care nurse practitioner (AGACNP) degree program is separate and distinct from the adult-gerontology primary care nurse practitioner (AGPCNP) program. The AGACNP program prepares nurse practitioners to provide care for acutely, critically, or complex chronically ill patients across the continuum of care. The principle focus of the program is on delivering care in hospital-based or urgent care centers. In contrast, the AGPCNP program prepares nurse practitioners (NPs) for practice in primary care settings.

Master's and doctoral students take program-specific courses following completion of the master's core curriculum. All courses are designed to satisfy the American Association of Colleges of Nursing (AACN) Essentials in Master's Education in Nursing (AACN, 2011) and Doctorate of Nursing Practice Essentials (AACN, 2006) curriculum guidelines. In addition, program-specific courses are designed to meet specifications described in the Adult-Gerontology Acute Care Nurse Practitioner Competencies document (AACN, 2012) and prepare students to be eligible to sit for the national certification examination for adult-gerontology primary care nurse practitioners. The program-specific courses include some on-campus components, including evaluations using standardized patients, simulation, and a clinical immersion experience.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the School of Nursing website (https://nursing.gwu.edu) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits, including 9 credits in professional core courses, 6 credits in research courses, 33 credits in field-specific courses, and completion of 625 clinical hours.

Program Requirements

Code	Title	Credits

MASTER OF SCIENCE IN NURSING IN THE FIELD OF ADULT-GERONTOLOGY PRIMARY CARE NURSE PRACTITIONER

Application to the MSN program

Applicants to the Master of Science in Nursing programs must have an earned Bachelor's degree from an accredited institution and a current license as a registered nurse with a GPA of 3.0 or higher. A Bachelor of Science in Nursing is preferred. RNs with a Bachelor's degree in another field may apply and, if accepted, will be required to take a bridge course the summer prior to the start of their studies.

Students may apply for admission if they will receive their Bachelor's degree before the first day of classes at GW. Applicants must complete the required applications before the deadline and notify the Admissions Office of their current student status. Admitted students will be required to submit a final transcript reflecting degree conferral before the first day of classes at GW. Satisfactory completion of NCLEX (National Council Licensure Examination for Registered Nurses) is required in order to continue in the Masters programs. It is recommended that applicants without relevant nursing work experience attend part time while working as a registered nurse.

Applicants must have a minimum GPA of 3.0 in all coursework, though the admission committee reserves the right to interview applicants who have less than a 3.0 GPA for either undergraduate or graduate studies. The GRE is not required for this program.

Degree Requirements

In addition to fulfilling general admission requirements, applicants to Master of Science in Nursing programs must have a BSN from an accredited institution, normally with a minimum GPA of 3.0 or higher, and a current RN license. Applicants that are registered nurses with a bachelor's degree in a related field may be admitted with the condition that they complete a Nursing bridge course prior to the start of their academic program.

Depending upon the program chosen, MSN credit requirements vary from 36 to 48 credit hours. All MSN programs require 9 credits of professional core courses (NURS 6202 Concepts in Population Health,NURS 6203 Nursing Leadership, NURS 6205 HealthPolicy,Quality,Political) and 6 credits of research courses (NURS 6270 , NURS 6271). Field-specific course requirements follow, with credit indicated in parentheses in the case of courses offered for variable credit.

The master of science in nursing degree in the field of adult-gerontology primary care nurse practitioner (AGPCNP) program provides the theoretical and practical foundations for nurses to expand their scope of practice and to become leaders in their roles as advanced practice nurses providing care for patients across the adult age continuum: the adolescent patient (12 and up), adult patient, older adult patient, and frail elderly patient.

Students complete the coursework online via distance learning and the clinical practicum rotations in their local community with faculty mentoring. The curriculum integrates research, policy, technology, simulation, and evidence-based nursing practice with diagnostic reasoning and clinical judgment to solve real-world health care problems. The distance-based format allows professional nurses to advance their education with access to GW's resources and expert faculty while continuing to work. Students may choose to enroll in the program on a full- or part-time basis.

Upon completion of the program students are eligible to sit for the nationally recognized AANP or ANCC certification examination for the Adult-Gerontology Primary Care Nurse Practitioner role and population focus.

Students in the AGPCNP option are required to complete four on-campus components.

- New Student Orientation—To assist in the transition to GW, the School of Nursing will host a mandatory orientation for all new students. The New Student Orientation is a vital first step towards academic success. It is designed to empower students with the knowledge and tools needed to be successful in the School of Nursing. Students become familiar with various campus academic resources, program requirements, course registration, online technology, and student expectations. Students will have the opportunity to meet other students, faculty members, consult with advisors, visit the campus, and tour local attractions. Orientation typically takes place the 2nd or 3rd week in August.
- NURS 6222—Advanced Health Assessment and Diagnostic Reasoning --All nurse practitioner students are expected to come to campus towards the end of the health assessment course to be tested on history and physical examination skills in the simulation center. On-campus training is also provided utilizing GW teaching assistants. Seminars are presented that strengthen diagnostic reasoning skills. This on-campus experience typically takes place over a 4-5 day period towards the end of April.
- NURS 6225 – AGPCNP II: Adolescent and Adult and NURS 6231-FNP 2: Lifespan Primary Care/Diagnosis/Management —All nurse practitioner students are expected to come to campus towards the end of the AGPCNP II/FNP 2 courses to be tested on clinical reasoning skills in the simulation center. On-campus seminars include reading 12 lead EKGs, radiological interpretation, and a hands on suturing/wound care workshop. This on-campus experience typically takes place over a 4-5 day period in early November.
- NURS 6229 – AGPCNP III: Adult, Older/Frail (or) NURS 6232 - FNP 3: Professional Issues/Diagnosis/Management—All

nurse practitioner students are required to pass final skills assessment with standardized patients in the simulation center. This on-campus experience typically takes place over a 2-3 day period in April prior to graduation in May.

Please note that students are responsible for all travel-related expenses. See the Visiting Campus (http://www.gwu.edu/visiting-campus) website for more information about visiting GW.

Visit the program website (http://nursing.gwu.edu/adult-nurse-practitioner) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits, including 9 credits in professional core courses, 6 credits in research courses, 30 credits in field-specific courses, a 3-credit elective course, and completion of 625 clinical hours.

Program Requirements

Code	Title	Credits
Professional core		
NURS 6202	Concepts in Population Health	
NURS 6203	Nursing Leadership	
NURS 6205	HealthPolicy,Quality,Political

NURS 6234	Advanced Pharm for Nursing	
Electives		

A 3-credit elective course.

MASTER OF SCIENCE IN NURSING IN THE FIELD OF FAMILY NURSE PRACTITIONER

Application to the MSN program

Applicants to the Master of Science in Nursing programs must have an earned Bachelor's degree from an accredited institution and a current license as a registered nurse with a GPA of 3.0 or higher. A Bachelor of Science in Nursing is preferred. RNs with a Bachelor's degree in another field may apply and, if accepted, will be required to take a bridge course the summer prior to the start of their studies.

Students may apply for admission if they will receive their Bachelor's degree before the first day of classes at GW. Applicants must complete the required applications before the deadline and notify the Admissions Office of their current student status. Admitted students will be required to submit a final transcript reflecting degree conferral before the first day of classes at GW. Satisfactory completion of NCLEX (National Council Licensure Examination for Registered Nurses) is required in order to continue in the Masters programs. It is recommended that applicants without relevant nursing work experience attend part time while working as a registered nurse.

Applicants must have a minimum GPA of 3.0 in all coursework, though the admission committee reserves the right to interview applicants who have less than a 3.0 GPA for either undergraduate or graduate studies. The GRE is not required for this program.

Degree Requirements

In addition to fulfilling general admission requirements, applicants to Master of Science in Nursing programs must have a BSN from an accredited institution, normally with a minimum GPA of 3.0 or higher, and a current RN license. Applicants that are registered nurses with a bachelor's degree in a related field may be admitted with the condition that they complete a Nursing bridge course prior to the start of their academic program.

Depending upon the program chosen, MSN credit requirements vary from 36 to 48 credit hours. All MSN programs require 9 credits of professional core courses (NURS 6202 Concepts in Population Health,NURS 6203 Nursing Leadership, NURS 6205 HealthPolicy,Quality,Political) and 6 credits of research courses (NURS 6270 , NURS 6271). Field-specific course requirements follow, with credit indicated in parentheses in the case of courses offered for variable credit.

The master of science in nursing in the field of family nurse practitioner (FNP) degree program prepares registered nurses

for leadership in primary care to families and individuals of all ages.

This specialty stresses the integration of research and nursing practice with a strong emphasis on solving real-world problems. The curriculum provides the theoretical and practical foundations for nurses to expand their scope of practice. Simultaneous clinical experiences ensure that students meet all criteria to sit for the nationally recognized AANP or ANCC certification examination for the Family Nurse Practitioner role and population focus. Students may choose to enroll in the program on a full- or part-time basis.

Students in the FNP option are required to complete four on-campus components:

- New Student Orientation: To assist in the transition to GW, the School of Nursing hosts a mandatory orientation for all new students. Designed to empower students with the knowledge and tools needed to be successful in the School of Nursing, the orientation program is a vital first step toward academic success. Students become familiar with various campus academic resources, program requirements, course registration, online technology, and student expectations. They also have the opportunity to meet fellow students and faculty members, consult with advisors, become familiar with the campus, and tour local attractions. Orientation typically takes place the second or third week in August.
- NURS 6222 Advanced Health Assessment and Diagnostic Reasoning: All students are expected to come to campus towards the end of the health assessment course to be tested on their history and physical examination skills in the simulation center. On-campus training is provided using GW teaching assistants, and seminars that strengthen diagnostic reasoning skills are presented. This on-campus experience typically takes place over a four- to five-day period towards the end of April.
- NURS 6225 Adult/Gerontology Primary Care Nurse Practitioner 2, Adolescent & Adult and NURS 6231 Family Nurse Practitioner 2, Lifespan Primary Care/Diagnosis/Management: All students are expected to come to campus towards the end of the AGPCNP II/FNP two courses to be tested on their clinical reasoning skills in the simulation center. On-campus seminars include reading 12 lead EKGs, radiological Interpretation, and a hands on suturing/wound care workshop. This on-campus experience typically takes place over a four- to five-day period in early November.
- NURS 6229 Adult/Gerontology Primary Care Nurse Practitioner 3, Adult, Older/Frail or NURS 6232 Family Nurse Practitioner 3, Professional Issues/Diagnosis/Management: All students are required to pass final skills assessment with standardized patients in the simulation center. This on-campus experience typically takes place over a two- to three day-period in April prior to graduation in May.

Please note that students are responsible for all travel-related expenses. See the Visiting Campus (http://www.gwu.edu/visiting-campus) website for more information about visiting GW.

Visit the Program website (http://nursing.gwu.edu/adult-nurse-practitioner) for additional information.

The School of Nursing also offers a Family Nurse Practitioner program for professionals holding a master's degree in nursing. Visit the certificate program website (http://nursing.gwu.edu/adult-nurse-practitioner-certificate) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits including, 6 credits in professional core courses, 9 credits in research courses, 33 credits in field-specific courses, and completion of 700 clinical hours.

MASTER OF SCIENCE IN NURSING IN THE FIELD OF NURSE-MIDWIFERY

Application to the MSN program

Applicants to the Master of Science in Nursing programs must have an earned Bachelor's degree from an accredited institution and a current license as a registered nurse with a GPA of 3.0 or higher. A Bachelor of Science in Nursing is preferred. RNs with a Bachelor's degree in another field may apply and, if accepted, will be required to take a bridge course the summer prior to the start of their studies.

Students may apply for admission if they will receive their Bachelor's degree before the first day of classes at GW. Applicants must complete the required applications before the deadline and notify the Admissions Office of their current student status. Admitted students will be required to submit a final transcript reflecting degree conferral before the first day of classes at GW. Satisfactory completion of NCLEX (National Council Licensure Examination for Registered Nurses) is required in order to continue in the Masters programs. It is recommended that applicants without relevant nursing work experience attend part time while working as a registered nurse.

Applicants must have a minimum GPA of 3.0 in all coursework, though the admission committee reserves the right to interview applicants who have less than a 3.0 GPA for either undergraduate or graduate studies. The GRE is not required for this program.

Degree Requirements

In addition to fulfilling general admission requirements, applicants to Master of Science in Nursing programs must have a BSN from an accredited institution, normally with a minimum GPA of 3.0 or higher, and a current RN license. Applicants that are registered nurses with a bachelor's degree in a related field may be admitted with the condition that they complete a Nursing bridge course prior to the start of their academic program.

Depending upon the program chosen, MSN credit requirements vary from 36 to 48 credit hours. All MSN programs require 9 credits of professional core courses (NURS 6202 Concepts in Population Health,NURS 6203 Nursing Leadership, NURS 6205 HealthPolicy,Quality,Political) and 6 credits of research courses (NURS 6270 , NURS 6271). Field-specific course requirements follow, with credit indicated in parentheses in the case of courses offered for variable credit.

The master of science in nursing in the field of nurse-midwifery program is a collaboration between GW and Shenandoah University (SU). The program prepares graduates to be eligible for the American Midwifery Certification Board's national certification exam. The nurse-midwifery degree program at SU is fully accredited by the Accreditation Commission for Midwifery Education.

Core courses required for the MSN are completed through GW, which awards the MSN degree, while the nurse-midwifery didactic and clinical component of the curriculum is fulfilled through SU, which awards the Postgraduate Certificate in Midwifery. A versatile distance learning format allows professional nurses to advance their education while continuing to work,and provides students with access to the resources and experts at GW and SU. In addition, there are selected on-campus sessions for skills training and education as well as clinical practicums in sites across the country. Students may choose to enroll in the program on a full- or part-time basis.

Visit the program website (http://nursing.gwu.edu/msn-concentration-nurse-midwifery) for additional information.

REQUIREMENTS

MASTER OF SCIENCE IN NURSING IN THE FIELD OF NURSING LEADERSHIP AND MANAGEMENT

Application to the MSN program

Applicants to the Master of Science in Nursing programs must have an earned Bachelor's degree from an accredited institution and a current license as a registered nurse with a GPA of 3.0 or higher. A Bachelor of Science in Nursing is preferred. RNs with a Bachelor's degree in another field may apply and, if accepted, will be required to take a bridge course the summer prior to the start of their studies.

Students may apply for admission if they will receive their Bachelor's degree before the first day of classes at GW. Applicants must complete the required applications before the deadline and notify the Admissions Office of their current student status. Admitted students will be required to submit a final transcript reflecting degree conferral before the first day of classes at GW. Satisfactory completion of NCLEX (National Council Licensure Examination for Registered Nurses) is required in order to continue in the Masters programs. It is recommended that applicants without relevant nursing work experience attend part time while working as a registered nurse.

Applicants must have a minimum GPA of 3.0 in all coursework, though the admission committee reserves the right to interview applicants who have less than a 3.0 GPA for either undergraduate or graduate studies. The GRE is not required for this program.

Degree Requirements

In addition to fulfilling general admission requirements, applicants to Master of Science in Nursing programs must have a BSN from an accredited institution, normally with a minimum GPA of 3.0 or higher, and a current RN license. Applicants that are registered nurses with a bachelor's degree in a related field may be admitted with the condition that they complete a Nursing bridge course prior to the start of their academic program.

Depending upon the program chosen, MSN credit requirements vary from 36 to 48 credit hours. All MSN programs require 9 credits of professional core courses (NURS 6202 Concepts in Population Health,NURS 6203 Nursing Leadership, NURS 6205 HealthPolicy,Quality,Political) and 6 credits of research courses (NURS 6270 , NURS 6271). Field-specific course requirements follow, with credit indicated in parentheses in the case of courses offered for variable credit.

The master of science in nursing in the field of nursing leadership and management degree program is designed to prepare graduates for upper-level positions in the field by enhancing the depth and breadth of the practicing clinical professional's knowledge and skills. The program focuses on leadership development by training nurses to think and act strategically, participate in policy decisions, and lead organizations through change and improvement.

Students complete the coursework online via distance learning. This distance-based format allows professional nurses to advance their education with access to GW's resources and expert faculty while continuing to work full-time. In addition, students attend select on-campus experiences to interact with faculty and fellow students. Students may choose to enroll in the program on a full- or part-time basis.

Visit the program website (http://nursing.gwu.edu/nursing-leadership-management) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits including 9 credits in professional core courses, 6 credits in research courses, and 21 credits in field-specific courses.

Program Requirements

Professional core	
NURS 6202	Concepts in Population Health
NURS 6203	Nursing Leadership
NURS 6205	HealthPolicy,Quality,Political
Research	

NURS 6207	Evidence-Based Practice for Health Care Researchers
NURS 6208	Biostatistics for Health Care Research
Field-specific	
NURS 6204	Health Info and Technology
NURS 6241	The Health Care Enterprise
NURS 6258	Leadership Capstone Pract I
NURS 6259	Leadership Capstone Pract II
NURS 6262	Leadership Coaching in Nursing
NURS 6274	Health Economics & Finance
NURS 6295	Health Care Quality Process

DUAL MASTER OF SCIENCE IN NURSING IN THE FIELD OF ADULT-GERONTOLOGY ACUTE CARE NURSE PRACTITIONER AND DOCTOR OF NURSING PRACTICE

The master of science in nursing (M.S.N.) in the field of adult-gerontology acute care nurse practitioner (AGACNP) degree program is separate and distinct from the adult-gerontology primary care nurse practitioner program (p. 831) (AGPCNP) program. The AGACNP program prepares nurse practitioners to provide care for acutely, critically, or complex chronically ill patients across the continuum of care. The principle focus of the program is on delivering care in hospital-based or urgent care centers. In contrast, the AGPCNP program prepares nurse practitioners (NPs) for practice in primary care settings.

The AGACNP program can be pursued as part of a dual degree program that awards the master of science in nursing (M.S.N.) mid-program and a doctor of nursing practice (http://bulletin.gwu.edu/nursing/doctor-nursing-practice) (D.N.P.) degree upon completion. Students take the D.N.P. core courses in the final semesters of the program. All students must have an earned bachelor's degree to enter the program and complete the M.S.N. core courses at the beginning of their graduate-level program of study.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the School of Nursing website (https://nursing.gwu.edu) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 81 credits, including 78 credits in required courses and a 3-credit elective course.

Code	Title	Credits

NURS 8499	Clinical Research Project	

Electives
One 3-credit elective course.

DOCTOR OF NURSING PRACTICE

An alternative to research-focused doctoral programs, the doctor of nursing practice (D.N.P.) advances professional nursing roles in clinical practice and nursing leadership and management. It is designed to develop leaders in health care at the local and national levels. Graduates can incorporate health policy, knowledge of information technology, evidence based practice, business principles, collaboration, health systems, and health policy into practice. A clinical research project immerses students in a practice environment that lays the foundation for future scholarship and success in the nursing field. Students may enter either at the post-bachelor's or post-master's level.

Visit the program website (https://nursing.gwu.edu/doctor-nursing-practice-dnp-program) for more information.

REQUIREMENTS

Program Options

POST-BACHELOR'S OPTIONS

- Doctor of Nursing Practice–Family Nurse Practitioner
- Doctor of Nursing Practice–Adult-Gerontology Primary Care Nurse Practitioner

POST-MASTER'S OPTIONS

- Doctor of Nursing Practice
- Doctor of Nursing Practice–Education Concentration
- Doctor of Nursing Practice–Executive Leadership
- Doctor of Nursing Practice–Family Specialty for Nurse Practitioners
- Doctor of Nursing Practice–Health Care Quality
- Doctor of Nursing Practice–Palliative Care Specialty for Nurse Practitioner

Program Requirements

Students who enter the D.N.P. program at the post-master's level must complete 36 credits of doctoral work. Students who enter the program at the post-bachelor's level must complete the credit requirements for their concentration (adult gerontology primary care nurse practitioner or family nurse practitioner) before beginning doctoral coursework. Students pursuing a Post-Graduate APRN Certificate: FSNP must complete 500 clinical hours

COLLEGE OF PROFESSIONAL STUDIES

Dean A. Eskandarian
Associate Deans A. Ashkar, J. Prostko

The College of Professional Studies (CPS) offers an expanding range of degree programs leading to associate's, bachelor's, and master's degrees in professional studies, along with a variety of certificate programs.

CPS's innovative programs are typically co-developed through collaboration among University content specialists and outside partners—government agencies, professional associations, consulting organizations, and business and industry leaders.

Programs draw from multiple academic disciplines and are delivered in flexible formats: face-to-face on campus, through distance learning, or a blend of both.

By combining University faculty experts with accomplished practitioners, CPS is a catalyst for academic innovation, constructing credentials for the workforce that uphold the University's rigorous standards of academic excellence and respond to the needs of a wide variety of professionals. Professional studies degree and certificate programs are also offered to organizational clients under contract and can be presented in flexible formats, including series of short classroom-based modules and distance learning.

New programs not included in this bulletin may be found at the College of Professional Studies website (http://www.cps.gwu.edu).

CPS manages facilities and services for off-campus programs offered by other schools of the University. The staff of instruction includes members of the full-time faculty of the University and academically qualified adjunct faculty from the professional community. All University off-campus offerings in Maryland are approved by the Maryland State Board for Higher Education; those in Virginia are certified by the State Council of Higher Education for Virginia.

REGULATIONS

- **Enrollment Status (p. 843)**
- **Time Limits (p. 843)**
- **Scholarship Requirements (p. 843)**
- **Grade of F (p. 844)**
- **Incompletes (p. 844)**
- **Transfer of Credit (p. 844)**
- **Provisional Admission (p. 844)**
- **Readmission (p. 844)**
- **Withdrawing From a Course (p. 845)**
- **Academic Integrity (p. 845)**

Enrollment Status

Once a student begins a degree or certificate program, he or she is expected to be enrolled continuously and actively engaged in fulfilling the requirements for the degree each semester of the academic year until the degree is conferred or certificate completed. For the fall and spring semesters, students must register for one or more credits to maintain enrollment status. A student who must interrupt active pursuit of the degree or certificate may petition the Dean, through the Program Director, for a leave of absence for a specified period of time, generally limited to one calendar year. If the petition is approved, the student must register for Leave of Absence in each fall and spring semester, following regular registration procedures. Students who discontinue their studies without being granted a leave of absence and students granted leaves who do not return to active study at the close of the period of approved absence must apply for readmission and are subject to the regulations and requirements then in force.

Time Limits

A full-time student is allowed a maximum of three calendar years from the date of the first registration as a degree student (excluding time spent enrolled exclusively in English for Academic Purposes courses) to complete all degree requirements; a part-time student is allowed a maximum of five calendar years. The time limit does not include any period of registration as a non-degree student before admission to degree candidacy or any period spent on approved leave of absence. Students who do not complete degree requirements within the time allowed will have their degree candidate status terminated; such students may be readmitted to degree candidate status under conditions specified by the Program Director and approved by the Dean.

Scholarship Requirements

Undergraduate students must maintain a minimum cumulative grade-point average of 2.0. and graduate students must maintain a minimum grade-point average of 3.0. If a student's GPA falls below the required minimum, he or she will receive

an academic warning and will be allowed one semester in which to raise the GPA to the required minimum; any such student who does not raise his or her GPA to the required minimum in one semester will be dismissed from the program. If it is mathematically impossible for the student's GPA to reach the required minimum in one semester, he or she will be dismissed from the program without warning.

See Grades under University Regulations (p. 21) for undergraduate and graduate grading systems.

Grade of F

A student who receives a grade of *F* is subject to dismissal from the program. If the student wishes to remain enrolled, he or she must present cause for consideration by the Program Director and to the Dean as to why continued study should be permitted. A student who receives a grade of *F*, if permitted to remain in the program, must repeat the course and achieve a passing grade as well as maintain the minimum required GPA; however, once a grade of *F* has been received it remains a part of the student's permanent record and is calculated into the grade-point average. Failure to receive permission to remain in the program and retake the failed course or achieve a passing grade after having been permitted to repeat a failed course will result in dismissal from the program.

Incompletes

The symbol *I* (Incomplete) indicates that a satisfactory explanation has been given to the instructor for the student's inability to complete the required coursework during the semester in which the course was taken. At the discretion of the instructor, the symbol *I* may be recorded if a student, for reasons beyond the student's control, is unable to complete the work of the course, and if the instructor is informed of, and approves, such reasons before the date when grades must be reported. This symbol may be used only if the student's prior performance and class attendance in the course have been satisfactory. Any failure to complete the work of a course that is not satisfactorily explained to the instructor before the date when grades must be reported will be graded *F,* Failure. If acceptable reasons are later presented to the instructor, that instructor may initiate an appropriate grade change. The instructor and student must sign an Incomplete Agreement, available through the Office of the Dean, which sets forth the requirements and due dates for successful completion of the course. The coursework must be completed within the designated time period agreed upon by the instructor and student in the Incomplete Agreement, but no more than one calendar year from the end of the semester in which the course was taken. All students who receive an Incomplete must maintain active student status during the subsequent semester(s) in which the coursework is being completed. If not registered in other courses during this period, the student must register for Continuous Enrollment.

When work for the course is completed, the instructor will complete a grade change form and submit it to the Office of the Registrar. Beginning with the fall 2014 semester, the final grade will replace the symbol of *I*. If work for the course is not completed within the designated time period, the grade will be converted automatically to a grade of *F,* Failure, 0 quality points, and the grade-point average and academic standing recalculated. For courses taken prior to the fall 2014 semester, the grade earned will be indicated in the form of *I,* followed by the grade. The symbol *I* cannot be removed and remains on the student's permanent academic record, even after the course has been completed successfully.

Transfer of Credit

A maximum of one-quarter of the credits required for the degree may be approved for transfer to a graduate program in the College of Professional Studies from credit earned while enrolled as a non-degree student at GW or from another degree-granting school of this University or another accredited college or university. For transfer credit to be approved, all of the following conditions must be met: the coursework must be from an accredited institution and must have been taken within the two years prior to matriculation; it must be approved as part of the student's program of studies; it must not have been applied to the completion of requirements for another degree; it must be post-baccalaureate graduate-level coursework; and the student must have received a minimum grade of *B* in each course for which transfer credit is requested. Requests for transfer credit must be submitted in writing and approved by the Program Director and the Dean during the student's first year in the program. An official transcript of the coursework must be on file before the request can be considered.

Transfer of credit for undergraduate students is subject to specific program requirements. Students must have received a minimum grade of *C* in any course for which transfer of credit is requested.

Once enrolled in the College of Professional Studies, students are not permitted to transfer coursework taken outside the University, except under extraordinary circumstances, and permission must be obtained in advance from the Dean.

Provisional Admission

Applicants with credentials that do not meet the minimum standards for the program of study, but who nonetheless show promise of successful work, are occasionally granted provisional admission by the Program Director/admissions committee. During the period of provisional status, students must meet the requirements set forth in their admission letter. Students who do not meet these requirements are dismissed from the program.

Readmission

The College of Professional Studies will not review any application for readmission to a program by a student who was dismissed from the same or any other program at the College or course of study at the University until at least one year after the student was dismissed.

Withdrawing From a Course

Students requesting to withdraw from a course after the eighth week of classes (or after the fourth week for modules) must be passing the course and must obtain the written permission of the Program Director and the Dean. If approved, the symbol *W,* Authorized Withdrawal, will appear on the transcript. Tuition will not be refunded. See Adding, Dropping, and Withdrawing from Courses under University Regulations (p. 21).

Academic Integrity

The University community, in order to fulfill its purposes, must establish and maintain guidelines of academic behavior. All members of the community are expected to exhibit honesty and competence in their academic work. Incoming students have a special responsibility to acquaint themselves with, and make use of, all proper procedures for doing research, writing papers, and taking examinations. Members of the community will be presumed to be familiar with the proper academic procedures and held responsible for applying them. Deliberate failure to act in accordance with such procedures will be considered academic dishonesty. Acts of academic dishonesty are a legal, moral, and intellectual offense against the community and will be prosecuted through the proper University channels, possibly resulting in dismissal from the program together with other University sanctions. The University Code of Academic Integrity (https://studentconduct.gwu.edu/code-academic-integrity) can be found at the Office of Academic Integrity (http://studentconduct.gwu.edu).

UNDERGRADUATE

Bachelor's completion programs

- Bachelor of Professional Studies with a major in cybersecurity (p. 847)
- Bachelor of Professional Studies with a major in integrated information science and technology (p. 847)
- Bachelor of Professional Studies with a major in police and security studies (p. 848)

Dual degree programs

- Bachelor of Arts with a major in political communication and Master of Professional Studies in the field of political management (p. 849)
- Bachelor of Arts with a major in political science and Master of Professional Studies in the field of advocacy in the global environment (p. 849)
- Bachelor of Arts with a major in political science and Master of Professional Studies in the field of legislative affairs (p. 850)
- Bachelor of Arts with a major in political science and Master of Professional Studies in the field of political management (p. 850)

GRADUATE

Master's programs

Admission Requirements

Applicants must hold a baccalaureate degree from a regionally accredited institution of higher learning or international equivalent. Applicants should have a strong academic background, normally with a *B* grade-point average or above (3.0 GPA on a 4.0 scale). Additional application requirements can be found on the Graduate Programs Finder (http://www.gwu.edu/all-graduate-programs).

- Master of Professional Studies in the field of b (p. 851)ioinformatics and biotechnology
- Master of Professional Studies in the field of cybersecurity strategy and information management (p. 852)
- Master of Professional Studies in the field of homeland security (p. 852)
- Master of Professional Studies in the field of landscape design (p. 854)
- Master of Professional Studies in the field of law firm management (p. 854)
- Master of Professional Studies in the field of paralegal studies (p. 855)
- Master of Professional Studies in the field of paralegal studies with a concentration in health care corporate compliance (p. 857)
- Master of Professional Studies in the field of publishing (p. 858)
- Master of Professional Studies in the field of sustainable urban planning (p. 859)

The Graduate School of Political Management, through the College of Professional Studies, offers the following:

- Master of Professional Studies in the field of advocacy in the global environment (p. 862)
- Master of Professional Studies in the field of legislative affairs (p. 863)
- Master of Professional Studies in the field of political management (p. 864)
- Master of Professional Studies in the field of political communication and governance ((p. 869)*Offered in Spanish only*)
- Master of Professional Studies in the field of strategic public relations (p. 870)
- Dual Master of Professional Studies in the field of political management and graduate certificate in survey design and analysis (p. 870)

CERTIFICATES

Undergraduate certificates

- Cyber Attacks and Cyber Threats Analysis

- Investigation of Cyber Security Incidents (p. 871)
- Protection and Defense of Computer Networks (p. 872)

Graduate certificates

The College of Professional Studies offers the following graduate certificates. Requirements are listed on the College of Professional Studies website (http://www.cps.gwu.edu). In addition to those listed, graduate certificates in political management and strategic governance and in strategic communications campaigns are offered in Spanish to closed cohorts of students in Latin America and in Spain.

- Climate Change Management and Policy (p. 872)
- Digital Politics (p. 872)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

- College of Professional Studies (CPS) (p. 1075)
- Advocacy in the Global Environment (PSAD) (p. 1400)
- Health Care Corporate Compliance (PSHC) (p. 1401)
- Homeland Security (PSHS) (p. 1401)
- Landscape Design (PSLD) (p. 1403)
- Law Firm Management (PSLM) (p. 1404)
- Legislative Affairs (LGAF) (p. 1327)
- Middle Grade Science (PSMS) (p. 1409)
- Middle School Math (PSMM) (p. 1408)
- Molecular Biology (PSMB) (p. 1404)
- Paralegal Studies (PSLX) (p. 1405)
- Physics Education (PSPH) (p. 1407)
- Political Management (PMGT) (p. 1387)
- Publishing (PSPB) (p. 1408)
- Public Leadership (PSPL (p. 1406))
- Public Relations (PSPR) (p. 1407)
- Security and Safety Leadership (PSSL) (p. 1409)
- Urban Sustainability (PSUS) (p. 1410)

UNDERGRADUATE PROGRAMS

Bachelor's completion programs

- Bachelor of Professional Studies with a major in cybersecurity (p. 847)
- Bachelor of Professional Studies with a major in integrated information science and technology (p. 847)
- Bachelor of Professional Studies with a major in police and security studies (p. 848)

Dual degree programs

- Bachelor of Arts with a major in political communication and Master of Professional Studies in the field of political management (p. 849)
- Bachelor of Arts with a major in political science and Master of Professional Studies in the field of advocacy in the global environment (p. 849)
- Bachelor of Arts with a major in political science and Master of Professional Studies in the field of legislative affairs (p. 850)
- Bachelor of Arts with a major in political science and Master of Professional Studies in the field of political management (p. 850)

BACHELOR OF PROFESSIONAL STUDIES WITH A MAJOR IN CYBERSECURITY

The Bachelor of Professional Studies with a major in cybersecurity program is intended for students with associate's or non-technical bachelor's degrees who are looking for entry-level positions and advancement in the field of cybersecurity. The program consists of a core curriculum and two concentrations that focus on protection and defense of computer networks and cyber attacks and cyber threats analysis. Upon completion of the program, students will be able to understand and implement cybersecurity requirements, protect and effectively defend computer networks against malicious activities, and correct computer network vulnerabilities through penetration testing and hacking techniques.

The core curriculum of this bachelor's degree program includes courses related primarily to specialty areas identified by NICE. The course work in program subject areas culminates in a practicum that focuses on preparing students to obtain professional certification combined with practical exercises in the computer lab.

REQUIREMENTS

Students completing this program will have satisfied GW's university-wide general education requirement, which includes 22 credits in the following areas:

1. Mathematics or statistics (3 credits)
2. Natural or physical science with lab (4 credits)
3. Humanities (3 credits)
4. Social and behavioral sciences (6 credits)
5. Written communication or composition (6 credits)

In addition, students take a minimum of 60 credits at GW, including 24 credits in foundational courses and 36 credits in subject area courses.

Code	Title	Credits
Foundational		
PSCS 2101	Writing and Communication in a Technical Field	
PSCS 2102	Fundamentals of Information Technology and Computing	
PSCS 2103	Ethics in the Age of Technology	
PSCS 4110	Data Communication and Networking Technologies	
PSCS 4120	Introduction to Cybersecurity	
PSCS 4190	Capstone Project	
Protection and Defense of Computer Networks		
PSCS 4101	Introduction to Protection Technologies	
PSCS 4102	Intrusion Detection and Vulnerability Management	
PSCS 4103	Securing Operating Systems	
PSCS 4104	Securing Network Devices	
PSCS 4105	Cyber Defense Techniques Practicum	
Cyber Attacks and Cyber Threats Analysis		
PSCS 4201		
PSCS 4202	Cyber Attack Tools and Techniques	
PSCS 4203	Analysis of the Intelligence Cycle	
PSCS 4204	Computer Network Attack and Exploitation	
PSCS 4205	Practicum: Cyber Attack Techniques	

BACHELOR OF PROFESSIONAL STUDIES WITH A MAJOR IN INTEGRATED INFORMATION, SCIENCE, AND TECHNOLOGY

The Bachelor of Professional Studies in the field of integrated Information, science, and technology (IIST) is an innovative and interdisciplinary program designed for community college graduates and working professionals who are seeking to complete their bachelor's degree in a technology-related field. The 60-credt program can be completed within two academic years (five consecutive semesters, including one summer session).

See the program website (http://cps.gwu.edu/bachelors-completion) for admission requirements.

REQUIREMENTS

This bachelor's degree completion program is designed for individuals who currently hold an associate's degree or have earned at least 60 credit hours towards their undergraduate degree.

The remaining 60 credit hours of study required for bachelor's degree completion include 44 credits in required courses and 16 credits in elective courses.

Code	Title	Credits
General Education		

6 credits of quantitative and logical reasoning	
6 credits of social and behavioral sciences	
6 credits of natural sciences, including one laboratory course	
6 credits of arts and humanities	
Required	
PSIS 2101	Writing & Comm & Med Rel - I
PSIS 2102	Writing & Comm & Med Rel - II

PSIS 4199	Special Topics

FACULTY

Director *S.* Hooshangi

BACHELOR OF PROFESSIONAL STUDIES WITH A MAJOR IN POLICE AND SECURITY STUDIES

The bachelor of professional studies with a major in police and security studies degree program helps students acquire the knowledge and skills needed to work more effectively as police professionals. Developed by faculty in consultation with metropolitan area law enforcement and police specialists, the core course work is designed to develop three central areas of competency: intelligence and criminal analysis; forensic science; and leadership and management. Elective courses are offered in a variety of disciplines, including sociology, leadership, public health, and international affairs.

Visit the program website (http://cps.gwu.edu/police-security-studies) for admissions and additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 120 credits, including 30 credits in general education courses, 60 credits in required courses, and 30 credits in elective courses.

Admission requirements:

To be considered for admission to the College of Professional Studies Police and Security Studies program, the applicant must possess an academic record of achievement and be employed as a security and safety professional. The admission requirements are listed below.

- Completion of a college-level English Composition course at a regionally accredited U.S. college or university with a grade of C or higher. **Note:** *Applicants may submit an acceptable writing sample taken in a CPS test setting if a college-level English Composition course has not been completed. Test centers are located in DC, Alexandria, Arlington, and Newport News, VA.*
- Attended at least one college-level course (minimum 3 credits) at a regionally accredited institution of higher education.
- Two or more years of work experience in the safety and security field.
- Completion of the first 12 credit hours taken at GW with a grade of C or higher. *All degree candidates receive provisional admission until completion of their first 12 credit hours at GW.*

Requirements for the degree: 120 credits

Requirements for the program:

30 credits of general education coursework including:*

6 credits of English composition or UW 1020 University Writing plus 2 credits of independent research with a focus on the application of the principles learned in UW 1020	
6 credits of quantitative and logical reasoning	
6 credits of social and behavioral sciences	
6 credits of natural sciences, including one laboratory course	
6 credits of arts and humanities	
60 credits of core courses:	
Intelligence and Criminal Analysis	
CPS 2103	Particular Forms of Crime (Intelligence and Criminal Analysis)
CPS 2107	Models of Policing
CPS 2108	Criminal Intelligence
CPS 2109	Criminal Analysis (Forensic Science)
CPS 2110	Predictive Policing
Forensic Science	
CPS 2130	Intro to Forensic Science
CPS 2131	Crime Scene Investigation
CPS 2132	Computer Crime Investigation
CPS 2133	Incident Management
CPS 2171	The Criminal Mind
Leadership and Management	
CPS 2102	Resource Management
CPS 2104	Leading Teams
CPS 2106	Strategic Planning
CPS 2134	Ethical Dilemmas in Policing
CPS 4192	Capstone Simulation
30 credits of electives selected from the following, in consultation with academic advisor:	
CPS 2101	The Criminal Justice System
CPS 2170	Domestic Violence
CPS 2172	Comparative Police Systems
CPS 2173	Transnational Threats&Security
CPS 2174	Crisis & Emergency Planning
CPS 2175	Emergency Pub. Health Issues
CPS 2176	Media,PR&Crisis Communication

General education and elective courses may be completed at any regionally accredited institution. A grade of C or higher is required for transfer credit to be approved. General education and elective course work may be completed before, during, or within five years of completing the other requirements for the bachelor's degree.

FACULTY

Director F. Lemieux

Assistant Director J. Delinski

BACHELOR OF ARTS WITH A MAJOR IN POLITICAL COMMUNICATION AND MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF POLITICAL MANAGEMENT

OVERVIEW

The School of Media and Public Affairs (https://smpa.gwu.edu) (SMPA) and the Graduate School of Political Management (https://gspm.gwu.edu) (GSPM) offer the dual B.A./M.P.S. degree program for undergraduate students who are interested in careers in the field of political management. The program allows students to take a specified number of graduate credits as part of their undergraduate degree, thereby allowing both degrees to be earned more quickly and at a lower cost. Students pursuing the dual program must meet all requirements of their respective SMPA program. To meet the requirements of the dual program, students take 6 credits in graduate-level courses as part of their B.A. program of study.

Consult the School of Media and Public Affairs (https://smpa.gwu.edu) for admissions requirements and more details.

BACHELOR OF ARTS WITH A MAJOR IN POLITICAL SCIENCE AND MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF ADVOCACY IN THE GLOBAL ENVIRONMENT

Columbian College's Department of Political Science and the College of Professional Studies offer the dual B.A./M.P.S. degree program for undergraduate students who

are interested in careers in global politics and advocacy, from lobbying to strategic public relations, campaigns, and influence building. The program allows students to take a specified number of graduate credits as part of their undergraduate degree, thereby allowing both degrees to be earned more quickly and at a lower cost. Students pursuing the dual program must complete all political science degree requirements (http://bulletin.gwu.edu/professional-studies/undergraduate-programs/dual-ba-political-science-mps-advocacy-global-environment/%20http://politicalscience.columbian.gwu.edu/psc-major-requirements). To meet the requirements of the dual program, students take 9 credits in graduate-level courses as part of their B.A. program of study.

Consult the Department of Political Science (http://www.gwu.edu/~psc) for admissions requirements and other details.

REQUIREMENTS

The following requirements must be fulfilled:

Students must complete all Political Science degree requirements, as outlined here: http://politicalscience.columbian.gwu.edu/psc-major-requirements.

Admission to the dual degree program allows the student to substitute three courses of the undergraduate Political Science major for Global Advocacy required courses (see "Required Core Courses" below) . These courses will count toward three of the four upper level elective courses in Political Science required for the major and may be taken during the second semester of junior year and during senior year.

Degree Requirements, M.P.S. in Advocacy in the Global Environment

REQUIRED CORE COURSES (21 credit hours)

PSAD 6225 Fundamentals of Global Political Management
PMGT 6403 Political Data & Analysis
PMGT 6402 Applied Political Communications
PMGT 6404 Principled Political Leadership
PSAD 6240 Global Advocacy: Strategies, Tools, and Tactics OR
PSAD 6270 International Public Relations and Global Advocacy
PSAD 6250 Cultural Aspects of Global Engagement
PSAD 6260 Comparative Political Management Environments

GLOBAL PERSPECTIVE RESIDENCIES (12 credit hours)

PSAD 6200 Advocating in North America (Washington, DC)
PSAD 6200 Advocating in Europe (Brussels)
PSAD 6200 Advocating in Turkey and its Region (Istanbul, Ankara)
PSAD 6200 Advocating in Asia (Hong Kong)
PSAD 6200 Advocating in Latin America (Sao Paulo, Brasilia)
PSAD 6200 Advocating in the United Kingdom (London, Oxford)
PSAD 6200 Advocating in the East Asian Capitals (Seoul, Beijing, Tokyo)

ELECTIVE COURSES (6 credit hours)

Flexible Electives: With advisor approval, students may take electives from the Legislative Affairs, Strategic Public Relations or Political Management programs. Some students also take courses at the Elliott School of Global Affairs, Trachtenberg School of Public Policy and Public Administration, and the School of Business.

BACHELOR OF ARTS IN POLITICAL SCIENCE AND MASTER OF PROFESSIONAL STUDIES IN LEGISLATIVE AFFAIRS

The George Washington University's Department of Political Science (http://www.gwu.edu/~psc) and the Graduate School of Political Management (GSPM) offer a dual degree B.A./M.P.S. program designed for highly-qualified undergraduate students majoring in political science who are interested in careers in the field of legislative affairs (http://gspm.gwu.edu/node/139). The program allows students to take a specified number of graduate credits as part of their undergraduate degree, thereby allowing both degrees to be earned more quickly and at a lower cost.

Consult the Department of Political Science (http://www.gwu.edu/~psc) for admissions requirements and other details.

BACHELOR OF ARTS IN POLITICAL SCIENCE AND MASTER OF PROFESSIONAL STUDIES IN POLITICAL MANAGEMENT

The George Washington University's Department of Political Science (http://www.gwu.edu/~psc) and the Graduate School of Political Management (https://gspm.gwu.edu) (GSPM) offer a dual degree B.A./M.P.S. program designed for highly-qualified undergraduate students majoring in political science who are interested in careers in the field of political management. The program allows students to take a specified number of graduate credits as part of their undergraduate degree, thereby allowing both degrees to be earned more quickly and at a lower cost. Students pursuing the dual program must complete all political science degree requirements (http://politicalscience.columbian.gwu.edu/psc-major-requirements). To meet the requirements of the dual program, students take 9 credits in graduate-level courses as part of their B.A. program of study.

Consult the Department of Political Science (http://www.gwu.edu/~psc) for admissions requirements and other details.

GRADUATE PROGRAMS

Master's programs

Admission Requirements

Applicants must hold a baccalaureate degree from a regionally accredited institution of higher learning or international equivalent. Applicants should have a strong academic background, normally with a *B* grade-point average or above (3.0 GPA on a 4.0 scale). Additional application requirements can be found on the Graduate Programs Finder (http://www.gwu.edu/all-graduate-programs).

- Master of Professional Studies in the field of b (p. 851)ioinformatics and biotechnology
- Master of Professional Studies in the field of cybersecurity strategy and information management (p. 852)
- Master of Professional Studies in the field of homeland security (p. 852)
- Master of Professional Studies in the field of landscape design (p. 854)
- Master of Professional Studies in the field of law firm management (p. 854)
- Master of Professional Studies in the field of paralegal studies (p. 855)
- Master of Professional Studies in the field of paralegal studies with a concentration in health care corporate compliance (p. 857)
- Master of Professional Studies in the field of publishing (p. 858)
- Master of Professional Studies in the field of sustainable urban planning (p. 859)

The Graduate School of Political Management, through the College of Professional Studies, offers the following:

- Master of Professional Studies in the field of advocacy in the global environment (p. 862)
- Master of Professional Studies in the field of legislative affairs (p. 863)
- Master of Professional Studies in the field of political management (p. 864)
- Master of Professional Studies in the field of political communication and governance ((p. 869)*Offered in Spanish only*)
- Master of Professional Studies in the field of strategic public relations (p. 870)
- Dual Master of Professional Studies in the field of political management and graduate certificate in survey design and analysis (p. 870)

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF BIOINFORMATICS AND BIOTECHNOLOGY

The master of professional studies in bioinformatics and biotechnology degree program prepares students to excel through a cross-disciplinary approach, delivering both academic knowledge and practical experience (within wet labs and computational labs) about bioinformatics and biotechnology. The curriculum integrates components of molecular biology, genetics, bioinformatics, computer programming, molecular modeling, and ultimately the business and entrepreneurship skills necessary to bring new discoveries to the marketplace.

Graduates are prepared with in-demand skills, including data analysis, programming, new product commercialization, and data generation as well as career skills in the bioinformatics and biotechnology fields.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://cps.gwu.edu/bioinformatics-and-biotechnology) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits in required courses.

Code	Title	Credits
Required		
PSMB 6101	Introduction to Bioinformatics	
PSMB 6102	Scripting	
PSMB 6103	Genomics	
PSMB 6104	Research Orientation	
PSMB 6105	Seminar in Computational Biology	
PSMB 6252	Biomolecular Modeling	
PSMB 6261	Introduction to Quantitative Biotechnology	
PSMB 6262	Bionanotechnology	
PSMB 6263	Management of Biotechnology Innovation	
PSMB 6264	Entrepreneurship and Technology Venture Creation	

PSMB 6266	Capstone Project

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF CYBERSECURITY STRATEGY AND INFORMATION MANAGEMENT

The Master of Professional Studies in the field of cybersecurity strategy and information management degree program is for working professionals from the military, homeland security, and private sectors who wish to gain the expertise to address current and emerging challenges in information technology security. Students learn strategies and practices that empower them to manage critical information in the fight against hackers, terrorists, and cyber criminals. The program also enhances the skills of current homeland security and criminal justice professionals, preparing leaders to secure the country's digital infrastructure.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://cps.gwu.edu/cybersecurity) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits in required courses.

Code	Title	Credits
Required:		
PSCS 6244	Information Systems Protection	
PSCS 6245	Cybersecurity Law and Policy	
PSCS 6246	Cyber Intelligence and Strategic Analysis	
PSCS 6247	Cyber Defense Strategy	
PSCS 6248	Introduction to Cyber Conflicts	
PSCS 6255	Information Management for Justice and Public Safety Professionals	
PSCS 6256	Application of Technology to Data Analytics	
PSCS 6257	Enterprise Architecture and Standards	
PSCS 6258	Information Sharing and Safeguarding	
PSCS 6259	Strategic Information Technology Investment and Performance Management	
PSSL 6260	Methods of Analysis in Security	
PSSL 6270	Capstone Project	

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF HOMELAND SECURITY

The master of professional studies in the field of homeland security is a 36-credit program designed for industry professionals—including those in the military—who wish to develop leadership skills as well as an in-depth understanding of current and emerging homeland security issues. The program provides a pioneering education on counter-terrorism, intelligence analysis, emerging security threats, and relevant legislation, enhancing the implementation of security practices in both public and private sectors.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 36 credits in required courses.

Code	Title	Credits
Required		
PSHS 6240	Political Violence and Terrorism	
PSHS 6241	Globalization of Threats and International Security	
PSHS 6242	Security and Civil Liberties	
PSHS 6243	Intelligence and Strategic Analysis	
PSHS 6244	Information Systems Protection	
PSHS 6250	Strategic Planning and Budgeting	
PSHS 6251	Inter-Agency Cooperation	
PSHS 6252	Emergency Management and Crisis Communication	
PSHS 6253	Managing the Politics of Leadership	
PSHS 6254	Strategic Change Management	
PSHS 6260	Methods of Analysis in Security	
PSHS 6270	Capstone Project	

FACULTY

Director F. Lemieux

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSHS 6240. Political Violence and Terrorism. 3 Credits.
The evolution of terrorism and politically motivated violence; causes and origins in regional, national, and international terrorist and insurgent groups and so-called terrorist states; trends in terrorist modus operandi, including asymmetric attacks; formulating effective counterterrorist strategies. Restricted to students in the MPS in homeland security program.

PSHS 6241. Globalization of Threats and International Security. 3 Credits.
The intersection of globalization and national and international security; how globalization may create new threats while amplifying existing threats; the relationship of specific forms of globalized threat to globalization; responses of states and non-state actors to such threats; the role of international organizations. Restricted to students in the MPS in homeland security program.

PSHS 6242. Security and Civil Liberties. 3 Credits.
Examination of U.S. government activities designed to protect the security of American citizens while balancing those interests against citizens' civil liberties; limitations placed on government activities by the First and Fourth Amendments of the Constitution; complexities associated with the characterization of criminals and terrorists. Restricted to students in the MPS in homeland security program.

PSHS 6243. Intelligence and Strategic Analysis. 3 Credits.
The structure and components of the national intelligence community and law enforcement communities; international intelligence comparison; analysis of intelligence policies and strategies at the international, national, and regional levels. Restricted to students in the MPS in homeland security program.

PSHS 6244. Information Systems Protection. 3 Credits.
Exploration of the major areas of information security including risk management, cybercrime, cyberconflict, and the technologies involved in both cyberattacks and information systems protection; creating, implementing, and maintaining an information security program; root causes of insecurity in information systems.

PSHS 6250. Strategic Planning and Budgeting. 3 Credits.
The adaptation of strategic planning and performance measures beyond budgeting by government agencies dealing with long-term security issues; integrative approach to strategic planning and management, focusing on the implementation, evaluation, and oversight of strategy and policy; development of budgets, accountability plans, and risk management to ensure compliance with stated goals; analytical tools and techniques that inform organizational strategies and actions. Restricted to students in the MPS in homeland security program.

PSHS 6251. Inter-Agency Cooperation. 3 Credits.
In-depth study of interagency cooperation issues relevant to the U.S. Department of Homeland Security's organizational structure; cooperative initiatives through mutual assistance agreements and regional, national, and international structures; technology interoperability, legal, and interorganizational challenges. Restricted to students in the MPS in homeland security program.

PSHS 6252. Emergency Management and Crisis Communication. 3 Credits.
The role of crisis communications in the overall management of emergency operations; critical communications tasks, functions, and operations of the emergency operations center, incident command, and associated emergency personnel; strategies and tactics to enhance and promote effective crisis communications among government emergency managers. Restricted to students in the MPS in homeland security program.

PSHS 6253. Managing the Politics of Leadership. 3 Credits.
The role of power and influence in organizations; complexity and challenges of developing political strategies and mobilizing the political support and resources needed to implement objectives. Restricted to students in the MPS in homeland security program.

PSHS 6254. Strategic Change Management. 3 Credits.
The challenges, techniques, burdens, and successes associated with initiating and implementing major change within organizations; the process of organizational change from multiple theoretical perspectives. Restricted to students in the MPS in homeland security program.

PSHS 6260. Methods of Analysis in Security. 3 Credits.
Methods and problems of data collection in security fields; analytical design, instrument utilization, sampling, and measurement; data analysis techniques. Restricted to students in the MPS in homeland security program. Prerequisite: None.

PSHS 6270. Capstone Project. 3 Credits.
Students refine their conception of leadership and knowledge of the homeland security field. Participants experience leadership in action and enhance independent learning while working in both small and large group dynamics. Restricted to students enrolled in the PSHS cohort. Prerequisites: All the curriculum in the PSHS must be completed before registering for this course.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF LANDSCAPE DESIGN

The Master of Professional Studies in the field of landscape design program is ideally suited for landscape professionals seeking to upgrade skills, individuals who wish to become professional landscape designers, amateurs with an interest in the art of garden design, institutional horticultural staff, nursery employees and garden-design writers. Courses are geared to small-scale landscape design applications with emphasis on sound design principles, good site engineering methods, and creative use of plant materials.

The 46-credit program combines the 28-credit landscape design graduate certificate program with the 18-credit graduate certificate in sustainable landscapes. Students acquire an understanding of best practices in landscape conservation and sustainability, adapted to the small-scale landscape.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://cps.gwu.edu/landscape-design) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 46 credits in required courses.

Code	Title	Credits
PSLD 6100	Landscape Graphics	
PSLD 6201	Introduction to Design	
PSLD 6202	Site Analysis	
PSLD 6203	Site Engineering	
PSLD 6204	Construction Methods and Materials	
PSLD 6212	History of Landscape Design	
PSLD 6213	Contemporary Themes in the Landscape	
PSLD 6221	Landscape Plants for Fall	
PSLD 6223	Landscape Plants for Spring	
PSLD 6225	Landscape Plants for Summer	
PSLD 6231	Site Design Studio	
PSLD 6236	Planting Design Studio	
PSLD 6240	Comprehensive Project	
PSLD 6260	Introduction to Sustainable Design	
PSLD 6261	Ecology of the Built Environment	
PSLD 6262	Tools for Sustainable Design	
PSLD 6264	Native Plants I	
PSLD 6265	Native Plants II	
PSLD 6266	Ecological Restoration	
PSLD 6268	Sustainable Design Methods	
PSLD 6269	Sustenance and the Landscape	
PSLD 6270	Sustainable Design Charrette	
Electives*		
PSLD 6229	Herbaceous Plants	
CPS 6291	Special Topics	

*Elective credits are taken in addition to those required for the degree. Special Topics courses address new developments in the field (e.g., Vectorworks I and II).

See CPS regulations (p. 843) for additional information regarding enrollment status and time limits.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF LAW FIRM MANAGEMENT

The master of professional studies in law firm management degree program responds to the need for highly skilled and adaptable leadership in law firms and companies providing services to law firms. This unique, flexible program provides law firm professionals with the business and leadership knowledge they need to succeed in the law firm industry. The program consists of 30 credits and can be completed in 18 months. The program, which begins in June each year, is specially designed for those working full-time, with a combination of distance learning and short-term residencies at GW's Alexandria Graduate Education Center.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://cps.gwu.edu/law-firm-management) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits in required courses.

Code	Title	Credits
PSLM 6201	Theories, Principles, and Practices of Law Firm Management	
PSLM 6202	ApplyingStrategic&BusPlanning	
PSLM 6203	Practical Applications of Law Firm Management	
PSLM 6204	Principles of Leadership	
PSLM 6205	Application of Leadership Frameworks	
PSLM 6206	Strategic Leadership for Sustainability and Change	
PSLM 6207	Process Improvement in Law Firms	
PSLM 6208	Legal Technology and Knowledge Management	

See CPS regulations (p. 843) for additional information regarding enrollment status and time limits.

FACULTY

Director C. Leonard

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSLM 6201. Theories, Principles, and Practices of Law Firm Management. 6 Credits.

PSLM 6202. ApplyingStrategic&BusPlanning. 3 Credits.
Team projects using a simulated law firm case study, including practice group and office profitability analysis, market assessments, creation of strategic plans, and merger analyses. Prerequisite: PSLM 6201.

PSLM 6203. Practical Applications of Law Firm Management. 3 Credits.
Presentation of strategic plans, analyses, and recommendations developed in PSLM 6202 before a panel of faculty, managing partners, and law firm professionals. Prerequisite: PSLM 6202.

PSLM 6204. Principles of Leadership. 6 Credits.
An intensive course focused on theories and principles of leadership within firms, including leading organizational change. Prerequisite: PSLM 6203.

PSLM 6205. Application of Leadership Frameworks. 3 Credits.
Concepts and frameworks that highlight leadership roles in firms. Prerequisite: PSLM 6204.

PSLM 6206. Strategic Leadership for Sustainability and Change. 3 Credits.
Integration of the content of PSLM 6204 and PSLM 6205 through a focus on strategic leadership. Prerequisite: PSLM 6205.

PSLM 6207. Process Improvement in Law Firms. 3 Credits.
Development of charters for major projects in law firms, applying skills pertaining to managing change and conflict. Prerequisite: PSLM 6206.

PSLM 6208. Legal Technology and Knowledge Management. 3 Credits.
Key elements of knowledge management, including development of a knowledge management strategy. Prerequisite: PSLM 6207.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF PARALEGAL STUDIES

The Master of Professional Studies in the field of paralegal studies is an advanced credential for those who wish to lead the profession in a variety of settings such as law, finance, insurance, consulting, and healthcare. The program curriculum balances a focus on analysis and critical thinking with the applied skills that employers seek: written and oral communication, research, and managing complex tasks and teams.

The master's is a 32-credit program that students complete in four semesters. GW's College of Professional Studies also offers an 18-credit graduate certificate, which is completed in two semesters. Credits earned in the graduate certificate

program may be applied toward master's degree requirements.

Students may attend classes in the evenings on GW's Foggy Bottom campus (http://nearyou.gwu.edu/kstreet) or in a distance learning (http://paralegalstudiesmasters.online.gwu.edu/?Access_Code=GW-MPL-SEO2&utm_source=seo2&utm_medium=referral&utm_campaign=GW-MPL-SEO2) format.

Visit the program website (http://cps.gwu.edu/paralegal) for additional information.

REQUIREMENTS

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

The following requirements must be fulfilled: 32 credits, including 20 credits in required courses and 12 credits in courses from one track.

Required	
CPS 6294	Independent Research
CPS 6298	Practicum
PSLX 6210	American Jurisprudence
PSLX 6211	Legal Research and Writing
PSLX 6212	Litigation
PSLX 6223	Contracts
PSLX 6224	Advanced Legal Writing
PSLX 6225	Business Entities
All courses from one track:	
Legal practice track	
PSLX 6214	Administrative Law
PSLX 6215	Government Contracts Law
PSLX 6226	International Law
PSLX 6227	Intellectual Property Law
Healthcare corporate compliance track	
PSHC 6201	Introduction to Health Care Corporate Compliance
PSHC 6202	Compliance with Laws and Regulations I
PSHC 6204	Compliance with Laws and Regulations II
PSHC 6206	Case Studies in Health Care Corporate Compliance

See CPS regulations for additional information regarding enrollment status and time limits.

Assistant Director E. Badawi

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSLX 6210. American Jurisprudence. 3 Credits.
An introduction to the foundations, theories, history, and applications of the American legal system; local, state, and federal courts and sources of law; and ethics and professionalism issues of especial importance to paralegals.

PSLX 6211. Legal Research and Writing. 3 Credits.
Fundamentals of legal research using print and online tools.

PSLX 6212. Litigation. 3 Credits.
Legal technology and the rules of court, procedure, and evidence; technical and substantive skills necessary for effective litigation support.

PSLX 6213. Corporations and Contracts Law. 3 Credits.

PSLX 6214. Administrative Law. 3 Credits.
An introduction to administrative and regulatory law; history and development of administrative law; agency, due process, agency actions, administrative investigation and hearings, and judicial review.

PSLX 6215. Government Contracts Law. 3 Credits.
The law of procuring, forming, and executing government contracts, including drafting and litigation; competition requirements, contract changes, and contract terminations; researching and drafting documents common to a government contracts practice.

PSLX 6216. Elements of Intellectual Property Law. 3 Credits.

PSLX 6217. Prosecution and Litigation in Intellectual Law Practice. 3 Credits.

PSLX 6218. International Trade and Finance. 3 Credits.

PSLX 6219. International Litigation. 3 Credits.

PSLX 6221. Tanzanian Legal System. 3 Credits.

PSLX 6222. Tanzanian Community Law. 3 Credits.

PSLX 6223. Contracts. 3 Credits.
Contract elements, their attendant legal ramifications, and the processes necessary to make such determinations. Development of legal reasoning skills in evaluating issues arising from contract law.

PSLX 6224. Advanced Legal Writing. 3 Credits.
Advanced legal writing techniques and drafting for legal practice. Legal writing in plain English; strategies for effective writing; emphasis on legal memoranda, legal correspondence, and preparing and drafting legal pleadings and documents for court. Refines and advances skills in written legal analysis and legal citation.

PSLX 6225. Business Entities. 3 Credits.
Overview of business organizations, including partnerships, limited liability companies, and corporations. Key concepts applicable to business organizations, including regulation, business formation, document preparation. Application of legal analysis within the context of business entities and other topics applicable to paralegals in all disciplines.

PSLX 6226. International Law. 3 Credits.
Introduction and survey of international law, including international trade law and litigation. Rules and principles governing relations among sovereign states, international organizations, and sources of international law. Analysis of the rules and customs for handling international trade. International courts and tribunals; overview of the treaties, customary principles, and institutional structures governing international human rights law.

PSLX 6227. Intellectual Property Law. 3 Credits.
Introduction to the legal structure of an intellectual property practice. Trademarks, copyrights, and patents and the supporting practice concomitant to each element. Analysis of the processes, supporting documentation, laws, and rules regarding patent prosecution and litigation. This course complements and builds upon the legal issues and analysis introduced in the courses on contracts, business entities, and litigation.

PSLX 6294. Independent Research in Legal Studies. 2 Credits.
Guided, independent research to demonstrate the higher level of competency in research, analysis, writing, and oral presentation. Restricted to master's degree candidates in the paralegal studies programs.

PSLX 6298. Paralegal Practicum. 0-3 Credits.
Students work in legal environments while completing their studies, taking active roles to obtain, manage, and maximize the value of their positions. Restricted to master's degree candidates in the paralegal studies programs.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF PARALEGAL STUDIES WITH A CONCENTRATION IN HEALTHCARE CORPORATE COMPLIANCE

The master of professional studies (M.P.S.) in the field of paralegal studies with a concentration in healthcare corporate compliance degree program allows paralegal students to enroll in the master of paralegal studies (p. 855) program and the healthcare corporate compliance graduate certificate (http://cps.gwu.edu/healthcare-compliance) program concurrently and receive both credentials. The M.P.S. is an advanced credential for those who wish to lead the profession in a variety of settings such as law, finance, insurance, consulting, and healthcare; the graduate certificate is the nationally-recognized industry standard.

At the completion of the program, graduates will have acquired the skills, knowledge, and abilities required to enter the field of healthcare law. The rigorous curriculum balances analysis and critical thinking with applied skills, and focuses on written and oral communication, research, and managing complex tasks and teams---all skills that employers demand. The program is offered in both campus (http://cps.gwu.edu/paralegal) and distance learning (http://paralegalstudiesmasters.online.gwu.edu) formats.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://cps.gwu.edu/healthcare-compliance) for additional information.

REQUIREMENTS

Applicants must hold a baccalaureate degree from a regionally accredited institution of higher learning or international equivalent. Additional admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Required:

PSLX 6210	American Jurisprudence
PSLX 6211	Legal Research and Writing
PSLX 6212	Litigation

PSLX 6223	Contracts
PSLX 6224	Advanced Legal Writing
PSLX 6225	Business Entities
PSHC 6201	Introduction to Health Care Corporate Compliance
PSHC 6202	Compliance with Laws and Regulations I
PSHC 6204	Compliance with Laws and Regulations II
PSHC 6206	Case Studies in Health Care Corporate Compliance
CPS 6294	Independent Research
CPS 6298	Practicum

See CPS regulations for additional information regarding enrollment status and time limits.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF PUBLISHING

The Master of Professional Studies in the field of publishing is designed for current and aspiring professionals. The 30-credit program is offered on a part-time basis; students finish the course of study in two years. Classroom instruction and distance learning options are available.

Core coursework provides a foundation in current industry practices, while advanced courses provide preparation for the future of publishing through in-depth study in the areas of editorial management, technology and design, or business and marketing.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://cps.gwu.edu/publishing) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 16 credits in required courses and all courses in one track; the remaining credits are taken in elective courses, with at least one elective taken in each of the two remaining tracks.

Code	Title	Credits
Required		
PSPB 6201	Book and Journal Publishing	
PSPB 6203	Business of Publishing	
PSPB 6205	CopyrightLaw/Print&Cyberspace	
PSPB 6207	Marketing Strategies	
PSPB 6232	Production Management	
PSPB 6251	Fundamentals of Electronic Publishing	
PSPB 6281	Ethics in Publishing	
All courses in one track		
Editorial Track		
PSPB 6261	Editorial Content, Rights, and Permissions	
PSPB 6262	Editing for Books, Journals, and Electronic Products	
PSPB 6265	Managing Editorial Staff	
Business and Marketing Track		
Four of the following:		
PSPB 6221	Publishing Management, Organization, and Strategy	
PSPB 6222	Accounting and Finance for Publishers	
PSPB 6224	Budgeting, Fulfillment, and Distribution	
PSPB 6258	User-Centric Design for Print and Electronic Publications	
PSPB 6271	Sales Management, Strategy, and Positioning	
PSPB 6272	Book Publicity & Promotion	
PSPB 6273	Managing the Marketing Portfolio	
Technology and Design Track		
Four of the following:		
PSPB 6213	Book Design	
PSPB 6253	Electronic Publishing Theory & Practice	
PSPB 6255	Electronic Publishing: Infrastructure and Architecture	
PSPB 6257	Designing/E-publishing Success	
PSPB 6258	User-Centric Design for Print and Electronic Publications	
Electives		

Credits beyond those for all required courses are taken as electives; at least one elective must be taken in each of the two remaining tracks.

FACULTY

Director A. Grossblatt

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSPB 6201. Book and Journal Publishing. 3 Credits.
Overview of the book and journal publishing industry and the opportunities and challenges it presents. Major functions of a publishing house and stages of publishing, including editorial, design, production, sales, marketing, and distribution. Publishing house finances.

PSPB 6203. Business of Publishing. 2 Credits.

PSPB 6205. CopyrightLaw/Print&Cyberspace. 3 Credits.

PSPB 6207. Marketing Strategies. 2 Credits.

PSPB 6213. Book Design. 2 Credits.

PSPB 6221. Publishing Management, Organization, and Strategy. 2 Credits.

PSPB 6222. Accounting and Finance for Publishers. 2 Credits.

PSPB 6224. Budgeting, Fulfillment, and Distribution. 2 Credits.

PSPB 6232. Production Management. 3 Credits.
Managing the production process from initial design and editing to a final printed and distributed publication. Aspects of traditional production, including printing basics, manufacturing savings, prepress and composition, paper, postage, and best practices. Emerging trends in digital products and delivery.

PSPB 6235. Essentials of Web Publishing. 2 Credits.

PSPB 6237. Business Models Online. 2 Credits.

PSPB 6251. Fundamentals of Electronic Publishing. 2 Credits.

PSPB 6253. Electronic Publishing Practice. 2 Credits.
Pragmatic, economic, and ethical aspects of electronic publishing for responsible decision making. Prerequisite: PSPB 6251.

PSPB 6255. Electronic Publishing: Infrastructure and Architecture. 3 Credits.
Emerging content technologies, including software and hardware components of a typical publishing system, the enabling standards, and an introduction to publishing systems architecture. Prerequisite: PSPB 6251.

PSPB 6257. Designing/E-publishing Success. 2 Credits.
Principles of digital design: usability testing, search engine optimization, iterative design, and multiple presentational models. Prerequisite: PSPB 6251.

PSPB 6258. User-Centric Design for Print and Electronic Publications. 2 Credits.

PSPB 6261. Editorial Content, Rights, and Permissions. 2 Credits.

PSPB 6262. Editing for Books, Journals, and Electronic Products. 2 Credits.
An overview of the editorial roles, functions, and workflows used in creating publications for print and electronic formats; peer review and online tools for manuscript submission and tracking.

PSPB 6265. Managing Editorial Staff. 2 Credits.

PSPB 6271. Sales Management, Strategy, and Positioning. 2 Credits.

PSPB 6272. Book Publicity & Promotion. 2 Credits.

PSPB 6273. Managing the Marketing Portfolio. 2 Credits.

PSPB 6281. Ethics in Publishing. 1 Credit.

PSPB 6298. Digital Publishing Practicum. 2 Credits.
Application of theory and practice acquired in prior courses to a real-world problem. Each semester the topic reflects a selected area of current importance in digital publishing. Restricted to students in the MPS in Publishing program during their final semester of study.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF SUSTAINABLE URBAN PLANNING

The master of professional studies in sustainable urban planning degree program is dedicated to helping students acquire the skills they need to face the challenges of modern urbanization, both in the United States and around the globe. The program offers an array of high-level theoretical, philosophical, and historical courses in planning, urban issues,

and new technological approaches that aim to prepare new planning professionals for success in the burgeoning field. Above all, the program gives students the ability to use their ideas to help forge better cities.

The complete sequence of classes required for the master's degree is offered each calendar year, including the summer session, and students may enroll on a full- or part-time basis.

The program also offers graduate certificates in sustainable urban planning (p. 876) and climate change management and policy (p. 872), which are designed for students who are not in need of a complete master's degree.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://cps.gwu.edu/master-professional-studies-sustainable-urban-planning-0) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits, including 30 credits in required courses and 18 credits in courses in one track.

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSUS 6201. Principles of Sustainable Urban and Regional Planning. 3 Credits.
The environmental, social, and economic elements of sustainability. Present and future challenges, including environmental management, energy policy, financial crises, global warming, inequality, public education, third and first world slums, the success and failure of nations, urban agriculture, urban economics, and more. The implications of sustainable development and conducting research based on evidenced-based policy. Students focus on the work of researchers outside of the planning field as they write a series of research essays containing reviews of relevant scientific literature.

PSUS 6202. Urban and Environmental Economics. 3 Credits.
The application of neoclassical economics to problems faced by practitioners of the field of sustainable urban and regional planning. Key economic concepts including supply and demand, consumption and production, markets and market failure, and measurement of environmental and other non-market commodities. An economist's perspective on the principals and methods for understanding urban and environmental challenges and solutions, urban growth, environmental quality, public policy, and other issues fundamental to contemporary development.

PSUS 6203. Research Methods I: Geospatial and Econometric Analysis. 3 Credits.
Focus on developing proficiency in geographic information systems (GIS) and econometric analysis, a method of statistical analysis for measuring the relationships at work in socioeconomic phenomena. Building and analyzing spatial datasets, specifically using ArcGIS and Stata statistical software.

PSUS 6204. Land Use Law. 3 Credits.

PSUS 6210. Transportation Planning in City Systems. 3 Credits.
Transportation planning with long-run goals in mind, including reducing greenhouse gas emissions. The role of planning at local and regional scales within the broader framework of transportation engineering.

PSUS 6211. Regional Development and Agricultural Economics. 3 Credits.
The economics of land use patterns and development processes in the United States and elsewhere in the world. Introduction to the field of agricultural economics and examination of food deserts and other food-related problems relevant to the field of sustainable urban planning.

PSUS 6212. Sustainable Communities I: Housing and Design. 3 Credits.
Community development with a focus on policy and the various sectors of interest that affect contemporary urbanization. How policies, planning techniques, and implementation strategies form the core work of planning practitioners. Topics include water supply, food deserts, public health, and urban resilience. Pathways to more sustainable communities are explored through the policy arenas in which key decisions are made; key sectors that make up the fabric of communities; and special topics that have emerged as critical challenges for sustainable community development.

PSUS 6213. Research Methods II: Advanced Geospatial and Econometric Analysis. 3 Credits.
Builds upon the skills learned in PSUS 6203. Application of econometric and geospatial analysis in the field of sustainable urban and regional planning. Emphasis on objectivity and use of the scientific method to form defensible, evidence-based policy. Prerequisite: PSUS 6203.

PSUS 6220. Planning Resilient and Low-Carbon Cities. 3 Credits.
International perspectives on urban planning, taking into consideration increased global temperatures resulting from greenhouse gas emissions-induced climate change. The course is taught with reference to the findings of the Intergovernmental Panel on Climate Change (IPCC) and considers how urbanization around the world must adapt to the reality of global warming and its consequences.

PSUS 6221. The Scientific Basis of Climate Change. 3 Credits.
The science underlying climate change policy and decision making. Earth systems, climate change projections, the need for mitigation, and impact assessment. Designed for non-scientists.

PSUS 6222. Climate Change Economics. 3 Credits.
Energy use in built environments with an emphasis on fundamental drivers of energy demand, strategies to promote energy efficiency, and essential features of energy supply; the relationship between energy demand and supply in development.; how advances in construction technology can help counter greenhouse gas emissions.

PSUS 6223. Sustainable Communities II: Tools for Assessment and Transformation. 3 Credits.
Builds on PSUS 6212 by further detailing the theory and tools relevant to the assessment and transformation of neighborhood and communities. Geospatial analysis explore the fundamental drivers of urban form, advanced transportation systems, theories of change, and various impact assessment tools used to inform policy implementation.

PSUS 6224. Sustainable Energy for Cities and the Environment. 3 Credits.
Resource management and renewable energy technologies. Vulnerabilities of existing urban structures, particularly the energy grid. Implications of and solutions to energy-related problems likely to arise in present and future cities.

PSUS 6230. Sustainable Comm Design Studio. 3 Credits.

PSUS 6231. Practicum:ClimateChangeMgt&Pol. 3 Credits.

PSUS 6233. Capstone Studio. 3 Credits.

PSUS 6235. Adv Topics in Urban Sust. 3 Credits.

PSUS 6260. Intro to Sustainable Design. 2 Credits.

PSUS 6261. Ecology of the Built Env.. 2 Credits.

PSUS 6262. Tools for Sustainable Design. 3 Credits.

PSUS 6264. Native Plants I. 2 Credits.

PSUS 6265. Native Plants II. 1 Credit.

PSUS 6266. Ecological Restoration. 1 Credit.

PSUS 6268. Sustainable Design Methods. 2 Credits.

PSUS 6269. Sustenance and the Landscape. 2 Credits.

PSUS 6270. Sustainable Design Charrette. 3 Credits.
Preparation of a final project that demonstrates students' understanding of how to select and use sustainable site principles in a landscape design. Building and expanding upon techniques learned in previous coursework, students show comprehension of how their project site has boundaries within its surrounding ecosystem, but is still part of a larger life cycle. Students work in a concentrated charrette format to develop a site design that is fully sustainable and buildable.

GRADUATE SCHOOL OF POLITICAL MANAGEMENT

The Graduate School of Political Management, through the College of Professional Studies, offers the master of professional studies in the fields of political management, legislative affairs, strategic public relations, and advocacy in a global environment. Each program has a prerequisite of a bachelor's degree with a minimum *B* grade-point average from an accredited college or university and is subject to the CPS regulations (http://www.cps.gwu.edu) that appear under the respective programs. In addition, graduate certificate programs are offered in campaign strategy, digital politics, community advocacy, public relations, PACs and political management, and global public relations. The master of professional studies in political communication and governance; and graduate certificates in both political management and strategic governance, and strategic communications and campaigns are offered in Spanish to closed cohorts of students in Latin America and in Spain.

GRADUATE

Master's programs

- Master of Professional Studies in the field of advocacy in the global environment (p. 862)
- Master of Professional Studies in the field of legislative affairs (p. 863)
- Master of Professional Studies in the field of political management (p. 864)
- Master of Professional Studies in the field of political communication and governance (offered only in Spanish) (p. 869)
- Master of Professional Studies in the field of strategic public relations (p. 870)

Combined program

- Dual Master of Professional Studies in the field of political management and graduate certificate in survey design and analysis (p. 870)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

- Political Management (PMGT) (p. 1387)
- Legislative Affairs (LGAF) (p. 1327)
- Professional Studies Public Relations (PSPR) (p. 1407)

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF ADVOCACY IN THE GLOBAL ENVIRONMENT

The Master of Professional Studies in the field of advocacy in the global environment offers innovative experiential learning opportunities for professionals involved in all aspects of global politics and advocacy, from lobbying to strategic public relations, campaigns, and influence building. The program can be completed in as little as one year; however, the usual pace is two courses per semester over two years. Twelve credits of coursework are dedicated to the global immersion residencies in regions around the globe: North America (Washington, D.C.), Europe (Brussels), Middle East and Africa (Istanbul), Asia (Hong Kong), and Latin America (São Paulo).

Specific admission requirements are shown on the Graduate Program (http://www.gwu.edu/all-graduate-programs)Finder.

Visit the program website (http://gspm.gwu.edu/advocacy-global-environment) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 39 credits, including 21 credits in required courses, 12 credits in global residencies, and 6 credits in elective courses.

Requirements for the major:

Core courses	
PSAD 6225	Fundamentals of Global Political Management
PMGT 6403	Political Data and Analytics
PMGT 6402	Applied Political Communications
PMGT 6404	Principled Political Leadership
PSAD 6240	Global Advocacy: Strategies, Tools, and Tactics
or PSAD 6270	International Public Relations and Global Advocacy
PSAD 6250	Cultural Aspects of Global Engagement
PSAD 6260	Comparative Political Management Environments
Four global residences	
PSAD 6200	Global Perspective Residencies
Six credits of electives selected in consultation with advisor*	

*Electives may be chosen from course offerings of the Legislative Affairs, Strategic Public Relations, or Political Management programs. Some students may take courses in the Elliott School of International Affairs, Trachtenberg School of Public Policy and Public Administration, the School of Business, or create an independent study course with the permission of the program director and approval of the director.

Scholarship Requirements

A grade-point average of 3.0 is required for award of a master's degree. Students who receive a grade of *C* in more than 6 credits are subject to suspension. Students who receive a grade of *F* must confer with the dean before enrollment for further coursework is allowed. See CPS regulations (p. 843) for additional information regarding enrollment status and time limits .

FACULTY

Professors M. Kennedy

Associate Professors M. Cornfield, S. Billet, L. Parnell, S. Wiley

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF LEGISLATIVE AFFAIRS

The Master of Professional Studies in the Field of Legislative Affairs centers on the study of applied politics in the legislative arena, offering students the perspective of both political scholars and working professionals. The curriculum focuses on how Congress operates, how legislative procedures shape outcomes, and how entities like the executive branch, lobbyists, and constituents influence the work of the legislature.

The program is designed for both working professionals and full-time students, with classes meeting Monday through Thursday evenings in the Washington, D.C. metro area. The required 33 credits can be completed in as little as one year; however, the usual pace is two courses per semester completed in two years.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gspm.gwu.edu/legislative-affairs) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits, including 12 credits in required courses; at least 6 credits in courses in each of two elective areas; either 6 credits in thesis or 6 additional credits in one or both of the two elective areas; and successful completion of a master's comprehensive examination.

Code	Title	Credits
Required		
LGAF 6201	Politics and Public Policy	
LGAF 6202	Legislative Politics	
LGAF 6203	Executive–Legislative Relations	
LGAF 6204	Research Methods for Legislative Affairs Specialists	
Elective areas		
American Political Process		
At least two courses from the following:		

LGAF 6217	Budgetary Politics
LGAF 6218	Judicial Politics
LGAF 6219	American Presidency
LGAF 6222	Parties and Elections
LGAF 6223	Public Opinion/Pol Socializatn
LGAF 6224	Interest Group Politics
LGAF 6228	Media and Congressional Politics
LGAF 6233	Comparative Legislatures
LGAF 6234	PACs and Congress
Public Policy Analysis	
At least two courses from the following:	
LGAF 6246	Congress & Foreign Policy
LGAF 6249	Congress and National Security Policy
LGAF 6251	Budgetary Policy
LGAF 6260	Special Topics: Domestic Policy
LGAF 6270	Special Topics: Congress and Foreign Policy
Thesis option	
LGAF 6998	Thesis
LGAF 6999	Thesis
Non-thesis option	
Six additional credits in one or both of the elective areas, above.	

*With prior approval of the academic advisor, students may take up to three of the required number of elective courses in related disciplines.

Successful completion of a master's comprehensive examination is required.

See CPS regulations for additional information regarding enrollment status and time limits.

Professorial Lecturers J. Weinberg, R. Whitlock, C. Veillette

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF POLITICAL MANAGEMENT

The master of professional studies in the field of political management degree program teaches students how to win campaigns, advocate effectively on issues, and formulate sophisticated communication strategies for candidates, causes, and corporations. Instructors are political and communications professionals who are passionate about educating students in their areas of expertise. Graduates of the program are prepared to assume decision-making positions as communications directors, digital directors, campaign managers, media consultants, chiefs of staff, and office-holders.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gspm.gwu.edu/node/120) for additional information.

REQUIREMENTS

Non-thesis and thesis options are available.

The following requirements must be fulfilled: Non-thesis option—36 credits, including 15 credits in required courses and 21 credits in elective courses; thesis option—36 credits, including 18 credits in required courses and 18 credits in elective courses.

Code	Title	Credits
Required		
PMGT 6401	Fundamentals of Political Management	
PMGT 6402	Applied Political Communications	
PMGT 6403	Political Data and Analytics	
PMGT 6404	Principled Political Leadership	
Electives		
Six courses from the following:		
PMGT 6410	Grassroots Engagement	
PMGT 6412	Issues Management	
PMGT 6422	State and Intergovernmental Politics	
PMGT 6430	Campaign Strategy	
PMGT 6432	Managing Campaigns	
PMGT 6434	Running for Office	

PMGT 6436	National Campaign Dynamics
PMGT 6438	State and Local Campaigns
PMGT 6440	Targeting and Voter Contact
PMGT 6442	Campaigns Around the World
PMGT 6450	Rules, Laws, and Strategy
PMGT 6452	Digital Strategy
PMGT 6454	Fundraising and Budgeting
PMGT 6456	Speechcraft
PMGT 6458	Crisis Management
PMGT 6460	Audience Research
PMGT 6462	Opposition Research
PMGT 6464	Influencing the Media
PMGT 6466	Political Advertising
PMGT 6468	Digital Advertising and Action
PMGT 6470	Digital Content Creation
PMGT 6472	Maximizing Social Media
PMGT 6474	Stereotypes and Political Strategy
PMGT 6476	Political Consulting
PMGT 6490	Special Topics
PMGT 6496	Independent Study
PMGT 6497	Graduate Internship
Non-thesis option	
Students who select the non-thesis option take the capstone course, PMGT 6495, and one additional elective in either their penultimate or final semester.	
PMGT 6495	Political Power & Practice
Thesis option	
Students who select the thesis option take PMGT 6498 and PMGT 6499 over the course of their final two terms.	
PMGT 6498	Thesis I
PMGT 6499	Thesis II
Distance learning	
Distance learning students take PMGT 6480 or PMGT 6482 as part of their program of study.	
PMGT 6480	Washington Residency
PMGT 6482	Applied Research Project

FACULTY

Director M. Kennedy

Professor F.C. Arterton

Associate Professors S. Billet (Program Director), L. Brown (Program Director), M. Cornfield (Research), D. Niven, L. Matos, L. Parnell (Program Director), S. Wiley

Assistant Professors M. Dallek, G. Lebel, D. Rehr (Program Director)

Professorial Lecturers J. Babb, T. Bawidamann, P. Bell, N. Bocksor, M. Braden, S. Bush, M. Crannell , B. Carr, D. Cantor, J. Chandler, J. Dube, M. Edwards, L. Ellenbogen, W. Feltus, P. Fenn, K. COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PMGT 1000. Dean's Seminar. 3 Credits.

PMGT 4101. Electoral&LegislativeProcesses. 3,4 Credits.

PMGT 4107. Practicum in Political Mgt. 3,4 Credits.

PMGT 4187. Professional Internship. 3-4 Credits.

PMGT 4192. Tutorial-Amer Elect& PolMvmnts. 3-4 Credits.

PMGT 6401. Fundamentals of Political Management. 3 Credits.
Main concepts, arenas, developments, roles, and practices in the field of political management. Assess rhetorical situations, write strategy memos, create and critique campaign messages, and engage citizens, professional colleagues and decision-makers. Taken in first semester of program. (Professors M. Cornfield and TBD.).

PMGT 6402. Applied Political Communications. 3 Credits.
Models and methods by which professionals plan, produce, and adjust strategic communication messages in democratic politics. Use a variety of communication forms and media, such as, fact sheets, blog posts, video releases, and public addresses, under typical constraints of time, money, information, reputation, talent, audience attentiveness, and institutional procedure. Students to enroll by their sixth course in the program. Core requirement; Must be completed before a student reaches 18 credit hours.

PMGT 6403. Political Data and Analytics. 3 Credits.
Introduction to the uses of quantitative data and statistics in politics. Learn to evaluate research designs, statistical associations, causal reasoning, methods for hypothesis testing, multivariate regression analyses, and data analytics. Consume and critique data and statistics for strategic purposes. Students to enroll by their sixth course in the program. Core requirement. Must be completed before a student reaches 18 credit hours.

PMGT 6404. Principled Political Leadership. 3 Credits.
Theory and practice of ethically grounded political leadership. Consideration of the recurrent dilemmas, philosophical principles, management techniques, codes of conduct, and professional norms in the political management field. Application through self-assessment exercises, case study analysis, and individual and group simulations. Students to enroll by their sixth course in the program. Core requirement. Must be completed before a student reaches 18 credit hours.

PMGT 6410. Grassroots Engagement. 3 Credits.
Strategies and techniques to build advocacy support among and across general civic populations. Identification of potential supporters through database targeting and individual outreach. Motivation and training of interested supporters for grassroots action in campaigns, at public forums, and before decision-makers. Coalition and protest options; analytics of ongoing efforts. (Professors E. Grefe, S. Gagen).

PMGT 6412. Issues Management. 3 Credits.
Track, influence, and alter politically significant issue-related discourses and policy developments. Legislative, executive, and judicial venues and processes for policymaking; state referendum, initiative, and recall ballot opportunities; organizational structures, including digital procedures, for issue management. (Professors M. Edwards, E. Grefe).

PMGT 6414. Lobbying. 3 Credits.
Survey of and training for lobbying in the U.S. federal system. Students design a detailed lobbying plan for implementation and practice a variety of influence techniques, including those associated with digital media and communications technologies. Legal compliance, organizational and public accountability, professional standards and practices. (Professor J. Hobson).

PMGT 6416. International Lobbying. 3 Credits.
Survey of international lobbying practices, analysis of strategic models and best practices in a variety of different countries and political systems (e.g., EU, China, Brazil, and Turkey). Trends and innovations in lobbying techniques and communications technologies. Investigation and application of appropriate research to improve practice. (Professor TBD by AGE program) (Same as PSAD 6240).

PMGT 6418. Budget Politics. 3 Credits.
Politics of the budget process, including formal and informal mechanisms of appropriating U.S. federal funds. Lobbying strategies and tactics employed by private and public organizations seeking to influence budgetary agenda-setting in the White House; decision-making in Congress; and funding negotiations within and between executive agencies. (Professor M. Edwards).

PMGT 6420. Corporate Public Affairs. 3 Credits.
Exploration of major functional areas in corporate public affairs with a focus on the political and policy dynamics operating in the United States and other democracies. Development and deployment of appropriate strategies, research, and tactics for corporations managing the complexities related to a global economy and shifting political alliances.

PMGT 6422. State and Intergovernmental Politics. 3 Credits.
Examination of the electoral pressures on state and local legislators. Methods and techniques for advocacy in various state capitals. The governing responsibilities of constitutionally-delegated to states and the ever-changing historical relationship between states and the federal government. (Professors C. Shank).

PMGT 6430. Campaign Strategy. 3 Credits.
Orientation to the basic systems and technologies that must be created and managed to produce electoral victory. The campaign plan and campaign budget as the foundation for management of campaigns. Focus on development of a campaign plan. (Professor M. Meissner).

PMGT 6432. Managing Campaigns. 3 Credits.
Understanding the role of a campaign manager in staffing and running a campaign, while executing the campaign plan. Candidate handling, fundraising, website and technology, geographic and demographic targeting, field organization, canvassing, get-out-the-vote, press operations, budget control, and liaison with the party and interest groups. (Professors TBD) Prerequisites: PMGT 6430.

PMGT 6434. Running for Office. 3 Credits.
Electoral politics from the perspective of the candidate, strategic and personal factors involved in the decision to run and the consequences of victory or defeat. (Professor R. Faucheux).

PMGT 6436. National Campaign Dynamics. 3 Credits.
Examination of the historical and systematic patterns in national elections. Differences between presidential and midterm elections; House and Senate contests; party nomination races and general elections; primaries and caucuses; Democratic and Republican party delegate selection rules; causes for "wave" elections; effect of the economy on election outcomes; and standard vice presidential selection models. The political and partisan structural conditions that exist before any of the candidates or the campaigns get involved.

PMGT 6438. State and Local Campaigns. 3 Credits.
Application of campaign strategy and management principles to electoral races at the state and local levels. Staffing, budgeting, and strategic challenges for what are typically lower-visibility contests that involve state and local candidates. Coordinated campaigns and the impact of the national party's reputation on these down-ballot races. (Professor TBD).

PMGT 6440. Targeting and Voter Contact. 3 Credits.
How to find voters for electoral and advocacy campaigns and tailor communications to them. Database analytics, list management, questionnaire design, target weighting, predictive modeling. Review of randomized and natural experiments in light of theoretic principles and findings from public opinion research. Skill development in use of spreadsheets and basic statistical packages. Lab fee. (Professors B. Russell, A. Strauss) Prerequisites: PMGT 6403.

PMGT 6442. Campaigns Around the World. 3 Credits.
Comparative examination of national-level campaigns in democratic countries outside of the United States. Strategies, techniques, and practices used in multi-party and/or parliamentary systems. Professional conduct, consulting rules and norms.

PMGT 6450. Rules, Laws, and Strategy. 3 Credits.
U.S. federal and state laws and regulations governing recognition of political parties and political organizations, campaign finance, political broadcasting and cablecasting, lobbying registration. Ballot access and voter registration. Ethical and strategic considerations (opportunities and constraints; benefits and drawbacks) related to rule construction. (Professor M. Braden).

PMGT 6452. Digital Strategy. 3 Credits.
Development of an integrated digital strategy for use in advocacy and electoral campaigns. Introduction to the theoretical concepts, distinctive technologies, applied skills, and managerial challenges associated with digital campaigning. Search engine optimization, GPS, online payment systems, customizing back- and front-end systems to meet strategic goals and budget parameters, working with IT vendors and distance volunteers, legal and cultural considerations in US and other regimes, site rollout and scaling, security and privacy. (Professor TBD).

PMGT 6454. Fundraising and Budgeting. 3 Credits.
Raising and spending money in political campaigns, referenda contests, issue advocacy, and lobbying efforts. Budgeting process, standard controls to check expenditures, accounting procedures, and general strategies for use in effective fundraising. (Professor N. Bocskor).

PMGT 6456. Speechcraft. 3 Credits.
Analysis and techniques used in speechwriting and presentations for public officials and candidates. Managing the political optics and understanding a speech's visual context and non-verbal communication capabilities (Rose Garden, Oval Office, campaign stump speech, ceremonial occasion, congressional testimony). Modulating speaker style, tone, and pacing, and staging the speech for effect. (Professors D. McGroarty, R. Lehrman).

PMGT 6458. Crisis Management. 3 Credits.
Management of crisis situations and defining moments in electoral, legislative, and public policy campaigns. Exploration of the causes and consequences of political scandals. Professional responsibilities and ethical considerations of crisis management and rapid response decisions. (Professor M. Edwards).

PMGT 6460. Audience Research. 3 Credits.
Processes by which citizens acquire political information and make decisions in politics. Survey research uses in electoral campaigns and issue advocacy. Designing and drawing samples, constructing and pretesting questionnaires, modes of interviewing, financial implications, practical problems in selecting and monitoring polling organizations, and interpretation of data. Focus groups and small-sample interviews; relationship between qualitative and quantitative research; reliability and validity. (Professors R. Johnson, D. Cantor, B. Tringali, M. Ward) Prerequisites: PMGT 6403.

PMGT 6462. Opposition Research. 3 Credits.
Practices and techniques associated with investigative opposition research. Public document and website searches, candidate tracking, and methods for information dissemination. Changes in practice as a result of technological innovations and a changing media environment. Professional responsibilities and ethics expected from opposition researchers.

PMGT 6464. Influencing the Media. 3 Credits.
Organization, practices, and norms of the major media; media coverage of public officials, political campaigns, legislative battles, interest groups, and issues of public policy. Formulation of strategies for getting favorable news coverage for the issue or candidate and for ending a media crisis. (Professor L. Ellenbogen).

PMGT 6466. Political Advertising. 3 Credits.
Strategies and techniques for using the various media (print, radio, television, cable, Internet) in political and advocacy campaigns, with emphasis on the use of television. Impact and uses of paid advertising; development of campaign messages; production, timing, and placement of television advertising; explanation of media markets. Students design print ads and brochures and produce a 30-second television spot. (Professor P. Fenn).

PMGT 6468. Digital Advertising and Action. 3 Credits.
Strategies and techniques for developing and leveraging digital advertising for mobilization. Manage an effective online ad campaign from initial concept to creation and from targeting to measuring the results. Prepare, design, and launch a variety of online ad types, including search, social, display, and video. Analyze success or failure based on analytics and benchmarking. Prerequisites: PMGT 6452: Digital Strategy.

PMGT 6470. Digital Content Creation. 3 Credits.
Developing and creating effective digital content that promotes campaign narratives and furthers strategic messages. Construct portfolios of original and aggregated digital media content. Skill development in infographics, video, GPS, photo collage, page and site architecture, and texts from 140 characters to blog posts and file attachments. Versioning for different communities, functionalities, and channels including mobile applications. Prerequisites: PMGT 6452: Digital Strategy.

PMGT 6472. Maximizing Social Media. 3 Credits.
Creating and integrating owned digital platforms and social media assets for political persuasion and action. Cultivation of online political communities, moderating and curating outside-generated content, integration and alignment with campaign message; event, reputation and crisis management. Review of constraints and potentials intrinsic to specific social media sites (e.g. Facebook, Google, LinkedIn, Twitter). Prerequisites: PMGT 6452: Digital Strategy.

PMGT 6474. Stereotypes and Political Strategy. 3 Credits.
Accounting for psychological constructs, social stereotypes, media framing, and the impression formation process in developing a political strategy. Review of empirical research; investigation of effective techniques or postures for overcoming biases; self-assessment of perceptual assumptions.

PMGT 6476. Political Consulting. 3 Credits.
Management principles, technical procedures, and legal requirements for starting and running a political consulting business. Effective practices for gaining a positive reputation, sustaining profitability across the variable political environment, and engaging on the international front. Start-up funding, mergers and acquisitions, exit strategies. (Professors G. Nordlinger, L. Purpuro, M. Meissner).

PMGT 6480. Washington Residency. 3 Credits.
Capstone experience equivalent to PMgt 6495 for students in the online Political Management program. Exposure to and interaction with political consultants, advocacy specialists, elected officials, and applied researchers in Washington, D.C. Integration of program curriculum toward an understanding of the federal political ecosystem and development of a robust political network. Restricted to Taken by PMGT online students in last or penultimate term, or with approval by instructor.

PMGT 6482. Applied Research Project. 3 Credits.
A research option for students in the online Political Management program. Development of a campaign-relevant research report and related communications on behalf of a mock political client. The report will describe the status quo of a political situation, analyze the factors and actors sustaining that status quo, identify what and who is potentially moveable in the direction the client seeks to go, and outline practical first steps a campaign can take in that direction. Restricted to For students in the PMGT online program; taken either in the penultimate or last term in the program.

PMGT 6490. Special Topics. 3 Credits.
Topic to be announced in the Schedule of Classes.

PMGT 6495. Political Power & Practice. 3 Credits.
Capstone seminar that develops and integrates knowledge of political strategies, tactics, and situational considerations, and applies that knowledge to advanced political problems. Topics include: gaining and wielding power, the complexity associated with making democracy work, conflict resolution, negotiation and bargaining skills, grappling with the consequences of winning and losing. Students to enroll during their last or penultimate term. (Professor L. Brown).

PMGT 6496. Independent Study. 0-3 Credits.
Independent research with a Political Management faculty member. Registration must be approved in advance by the supervising faculty member and the director of the political management program.

PMGT 6497. Graduate Internship. 0 Credits.
Limited to Political Management M.P.S. degree candidates. Experience at an organization focused on applied politics.

PMGT 6498. Thesis I. 3 Credits.
Master's degree candidates must apply to the program committee for thesis approval and have completed 24 credit hours with a 3.3 GPA.

PMGT 6499. Thesis II. 3 Credits.
Master's degree candidates must apply to the program committee for thesis approval and have completed 24 credit hours with a 3.3 GPA. Prerequisites: PMGT 6498.

PMGT 6501. Politics and Public Policy. 3 Credits.
Examination of political processes that influence policy formulation, policy implementation, and the uses of policy analysis. Topics include political and policy decision making, actors, and process.

PMGT 6502. ConfrontManag&AllianceBldg. 3 Credits.

PMGT 6503. Communication Strategy. 3 Credits.
Formulation of political communications strategies. Elements necessary to create, introduce, and maintain an effective political profile in issue advocacy campaigns, candidate elections, and legislative advocacy campaigns. Application of principles of research, advertising, and marketing to the political landscape.

PMGT 6504. PolMgt & StrategicGovernance. 3 Credits.

PMGT 6505. Politica de bases. 3 Credits.
Use of microtargeting and database-layering technology to identify potential advocates. Motivational techniques to mobilize volunteers for political campaigns, lobbying efforts, and community advocacy. Techniques used by grassroots organizers to help corporations, unions, civic and nonprofit organizations, and special interest groups achieve strategic goals.

PMGT 6506. Practicum. 3 Credits.

PMGT 6507. Democracia y elections en LA. 3 Credits.
This course will focus on the recent history of Latin America, underscoring the struggle to establish and consolidate democracy and the preeminence of elections as the legitimate process to select and replace authorities at the national, regional and local levels. The course will provide the student with concepts to understand the different types of democratic settings that exist in the region, that is the coexistence of fairly established and solid democracies, with low intensity democracies, and semi-authoritarian regimes, all of which utilize electoral processes to select public authorities. The main message of this course is that campaign designers need to understand and take a strategic advantage of the political context and the rules governing the political competition in order to obtain the most effective results.

PMGT 6508. Estrategia de campana LA. 3 Credits.
Organization of political campaigns. Strategic decisionmaking. Formulation of political communications strategies. Aspects necessary to introduce and maintain an effective political profile in the electoral campaigns in Latin America, including the specialized forms of communication which political professionals use to win support for their candidates. This course will be taught entirely in Spanish.

PMGT 6509. Las encuestas-America Latina. 3 Credits.
The use of survey research in campaigns. Quantitative and qualitative survey research for political management in Latin America. The proper use of polls; methodology and survey design; reviewing poll results; drawing conclusions and recommendations from polls; and the practical problems of administering and interpreting survey data of public opinion in Latin America. PMGT 6509 will be taught entirely in Spanish.

PMGT 6510. Organizacion y ejecucion-LA. 3 Credits.
Organizational choices facing campaign management teams in Latin America as they attempt to combine the resources and activities of a modern campaign into a winning effort.

PMGT 6511. Propoganda politica, La campan. 3 Credits.
The strategies, techniques, design and impact of paid political communications directed toward target audiences in Latin America, focusing upon the role of political advertising in a campaign, including radio, direct mail, print and internet, but with specific emphasis on television commercials.

PMGT 6512. Los medios, la politica-LA. 3 Credits.
The role of the media in the politics of Latin America. Who the media are, how they make their decisions, and how they influence outcomes in campaigns and other political situations. Strategic planning in dealing with the media as well as the particular dynamics that surround electronic, print, and the new media. Effective practices of media engagement. This course will be taught entirely in Spanish.

PMGT 6513. Comunicacion Politica,Gobernon. 3 Credits.
The course builds upon the Practicum course of the Certificate in Governance and integrates the two processes of politics: campaigning and governing. PMGT 6513 will be taught entirely in Spanish.

PMGT 6514. Manejo de Crisis. 3 Credits.
Manejo de Crisis. Management of crisis situations and defining moments in electoral, legislative, and public policy campaigns. Exploration of the causes and consequences of political scandals. Professional responsibilities and ethical considerations of crisis management and rapid response decisions.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF POLITICAL COMMUNICATION AND GOVERNANCE (OFFERED IN SPANISH ONLY)

GW's Graduate School of Political Management offers the Master of Professional Studies in the field of political communication and governance to closed cohorts of students in Latin America and Spain. The program combines several subjects divided into two modules: political communication and election campaign and political management and governance. The opportunity to pursue an individualized master's research project is also available. The programs are offered in Spanish only.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program's website (http://www.gspminternational.org) for additional information.

See CPS regulations (p. 843) for additional information regarding enrollment status and time limits.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF STRATEGIC PUBLIC RELATIONS

The master of professional studies in the field of strategic public relations prepares its graduates to work at major public relations firms or in communication roles with nonprofits, corporations, on Capitol Hill, or in the executive branch. The 30-credit program is offered at GW's Alexandria Education Center as well as via distance learning.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://gspm.gwu.edu/strategic-public-relations) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 18-21 credits in required courses and 9-12 credits in elective courses.

The following requirements must be fulfilled: 30 credits in required and elective courses.

Code	Title	Credits
Required		
PSPR 6201	Public Relations Principles and Practices	
PSPR 6202	Advanced Writing for PR Professionals (see note below)	
PSPR 6203	Research Methods for Public Relations and Public Affairs Managers	
PSPR 6204	Media Relations in the New Media World	
PSPR 6205	Fundamentals of Business and Management for Public Relations and Public Affairs	
PSPR 6206	Ethical Standards in Public Relations and Public Affairs	
CPS 6300	Capstone Research Project	
Electives		
9-12 credits in elective courses chosen in consultation with the program director.		

Note: Students may place out of PSPR 6202 based upon review of their transcript and required writing samples. Such students take an additional elective course.

FACULTY

Director L. Parnell

DUAL MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF POLITICAL MANAGEMENT AND GRADUATE CERTIFICATE IN SURVEY DESIGN AND ANALYSIS

The dual graduate master of professional studies degree/graduate certificate program teaches students to design and conduct public opinion surveys, analyze the data that those surveys impart, and use that data to craft winning political campaigns and advocacy initiatives. The program helps students understand not only when it is appropriate to procure and design public opinion surveys, but also how to generate useful questions, analyze responses, and craft communications about the data in a manner that is consistent and aligned with a political strategy. Students also learn to analyze both publicly available and privately commissioned survey opinion data to develop and contextualize a campaign's or an advocacy group's strategic plan.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

Visit program website (https://gspm.gwu.edu/dual-degree-programs) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 42 credits, including 33 credits in required courses and 9 credits in elective courses.

Code	Title	Credits
Required		
PMGT 6401	Fundamentals of Political Management	
PMGT 6402	Applied Political Communications	
PMGT 6403	Political Data and Analytics	
PMGT 6404	Principled Political Leadership	
PMGT 6495	Political Power & Practice	
STAT 6233	Questionnaire Design	
STAT 6234	Intermediate Statistical Laboratory: Statistical Computing Packages	
STAT 6236	Applied Sampling Techniques	

STAT 6238	Survey Management
Electives	
9 credits in Political Management (PMGT) courses	

CERTIFICATE PROGRAMS

Undergraduate certificates

- Cyber Attacks and Cyber Threats Analysis
- Investigation of Cyber Security Incidents (p. 871)
- Protection and Defense of Computer Networks (p. 872)

Graduate certificates

The College of Professional Studies offers the following graduate certificates. Requirements are listed on the College of Professional Studies website (http://www.cps.gwu.edu). In addition to those listed, graduate certificates in political management and strategic governance and in strategic communications campaigns are offered in Spanish to closed cohorts of students in Latin America and in Spain.

- Climate Change Management and Policy (p. 872)
- Digital Politics (p. 872)
- Global Public Relations (p. 873)
- Health Care Corporate Compliance (p. 873)
- Justice and Public Safety Information Management (p. 874)
- Landscape Design (p. 874)
- PACs and Political Management (p. 874)
- Paralegal Studies (p. 875)
- Strategic Management and Executive Leadership for Law Enforcement
- Sustainable Landscapes (p. 876)
- Sustainable Urban Planning (p. 876) (p. 876)

UNDERGRADUATE CERTIFICATE IN CYBER ATTACKS AND CYBER THREATS ANALYSIS

The undergraduate certificate in cyber attacks and cyber threats analysis is intended for students with associate's or non-technical bachelor's degrees who wish to learn about highly specialized review and evaluation of incoming cyber security attacks and breaches. Upon the completion of this program, students will be able to investigate cyber security incidents, and identify and correct computer network vulnerabilities through penetration testing and hacking techniques.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://cps.gwu.edu/cybersecurity-bachelors) for admissions requirements and other additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Code	Title	Credits
PSCS 4201		
PSCS 4202	Cyber Attack Tools and Techniques	
PSCS 4203	Analysis of the Intelligence Cycle	
PSCS 4204	Computer Network Attack and Exploitation	
PSCS 4205	Practicum: Cyber Attack Techniques	

UNDERGRADUATE CERTIFICATE IN INVESTIGATION OF CYBER SECURITY INCIDENTS

The undergraduate certificate in investigation of cyber security incidents is designed for students who are looking to learn about investigation of cyber events and crimes that impact information technology systems and computer networks. Upon the completion of this program, students are able to investigate and analyze cyber security incidents and collect digital evidence for analysis.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://cps.gwu.edu/undergraduate-certificates) for admission requirements and additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Code	Title	Credits
Required		
PSCS 2301	Cyber Investigation	
PSCS 2302	Digital Forensics	
PSCS 2303	Compliance and Risk Management	
PSCS 2304	Incident Response	

PSCS 2305	Practicum: Incident Response Techniques

UNDERGRADUATE CERTIFICATE IN PROTECTION AND DEFENSE OF COMPUTER NETWORKS

The certificate in protection and defense of computer networks is designed for students with associate's or non-technical bachelor's degrees who are looking to learn about current, state-of-the-art protection technologies. Upon the completion of this program, students will be able to identify, analyze, and mitigate potential threats to information technology systems or computer networks.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://cps.gwu.edu/undergraduate-certificates) for admissions requirements and additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Code	Title	Credits
Required		
PSCS 4101	Introduction to Protection Technologies	
PSCS 4102	Intrusion Detection and Vulnerability Management	
PSCS 4103		
PSCS 4104	Securing Network Devices	
PSCS 4105	Cyber Defense Techniques Practicum	

GRADUATE CERTIFICATE IN CLIMATE CHANGE MANAGEMENT AND POLICY

The graduate certificate in climate change policy and management is intended for students with a master's degree in planning or an allied field—including public policy and the social sciences—who seek expertise in planning for climate change and climate change adaptation. Graduates of the program are able to apply their knowledge in public and private sector planning, policy, design, and/or engineering agencies, both inside and outside the United States.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://cps.gwu.edu/sustainable-urban-planning/graduate-certificate-climate-change-management-policy) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 12 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Required		
PSUS 6220	Planning Resilient and Low-Carbon Cities	
PSUS 6221	The Scientific Basis of Climate Change	
PSUS 6222	Climate Change Economics	
PSUS 6224	Sustainable Energy for Cities and the Environment	
Electives		
6 credits in professional studies urban sustainability (PSUS) courses.		

See CPS regulations (p. 843) for additional information regarding enrollment status and time limits

GRADUATE CERTIFICATE IN DIGITAL POLITICS

Digital platforms and high-tech tools that assist with political fundraising, grassroots organizing, and policy issue advocacy have become central to success in politics, and especially in electoral campaigns. The graduate certificate in digital politics teaches students how to master the world of online communications, advertising, social media networking, and fundraising. In the rapidly changing world of politics, this certificate targets students seeking to gain expertise in the most current tools and tactics.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://gspm.gwu.edu/digital-politics) for additional information

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 9 credits in required courses and 9 credits in elective courses

Code	Title	Credits
Required		

PMGT 6402	Applied Political Communications
PMGT 6403	Political Data and Analytics
PMGT 6452	Digital Strategy
Electives	
9 credits from the following:	
PMGT 6440	Targeting and Voter Contact
PMGT 6468	Digital Advertising and Action
PMGT 6470	Digital Content Creation
PMGT 6472	Maximizing Social Media

Specific admission requirements can be found on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://gspm.gwu.edu/digital-politics) for additional information.

GRADUATE CERTIFICATE IN GLOBAL PUBLIC RELATIONS

Designed for working professionals, the global public relations graduate certificate program teaches students the strategic and tactical skills needed to excel in the challenging world of global public relations. The 6-course, 18 credit program includes a global perspective residency. The course work completed in the certificate program can be applied to the master's degree in Strategic Public Relations (https://gspm.gwu.edu/node/140) or Advocacy in the Global Environment. (https://gspm.gwu.edu/node/1068)

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://gspm.gwu.edu/global-public-relations) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses; or, with the advisor's approval, 12 credits in required courses and one 3-credit elective.

Code	Title	Credits
Required		
PMGT 6402	Applied Political Communications	
PMGT 6403	Political Data and Analytics	
PSPR 6204	Media Relations in the New Media World	
PSAD 6270	International Public Relations and Global Advocacy	
PSAD 6200	Global Perspective Residencies	
Electives		
In lieu of one required course, students may take, with the program director's approval, a 3-credit elective selected from the curricula of the graduate certificate in strategic public relations, legislative affairs, or political management programs or from another GW school or college.		

GRADUATE CERTIFICATE IN HEALTH CARE CORPORATE COMPLIANCE

Designed for professionals working in the field of healthcare compliance or who aspire to work in the field, the 12-credit graduate certificate program provides students with a uniquely comprehensive view of health care corporate compliance. Drawing from both GW's Department of Health Policy in the Milken Institute School of Public Health and a leading health care law firm in Washington, D.C., the program offers education in health care laws and regulations as well as tools and strategies for creating effective corporate compliance programs. As the center of federal health care policy and enforcement, Washington provides the ideal backdrop for study, allowing unparalleled access to experts in the field, including current and former regulators and policymakers, and other compliance professionals. No other course or program can offer this level of expertise.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://cps.gwu.edu/healthcare-compliance) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
Required		
PSHC 6201	Introduction to Health Care Corporate Compliance	
PSHC 6202	Compliance with Laws and Regulations I	
PSHC 6204	Compliance with Laws and Regulations II	
PSHC 6206	Case Studies in Health Care Corporate Compliance	

See CPS regulations (p. 843) for additional information regarding enrollment status, grade-point average requirements, and time limits.

GRADUATE CERTIFICATE IN JUSTICE AND PUBLIC SAFETY INFORMATION MANAGEMENT

The graduate certificate in justice and public safety information management curriculum has been tailored to address the rising demand for professionals with a comprehensive and strategic knowledge of policy, best practices, and strategies related to IT and data management for use by public and private sector homeland security and justice organizations.

The program combines classroom-based and online instruction delivered via Blackboard, GW's web-based educational platform. The online component allows students to fit a full course load into their busy schedules, making it possible to complete the degree in three semesters.

Specific admission requirements can be found on the Graduate (http://www.gwu.edu/all-graduate-programs)Program Finder.

Visit the program website (https://cps.gwu.edu/justice-info-management) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 15 credits in required courses.

Code	Title	Credits
Required		
PSSL 6255	Info. Mgt. Just. & Pub. Safety	
PSSL 6256	Applied Tech in Data Analytics	
PSSL 6257	Enterprise Arch. & Standards	
PSSL 6258	Info Sharing & Safeguarding	
PSSL 6259	Strat. IT Invsmt. & Perf. Mgmt	

See CPS regulations (p. 843) for additional information regarding enrollment status and time limits.

GRADUATE CERTIFICATE IN LANDSCAPE DESIGN

The graduate certificate program in landscape design is ideally suited for landscape professionals seeking to upgrade skills, individuals who wish to become professional landscape designers, amateurs with an interest in the art of garden design, institutional horticultural staff, nursery employees, and garden-design writers. Courses are geared to small-scale landscape design applications with emphasis on sound design principles, good site engineering methods, and creative use of plant materials.

Specific admission requirements can be found on the Graduate (http://www.gwu.edu/all-graduate-programs)Program Finder.

Visit the program website (https://cps.gwu.edu/landscape-design) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 28 credits in required courses.

Code	Title	Credits
Required		
PSLD 6100	Landscape Graphics	
PSLD 6201	Introduction to Design	
PSLD 6202	Site Analysis	
PSLD 6203	Site Engineering	
PSLD 6204	Construction Methods and Materials	
PSLD 6212	History of Landscape Design	
PSLD 6213	Contemporary Themes in the Landscape	
PSLD 6221	Landscape Plants for Fall	
PSLD 6223	Landscape Plants for Spring	
PSLD 6225	Landscape Plants for Summer	
PSLD 6231	Site Design Studio	
PSLD 6236	Planting Design Studio	
PSLD 6240	Comprehensive Project	

See CPS regulations (p. 843) for additional information regarding enrollment status and time limits.

GRADUATE CERTIFICATE IN PACS AND POLITICAL MANAGEMENT

This unique graduate certificate teaches the fundamentals required to effectively run an organization's Political Action Committee (PAC). The challenges of coordinated political action and campaign finance uncertainty make it more important than ever that professionally trained and savvy leaders manage PACs. The program is designed to give

PAC managers the skills necessary to successfully tackle the daunting realities of political finance and action.

Specific admission requirements can be found on the Graduate (http://www.gwu.edu/all-graduate-programs)Program Finder.

Visit the program website (https://gspm.gwu.edu/pacs-and-political-management) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 15 credits, including 3 credits in a required course and 12 credits in elective courses.

Code	Title	Credits
Required		
LGAF 6234	PACs and Congress	
Electives		
Two political management courses selected from the following:		
PMGT 6454	Fundraising and Budgeting	
PMGT 6221	Fundraising for Organizations	
PMGT 6412	Issues Management	
PMGT 6410	Grassroots Engagement	
PMGT 6450	Rules, Laws, and Strategy	
Two legislative affairs courses selected from the following:		
LGAF 6202	Legislative Politics	
LGAF 6222	Parties and Elections	
LGAF 6224	Interest Group Politics	
LGAF 6260	Special Topics: Domestic Policy	

See CPS regulations (p. 843) for additional information regarding enrollment status and time limits.

GRADUATE CERTIFICATE IN PARALEGAL STUDIES

The graduate certificate in paralegal studies is for students who wish to enter the paralegal profession, where the certificate is universally recognized as the standard entry-level credential. GW's approach is academic and practical, emphasizing leadership and teamwork, written and oral communication skills, ethics, and time management in addition to substantive law and legal technology skills.

Specific admission requirements can be found on the Graduate (http://www.gwu.edu/all-graduate-programs)Program Finder.

Visit the program website (https://cps.gwu.edu/paralegal) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Code	Title	Credits
Required		
PSLX 6210	American Jurisprudence	
PSLX 6211	Legal Research and Writing	
PSLX 6212	Litigation	
PSLX 6223	Contracts	
PSLX 6224	Advanced Legal Writing	
PSLX 6225	Business Entities	

See CPS regulations (p. 843) for additional information regarding enrollment status and time limits.

GRADUATE CERTIFICATE IN PUBLIC RELATIONS

REQUIREMENTS

Specific admission requirements can be found on the Graduate (http://www.gwu.edu/all-graduate-programs)Program Finder.

Required courses:	
PSPR 6201	Public Relations Principles and Practices
PSPR 6202	Advanced Writing for PR Professionals
PSPR 6203	Research Methods for Public Relations and Public Affairs Managers
PSPR 6204	Media Relations in the New Media World
PSPR 6205	Fundamentals of Business and Management for Public Relations and Public Affairs
PSPR 6206	Ethical Standards in Public Relations and Public Affairs

See CPS regulations (p. 843) for additional information regarding enrollment status and time limits.

GRADUATE CERTIFICATE IN STRATEGIC MANAGEMENT AND EXECUTIVE LEADERSHIP FOR LAW ENFORCEMENT

The graduate certificate in strategic management and executive leadership for law enforcement is offered jointly by GW and American University. The curriculum is tailored to address the rising demand for law enforcement professionals with a comprehensive set of leadership and strategic thinking skills. Three courses are taken at GW and three at American University.

Specific admission requirements can be found on the Graduate (http://www.gwu.edu/all-graduate-programs)Program Finder.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Code	Title	Credits
Required		
PSSL 6250	Strategic Planning and Budgeting	
PSSL 6253	Managing the Politics of Leadership	
PSSL 6270	Capstone Project	
PUAD 620 *		
PUAD 638 *		
PUAD 639 *		

*Course taken at American University

See CPS regulations (p. 843) for additional information regarding enrollment status and time limits.

GRADUATE CERTIFICATE IN SUSTAINABLE LANDSCAPES

The graduate certificate in sustainable landscapes addresses the growing need for landscape and allied professionals with the knowledge and skills to design and/or manage ecologically sensitive, regenerative landscapes that are hospitable to humans and wildlife alike. Students acquire an understanding of best practices in landscape conservation and sustainability, adapted to the small-scale landscape.

Specific admission requirements can be found on the Graduate (http://www.gwu.edu/all-graduate-programs)Program Finder.

Visit the program website (https://cps.gwu.edu/sustainable-landscapes) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Code	Title	Credits
Required		
PSUS 6260	Intro to Sustainable Design	
PSUS 6261	Ecology of the Built Env.	
PSUS 6262	Tools for Sustainable Design	
PSUS 6264	Native Plants I	
PSUS 6265	Native Plants II	
PSUS 6268	Sustainable Design Methods	
PSUS 6269	Sustenance and the Landscape	
PSUS 6266	Ecological Restoration	
PSUS 6270	Sustainable Design Charrette	

See CPS regulations (p. 843) for additional information regarding enrollment status and time limits.

GRADUATE CERTIFICATE IN SUSTAINABLE URBAN PLANNING

The graduate certificate in sustainable urban planning is tailored to students seeking a credential in the field, but who are not in need of a complete master's degree. This certificate can be combined with the graduate certificate in climate change management and policy (p. 872) and four core planning courses to earn the master of professional studies in sustainable urban planning (p. 859) degree.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (https://cps.gwu.edu/sustainable-urban-planning/graduate-certificate-sustainable-urban-planning) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 12 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Required		

PSUS 6201	Principles of Sustainable Urban and Regional Planning
PSUS 6202	Urban and Environmental Economics
PSUS 6210	Transportation Planning in City Systems
PSUS 6211	Regional Development and Agricultural Economics
Electives	
6 credits in elective Professional Studies Urban Sustainability (PSUS) courses	

See CPS regulations (p. 843) for additional information regarding enrollment status and time limits.

MILKEN INSTITUTE SCHOOL OF PUBLIC HEALTH

Dean L.R. Goldman
Associate Deans J. DeLoia, K. Horn, G.H. Taylor, P. Vigilance
Assistant Dean H. Klepac, M. Turner

Established in July 1997 as the School of Public Health and Health Services, the school brought together three longstanding university programs in the schools of medicine, business, and education. In 2014, the school was renamed Milken Institute School of Public Health (Milken Institute SPH) after receiving three gifts totaling $80 million from the Milken Institute, the Sumner M. Redstone Charitable Foundation, and the Milken Family Foundation, the largest ever received by The George Washington University. The only school of public health in the nation's capital, Milken Institute SPH enrolls more than 1,800 students, who come from nearly every U.S. state and many other nations to pursue undergraduate, graduate, and doctoral-level degrees in public health. The student body is one of the most ethnically diverse among the nation's private schools of public health. Six departments form the school: Environmental and Occupational Health, Epidemiology and Biostatistics, Exercise and Nutrition Sciences, Global Health, Health Policy and Management, and Prevention and Community Health.

Degree Programs

The Milken Institute SPH offers the following degree programs:

- Bachelor of Science with majors in exercise science and public health
- Master of Public Health in the fields of biostatistics; community oriented primary care; environmental health science and policy; epidemiology; global environmental health; global health communication; global health epidemiology and disease control; global health program design, monitoring, and evaluation; global health policy; health policy; health promotion; maternal and child health; physical activity in public health; public health communication and marketing; and public health nutrition
- Master of Public Health: MPH@GW (online)
- Master of Science in the fields of biostatistics; epidemiology; exercise science with a concentration in strength and conditioning; health policy; management of health informatics and analytics and public health microbiology and emerging infectious diseases (Columbian College of Arts and Sciences confers the Masters of Science in biostatistics)
- Master of Health Administration; Master of Health Administration; MHA@GW (hybrid/executive program)
- Health Services Administration Specialist
- Special (Joint) Programs: Doctor of Medicine and Master of Public Health; Juris Doctor/Master of Laws in the field of law and Master of Public Health; Master of Arts in the field of international affairs and Master of Public Health; Master of Health Administration with a certificate in healthcare corporate compliance; Master of Public Health in the field of health policy with certificate in healthcare corporate compliance; Master of Science in Health Policy with a certificate in healthcare corporate compliance; Master of Science in Health Sciences in the field of physicians assistant and Master of Public Health; Peace Corp Master's International Program and Master of Public Health
- Doctor of Public Health in the fields of environmental and occupational health; global health; health behavior; and health policy
- Doctor of Philosophy in the fields of biostatistics; epidemiology; and social and behavioral sciences in public health (Columbian College of Arts and Sciences confers the Doctor of Philosophy in biostatistics and public policy and public policy and administration (health policy track))

Mission

Our mission is to provide the best public health educational experience incorporating our core values of scholarship and leadership, scientific rigor and policy analysis, and training to foster the next generation of thought leaders, practitioners, policy makers, and scientists who will transform public health worldwide, especially for underserved and poor populations.

Vision

As complex global health challenges continue to threaten our health and future, the Milken Institute SPH will be preeminent in training tomorrow's leaders for improving the public's health. We aspire to become one of the top five private schools of public health in the world.

Accreditation

The public health programs of the Milken Institute SPH are fully accredited by the Council on Education for Public Health (CEPH). In 2016, the Milken Institute SPH was awarded a seven-year accreditation through July 1, 2023. The program in health administration is fully accredited by the Commission on Accreditation of Healthcare Management Education (CAHME). Milken Institute SPH is a member of the Association of Schools and Programs of Public Health.

REGULATIONS

  - Incompletes (p. 882)
  - Changing an Incomplete (I) (p. 882)
  - In Progress (IP) (p. 882)
  - Applying for Readmission to a Program (p. 883)
  - International Students---Less than Full-Time Status (p. 883)
  - Independent Study Course Requirements (p. 883)
  - Graduation (p. 883)

Undergraduate Regulations

Graduation Requirements

Depending on the Milken Institute SPH degree program, students must complete 120 to 124 credits. Students in the B.S. in exercise science degree programs must have a minimum cumulative GPA of 2.5 in courses in the Exercise Science core; those in the B.S. in public health program must have a minimum overall cumulative GPA of 2.5. The University General Education Requirement and major and other curriculum requirements are listed under each program's regulations tab in this Bulletin.

While degrees are awarded at the end of each semester, formal commencement ceremonies occur only in May. Students are eligible to graduate only after they have completed all degree requirements and have no financial obligations to the University. Students may include degree designations (B.S., M.S., M.P.H., M.H.A., Dr.PH., or Ph.D.) after their name only when they have completed all degree requirements.

Enrollment Status

Once entered in an undergraduate degree program, students are expected to be registered continuously for at least 1 credit during all fall and spring semesters and to be engaged actively in fulfilling the requirements for their degree.

- In the fall and spring semesters, students must register for 1 or more credits to maintain enrollment status.
- During the summer session, students do not have to be enrolled unless they are graduating during the summer; in this case, they should register for Continuous Enrollment.
- Some additional activities, such as study abroad programs, qualify as continuous enrollment.

Degree students who need to interrupt active pursuit of the degree may petition to take a leave of absence for a period of no more than one calendar year during their program. Students who discontinue active enrollment in degree studies without being granted a leave of absence, or students who are granted a leave but do not return to active study at the close of the period of approved absence, are no longer in status and must apply for readmission and be subject to the regulations and program requirements then in effect. Readmission to any program is a competitive process and not guaranteed.

Advising

Students are responsible for building a support system to help ensure their own academic success. Each student is assigned a faculty advisor who may assist not only with academic counseling, but also in areas ranging from understanding University requirements to finding campus resources to help individual students connect with the GW the community. Other members of the faculty, professional advisors, tutors, and/or counselors also should be part of the support system. The University Career Center and The Writing Center offer walk-in and by-appointment assistance. Personal counseling is available through the office of the Dean of Student Affairs, Mental Health Services, Disability Support Services, Multicultural Student Services Center, and International Services Office.

Timely Progress Toward the Degree

Students who fail to make adequate and timely progress toward the degree, through repeated leaves of absence or repeated failure to complete an appropriate number of credits per semester, may be dismissed from the University (see Right to Dismiss Students under University Regulations). Students dismissed on these grounds may apply for readmission after supplying sufficient evidence of academic promise. Additionally, students must attain grades no lower than C– in required major field courses. If a student receives a grade of D +, D, or D– in a course specifically required for the major, the student will be required to repeat the course until a satisfactory grade (C– or better) is earned. Once the student has completed the course with a satisfactory grade, credits earned the first time the course was taken will count toward the minimum number of credits required for the major. Credits earned toward the repetition do not count toward the degree.

Incompletes

Conditions under which the symbol *I*, Incomplete, may be assigned are described under University Regulations (http://bulletin.gwu.edu/university-regulations). In the Milken Institute SPH, the conditions for granting a notation of *I* are documented with a written contract (http://publichealth.gwu.edu/pdf/gwsph_incomplete_contract.pdf) between the faculty member and the student.

The Incomplete work must be completed as specified in the contract but no later than one calendar year from the end of the semester in which the course was taken. In cases of well-documented extenuating circumstances, an instructor and a student may jointly petition the dean for additional time in which to complete the work of the course. Such petitions should be submitted within one year of the assignment of the symbol *I*.

Pass/No Pass Option

Junior or senior students in good standing may, with the approval of the instructor and program director, take one course each semester for a grade of *P*, Pass, or *NP*, No Pass. No student will be allowed to take more than a total of four courses on a P/NP basis under this regulation. Students may, however, also receive grades of P/NP in courses that are graded only on that basis. Courses required for the University General Education Requirement or in the student's major or minor field (including those courses required for the major that are offered by other departments) may not be taken on the P/NP basis. A transfer student may not choose this option until the second semester of enrollment in the University. Under no circumstances may a student change from P/NP status to graded status, or vice versa, after the end of the eighth week of class. The Milken Institute SPH does not allow LSPA courses to be counted toward the degree.

Academic Workload

To encourage academic performance of high quality, the Milken Institute SPH places limits on the number of credits a student may take. After freshman year, a full-time student who is not on probation may take a course load of up to 19 credits. The 18th and all subsequent credits require additional tuition charges. A full-time student who, during the immediately preceding semester, has received no grades below B− and has earned grades of A or A− in three courses totaling at least 9 credits may take up to 21 credits. Students may not register for more than 21 credits without the approval of the dean.

Applying for Readmission to a Program

Undergraduate students who previously were registered in a SPH program but who did not register during the immediately preceding semester (summer sessions excluded) are out of status and must apply for readmission by completing an admissions petition. Filing the petition does not guarantee that the student will be readmitted. Milken Institute SPH departments are responsible for readmitting students and can do so only if the student is not in violation of other Milken Institute SPH or University policies. Students who have attended one or more academic institutions while absent from this University must have complete, official transcripts from each institution sent directly to the Milken Institute SPH Office of Admissions. Applicants for readmission are considered on the basis of policies and program requirements currently in effect and if readmitted, will be subject to the policies and program requirements then in effect.

International Students--Less than Full-Time Status

International students on an F-1 or J-1 Visa are responsible for enrolling as a full-time student (minimum 12 credits for undergraduate students) for spring and fall semesters according to U.S. Immigration and Naturalization rules governing registration requirements. In certain circumstances, a reduced course load may be allowed; students should contact the International Services Office (http://internationalservices.gwu.edu) to request approval for this exception.

Special Honors

In addition to meeting the general requirements stated under University Regulations, a candidate for graduation with Special Honors in exercise science must have a minimum GPA of 3.5 in required courses in the major and a minimum overall GPA of 3.25. The candidate must submit an honors paper; the student will be recommended for graduation with special honors only if a committee of at least two faculty members approves the paper.

Independent Study Course Requirements

Independent study is designed to provide the student with an opportunity to gain or enhance public health knowledge and to explore an area of interest related to public health research or the delivery and/or administration of health services. Forms and instructions for registration are available online (http://publichealth.gwu.edu/academics/forms). Independent study projects may not be used as a substitute for an available required or elective course and may not cover substantially the same subject matter that is available in a required or elective course.

Preparation for Medical School

A student who plans to apply to medical school fulfills the general requirements of their program. The health professions advisors in the Columbian College Office of Undergraduate Studies provide advice about academic preparation for medical school. For admission to most medical schools, the student must earn a bachelor's degree that includes the following course work: Biology—8 credits of introductory biology, including laboratory. Students who receive credit for AP biology must complete 8 credits of upper-level biology course work, including laboratory; chemistry—8 credits of general inorganic chemistry, including laboratory; organic Chemistry—8 credits, including laboratory; biochemistry—3

credits; physics—8 credits, including laboratory; and English—6 credits in introductory English composition courses (fulfilled by the University Writing Program). Many medical schools have additional entrance requirements, which may include courses in biochemistry, genetics, and mathematics; even when such courses are not required, they are strongly recommended. With the exception of the specified requirements, applicants are urged to follow their personal interests in developing their course of study.

Preparation for Law School

A broad liberal arts education is the best undergraduate preparation for law school. Students are encouraged to use elective credit to increase the breadth of their program of study. Advice about academic preparation for law school is provided by the pre-law advisor in the Columbian College Office of Undergraduate Studies (http://columbian.gwu.edu/undergraduate/advising).

Other Regulations

Other regulations applicable to undergraduate students of the University can be found under University Regulations (http://bulletin.gwu.edu/university-regulations).

Graduate Regulations

The Milken Institute SPH provides an online Graduate Student Handbook (http://publichealth.gwu.edu/pdf/Handbook.pdf), which contains additional updated information on policies, regulations, and other matters of concern to enrolled or admitted students. It is the responsibility of the student to be aware of the information contained in both this Bulletin and the Handbook. Students should also consult departmental handbooks and guidelines.

Enrollment Status

Once entered in a graduate degree program, students are expected to be registered continuously for at least one credit during all fall and spring semesters and engaged actively in fulfilling the requirements for the degree.

- In the fall and spring semester, students must register for 1 or more credits to maintain enrollment status.
- During the summer session, students do not have to be enrolled unless they are graduating during the summer; in this case, they should register for Continuous Enrollment.
- Some additional activities, such as Master's International, qualify as continuous enrollment.

Degree students who need to interrupt active pursuit of the degree may petition to take a Leave of Absence for a period of no more than one calendar year during the their program. Students who discontinue active enrollment in degree studies without being granted a leave of absence, or students who granted a leave but does not return to active study at the close of the period of approved absence, are no longer in status and must apply for readmission and be subject to the regulations and program requirements then in effect. Readmission to any program is a competitive process and not guaranteed.

Advising

Students are responsible for building a support system to help ensure their own academic success. Each student is assigned a faculty advisor who may assist not only with academic counseling, but also in areas ranging from understanding University requirements to finding campus resources to help individual students connect with the GW the community. Other members of the faculty, professional advisors, tutors, and/or counselors also should be part of the support system. The University Career Center (http://publichealth.gwu.edu/services/career-center) and Writing Center (http://www.gwu.edu/%7Egwriter) offer walk-in and by-appointment assistance. Personal counseling is available through the office of the Dean of Student Affairs (http://students.gwu.edu), Mental Health Services (http://counselingcenter.gwu.edu), Disability Support Services (http://gwired.gwu.edu/dss), the Multicultural Student Services Center (http://gwired.gwu.edu/mssc/?url=mssc), and the International Services Office (http://internationalservices.gwu.edu).

Academic Standing

Graduate students who are not suspended, on academic probation, or under extended provisional admission status are considered to be in good standing. Maintenance of a minimum GPA of 3.0 is required for the degree. All courses taken for graduate credit after matriculation as a degree candidate—including those the Milken Institute SPH transferred in from non-degree status, but excluding those audited or taken for the grade of *CR/NC*—will be used to calculate the GPA.

Provisional Admission

Graduate program applicants with credentials that are weaker than expected for graduate study, but who nonetheless show promise of successful graduate work, occasionally are granted provisional admission by the Milken Institute SPH Admissions Committee. While on provisional admission status, students are required to see their advisors each semester prior to registration. Provisionally admitted graduate students must demonstrate their ability to maintain a minimum GPA of 3.0 in the first 9 credits of coursework attempted, and during this time are not allowed to receive an Incomplete or a grade lower than a 3.0; provisionally admitted students who meet these requirements are granted good standing. Provisionally admitted students who do not meet these requirements are subject to suspension.

Semester Warning

Graduate students whose cumulative GPA is below 3.0 after attempting a minimum of 1 credit and a maximum of 8 credits will be issued a warning at the end of the semester and will be required to take corrective measures, such as meeting with their academic advisor to outline steps to raise the GPA.

Probation

Graduate students whose GPA falls below 3.0 at any point after completing 9 credits will be placed on probation. This probation extends through the period in which the student next attempts up to 12 credits of work, including prescribed courses. A student's program may be restricted by the program director if deemed necessary. During this period, the student's performance will be monitored to determine suitability for continued study. A student who fails to raise the cumulative GPA to 3.0 or above during the period of probation is subject to suspension. Incompletes and grades of B- or below are not permitted during the probationary period and are grounds for automatic suspension. A student who is subject to probation for a second time at any point during their degree program may be suspended automatically.

Grade of F

Graduate student who receive a grade of *F* are subject to suspension. If such students wish to remain enrolled, they must present cause, for consideration by the dean and the director of his/her degree program, as to why continued study should be permitted. Once a grade of *F* is earned in a core, required, or elective course, it remains a part of the student's permanent record and is calculated into the GPA. A graduate student who receives the grade of *F* in a core or other required course and is permitted to continue in graduate studies must repeat the course and achieve a minimum grade of 3.0. The repetition does now, however, expunge the grade of F, which remains part of the student's record. If the student receives a grade below 3.0 in the repeated course, he or she will be suspended from the degree program.

Suspension

Graduate student who receive an *F* or do not meet the conditions of probation are subject to suspension. Suspended students may not register for or complete any courses at The George Washington Dean's Office, in consultation with the student's academic advisor, may continue a student on probation (in lieu of suspension) if satisfactory progress is demonstrated during the probationary period, and sufficient evidence of academic promise, by way of a statement of appeal, is offered by the student. A student who is suspended or withdraws under these conditions may apply for readmission after one semester. To be readmitted, the student must submit evidence that suggests the probability of academic success. A student who is readmitted will continue on academic probation and must achieve a minimum GPA of 3.5 in the next 12 credits of graduate study. Should the student fail to achieve this GPA, he or she will be suspended and will not be readmitted.

Timely Progress Toward the Degree

A graduate student who fails to make adequate and timely progress toward the degree, through repeated leaves of absence or repeated failure to complete an appropriate number of credits per semester, may be suspended. Students suspended on these grounds may apply for readmission after supplying sufficient evidence of academic promise.

Summary of Academic Standing Policies for Graduate Students

- Provisional Admission—A student who receives a grade of *I* or of *B-* or lower while on provisional admission status is subject to suspension.
- Semester Warning—A student with a cumulative GPA below 3.0 (with fewer than 9 credits completed) must take corrective action.
- Academic Probation—A student with a cumulative GPA below 3.0 (with 9 or more credits completed) is placed on academic probation. A student on academic probation who receives an unacceptable grade (*B-, C, F, I, Z*) or fails to raise the cumulative GPA to 3.0 within the next 12 credits taken is subject to suspension.
- Grade of F—A student who receives a grade of F is subject to suspension. If a student wishes to remain enrolled he or she must present cause as to why continued study should be permitted. If permitted to continue in graduate studies, the student must repeat the course (if core or required) and achieve at least the grade of B.
- Suspension—A student who is suspended may not register for or complete any courses at GW. A student who is suspended or withdraws under these conditions may apply for readmission after one semester.

Incompletes

Conditions under which the symbol *I*, Incomplete, may be assigned are described under University Regulations (http://bulletin.gwu.edu/university-regulations). In the Milken Institute SPH, the conditions for granting a notation of *I* are documented with a written contract (http://publichealth.gwu.edu/pdf/gwsph_incomplete_contract.pdf) between the faculty member and the student.

Changing an Incomplete (I)

Conditions under which the symbol *I*, Incomplete, may be changed to a letter grade are described under University Regulations (http://bulletin.gwu.edu/university-regulations). In the Milken Institute SPH, incomplete work must be completed as specified in the contract but no later than six months from the end of the semester in which the course was taken. In cases of well-documented extenuating circumstances, an instructor and a student may jointly petition the dean for additional time in which to complete the work of the course. Such petitions should be submitted within six months of the assignment of the symbol *I*.

In Progress (IP)

The notation In Progress (*IPG*) is assigned for all thesis, residency, advanced reading, independent study, culminating experience, practicum, and dissertation research courses until the coursework is completed. Upon the satisfactory completion, the grade replaces the notation *IPG* on the

transcript. An *IPG* may not be assigned to regular, semester-length courses.

Applying for Readmission to a Program

Students Who Have Taken Classes Within the Past Year:
Milken Institute SPH graduate degree or certificate students who were previously registered in the university but did not register during the immediate preceding semester/module (excluding summer sessions) are out of status and must apply for readmission by completing an admissions petition. (http://publichealth.gwu.edu/academics/forms)

Students Who Have Not Taken Classes in More Than a Year:
Students who have not taken any courses at GW in more than one year must apply for readmission using SOPHAS Express (https://sophasexpress.liaisoncas.com).

Students Who Have Been Suspended:
Students who were suspended from the Milken Institute SPH must apply for readmission through SOPHAS Express (https://sophasexpress.liaisoncas.com). Students may only apply for readmission after at least one academic year has passed. Students should consult with the advisor concerning readmission requirements.

International Students---Less than Full-Time Status

International students on an F-1 or J-1 Visa are responsible for enrolling as full-time student (minimum 9 credits for graduate students) for the spring and fall semesters according to the U.S. Immigration and Naturalization rules governing registration requirements. Under certain circumstances, a reduced course load may be allowed. To request approval for a course reduction, students should submit the F-1/J-1 Request for Reduced Course Load Form (http://bulletin.gwu.edu/public-health/%20http://gwired.gwu.edu/iso/CurrentStudents/formscopy). More information is available by calling the ISO at (202) 994-4477.

Independent Study Course Requirements

Independent study is designed to provide students with an opportunity to gain or enhance public health knowledge and to explore an area of interest related to public health research or the delivery and/or administration of health services. Instructions and forms required for registration (http://publichealth.gwu.edu/academics/forms) are available Independent study projects may not be used as a substitute for an available required or elective course and may not cover substantially the same subject matter that is available in a required or elective course.

Graduation

While degrees are awarded at the end of each semester, formal commencement ceremonies occur only in May. Students are eligible to graduate only after they have completed all degree requirements and have no financial obligations to the University. Students may include degree designation (B.S., M.S., M.P.H., M.H.A., Dr.PH., or Ph.D.) after their name only when they have completed all degree requirements.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Science with a major in exercise science (p. 885)
- Bachelor of Science with a major in exercise science, pre-athletic training/sports medicine concentration (p. 887)
- Bachelor of Science with a major in exercise science, pre-medical professional concentration (p. 890)
- Bachelor of Science with a major in exercise science, pre-physical therapy concentration (p. 892)
- Bachelor of Science with a major in public health (p. 895)

Combined program

- Dual Bachelor of Science in public health and Master of Public Health

Minors

- Minor in exercise science (p. 897)
- Minor in nutrition
- Minor in public health

GRADUATE

Master of Public Health

- Master of Public Health in the field of biostatistics (p. 925)
- Master of Public Health in the field of community oriented primary care (p. 1003)
- Master of Public Health in the field of environmental health science and policy (p. 912)
- Master of Public Health in the field of epidemiology
- Master of Public Health in the field of global environmental health (p. 916)
- Master of Public Health in the field of global health communication (p. 955)
- Master of Public Health in the field of global health program design, monitoring, and evaluation (p. 962)
- Master of Public Health in the field of global health policy (p. 960)
- Master of Public Health in the field of global health epidemiology and disease control (p. 958)
- Master of Public Health in the field of health policy (p. 972)
- Master of Public Health in the field of health promotion (p. 1007)
- Master of Public Health in the field of maternal and child health (p. 1009)
- Master of Public Health in the field of physical activity in public health (p. 941)

- Master of Public Health in the field of public health communication and marketing (p. 1011)
- Master of Public Health in the field of public health nutrition (p. 944)
- Master of Public Health: MPH@GW (p. 900)

Master of Science

- Master of Science in the field of biostatistics (p. 930)
- Master of Science in the field of epidemiology (p. 931)
- Master of Science in the field of exercise science with a concentration in strength and conditioning (p. 947)
- Master of Science in the field of health policy (p. 978)
- Master of Science in the field of public health microbiology and emerging infectious diseases (p. 933)
- Master of Science in the field of management of health informatics and analytics (p. 979)

Master of Health Administration

- Master of Health Administration (p. 968)
- Master of Health Administration – online/executive program (p. 971)

Specialist program

- Health Services Administration Specialist (p. 979)

Joint/Dual programs

- Doctor of Medicine and Master of Public Health (p. 909)
- Juris Doctor/Master of Laws in the field of law and Master of Public Health (p. 909)
- Master of Arts in the field of international affairs and Master of Public Health (p. 899)
- Master of Health Administration with a certificate in health care corporate compliance (p. 902)
- Master of Public Health in the field of health policy with a certificate in health care corporate compliance (p. 907)
- Master of Science in Health Policy with a certificate in health care corporate compliance (p. 903)
- Master of Science in Health Sciences in the field of physicians assistant and Master of Public Health (p. 903)
- Peace Corp Masters International Program and Master of Public Health

Doctoral programs

- Doctor of Public Health in the field of environmental and occupational health (p. 920)
- Doctor of Public Health in the field of global health (p. 965)
- Doctor of Public Health in the field of health behavior (p. 1013)
- Doctor of Public Health in the field of health policy (p. 981)
- Doctor of Philosophy in the field of biostatistics (p. 935)
- Doctor of Philosophy in the field of epidemiology (p. 937)
- Doctor of Philosophy in the field of public policy and administration (health policy track) (p. 980)
- Doctor of Philosophy in the field of social and behavioral sciences in public health (p. 1014)

CERTIFICATES

- Graduate certificate in health administration generalist (p. 982)
- Graduate certificate in long-term care
- Graduate certificate in (p. 983)health policy
- Graduate certificate in public health (p. 910)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

The letters and and range of numbers below indicate the department in which the course is offered.

PUBH 6000 - 6099: MPH Core & MPH@GW Program-Specific Courses
PUBH 6100 - 6199: Environmental and Occupational Health Courses
PUBH 6200 - 6299: Epidemiology and Biostatistics Courses
PUBH 6300 - 6399: Health Policy Courses
PUBH 6400 - 6499: Global Health Courses
PUBH 6500 - 6599: Prevention and Community Health Courses
PUBH 6600 - 6699: Public Health Nutrition and Miscellaneous Courses
PUBH 8000 - 9000: Doctoral Level Courses
EXSC 6000 - 7000: Exercise Science Courses
HSML 6200 - 6300: Health Services Management and Leadership Courses

- Epidemiology (EPID) (p. 1214)
- Exercise and Nutrition Sciences (EXNS) (p. 1214)
- Health and Wellness (HLWL) (p. 1253)
- Health Services Management and Leadership (HSML) (p. 1250)
- Lifestyle, Sports, and Physical Activity (LSPA) (p. 1328)
- Public Health (PUBH) (p. 1420)

UNDERGRADUATE PROGRAMS

Bachelor's programs

- Bachelor of Science with a major in exercise science (p. 885)
- Bachelor of Science with a major in exercise science, pre-athletic training/sports medicine concentration (p. 887)
- Bachelor of Science with a major in exercise science, pre-medical professional concentration (p. 890)
- Bachelor of Science with a major in exercise science, pre-physical therapy concentration (p. 892)
- Bachelor of Science with a major in public health (p. 895)

Combined program

- Dual Bachelor of Science in public health and Master of Public Health

Minors

- Minor in exercise science (p. 897)
- Minor in nutrition
- Minor in public health

BACHELOR OF SCIENCE WITH A MAJOR IN EXERCISE SCIENCE

Program Advisor and Director B. Westerman

The bachelor of science with a major in exercise science degree program prepares individuals for careers in medicine and other health related professions including athletic training/sports medicine, physical therapy, physician's assistant or nursing, exercise physiology and rehabilitation, sport psychology as well as fitness and health promotion.

Students in the exercise science major may select the pre-medical professional concentration (for those planning to enter a medical, physician assistant, or nursing program upon graduation), the pre-physical therapy concentration, or the pre-athletic training/sports medicine concentration. The exercise science major may also be taken without a concentration.

REQUIREMENTS

The following requirements must be fulfilled:

124 credits and maintenance of a minimum grade point average of 2.5 in the exercise science core requirements.

University General Education Requirements*

Code	Title	Credits
Required (26 credits)		
UW 1020	University Writing	
or HONR 1015	Honors Proseminar: UW 1020: Origins and Evolution of Modern Thought	
Two writing-in the disciplines (WID) courses (may also be counted in another category)		
One critical analysis in the humanities course		
One quantitative reasoning course (must be satisfied with STAT 1051, STAT 1053, or STAT 1127 for Exercise Science majors)		
One scientific reasoning course with laboratory experience (must be satisfied with BISC 1111 for Exercise Science majors)		
Two critical analysis in the social sciences courses (must be satisfied with ANTH 1002, ANTH 1003, or ANTH 1004; and COMM 1040, or COMM 1041 for Exercise Science majors)		

*A list of approved courses can be found on the General Education Requirement page (p. 38).

BACHELOR OF SCIENCE WITH A MAJOR IN EXERCISE SCIENCE, PRE-MEDICAL PROFESSIONAL CONCENTRATION

Program Advisor and Director B. Westerman

The bachelor of science with a major in exercise science degree program prepares individuals for careers in medicine and other health related professions including athletic training/sports medicine, physical therapy, physician's assistant or nursing, exercise physiology and rehabilitation, sport psychology as well as fitness and health promotion.

Students in the exercise science major may select the pre-medical professional concentration (for those planning to enter a medical, physician assistant, or nursing program upon graduation), the pre-physical therapy concentration, or the pre-athletic training/sports medicine concentration. The exercise science major may also be taken without a concentration.

REQUIREMENTS

The following requirements must be fulfilled:

124 credits and maintenance of a minimum grade point average of 2.5 in the exercise science core requirements.

University General Education Requirements*

Code	Title	Credits
Required (26 credits)		
UW 1020	University Writing	
or HONR 1015	Honors Proseminar: UW 1020: Origins and Evolution of Modern Thought	
Two writing-in the disciplines (WID) courses (may also be counted in another category)		
One critical analysis in the humanities course		
One quantitative reasoning course (must be satisfied with STAT 1051, STAT 1053, or STAT 1127 for Exercise Science majors)		
One scientific reasoning course with laboratory experience (must be satisfied with BISC 1111 for Exercise Science majors)		
Two critical analysis in the social sciences courses (must be satisfied with ANTH 1002, ANTH 1003, or ANTH 1004; and COMM 1040, or COMM 1041 for Exercise Science majors)		

*A list of approved courses can be found on the General Education Requirement page (p. 38).

BACHELOR OF SCIENCE WITH A MAJOR IN PUBLIC HEALTH

Program Director S. Wilensky

The bachelor of science with a major in public health degree program is intended to convey to students technical detail and analytic skills with a liberal arts philosophical base. It also has the educational objectives of nurturing critical thinking, analysis, and synthesis of information, and recognizing the historical and societal associations of current trends in public health and health care delivery. While nurturing students' capacity to think analytically and creatively, the program strives to deepen students' commitment to improving the public's health.

Students may apply to enter the 120-credit public health major during the semester prior to completing 60 credits. Applicants should have a minimum grade point average of 3.0.

Visit the program website (http://publichealth.gwu.edu/programs/public-health-bs) for additional information.

COMPETENCIES

The following competencies are designed to be achieved by all public health majors through the indicated courses:

Upon completion of the bachelor of science with a major in public health, students will be able to:

Assess the impact of historical, cultural, political, environmental, behavioral, and socioeconomic factors on population/community health and health status

Relevant courses:

PUBH 1101	Introduction to Public Health & Health Svcs
PUBH 1102	History of Public Health
PUBH 2110	Public Health Biology
PUBH 2112	Principles of Health Education and Health Promotion
PUBH 3132	Health and Environment
PUBH 3133	Global Health and Development
PUBH 3135W	Health Policy
PUBH 4140W	Senior Seminar

Describe the organization, financing, and delivery of health services and public health systems

Relevant courses:

PUBH 1101	Introduction to Public Health & Health Svcs
PUBH 3130	Health Services Management and Economics
PUBH 3133	Global Health and Development
PUBH 3135W	Health Policy

Describe the underlying biological factors relating to prominent public health and health care issues and discuss how these factors inform interventions to improve individual and population health

Relevant courses:

PUBH 1101	Introduction to Public Health & Health Svcs
PUBH 2112	Principles of Health Education and Health Promotion
PUBH 2110	Public Health Biology
PUBH 3131	Epidemiology: Measuring Health and Disease
PUBH 3132	Health and Environment
PUBH 3133	Global Health and Development

PUBH 4140W	Senior Seminar

Critically review multiple types of research, develop an understanding of data and research, and develop and evaluate public health interventions based on available evidence

Relevant courses:

PUBH 1101	Introduction to Public Health & Health Svcs
PUBH 2110	Public Health Biology
PUBH 3131	Epidemiology: Measuring Health and Disease
PUBH 3132	Health and Environment
PUBH 3133	Global Health and Development
PUBH 4140W	Senior Seminar

Evaluate policy, behavioral, environmental, and systems options for addressing current public health and health care concerns

Relevant courses:

PUBH 1101	Introduction to Public Health & Health Svcs
PUBH 2110	Public Health Biology
PUBH 2112	Principles of Health Education and Health Promotion
PUBH 3130	Health Services Management and Economics
PUBH 3132	Health and Environment
PUBH 3133	Global Health and Development
PUBH 3135W	Health Policy
PUBH 4140W	Senior Seminar

Communicate public health concepts and analysis clearly and persuasively. (all courses relevant).
Use an interdisciplinary integrative approach to address public-health research issues

Relevant courses:

PUBH 1101	Introduction to Public Health & Health Svcs
PUBH 2110	Public Health Biology
PUBH 3131	Epidemiology: Measuring Health and Disease
PUBH 3132	Health and Environment
PUBH 3133	Global Health and Development
PUBH 3135W	Health Policy
PUBH 4140W	Senior Seminar

REQUIREMENTS

The following requirements must be fulfilled:

Code	Title	Credits
Prerequisites		
One of the following as a prerequisite to PUBH 2110:		
BISC 1005	The Biology of Nutrition and Health	
BISC 1111	Introductory Biology: Cells and Molecules	
or equivalent course with approval from the PUBH 2110 instructor		
As a prerequisite to PUBH 3131:		
One semester of statistics (STAT 1127 preferred)		
As a prerequisite to PUBH 3130:		
ECON 1011	Principles of Economics I	
or equivalent course with approval from the PUBH 3130 instructor.		

Code	Title	Credits
Required for the major		
30 credits in public health core courses		
PUBH 1101	Introduction to Public Health & Health Svcs	
PUBH 1102	History of Public Health	
PUBH 2110	Public Health Biology	
PUBH 2112	Principles of Health Education and Health Promotion	
PUBH 3130	Health Services Management and Economics	
PUBH 3131	Epidemiology: Measuring Health and Disease	
PUBH 3132	Health and Environment	
PUBH 3133	Global Health & Development	
PUBH 3135W	Health Policy	

PUBH 4140W	Senior Seminar
12 credits in approved elective courses from the following. No more than 9 credits may be taken through study abroad programs and/or non-GW domestic courses.	
HLWL 1106	Drug Awareness
HLWL 1109	Human Sexuality
HLWL 1110	Issues in Alternative Medicine
EXNS 1114	Community Nutrition
EXNS 2119	Introduction to Nutrition Science
EXNS 2122	Food Systems in Public Health
ANTH 3504	Illness, Healing, and Culture
HIST 3363	Race, Medicine & Public Health
ANTH 3513	Anthropology of Human Rights
ANTH 6302	Issues in Development
BIOC 3560	Diet, Health, and Longevity
GEOG 2127	Population Geography
GEOG 2137	Environmental Hazards
HSCI 2101	Psychosocial Aspects of Health and Illness
PUBH 2113	Impact of Culture upon Health
PUBH 2114	Environment, Health, and Development
PUBH 2115	Health, Human Rights, and Displaced Persons
PUBH 2116	Global Delivery of Health Systems
PUBH 2117	Service Learning in Public Health
PUBH 3136	Health Law
PUBH 3137	Global Public Health Nutrition
PUBH 3150	Sustainable Energy & Env Hlth
PUBH 3151	Current Issues in Bioethics
PUBH 3199	Topics in Public Health

Students must take all required courses at GW unless an exception is granted by the SPH Director of Undergraduate Programs. Permission will be granted only if there are strong extenuating circumstances that call for such an exception.

Students must comply with policies and procedures as outlined in University and SPH regulations. Students should pay particular attention to SPH requirements for completing human research training, completing 8 hours of professional enhancement activities, and passing the academic integrity quiz.

COMBINED BACHELOR OF SCIENCE IN PUBLIC HEALTH AND MASTER OF PUBLIC HEALTH

Program Director S. Wilensky
Program Advisor M. Wilson

The Milken Institute School of Public Health (SPH) accepts a small number of outstanding students who demonstrate academic excellence and a strong commitment to public health into its dual bachelor of science in public health/master of public health (B.S./M.P.H.) degree program each year. The program is designed to help students become public health leaders who are committed to lifelong learning and improving the health and well-being of local, national, and international communities.

The B.S./M.P.H. program allows students to take a specified number of graduate credits as part of their undergraduate degree, thereby decreasing the number of credits normally required for the master's degree. The program is appropriate for pre-professional students who are interested in public health issues. Interested students may apply to any of the M.P.H. programs, with the exception of public health management.

Specific master's program admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://publichealth.gwu.edu/programs/public-health-bsmph) for additional information.

MINOR IN EXERCISE SCIENCE

REQUIREMENTS

The following requirements must be fulfilled: 15 credits in required courses and 3-4 credits in elective courses.

Code	Title	Credits
Required		
EXNS 1103	Professional Foundations in Exercise Science	
EXNS 1110	Applied Anatomy and Physiology I	
EXNS 1111	Applied Anatomy and Physiology II	
EXNS 2111	Exercise Physiology I	
Electives		

3-4 credits from the following:	
EXNS 1118	Sport and Nutrition
EXNS 2110	Injury Prevention and Control
EXNS 2112	Exercise Physiology II
EXNS 2113	Kinesiology
EXNS 2116	Exercise and Health Psychology
EXNS 2119	Introduction to Nutrition Science

MINOR IN NUTRITION

REQUIREMENTS

The following requirements must be fulfilled: 15 credits in required courses.

Code	Title	Credits
Required		
EXNS 1114	Community Nutrition	
EXNS 1118	Sport and Nutrition	
EXNS 2119	Introduction to Nutrition Science	
Two of the following:		
SUST 2003	The Sustainable Plate

PUBH 3137	Global Public Health Nutrition
PUBH 3150	Sustainable Energy & Env Hlth

PUBH 3151	Current Issues in Bioethics
PUBH 3199	Topics in Public Health

*Advising documents are maintained by and available from the SPH Undergraduate Program Advisor.

GRADUATE PROGRAMS

Master of Public Health

- Master of Public Health in the field of biostatistics (p. 925)
- Master of Public Health in the field of community oriented primary care (p. 1003)
- Master of Public Health in the field of environmental health science and policy (p. 912)
- Master of Public Health in the field of epidemiology
- Master of Public Health in the field of global environmental health (p. 916)
- Master of Public Health in the field of global health communication (p. 955)
- Master of Public Health in the field of global health program design, monitoring, and evaluation (p. 962)
- Master of Public Health in the field of global health policy (p. 960)
- Master of Public Health in the field of global health epidemiology and disease control (p. 958)
- Master of Public Health in the field of health policy (p. 972)
- Master of Public Health in the field of health promotion (p. 1007)
- Master of Public Health in the field of maternal and child health (p. 1009)
- Master of Public Health in the field of physical activity in public health (p. 941)
- Master of Public Health in the field of public health communication and marketing (p. 1011)
- Master of Public Health in the field of public health nutrition (p. 944)
- Master of Public Health: MPH@GW (p. 900)

Master of Science

- Master of Science in the field of biostatistics (p. 930)
- Master of Science in the field of epidemiology (p. 931)
- Master of Science in the field of exercise science with a concentration in strength and conditioning (p. 947)
- Master of Science in the field of health policy (p. 978)
- Master of Science in the field of public health microbiology and emerging infectious diseases (p. 933)
- Master of Science in the field of management of health informatics and analytics (p. 979)

Master of Health Administration

- Master of Health Administration (p. 968)
- Master of Health Administration – online/executive program (p. 971)

Specialist program

- Health Services Administration Specialist (p. 979)

Joint/Dual programs

- Doctor of Medicine and Master of Public Health (p. 909)
- Juris Doctor/Master of Laws in the field of law and Master of Public Health (p. 909)
- Master of Arts in the field of international affairs and Master of Public Health (p. 899)
- Master of Health Administration with a certificate in health care corporate compliance (p. 902)
- Master of Public Health in the field of health policy with a certificate in health care corporate compliance (p. 907)
- Master of Science in Health Policy with a certificate in health care corporate compliance (p. 903)
- Master of Science in Health Sciences in the field of physicians assistant and Master of Public Health (p. 903)
- Peace Corp Masters International Program and Master of Public Health

Doctoral programs

- Doctor of Public Health in the field of environmental and occupational health (p. 920)
- Doctor of Public Health in the field of global health (p. 965)
- Doctor of Public Health in the field of health behavior (p. 1013)
- Doctor of Public Health in the field of health policy (p. 981)
- Doctor of Philosophy in the field of biostatistics (p. 935)
- Doctor of Philosophy in the field of epidemiology (p. 937)
- Doctor of Philosophy in the field of public policy and administration (health policy track) (p. 980)
- Doctor of Philosophy in the field of social and behavioral sciences in public health (p. 1014)

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL AFFAIRS AND MASTER OF PUBLIC HEALTH

SPH *Program Coordinator* E. Uretsky

The Elliott School of International Affairs and Milken Institute School of Public Health collaborate in offering a dual degree program leading to a Master of Public Health (M.P.H.) and the Master of Arts (M.A.) for the following academic programs:

M.A./M.P.H. Area of Combined Study

- Milken Institute School of Public Health
  Master of Public Health
  - Global Health Communication
  - Global Health Program Design, Monitoring and Evaluation
  - Global Health Policy
- Elliott School of International Affairs
  Master of Arts
  - Asian Studies
  - European and Eurasian Studies
  - International Affairs
  - International Development Studies
  - Latin American & Hemispheric Studies

The dual degree requires a total of 67 credits. Students electing Global Health as their Elliott School M.A. major field can use the 12 major field credits (taken in the Department of Global Health) to fulfill both the M.A. and M.P.H. requirements. Six additional credits of course work in the Elliott School may also be applied toward the M.P.H. as electives.

Students applying to the M.A./M.P.H. program must submit application materials to both the Elliott School of International Affairs and the Milken Institute School of Public Health and be accepted by both schools. A full-time student (taking an average of 10 credits per semester) may be able to complete both degrees within three years by attending summer sessions. Students accepted into the dual degree program may complete each degree separately.

Visit the program website (http://publichealth.gwu.edu/programs/joint-mamph) for additional information.

REQUIREMENTS

Curriculum

The requirements for each program are found in the program information on the Milken Institute SPH (http://publichealth.gwu.edu/academics) website and Elliot School of International Affairs (http://elliott.gwu.edu/graduate-programs) website.

Dual Degree Rules and Regulations

Students in the dual degree program must fulfill the requirements of both degrees. Students are expected to work with program directors or advisors in each School to insure that all requirements are completed. Approval by program directors or advisors in both Schools is required for any overlap courses designated as meeting the requirements of both degree programs.

Graduation

Students completing the requirements of one degree program may apply to graduate with that degree prior to completing the second degree. Students may also formally request withdrawal from either program at any time to pursue a single degree in the other program. All work on each degree must be completed within five years from the student's entry into that degree program.

MASTER OF PUBLIC HEALTH: MPH@GW

Program Director M. Turner

Program Description

This distance education track for the master of public health (M.P.H.) degree emphasizes local, national, and global health practice. The program emphasizes interdisciplinary teaching, and focuses on core competencies/skills and uses cases/other materials from both the U.S. and abroad. The pedagogy allows students to tailor their education to community level, national, or global interests in the U.S. and countries around the world, emphasizing interdisciplinary public health competencies, including biostatistics and epidemiology; cultural competency; health communication; leadership; professionalism; planning, implementation and evaluation methods; public health biology; and systems thinking.

The MPH@GW track is taught in 10-week quarters across the calendar year (4 quarters per year).

Mission

Provide a practice-oriented M.P.H. curriculum that enables graduates to be leaders in the design of population and community health programs in the US and globally.

Visit the program website (http://publichealthonline.gwu.edu) for additional information.

COMPETENCIES

Program-Specific Competencies

Upon completion of the program, students should possess the following functional competencies.

- Describe biological mechanisms of major diseases causing death and disability in the US and globally from a public health perspective.

  Relevant course:

PUBH 6001	Biological Concepts in Public Health

- Define communities and identify and assess relevant population health needs.

  Relevant courses:

PUBH 6007	Social and Behavioral Approaches to Public Health

PUBH 6500	Planning and Implementing Health Promotion Programs

- Assess the functions, capacities, management and governance of governmental, international and non-state organizations that comprise health systems. Translate scientific and program evidence to inform the development of public health programs and policies within the context of health systems.

Relevant courses:

PUBH 6006	Management and Policy Approaches to Public Health
PUBH 6442	Comparative Global Health Systems

- Apply public health theory and experiential evidence to develop and manage project, program and institutional strategies to reduce community and individual health risks to mitigate the impact of disease.

Relevant courses:

PUBH 6007	Social and Behavioral Approaches to Public Health
PUBH 6503	Introduction to Public Health Communication and Marketing

- Conduct core program evaluations and complete an assessment of program outcomes, achievements, impacts and shortcomings. Communicate findings to stakeholders.

Relevant courses:

PUBH 6501	Program Evaluation
PUBH 6437	Global Health Program Evaluation

- Apply relevant qualitative and quantitative tools and concepts to inform policy analyses for different audiences and topics.

Relevant courses:

PUBH 6002	Biostatistical Applications for Public Health
PUBH 6003	Principles and Practices of Epidemiology
PUBH 6502	Practical Data Analysis: PCH

- Develop concise written and oral policy analyses for different audiences; identify the key strategies required to protect and advance health.

Relevant course:

PUBH 6006	Management and Policy Approaches to Public Health

- Describe how health systems performance is affected by various approaches to health care organization, health law, health workforce development and health care financing.

Relevant courses:

HSML 6202	Intro/Health Services Delivery
PUBH 6442	Comparative Global Health Systems

- Develop knowledge and skills in fundamentals of environmental health including the connection between population health and exposures to chemical, physical, and biological agents in the environment.

Relevant course:

PUBH 6004	Environmental and Occupational Health in a Sustainable World

- Develop communication campaigns and strategies to disseminate health promotion information through media channels.

Relevant course:

PUBH 6503	Introduction to Public Health Communication and Marketing

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 15 credits in core courses, 16 credits in program-specific courses, 10 credits in elective courses, 2 credits in a practicum, and 2 credits in a culminating experience.

Code	Title	Credits
Required		
Core		
PUBH 6001	Biological Concepts in Public Health	
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6004	Environmental and Occupational Health in a Sustainable World	

PUBH 6006	Management and Policy Approaches to Public Health
PUBH 6007	Social and Behavioral Approaches to Public Health
Program specific	
PUBH 6050	Introduction to Health Services Delivery
PUBH 6052	Practical Data Management and Analysis for Public Health
PUBH 6054	Community Engagement and Advocacy
PUBH 6437	Case Study Methods for Global Health Evaluation
PUBH 6442	Comparative Global Health Systems
PUBH 6500	Planning and Implementing Health Promotion Programs
PUBH 6503	Introduction to Public Health Communication and Marketing
Practicum and culminating experience	
PUBH 6014	Practicum (professionals already working in public health may substitute an elective with appropriate approval)
PUBH 6015	Culminating Experience (taken for 1 credit twice)
Electives	
10 credits in any SPH graduate courses	

Visit the MPH@GW website for an updated list of electives.

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

MASTER OF HEALTH ADMINISTRATION WITH A CERTIFICATE IN HEALTH CARE CORPORATE COMPLIANCE

Program Director J. Thorpe

GW's College of Professional Studies offers a 12-credit graduate certificate program in corporate compliance (https://cps.gwu.edu/healthcare-compliance) that draws from the Milken Institute School of Public Health's Department of Health Policy and a leading health care law firm in Washington, D.C. The program focuses on health care laws and regulations as well as the tools and strategies for creating effective corporate compliance programs.

Students who successfully complete the requirements for the certificate program may apply those credits as electives in the master of heath administration (M.H.A.) degree program**.** All other degree requirements for the M.H.A. (p. 968) must be fulfilled. Visit the program website (p. 968) for additional information.

REQUIREMENTS

Program Requirements

Designed for working professionals, the 12-credit Graduate Certificate in Healthcare Corporate Compliance (GW HCC Program or Program) provides students with a uniquely comprehensive education in healthcare corporate compliance. The Program is designed for current or aspiring corporate compliance officers and other working in compliance-related fields. The course of study, offered in just over seven months, is divided into three segments: Five-day, In-classroom Residency at GW's Graduate Education Center in Alexandria,VA (three credits); Six-month, Online Distance Learning segment (six credits); and Three-day, In-classroom Capstone back in Alexandria, VA (three credits).

The Graduate Certificate in Heathcare Corporate Compliance can be awarded in conjunction with a Master of Heath Administration (MHA)**.** The 12 credits earned through the Graduate Certificate in Healthcare Corporate Compliance may be applied as electives in this program.

All other degree requirements for the MHA Master's program must be fulfilled as noted on the MHA program page (p. 968).

College of Professional Studies

The Graduate Certificate in Healthcare Corporate Compliance is awarded through the GW College of Professional Studies. Visit the CPS website (http://cps.gwu.edu/healthcare-compliance) for more information.

MASTER OF SCIENCE IN HEALTH POLICY WITH A CERTIFICATE IN HEALTHCARE CORPORATE COMPLIANCE

Program Director J. Thorpe

GW's College of Professional Studies offers a 12-credit graduate certificate program in corporate compliance (https://cps.gwu.edu/healthcare-compliance) that draws from the Milken Institute School of Public Health's Department of Health Policy and a leading health care law firm in Washington, D.C. The program focuses on health care laws and regulations as well as the tools and strategies for creating effective corporate compliance programs.

Students who successfully complete the requirements for the certificate program may apply those credits as electives in the master of science (M.S.) in health policy degree program**.** All other degree requirements for the M.S. program (p. 972) must be fulfilled. Visit the program website (http://publichealth.gwu.edu/programs/health-policy-ms) for additional information.

DUAL MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF PHYSICIAN ASSISTANT AND MASTER OF PUBLIC HEALTH

Program Director J. Cawley

Mission Statement

As the U.S. health care system continues to evolve, market forces and changing personnel requirements create new and expanding roles for health care professionals. The joint Physician Assistant–Master of Science in Health Sciences/Master of Public Health P.A.–M.S.H.S./M.P.H. program strives to fill the need for a new type of health care professional: one who has both the depth of medical knowledge and the range of leadership and policy skills to meet the challenges of future practice. Based in both the Milken Institute School of Public Health (SPH) Department of Prevention and Community Health, and the School of Medicine and Health Sciences (SMHS), the P.A.–M.S.H.S./M.P.H. program presents a graduate curriculum that blends two important traditional paradigms of health care—the biomedical and the preventive. Health care professionals in the future U.S. health system must be prepared as competent and caring clinicians, as well as bring a broad view of population health and prevention to their work. Graduates of the GW P.A./M.P.H. program will be leaders in clinical practice in primary care and preventive medicine and will have the preparation to assume high level positions in education, research, and policy.

Goals

The P.A.–M.S.H.S. /M.P.H. provides the opportunity for students to obtain the competencies necessary to succeed in the rapidly evolving American and global health systems.

The major goals of GW's P.A.–M.S.H.S./M.P.H. program are to:

- Recruit diverse and intellectually curious students and develop in them a strong clinical medical and prevention knowledge base necessary to deliver the highest quality patient-centered healthcare in a variety of clinical settings worldwide;
- Educate future health care professionals who are competent clinicians who can bring a population health orientation to their practice setting;
- Develop practitioners for the future who integrate concepts of prevention, community-oriented primary care, and population health;
- Graduate collaborative clinicians who will serve the healthcare needs of a worldwide community with intelligence, compassion, and integrity;
- Foster analytic thinking skills such that graduates will be able to perform a wide range of clinical tasks working with physicians, as well as assessing community health problems and addressing population health needs;

- Nurture a sensitivity and respect for the cultural and personal beliefs of all patients and an understanding of how social, economic, and other system forces can impact health and healthcare and how these impact patient morbidity and mortality;
- Encourage graduates to be responsive to the needs of patients and society and advocate for quality patient care regardless of patient population;
- Graduate practitioners who will have the information technology and research skills necessary to access and interpret the medical literature and support their ongoing professional development; and
- Expect graduates to practice collaboratively, professionally, legally, ethically, and with integrity.

The P.A.–M.S.H.S./M.P.H. program draws from a faculty in both the School of Medicine and Health Sciences and the Milken Institute SPH to provide instruction in a wide range of subjects in medicine, public health, and professional leadership.

The purpose of the P.A.–M.S.H.S./M.P.H. program is to provide future clinicians with a wide range of skills in leadership, policy development, and community and preventive medicine. Students in the program prepare as clinicians fulfilling all of the requirements for national certification as a physician assistant (PA) in the GW Physician Assistant program. In addition, public health course work provides an orientation to population and community health. For example, in the Community Oriented Primary Care (COPC) track, students acquire skills in community health assessment, community based interventions, and the application of COPC principles in community based practice settings. GW's SPH course work in health care administration, management, and health care economics prepares students to be leaders in a wide variety of clinical settings, office practices, outpatient clinics, community-based health centers, and health care institutions. Students are also exposed to the formulation of health policy.

Set in the center of the health policy in the nation, the P.A.–M.S.H.S./M.P.H. program affords students the chance to interact with individuals in both the public and private sector who are involved in policy research, practice, and legislation.

Visit the M.P.H. program website (http://publichealth.gwu.edu/academics/graduate/masters-programs) for additional information.

Visit the P.A. program website (https://www.gwu.edu/graduate-programs/physician-assistant) for additional information.

Admissions Requirements

If you are interested in the joint P.A./M.P.H. program you will be receiving correspondence from both the School of Medicine and Health Sciences (for the P.A.–M.S.H.S.) and the Milken Institute SPH and School of Medicine and Health Services (for the M.P.H.) regarding the completion of your application and admissions decisions. Should you be accepted to one degree program and not the other, you may accept the admissions offer from the program to which you were accepted, because decisions are made separately.

1. Submit the P.A. Application (CASPA and PA Secondary Application) according to the instructions on the website (http://smhs.gwu.edu/pas/program/prospective-students/admissions).
2. You should submit the P.A. Secondary Application within two weeks of submitting the CASPA.
3. October 1 is the deadline for complete applications to include GRE score receipt.

The School of Medicine and Health Services, to save you time and money, will copy your application materials and send them to the Admissions Office of the Milken Institute SPH. Do not complete the SOPHAS application or the SPH secondary application, as this will delay the processing of your application and result in your accruing increased application fees.

COMMUNITY-ORIENTED PRIMARY CARE

The following requirements must be fulfilled: 136 credits, including 100 credits in physician assistant courses, 13 credits in public health core courses, 10 credits in prevention and community health courses, and 13 credits in community oriented primary care track courses.

MASTER OF PUBLIC HEALTH IN THE FIELD OF HEALTH POLICY WITH A CERTIFICATE IN CORPORATE COMPLIANCE

Program Director J.Thorpe

Given the dramatic changes in healthcare policy and regulation over the past decade, the position of corporate compliance officer has become increasingly important in the healthcare industry. No other position can have so profound an impact on your healthcare organization's success—or failure. Legislation such as the Health Insurance Portability and Accountability Act (HIPAA) and the federal Anti-Kickback and Stark Laws has created the need for university-based credentials for this increasingly specialized—and increasingly complicated—field.

GW's College of Professional Studies (CPS) offers a one-of-a-kind program providing a comprehensive corporate compliance education. Drawing from both GW's Department of Health Policy in the Milken Institute School of Public Health and a leading healthcare law firm in Washington, DC, the program offers education in healthcare laws and regulations as well as tools and strategies for creating effective corporate compliance programs.

REQUIREMENTS

Program Requirements

Designed for working professionals, the 12-credit Graduate Certificate in Healthcare Corporate Compliance (GW HCC Program or Program) provides students with a uniquely comprehensive education in healthcare corporate compliance. The Program is designed for current or aspiring corporate

compliance officers and other working in compliance-related fields. The course of study, offered in just over seven months, is divided into three segments: Five-day, In-classroom Residency at GW's Graduate Education Center in Alexandria,VA (three credits); Six-month, Online Distance Learning segment (six credits); and Three-day, In-classroom Capstone back in Alexandria, VA (three credits).

The Graduate Certificate in Heathcare Corporate Compliance can be awarded in conjunction with a Master of Public Health in the field of health policy. The 12 credits earned through the Graduate Certificate in Healthcare Corporate Compliance may be applied toward this MPH. 3 credits earned in the Graduate Certificate can be applied to the Program-Specific courses and 9 credits to the electives.

All other degree requirements for the MPH program must be fulfilled as noted on the MPH in the field of health policy program page (p. 972).

College of Professional Studies

The Graduate Certificate in Healthcare Corporate Compliance is awarded through the GW College of Professional Studies. Visit the CPS website (http://cps.gwu.edu/healthcare-compliance) for more information.

PEACE CORP MASTERS INTERNATIONAL PROGRAM AND MASTER OF PUBLIC HEALTH

Program Contacts Milken Institute School of Public Health, Office of Recruitment and Admissions (asksphhs@gwu.edu)

The Milken Institute School of Public Health (Milken Institute SPH) collaborates with the Peace Corps as one of 90 institutions in the United States participating in this prestigious academic partnership. The program is designed to help address the shortage of prepared public health professionals that the organization has identified. Students in the program earn a degree in any one of the Milken Institute SPH's M.P.H. programs, which provides the academic base and professional skills. They then have priority placement for the two-year public health service assignment with the Peace Corps in a developing country, which provides on-the-ground training.

Students in the program complete M.P.H. course work on the GW campus and then enter the Peace Corps and begin their service in the assigned country. As Peace Corps volunteers, M.P.H. students complete three months of intensive language, technical, and cross-cultural training followed by two years of service as public health workers. The Peace Corps experience serves as the practicum required for the M.P.H. degree, and generally provides the basis for the program's required culminating experience. Upon satisfactory completion of the two-year Peace Corps service and completion of the practicum, students return to GW and enroll in the culminating experience. The degree is awarded once all requirements for the M.P.H. have been fulfilled.

REQUIREMENTS

Admissions Requirements

To be eligible for this program, applicants must be accepted by both the Milken Institute School of Public Health and the Peace Corps through separate application processes. Prospective applicants should apply to both programs simultaneously to allow sufficient time for the Peace Corps' medical and suitability clearances to be processed. While it is best to apply simultaneously to both programs, it may be possible to apply and be accepted to the Peace Corps after having begun the M.P.H. degree program. The review of applications is independent and admission to one program does not guarantee admission to the other.

Peace Corps

To join the Peace Corps, applicants must be U.S. citizens, at least 18 years old, and in good physical health. Call or write for additional information regarding eligibility criteria and benefits package (including field practicum tuition waiver, language and cultural training, living/ housing expenses in the field, medical/dental coverage, deferment of student-loan repayment, transportation expenses to and from one's assigned country, vacation time and allowances, financial readjustment allowance, and employment assistance post-service). Master's International students should be willing to serve at any location assigned by the Peace Corps. Visit the Peace Corps website (http://bulletin.gwu.edu/public-health/peace-corps/www.peacecorps.gov) for more information.

Milken Institute School of Public Health

To join the SPH M.P.H. program follow the application process described on the SPH Admissions website (http://publichealth.gwu.edu/admissions/graduate-admissions). Applicants must have a baccalaureate degree and submit all relevant documents by the stated application deadlines. Special M.P.H. program requirements are detailed in the application.

Program Format

1. Apply to the Milken Institute SPH M.P.H. program and the Peace Corps simultaneously, and gain acceptance to both programs.
2. Successfully complete all on-campus course work for the M.P.H. (expect one and one-half to two years of study), with the exception of the practicum and culminating experience.
3. Begin Peace Corps in-service training program.
4. Deploy to service site.
5. Early in the deployment, submit a practicum proposal to the SPH practicum director for approval. (This step may be undertaken earlier in the process);
6. Complete the practicum and maintain communication with the SPH practicum director on at minimum a quarterly basis,

or as directed by the director) while completing the Peace Corps assignment.

7. Complete the Peace Corps assignment and return to GW to complete the culminating experience and graduate.

Visit the Milken Institute School of Public Health website (http://publichealth.gwu.edu/programs/master%E2%80%99s-international-program-peace-corps-mph) for more information.

DOCTOR OF MEDICINE AND MASTER OF PUBLIC HEALTH

Program Director S. Schroth

George Washington University School of Medicine and Health Sciences (SMHS) applicants and students can apply to the Milken Institute School of Public Health to obtain a Master of Public Health (M.P.H.) degree in one of the following programs:

- Biostatistics
- Community Oriented Primary Care
- Environmental Health Science and Policy
- Epidemiology
- Global Environmental Health
- Global Health Communication
- Global Health Policy
- Global Health Program Design, Monitoring and Evaluation
- Global Epidemiology and Disease Control
- Health Policy
- Health Promotion
- Maternal and Child Health
- Physical Activity in Public Health
- Public Health Communication and Marketing
- Public Health Nutrition

REQUIREMENTS

While the MPH degree is 45 credits in length, joint students will enroll in 43 total MPH credits.

- Joint students do not take PUBH 6001 BiologicalConcepts/PublicHlth (2 credits).
- SMHS accepts PUBH 6014 Practicum (2 credits) and PUBH 6015 Culminating Experience (2 credits), upon approval, which may fulfill the special project requirement for certain courses.

Students in the five year joint MD/MPH degree program may begin the MPH portion of the program at any time prior to the beginning of their fourth year in the MD program. All joint students are granted a one year leave of absence from medical school during which between 18 and 27 credits of MPH work are completed. The remaining course work is completed during the summer semesters, coincident with parts of the medical school curriculum, and during the spring semester of the senior year of the MD curriculum when elective credit requirements for the MD degree are waived.

Visit the Milken Institute School of Public Health joint MD/MPH website (http://publichealth.gwu.edu/programs/joint-mdmph) for more information.

JOINT JURIS DOCTOR AND MASTER OF PUBLIC HEALTH

Program Contact J. Teitelbaum

Hirsh Health Law and Policy Program

The Hirsh Health Law and Policy Program of The Milken Institute School of Public Health (SPH) offers unique educational opportunities to law students, practicing lawyers, and health professions students. Endowed by Harold and Jane Hirsh and home to GW's joint degree programs in law and public health, the program is designed to foster an interdisciplinary approach to the study of health policy, health law, public health, and health care. The Hirsh Program's overall goal is to advance a greater understanding regarding how the law influences and shapes all facets of health care and public health, as well as how the changing system affects traditional areas of the law. At the same time, the program seeks to achieve the pragmatic objectives of preparing law degree candidates and practicing lawyers for the broad range of health law-related careers that are available today.

Established in 1997, the Hirsh Program is structured to allow students to take maximum advantage of its location in Washington, DC, the center of the national health policy and law debate. The program is designed to provide a solid grounding in individual and population health, from the health care and public health systems themselves to extensive course work in advanced health policy and law. The program serves juris doctor (J.D.) and master of laws (LL.M.) candidates as well as lawyers pursuing health law careers and all manner of health profession students.

Joint Degree Admissions Information

J.D. students are required to focus their studies exclusively to the first-year curriculum. Applicants to the joint law–public health degree/certificate program may apply for admission to SPH at the same time they apply to GW Law School or after admission to the Law School. J.D. candidates who do not apply concurrently to the Law School and SPH are encouraged to file the M.P.H. or certificate application by the spring semester of their first year of law studies. LL.M. candidates are encouraged to apply to SPH at the time they apply to the Law School or during their first semester on campus.

Applicants to the joint law-public health program must complete the application processes for both the Law School (J.D. or LL.M.) and for the Milken Institute School of Public Health (M.P.H. or certificate). Admission to the joint degree program requires admissions acceptances from both Schools.

However, because admission to each School is separate and distinct, applicants who are accepted by one School but not the other are free to enroll in the School to which they have been accepted.

Applications for both programs are available on the Law School website (http://www.law.gwu.edu/Admissions/Pages/Default.aspx) and SPH website (http://publichealth.gwu.edu/admissions). Whether applying simultaneously to both Schools or as a current GW Law student, applicants must complete the SOPHAS application as indicated at the SPH website (http://publichealth.gwu.edu/admissions/graduate-admissions).

Internship/Research Opportunities

The Hirsh Program offers extensive assistance in arranging internships in congressional offices, federal agencies, and the hundreds of national health organizations located in and throughout the Washington, D.C. metropolitan area. Through its affiliation with the Department of Health Policy, the program also engages in extensive law-related health policy research, offering Hirsh Program students paid and unpaid training opportunities during their period of study. Visit the Department's website (http://www.gwhealthpolicy.org) for a description of the types of research in which it engages.

REQUIREMENTS

M.P.H. Requirements

The course of study for the M.P.H. degree consists of 45 credits in one of several focus areas (http://publichealth.gwu.edu/node/766), including a supervised practicum. Because the Milken Institute SPH accepts 8 Law School credits toward completion of the M.P.H. degree, juris doctor (J.D.) and master of laws (LL.M.) students need only complete 37 credits of coursework through SPH to obtain an M.P.H. degree.

Depending upon the focus area in which a J.D. student chooses to study, the joint degree can be earned, as a general rule, in three-and-a-half or four years of full-time study, including summer enrollment. J.D. candidates selecting joint degree studies in one of the more science-oriented areas, such as epidemiology or biostatistics, should anticipate a four-year course of study. Candidates selecting a less scientific area, such as health policy or health management, can expect to complete their joint degrees in three-and-a-half years. Full-time LL.M./M.P.H. candidates should anticipate completing the joint degree in approximately two years. Part-time J.D. and LL.M. candidates pursuing joint degrees will, of course, have longer courses of study.

Certificate Requirements

The course of study for the graduate certificate consists of 18 credits in one of several focus areas (http://publichealth.gwu.edu/node/768). However, because the Milken Institute SPH accepts 6 Law School credits toward completion of the certificate program, J.D. and LL.M. students need only complete 12 credits of coursework through the SPH to obtain a graduate certificate in public health. Upon an individual's subsequent acceptance to the M.P.H. degree program, credits from the graduate certificate may be transferred to the M.P.H. degree program. Full-time J.D. candidates can complete a graduate certificate during their regular course of study in the Law School. Full-time LL.M./certificate candidates typically complete the program in one-and-a-half years.

GRADUATE CERTIFICATE IN PUBLIC HEALTH

REQUIREMENTS

Advisor J. DeLoia

The following requirements must be fulfilled: 15 credits in required courses.

Code	Title	Credits
Required		
PUBH 6001	Biological Concepts in Public Health	
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6004	Environmental and Occupational Health in a Sustainable World	
PUBH 6006	Management and Policy Approaches to Public Health	
PUBH 6007	Social and Behavioral Approaches to Public Health	

Course work may be completed through residential or distance modalities. Additional certificate information is available on the SPH website (http://sphhs.gwu.edu/programs/public-health-generalist-certificate).

Requirements for the graduate certificate

1. Graduate credit requirement: 15 graduate credits
2. The Program Director/Advisor must pre-approve all course selections and course sequencing by developing a program of study prior to the student's initial registration. Graduate certificate students meet with their advisor each semester before registration. All changes in this program of study must be pre-approved by the Program Director/Advisor.
3. Grade point requirement: A 3.0 (*B*) overall grade point average or better.

4. Time limit requirement: The certificate must be completed within 2 years.

ENVIRONMENTAL AND OCCUPATIONAL HEALTH

The Department of Environmental and Occupational Health (EOH) works to further the student's understanding of how natural and human-made environments impact human health. The department offers public health programs that challenge students to explore both the underlying science and policy remedies for topics including sustainable cities and food systems, climate change mitigation, workplace safety, and risk management.

GRADUATE

Master's programs

- Master of Public Health in environmental health science and policy (p. 912)
- Master of Public Health in global environmental health (p. 916)

Doctoral program

- Doctor of Public Health in environmental and occupational health (p. 920)

FACULTY

Professors G. Gray, L. Goldman, D. Michaels (*Research*), M. J. Perry (*Chair*), L. B. Price

Associate Professors P.T. LaPuma, S. McCormick

Assistant Professors K.M. Applebaum, J. Graham, A.L. Northcross, A.R. Zota

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PUBH 2114. Environment, Health, and Development. 3 Credits.
Survey of the relationship between health and development and environmental trends. Topics include deforestation, urban contamination, and desertification.

PUBH 3150. Sustainable Energy & Env Hlth. 3 Credits.
Sustainability issues from the perspective of environmental health. Technical, social, and health implications of specific energy sources. Energy conservation and efficiency in the context of population growth, food and water resources, and maintenance of a healthy environment for future generations.

PUBH 6004. Environmental and Occupational Health in a Sustainable World. 2 Credits.
Examination of the connection between population health and exposures to chemical, physical, and biological agents in the environment. Problem-solving frameworks familiarize students with data sources, methodologies, and policy approaches being used to address the public health impacts of environmental and occupational health hazards, including the consequences of climate change, natural resource degradation, and industrial chemicals. Integration of key concepts of environmental health with principles of sustainability illustrate how public policies and practices on the local, national, and global level affect population health.

PUBH 6121. Environmental and Occupational Epidemiology. 3 Credits.
Demonstration and application of epidemiologic methods for the study of environmental and occupational health problems. Epidemiologic exposure assessment methods and methods relevant to cohort, case-control, cross-sectional, and case cross-over studies. Survey design and sources and evaluation of biases and confounding. Emphasis on written and oral communication skills. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6004.

PUBH 6122. Protecting Public Health and the Environment: Policies, Politics, and Programs. 3 Credits.
The legislative, regulatory, judicial, and political system in the United States developed to protect human health and the environment. National and global public and environmental health agencies, policy development, and current topics. Prerequisites: PUBH 6004 or permission of the intructor.

PUBH 6123. Toxicology: Applications for Public Health Policy. 3 Credits.
Toxicology as both a scientific discipline and a source of information for public health policy with respect to the regulation of foods, pesticides, drugs (pharmaceuticals), environmental chemical pollutants, and other chemicals that may affect human and environmental health. How chemicals interact with biological systems to produce adverse effects. The ways in which toxicologic information is developed and applied to regulatory decision making and the use of toxicology in regulatory risk assessment. Prerequisite: PUBH 6004.

PUBH 6124. Problem Solving in EOH. 3 Credits.
This culminating course uses problem-based learning methods to examine a variety of real-world EOH issues in depth. Cases stimulate students to integrate their cumulative knowledge across all required courses and demonstrate their professional competencies. Students to conduct activities characteristic of EOH practice: evaluating a variety of technical, public, and media, reports; integrating and interpreting environmental, exposure, and health information effectively; designing analytic and communication strategies; presenting in writing and orally relevant materials to address EOH issues; and, making appropriate policy and/or program decisions and recommendations. Prerequisites: PubH 6121, 6123, 6126.

PUBH 6125. Intro-Children's Health & Env. 2 Credits.
Describes the impact of environmental toxicants on children's health and reviews some of the major policy issues in the field of children's environmental health. Prerequisites: PubH 6004.

PUBH 6126. Assessment&Control/Env Hazards. 3 Credits.
Introduces the anticipation, recognition, assessment, and control of hazards in the workplace and the ambient environment. It emphasizes an understanding of the characteristic features of specific hazards, which may be chemical, biological, or physical/ergonomic.

PUBH 6127. Germs: An Introduction to Environmental Health Microbiology. 2 Credits.
Basics of public health microbiology as it relates to the environment, food, water, and bioterrorism. Examines from an environmental health perspective how the principles of microbiology are applied to current and emerging public health issues, whether from intentional or unintentional contamination of the environment. Specific topics will include: industrial animal production and increasing prevalence of antibiotic resistance; effectiveness of various point of use technologies for water purification; recent advances in quantitative microbial risk assessment; one medicine (where public and veterinary health meet); detection strategies for microorganisms (including bioterrorism agents); and current approaches in food defense and agroterrorism. Prerequisites: PUBH 6004.

PUBH 6128. Global Environmental and Occupational Health. 2 Credits.
Examination of the global environmental and occupational health factors that contribute significantly to the global burden of disease, focusing primarily on low- and middle-income countries. Principles from behavioral sciences, development economics, risk assessment, and epidemiology are included. Potential solutions to environmental health problems, metrics used to measure impacts, and areas for future research. Prerequisite: PUBH 6004.

PUBH 6130. Sustainable Energy and the Environment. 2 Credits.
The sustainability of various energy strategies, including energy conservation, green building principles, renewable energy, and mitigation and adaption policies for climate change. Emphasis on the life cycle framework. Topics include natural resource depletion, water and energy consumption, and air, water, and solid waste pollutant emissions. Prerequisite: PUBH 6004.

PUBH 6131. Applied Data Analysis in Environmental and Occupational Health. 3 Credits.
Application of biostatistical and epidemiologic concepts and methods to analysis of environmental and occupational health (EOH) data. Students manage datasets, conduct data analyses, present data graphically, and interpret data for relevance to EOH research, policy, and practice. Development and practice of skills needed for analyzing complex exposures and communicating environmental and occupational research findings. Prerequisites: PUBH 6002, PUBH 6003, and PUBH 6004.

PUBH 6132. Water, Sanitation, and Hygiene (WASH) in Low-Income Countries. 2 Credits.
Introduction to working in both disaster and development settings in countries where contaminated water, inadequate sanitation, and poor hygiene (WASH) cause serious health problems. Students gain practical experience applying WASH methods in the field. Prerequisite: PUBH 6004.

PUBH 6133. Social Dimensions in Climate Change and Health. 3 Credits.
The drivers of climate change and outcomes with particular focus on health dimensions; obstacles, vulnerabilities, inequality, and adaptation as well as technical and social solutions.

PUBH 6134. Communicating Science for Public Health. 2 Credits.
Evaluating the primary scientific literature and communicating research findings in outlets ranging from peer-reviewed journals to 140 character Tweets. Identifying target audiences and shaping messages to maximize impact, while maintaining the integrity of the supporting evidence. Written and oral communication and critical evaluation are emphasized. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6199. Topics in EOH. 0-3 Credits.
In-depth examination of a particular facet of public health. Topics and prerequisites vary.

MASTER OF PUBLIC HEALTH IN THE FIELD OF ENVIRONMENTAL HEALTH SCIENCE AND POLICY

Program Director K. Applebaum
Practicum Director P. LaPuma

Mission

The mission of the master of public health (M.P.H.) in the field of environmental health science and policy degree program is to educate individuals who are committed to public health protection to apply critical analytic skills to the development, implementation, and evaluation of practices and policies aimed at preventing or minimizing the adverse impact of environmental and occupational hazards on human health.

Goals

Our graduates will possess a multidisciplinary knowledge base and skill set that will provide them a framework for addressing environmental and occupational health (EOH) issues. They will understand three distinct scientific foundations of environmental health in order to:

- Assess and control environmental and occupational exposures;
- Understand the effects of these exposures on human health; and
- Interpret epidemiologic and other research findings related to environmental risks.

Furthermore, graduates will be prepared to build on this science base in order to:

- Analyze policy implications and participate in policy development, implementation, and evaluation; and
- Assess and manage environmental and occupational risks.

COMPETENCIES

Upon Completion of the Master of Public Health program in the field of environmental health science and policy, students should possess the following functional competencies.

Epidemiology & Biostatistics

Critically assess existing epidemiologic research.

- Summarize goals, design, methods, and results of published research.

PUBH 6121	Environmental and Occupational Epidemiology

- Identify biases and evaluate the extent to which they threaten study validity.

PUBH 6121	Environmental and Occupational Epidemiology
PUBH 6131	Applied Data Analysis in Environmental and Occupational Health

- Apply statistical principles to interpret epidemiologic data.

PUBH 6121	Environmental and Occupational Epidemiology
PUBH 6131	Applied Data Analysis in Environmental and Occupational Health

Design appropriate studies for investigating EOH problems.

- Identify appropriate resources and databases to plan and conduct studies.

PUBH 6015	Culminating Experience
PUBH 6121	Environmental and Occupational Epidemiology
PUBH 6124	Problem Solving in EOH

- Given a research question, identify appropriate study design, choose appropriate study populations, describe relevant exposure assessment methods, identify appropriate data collection instruments and processes, and describe procedures for protecting human subjects.

PUBH 6121	Environmental and Occupational Epidemiology
PUBH 6126	Assessment&Control/Env Hazards

Conceptualize and carry out data analysis to address study goals.

- Conceptualize research questions.

PUBH 6015	Culminating Experience
PUBH 6121	Environmental and Occupational Epidemiology
PUBH 6131	Applied Data Analysis in Environmental and Occupational Health

- Utilize appropriate approaches to manage and analyze data.

PUBH 6015	Culminating Experience
PUBH 6131	Applied Data Analysis in Environmental and Occupational Health

Exposure Assessment and Control

Assess environmental and occupational exposures.

- Describe the principle of operation, capability, and limitations of assessment instrumentation.

PUBH 6126	Assessment&Control/Env Hazards

- Assess severity of potential hazards and select the appropriate instrument and measurement method.

PUBH 6126	Assessment&Control/Env Hazards

- Interpret exposure measurements to assess the severity of a chemical, physical, or biological hazard.

PUBH 6124	Problem Solving in EOH

PUBH 6126	Assessment&Control/Env Hazards

- Compare exposure data against established occupational & environmental health standards and guidelines.

PUBH 6124	Problem Solving in EOH
PUBH 6126	Assessment&Control/Env Hazards

- Evaluate the strengths and weaknesses of epidemiologic exposure assessments.

PUBH 6121	Environmental and Occupational Epidemiology

Recommend strategies to prevent and control environmental and occupational exposures.

- Recommend appropriate control strategies, such as; environmental health interventions, protective equipment, behavior change campaigns, to mitigate health hazards.

PUBH 6124	Problem Solving in EOH
PUBH 6126	Assessment&Control/Env Hazards

Toxicology

Identify the adverse effects of chemical, biological, and physical exposures on human health.

- Apply key concepts in toxicology including: dose-response relationships; absorption, distribution, metabolism and excretion of xenobiotics; acute and chronic effects.

PUBH 6123	Toxicology: Applications for Public Health Policy

- Describe the biological basis for the adverse effects of toxicants on specific organs and tissues and identify specific compounds that interact with specific organs.

PUBH 6123	Toxicology: Applications for Public Health Policy

- Describe biological basis for the systemic effects of toxicants (e.g., carcinogenicity, genotoxicity, developmental toxicity) and identify specific compounds that elicit these effects.

PUBH 6123	Toxicology: Applications for Public Health Policy

Interpret toxicological research findings in the context of human health risk assessment.

- Explain key aspects of toxicological tests as well as their strengths and weaknesses.

PUBH 6123	Toxicology: Applications for Public Health Policy

- Explain how risk assessment is used to translate toxicologic information for regulatory decisions including: evaluating a body of data and applying weight of evidence approaches; calculating and using the reference dose (RfD); calculating and using of cancer slope factors.

PUBH 6122	Protecting Public Health and the Environment: Policies, Politics, and Programs
PUBH 6123	Toxicology: Applications for Public Health Policy

Policy

Synthesize scientific evidence in order to inform EOH policy and reduce and prevent environmental and occupational disease and injury.

- Describe the authority and approaches of U.S. public and environmental health agencies.

PUBH 6122	Protecting Public Health and the Environment: Policies, Politics, and Programs

- Apply the risk assessment, risk management, and Source-to-Effect frameworks.

PUBH 6124	Problem Solving in EOH

- Explain the role of scientific, economic, ethical, and political interests in development and implementation of human health and environmental health policy.

PUBH 6122	Protecting Public Health and the Environment: Policies, Politics, and Programs
PUBH 6123	Toxicology: Applications for Public Health Policy

Conduct policy analysis relevant to EOH problems.

- Discuss the control of public health hazards on a global basis.

PUBH 6126	Assessment&Control/Env Hazards

- Analyze approaches to environmental or occupational health policy development.

PUBH 6122	Protecting Public Health and the Environment: Policies, Politics, and Programs

- Analyze the role of environmental and occupational health policies and politics in promoting sustainability.

PUBH 6122	Protecting Public Health and the Environment: Policies, Politics, and Programs

Risk Management

Synthesize relevant information in order to assess and manage environmental and occupational risks.

- Given a specific context, design a plan to collect relevant information to fully characterize EOH hazards and related human health effects.

PUBH 6124	Problem Solving in EOH

- Evaluate data and other information to characterize potential EOH hazards, sources of those hazards, potential for human exposure, and potential or actual health effects.

PUBH 6123	Toxicology: Applications for Public Health Policy
PUBH 6124	Problem Solving in EOH

- Recommend possible approaches to reduce the risk and/or impact of exposure to EOH hazards, and evaluate these approaches with regard to ethical issues, technical feasibility, resource requirements, and policy context.

PUBH 6124	Problem Solving in EOH
PUBH 6126	Assessment&Control/Env Hazards

- Communicate with relevant stakeholder groups about environmental and occupational health issues and recommendations, using appropriate terminology and data.

PUBH 6122	Protecting Public Health and the Environment: Policies, Politics, and Programs
PUBH 6123	Toxicology: Applications for Public Health Policy
PUBH 6124	Problem Solving in EOH

Identify ethical issues in environmental health policy and practice.

- Discuss how scientific principles and societal values such as equity and environmental justice influence decision-making about environmental and occupational health problems in research, public health practice, policy, and management contexts.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 15 credits in core courses, 18 credits in program specific courses, 8 credits in elective courses, and 4 credits in practicum/culminating experience.

Code	Title	Credits
Required core courses (15 credits):		
PUBH 6001	Biological Concepts in Public Health	
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6004	Environmental and Occupational Health in a Sustainable World	
PUBH 6006	Management and Policy Approaches to Public Health	
PUBH 6007	Social and Behavioral Approaches to Public Health	
Required program-specific courses (18 credits):		
PUBH 6121	Environmental and Occupational Epidemiology	
PUBH 6122	Protecting Public Health and the Environment: Policies, Politics, and Programs	
PUBH 6123	Toxicology: Applications for Public Health Policy	
PUBH 6124	Problem Solving in EOH	
PUBH 6126	Assessment&Control/Env Hazards	
PUBH 6131	Applied Data Analysis in Environmental and Occupational Health	
Program-specific electives (4 credits):		
Two of the following		
PUBH 6127	Germs: An Introduction to Environmental Health Microbiology	
PUBH 6128	Global Environmental and Occupational Health	
PUBH 6130	Sustainable Energy and the Environment	
PUBH 6133	Social Dimenensions in Climate Change and Health	
Electives (4 credits):		
Any SPH graduate course		
Practicum and culminating experience:		
PUBH 6014	Practicum	
PUBH 6015	Culminating Experience (taken twice for one credit)	

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

MASTER OF PUBLIC HEALTH IN THE FIELD OF GLOBAL ENVIRONMENTAL HEALTH

Program Director G. Gray
Practicum Director S. McCormick

Mission

The mission of the master of public health (M.P.H.) in the field of global environmental health degree program—a joint program between the Departments of Global Health and Environmental and Occupational Health—is to educate individuals who are committed to working in resource-poor settings and applying analytic skills to prevent or mitigate the adverse impact of environmental hazards on human health. The program has a particular focus on traditional environmental health hazards—that is, health risks that are a consequence of a lack of access to clean water, inadequate sanitation, poor hygiene, household air pollution, solid waste disposal, and vector-borne diseases such as malaria.

Goals

The program seeks to help train graduates who will hold a multidisciplinary knowledge base and skill set that will provide them with a framework for addressing environmental health issues from environmentally mediated disease in the poorest performing regions of the world. They will understand the scientific and cultural foundations of environmental health in order to assess environmental exposures and understand the effects of these exposures on human health; interpret epidemiologic and other research findings related to global environmental health risks; and assume leadership roles in designing, implementing, and evaluating programs that focus on modification of environmental health-related behaviors at local, regional, national, and/or global levels.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://publichealth.gwu.edu/programs/global-environmental-health-mph) for additional information.

COMPETENCIES

Upon completion of the master of public health (M.P.H.) in the field of global environmental health degree program, students should possess the following functional competencies:

Epidemiology and Biostatistics

Critically assess existing epidemiologic research.

- Summarize goals, design, methods, and results of published research.

Code	Title	Credits
PUBH 6015	Culminating Experience	
PUBH 6121	Environmental and Occupational Epidemiology	
PUBH 6131	Applied Data Analysis in Environmental and Occupational Health	
PUBH 6400	Global Health Frameworks	
PUBH 6411	Global Health Qualitative Research Methods	

- Identify biases and evaluate the extent to which they threaten study validity.

Code	Title	Credits
PUBH 6121	Environmental and Occupational Epidemiology	
PUBH 6131	Applied Data Analysis in Environmental and Occupational Health	
PUBH 6411	Global Health Qualitative Research Methods	

- Apply statistical principles to interpret epidemiologic data.

Code	Title	Credits
PUBH 6121	Environmental and Occupational Epidemiology	
PUBH 6131	Applied Data Analysis in Environmental and Occupational Health	

Design appropriate studies for investigating EOH problems.

- Identify appropriate resources and databases to plan and conduct studies.

Code	Title	Credits
PUBH 6015	Culminating Experience	

PUBH 6121	Environmental and Occupational Epidemiology
PUBH 6128	Global Environmental and Occupational Health
PUBH 6400	Global Health Frameworks
PUBH 6411	Global Health Qualitative Research Methods

- Given a research question, identify appropriate study design, choose appropriate study populations, describe relevant exposure assessment methods, identify appropriate data collection instruments and processes, and describe procedures for protecting human subjects.

Code	Title	Credits
PUBH 6015	Culminating Experience	
PUBH 6131	Applied Data Analysis in Environmental and Occupational Health	
PUBH 6411	Global Health Qualitative Research Methods	

Assess Global Environmental and Occupational Risks

Assess environmental and occupational exposures.

- Describe the principle of operation, capability, and limitations of assessment instrumentation.

Code	Title	Credits
PUBH 6126	Assessment&Control/Env Hazards	

- Assess severity of potential hazards and select the appropriate instrument and measurement method.

Code	Title	Credits
PUBH 6126	Assessment&Control/Env Hazards	

- Interpret exposure measurements to assess the severity of a chemical, physical, or biological hazard.

Code	Title	Credits
PUBH 6126	Assessment&Control/Env Hazards	
PUBH 6435	Global Health Program Development and Implementation	

- Compare exposure data against established occupational and environmental health standards and guidelines.

Code	Title	Credits
PUBH 6126	Assessment&Control/Env Hazards	
PUBH 6128	Global Environmental and Occupational Health	

- Evaluate the strengths and weaknesses of epidemiologic exposure assessments.

Code	Title	Credits
PUBH 6121	Environmental and Occupational Epidemiology	
PUBH 6128	Global Environmental and Occupational Health	

Recommend strategies to prevent and control environmental and occupational exposures.

- Recommend appropriate control strategies, such as; environmental health interventions, protective equipment, behavior change campaigns, to mitigate health hazards.

Code	Title	Credits
PUBH 6126	Assessment&Control/Env Hazards	
PUBH 6128	Global Environmental and Occupational Health	

PUBH 6400	Global Health Frameworks

Global Environmental Health Policy Analysis

Synthesize scientific evidence in order to inform global environmental health policy and reduce and prevent environmental health related disease and injury.

- Describe the authority and approaches of global environmental health agencies.

Code	Title	Credits
PUBH 6128	Global Environmental and Occupational Health	
PUBH 6435	Global Health Program Development and Implementation	

- Apply the risk assessment, risk management, and Source-to-Effect frameworks.

Code	Title	Credits
PUBH 6126	Assessment&Control/Env Hazards	
PUBH 6128	Global Environmental and Occupational Health	

- Explain the role of scientific, economic, ethical, and political interests in development and implementation of global environmental health policy.

Code	Title	Credits
PUBH 6126	Assessment&Control/Env Hazards	
PUBH 6128	Global Environmental and Occupational Health	
PUBH 6400	Global Health Frameworks	
PUBH 6435	Global Health Program Development and Implementation	

Conduct policy analysis relevant to global environmental health problems.

- Discuss interventions used in global environmental health.

Code	Title	Credits
PUBH 6126	Assessment&Control/Env Hazards	
PUBH 6128	Global Environmental and Occupational Health	
PUBH 6400	Global Health Frameworks	
PUBH 6435	Global Health Program Development and Implementation	

- Analyze approaches used in global environmental health policy development.

Code	Title	Credits
PUBH 6128	Global Environmental and Occupational Health	
PUBH 6400	Global Health Frameworks	
PUBH 6435	Global Health Program Development and Implementation	

- Analyze the role of global environmental health policies and politics in promoting sustainability.

Code	Title	Credits
PUBH 6128	Global Environmental and Occupational Health	
PUBH 6435	Global Health Program Development and Implementation	

Design, Implement, Monitor and Evaluate Global Environmental Health Programs

Synthesize relevant information in order to assess and manage environmental and occupational risks.

- Characterize political, social, cultural, religious and economic context to determine feasible interventions.

Code	Title	Credits
PUBH 6128	Global Environmental and Occupational Health	
PUBH 6400	Global Health Frameworks	
PUBH 6435	Global Health Program Development and Implementation	

- Given a specific context, design a plan to collect relevant information to fully characterize global environmental health hazards and related human health effects.

Code	Title	Credits
PUBH 6121	Environmental and Occupational Epidemiology	
PUBH 6128	Global Environmental and Occupational Health	
PUBH 6435	Global Health Program Development and Implementation	

- Evaluate data to characterize potential global environmental health hazards, potential for human exposure and health effects.

Code	Title	Credits
PUBH 6121	Environmental and Occupational Epidemiology	

PUBH 6128	Global Environmental and Occupational Health
PUBH 6400	Global Health Frameworks
PUBH 6411	Global Health Qualitative Research Methods
PUBH 6435	Global Health Program Development and Implementation

- Recommend possible approaches to reduce the risk and/or impact of exposure to global environmental health hazards, and evaluate these approaches with regard to ethical issues, technical feasibility, resource requirements, and policy context.

Code	Title	Credits
PUBH 6126	Assessment&Control/Env Hazards	
PUBH 6128	Global Environmental and Occupational Health	
PUBH 6400	Global Health Frameworks	
PUBH 6435	Global Health Program Development and Implementation	

- Communicate with relevant stakeholder groups about environmental and occupational health issues and recommendations, using appropriate terminology and data.

Code	Title	Credits
PUBH 6128	Global Environmental and Occupational Health	
PUBH 6435	Global Health Program Development and Implementation	

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 15 credits in core courses, 17 credits in program-specific courses, 2 credits in a practicum course, 2 credits in a culminating experience, and 9 credits in elective courses.

Program Requirements

Code	Title	Credits
Core		
PUBH 6001	Biological Concepts in Public Health	
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6004	Environmental and Occupational Health in a Sustainable World	
PUBH 6006	Management and Policy Approaches to Public Health	
PUBH 6007	Social and Behavioral Approaches to Public Health	
Program-specific: environmental and occupational health		
PUBH 6121	Environmental and Occupational Epidemiology	
PUBH 6126	Assessment&Control/Env Hazards	
PUBH 6128	Global Environmental and Occupational Health	
PUBH 6131	Applied Data Analysis in Environmental and Occupational Health	
Program-specific: global health		
PUBH 6400	Global Health Frameworks	
PUBH 6411	Global Health Qualitative Research Methods	
PUBH 6435	Global Health Program Development and Implementation	
Electives		
9 credits from the following:		
PUBH 6123	Toxicology: Applications for Public Health Policy	
PUBH 6132	Design, Implementation and Evaluation of Global Water, Sanitation and Hygiene (WASH) Programs	
PUBH 6125	Intro-Children's Health & Env	
PUBH 6127	Germs: An Introduction to Environmental Health Microbiology	
PUBH 6130	Sustainable Energy and the Environment	
PUBH 6133	Social Dimenensions in Climate Change and Health	
PUBH 6262	Intro-Geog Information Systems	
PUBH 6271	Disaster Epidemiology	
PUBH 6435	Global Health Program Development and Implementation	

PUBH 6437	Case Study Methods for Global Health Evaluation
PUBH 6480	Public Health in Complex Emergencies
Practicum and Culminating Experience	
PUBH 6014	Practicum
PUBH 6015	Culminating Experience (offered in two parts, 1 credit each)

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

DOCTOR OF PUBLIC HEALTH IN THE FIELD OF ENVIRONMENTAL AND OCCUPATIONAL HEALTH

Program Director G. Gray

Mission

The mission of the Department of Environmental and Occupational Health (EOH) is to increase the body of knowledge that addresses the adverse health effects of environmental and occupational exposures; to disseminate knowledge through the education of students and health practitioners; and to apply that knowledge in the clinical, environmental, and workplace settings.

Goal

The goal of the doctor of public health in the field of environmental and occupational health (Dr.P.H.) degree program is to prepare students for advanced level professional work in research, policy, and program design and administration.

Admissions Requirements

The doctor of public health program is designed for mid-career professionals seeking to become public health leaders. Preference for admission to the Dr.P.H. program is given to applicants who have completed an M.P.H. degree from a Council of Education for Public Health (CEPH) accredited program. Alternatively, applicants with a master's degree in another field may indicate their relevant training, research experience, or educational background comparable to the M.P.H. Doctoral applicants admitted without an M.P.H. will be required to take additional course work at the graduate level that does not apply toward the minimum 48 credits required for the Dr.P.H. Qualified applicants with degrees from institutions outside the United States are also eligible for admission. All applicants must submit scores from the Graduate Record Exam (GRE) taken within five years of the date of application. Because admission to this program is highly selective, successful applicants have competitive academic credentials and substantial prior public health professional work experience related to the specialty field to which they are applying.

Program Policies and Procedures

For program policies and procedures, please refer to the Doctor of Public Health Handbook and other resources on the DrPh in the field of Environmental and Occupational Health website. (http://publichealth.gwu.edu/programs/environmental-occupational-health-drph)

REQUIREMENTS

The following requirements must be fulfilled: 48 credits, including 20 credits in required courses, 6 credits in field-specific courses, 7-10 credits in elective courses, 4 credits in professional leadership courses, 8-10 credits in dissertation preparation and dissertation, and successful completion of a comprehensive examination.

Program requirements

20 credits of required foundational and research methods courses	
PUBH 8401	Found PH Leadership & Practice (Doctoral Seminar)
PUBH 8402	Ldrshp/PublicHlthPractc&Policy
PUBH 8416	Study Design & Evaluation Methods
PUBH 8417	Qual Research Methods&Analysis
PUBH 8418	Applied Statistical Analysis
PUBH 8419	Measrmnt/PublHlth&HlthSrvcsRes
PUBH 8420	Advanced Analysis & Dissemination
6 credits of required EOH specialty field courses	
PUBH 8411	AdvTpc-PrinEnvHlthRiskScience (Doctoral Seminar)
PUBH 8412	AdvTpc-Env&OccHlthRsrch&Practc

7-10 credits of elective specialty field courses (sample list)	
PUBH 6121	EnvrnmntlEpidemiology
PUBH 6122	Envir Policy, Politics, Progs
PUBH 6123	Toxicology: Applic for PH Pol
PUBH 6124	Problem Solving in EOH
PUBH 6125	Intro-Children's Health & Env
PUBH 6126	Assessment&Control/Env Hazards
PUBH 6127	Germs: An Introduction to Environmental Health Microbiology
PUBH 6128	Global Envrnmtl & Occptnl Hlth
PUBH 6130	Sustainable Energy & Environmt
PUBH 6199	Topics in EOH (Microbial Risk Assessment)
PUBH 6199	Topics in EOH (Pesticide Exposures and Cancer)
PUBH 6199	Topics in EOH (Food and the Global Environment)
4 credits of professional leadership courses	
PUBH 8415	Instructional Leadership
PUBH 8413	Research Leadership
Comprehensive examination	
8-11 credits of dissertation preparation and dissertation	
PUBH 8422	AdvHlthCare&PublcHlthRsrchDes
Advanced Health Care and Public Health Research Design Prerequisites: Pass Comprehensive Exam, Approval of Program Director, & one page abstract	
PUBH 8423	Dissertation Research
Dissertation Research – DrPH Degree Dissertation Research	

Graduation Requirements

1. Graduate credit requirement: 48 graduate credits are required.
2. Course requirements: successful completion of the foundational and research methods courses. The program-specific specialty field courses and the professional leadership credits are required.
3. Comprehensive exam: Once the course of study is completed, students are required to pass the comprehensive exam to be officially admitted to the candidacy phase.
4. Dissertation: PUBH 8422 Advanced Health Care and Public Health Research Design plus 6-9 dissertation research credits are required. Once the proposal has been successfully defended and dissertation research credits have been met, the oral defense may be scheduled.
5. Grade point requirement: A 3.0 (B average) overall grade-point average is required.
6. Time limit requirement: The degree must be completed within seven (7) years.
7. No transfer credits are accepted.

EPIDEMIOLOGY AND BIOSTATISTICS

The Department of Epidemiology and Biostatistics integrates diverse educational programs with a rapidly growing research portfolio. Graduate students have the opportunity to study and participate in faculty research projects in a variety of academic disciplines, including infectious disease, cancer, nutritional and disaster epidemiology, applied biostatistical methods, and public health laboratory science. In their practicum, students work closely with scientists at local health departments, the NIH and other federal agencies, academic institutions, and international health organizations. By exploring the core quantitative sciences of public health and taking advantage of opportunities to learn by doing, students are prepared to become the next generation of public health leaders and practitioners.

GRADUATE

Master's programs

- Master of Public Health in the field of biostatistics (p. 925)
- Master of Public Health in the field of epidemiology (p. 927)
- Master of Public Health in the field of global health epidemiology and disease control (p. 958)
- Master of Science in biostatistics (p. 930) (Jointly administered by the Department of Statistics in CCAS and the Department of Epidemiology and Biostatistics in SPH)
- Master of Science in epidemiology (p. 931)
- Master of Science in public health microbiology and emerging infectious diseases (p. 933)

Doctoral programs

- Doctor of Philosophy in biostatistics (p. 935) (Jointly administered by the Department of Statistics in CCAS and the Department of Epidemiology and Biostatistics in SPH)
- Doctor of Philosophy in epidemiology (p. 937)

FACULTY

Professors A. E. Greenberg (*Chair*), L. Guay (*Research*), M. Foulkes (*Research*), K. Hirst (*Research*), D. A. Hoffman (*Emeritus)*, J. Jordan, J. M. Lachin, Z. Li, R. K. Riegelman, S. J. Simmens *(Research)*, E. A. Thom *(Research),* D.A. Verme,

Associate Professors J.M. Bethony, A. D. Castel, S. D. Cleary, K. L. Drews (*Research*), H. J. Hoffman, K. Jablonski *(Research),* I. Kuo (*Research*), Y. Ma, M. Magnus, M.M. Rice *(Research),* K.Z. Robien, N. Younes, H. A. Young

Assistant Professors I. Bebu (*Research*), B. Braffett (*Research*), R. G. Clifton (*Research*), A. Elmi, M. Ghosh, J. Peterson (*Research*), M. Power, M. Temprosa *(Research)*

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PUBH 3131. Epidemiology: Measuring Health and Disease. 3 Credits.
Principles of epidemiology applied to disease surveillance, control of infectious and chronic diseases, and health services/ health policy. Understanding the basic research designs and their relationship to establishing cause and effect and effectiveness of interventions to prevent and cure disease. Prerequisite: PUBH 1101, STAT 1127 .

PUBH 6002. Biostatistical Applications for Public Health. 3 Credits.
Application of biostatistical principles to critical analysis of retrospective studies, prospective studies, and controlled clinical trials, as well as studies in the health services literature. Selection, basic calculations, and interpretation of statistical methods for detection of significant associations and differences.

PUBH 6003. Principles and Practices of Epidemiology. 3 Credits.
General principles, methods, and applications of epidemiology. Outbreak investigations, measures of disease frequency, standardization of disease rates, study design, measures of association, hypothesis testing, bias, effect modification, causal inference, disease screening, and surveillance. Case studies apply these concepts to a variety of infectious, acute, and chronic health conditions affecting the population.

PUBH 6242. ClinicalEpid&Decision Analysis. 2,3 Credits.
Quantitative and qualitative approaches to decision making, including risk- benefit analysis, decision analysis, and cost-effective analysis. Applications to technology assessment; development of clinical guidelines. Note: MPH Health Policy, MS Health Policy and Doctoral Students concurrently take PubH 6299 topics course by the same name for 1 credit, thereby enrolling for three total credits (PubH 6242=2 credits plus PubH 6299.xx, same name =1 credit). Prerequisites: PUBH 6002, PUBH 6003.

PUBH 6243. Topics:ClinicalEpi&DecAnalysis. 1 Credit.
This class takes an evidence-based problem solving approach for Masters level students interested in the health policy focus of clinical epidemiology utilizing methods taught in PubH 6242. Prerequ: PubH 6003. Corequis: PubH 6242.

PUBH 6244. Cancer Epidemiology. 2 Credits.
Epidemiology of specific cancers, with an emphasis on molecular and genetic epidemiology. Current research in the field. Prerequisites: PubH 203.

PUBH 6245. InfectiousDisease Epidemiology. 2 Credits.
The role and conduct of laboratory and field investigations in the epidemiology of infectious diseases. Prerequisite: PubH 6003.

PUBH 6247. Design of Health Studies. 3 Credits.
Epidemiologic concepts and methods applied to specific research questions especially new types of public health problems. Recognition and development of the most appropriate study design for a specific health issue. Ecologic, cross-sectional, case-control, cohort studies and clinical trials. Sampling, measurement, questionnaire design, causality and causal criteria. Development of a research proposal. Co-requisite: PubH 6002. Prerequisite: PubH 6003.

PUBH 6249. StatPackages/DataMgt&DataAnlys. 3 Credits.
This course familiarizes the student with one of the most widely used database management systems and statistical analysis software packages, the SAS System, operating in a Windows environment. Throughout the course, several database management system techniques and data analytical strategies for the appropriate analysis of datasets obtained from a variety of studies will be presented. Statistical techniques covered include linear regression, analysis of variance, logistic regression, and survival analysis. Prerequisite: PubH 6002.

PUBH 6250. Epidemiology of HIV/AIDS. 2 Credits.
Methodological issues central to HIV/AIDS research. Biases peculiar to HIV/AIDS epidemiologic studies (both observational and experimental designs). The natural history of HIV, diagnosis, surveillance, vulnerable subpopulations, behavioral facets, and evaluation of epidemiologic studies with an emphasis on methodological considerations. Prerequisite: PubH 6003, Recommended PubH 6002.

PUBH 6252. Advanced Epidemiology Methods. 3 Credits.
Advanced quantitative epidemiologic methods, with a focus on basic data analytic techniques, identifying and evaluating bias and adjusting for confounding. Dose-response, trend analysis, and multiple linear and logistic regression models. Prerequisites: PubH 6002, 6003, 6247. Co- or prerequisite PubH 6249.

PUBH 6253. Issues in HIV Care & Treatment. 1 Credit.
This course will provide an overview and in depth consideration of some of the major issues in treatment of HIV disease, including the assessment of efficacy and effectiveness, drug resistance, monitoring of drug toxicity, special populations, the interrelationship between treatment and prevention, and quality of care. The course has been designed with an interdisciplinary audience in mind. In discussions and assignments, students will be able to emphasize their own area of interest and/or expertise (e.g. epidemiology, policy, etc).

PUBH 6255. Org Responses to HIV/Epidemic. 2 Credits.
This seminar focuses on the rapidly evolving responses of local, national and global governmental and non-governmental organizations to the HIV/AIDS epidemic. Inspirational leaders of selected HIV/AIDS organizations are invited to describe how their organizations contribute to fighting the epidemic; the leadership and management skills that they use in their daily work; and their strategic decision-making processes. Basic principles of epidemiology, leadership and organizational strategy and structure are addressed through didactic presentations and interactive faculty-student dialogue. Lessons learned through the lens of HIV/AIDS organizations are broadly applicable to other public health problems. Students will learn about the strengths and challenges of different types of public health organizations as they make career decisions about their own transition to the public health work force. Prerequisite: PubH 6003, HIV/AIDS experience, or permission of Instructor.

PUBH 6258. Adv Topics/Biostat Consulting. 1 Credit.
Principles and practice of biostatistical consulting in public health and medical research environments.

PUBH 6259. Epid Surveillance/PublicHealth. 2 Credits.
Focus on foundations of public health surveillance systems for communicable as well as chronic diseases. Outbreak investigation methods will be included, as well as surveillance data sources, data management, data analysis, ethical issues, surveillance system evaluation, and use of information for prevention. Surveillance systems for reportable diseases, nosocomial infections, bioterrorism events, cancer, environmental disease, vaccine-related adverse events, bovine spongiform encephalopathy, and military personnel will be discussed. Prerequisites: PubH 6003.

PUBH 6260. Adv DataAnalysis-Public Health. 3 Credits.
Advanced data analysis using the SAS System to expand on the analytic techniques gained in PubH 6002 and PubH 6249 and to provide students with the applied statistical skills required to analyze various types of public health datasets. Prerequisites: PubH 6002, 6249.

PUBH 6261. Epi-Bio Skills Bldg Seminar. 1 Credit.
Assists students in developing the skills needed to complete degree requirements and to provide them with practical applied public health training. By the end of the course, students will be able to describe essential skills needed for preparation, implementation, presentation and communication of public health data.

PUBH 6262. Intro-Geog Information Systems. 1 Credit.
Geographic information systems (GIS) for mapping and display of health data. The course makes use of ArcGIS 8.3. The use of spatial statistics for the detection of clusters and patterns in the spread of diseases. Working with geodatabases, shape files, layers, query information from attribute tables, geocode addresses and customizing GIS applications.

PUBH 6263. Advanced GIS. 1 Credit.
Provides mid to advanced level training in GIS for display and analysis of health data. Use software ArcGIS 9.3 and additional extensions such as Spatial Analyst and Geostatistical Analyst. Also uses GeoDa software. Emphasizes benefits of using GIS to do more than simply manage and map data. GIS supports a range of spatial analysis functions that enable researchers to extract additional meaning from manipulating geographic data. Learn to work with raster datasets and geodatabases to build spatial models for analyzing health data and evaluating spatial patterns of health events based on notion of distance. Prerequisite: PubH 6262.

PUBH 6264. Quantitative Methods. 3 Credits.
Introduces basic concepts in mathematical statistics. Topics will include probabilities (unconditional and conditional), density and distribution functions of continuous and discrete random variables, including expected values. Specific distribution functions discussed will be Binomial, Poisson, Hypergeometric, and Gaussian distributions. Additional topics include bivariable distributions, variance-covariance matrix, limiting theory, asymptotic results, and maximum likelihood estimation. Prerequisites: Math 1231, 1232 and PubH 6002, 6249.

PUBH 6265. Design of Medical Studies. 3 Credits.
Design of medical investigations, including the randomized clinical trial, observational cohort study, and the retrospective case-control study. Specific methods regarding sample size, power and precision and statistical procedures for randomization and sa.

PUBH 6266. Biostatistical Methods. 3 Credits.
Biostatistical methods for asymptotically efficient tests and estimates of relative risks and odds ratios from prospective and retrospective matched and unmatched studies. Fixed and random effects models. Logistic regression, conditional logistic regression. Poisson regression. Maximum likelihood and efficient scores. Prerequisites: STAT 6201-6202, PubH 6264.

PUBH 6267. Time Series:Applications in PH. 2 Credits.
Introduce basic concepts for the identification and modeling of time series in the time domain approach. Learn a new set of terminology standards and a different way to analyze these type of data and to forecast future values of a time series and its accuracy. Software used is SAS/ETS and 3 procedures: ARIMA, AUTOREG, FORECAST. New mathematical notation will be used. Prerequisite: PubH 6249.

PUBH 6268. Advanced SAS. 1 Credit.
Intensive in advanced programming using SAS. Expand technical skills to provide advanced SAS tools for data management and graphics. Topics to include Interactive Matrix Language (IML), SAS Macro facility language, and drill-down graphs using SAS/GRAPH. Prerequisites: PubH 6002, 6249 or Instructor's permission.

PUBH 6269. Reproductive Epidemiology. 1 Credit.
Current research, controversial issues and methodological problems in epidemiology of reproductive and perinatal health. Present reproductive health issues such as conception and infertility; perinatal issues such as complications of pregnancy, infections in pregnancy, adverse pregnancy outcomes, and birth defects. Prerequisite: PubH 6003.

PUBH 6270. HIV/AIDS Surveillance. 1 Credit.
Overview of surveillance methods used domestically and internationally to monitor HIV/AIDS epidemic. Surveillance systems including sentinel, population based, behavioral, and incidence surveillance will be presented and discussed. Strengths and weaknesses of these various systems will be discussed in addition to how data from these systems impact and inform HIV/AIDS related policies and programs. Prerequisite: PubH 6003.

PUBH 6271. Disaster Epidemiology. 1 Credit.
Introduction to disaster epidemiology that elucidates the important role epidemiologists play in assessing the health and psychological effects of natural and man-made disasters and in identifying factors that contribute to these effects. Focus will be on applications of epidemiologic methods to the study of public health consequences of disasters, case studies from actual disasters used to illustrate various roles of epidemiologist in responding to these events and lessons learned. Highlight key skills that epidemiologists need to be part of a response and recovery . Identify methodological issues for future work. Prerequisites: PubH 6002, 6003.

PUBH 6272. Infectious Agents- Cancer. 1 Credit.
Describes the role of infectious agents in the etiology of human cancer. Emphasis on differences between specific oncogenic viruses. Other oncogenic agents, bacterial and parasitic, will also be discussed. Discuss laboratory approaches to the documentation of their pathogenicity, how behavior affects mode of transmission, and which types of data provide strongest support for documenting oncogenic potential for humans. Prerequisite: PubH 6003.

PUBH 6273. Ethnographic Methods. 1 Credit.
Use ethnographic field methods in conjunction with epidemiological research. Introduction to specific methods used to examine health phenomena and determinants of disease. Learn specific applied skills that can be modified with socio-cultural modifications to evaluate urban sites and other settings. Basic skills in application of ethnographic methods, including recursive observations, participant observations, and variety of approaches to interviewing such as in-depth, structured and non-structured as well as conversational interviewing. Discuss use of multiple approaches in conjunction with ethnography, including focus groups, archival, document, statistical and secondary data analysis, and survey research methods. Course emphasizes use of ethnographic research methods in community-based health settings and evaluates issues in cultural competency and how to garner stakeholder support to conduct epidemiologic studies. Prerequisite: PubH 6003.

PUBH 6274. Emerging ID for PH Pro's. 2 Credits.
Focus on epidemiology of emerging infectious diseases of public health importance, including factors leading to their development, management of emerging infectious diseases from a public health and laboratory standpoint, including biosafety, and strategies for emergency preparedness from a national and international perspective. Course emphasizes the context of emerging infectious diseases and strategic approaches to their containment. Prerequisites: PubH 6003 or Micr 6292 or Instructor permission.

PUBH 6275. Essential PH Lab Skills. 2 Credits.
This course will provide public health students with practical laboratory experience Prerequ: Micr 6239 or Micr 6212 or permission of instructor.

PUBH 6276. Health Microbiology. 3 Credits.
Gain in-depth understanding of important non-viral pathogens pertinent to PH Microbiology. Learn how to isolate & identify pathogens using critical thinking & problem solving skills.

PUBH 6277. Public Health Genomics. 2 Credits.
Learn about molecular technology and how it is impacting public health practice & discourse in the post genomic era. Explore ways in which genomics is being used to solve or help alleviate PH problems through case-focused discussions. Prerequisite: genetics or molecular biology within 6 years or permission of course instructor.

PUBH 6278. Public Health Virology. 3 Credits.
In-depth understanding of viral pathogenesis by focusing on current research, controversial issues and PH relevance. Survey of family of viruses most relevant to today's public health efforts, concentrating on virus-host interactions & therapeutic strategies.

PUBH 6280. MEID Final Project. 2 Credits.
Focus on the synthesis and summary of data acquired through epidemiologic and/or public health laboratory research. Prerequisites: PubH 6002, 6003, 6292, 6245; Biosafety training, CITI training, HIPAA training, permission of instructor.

PUBH 6299. Topics in Epi/Bio. 1-3 Credits.
In-depth examination of a particular facet of public health. Topics and prerequisites vary.

MASTER OF PUBLIC HEALTH IN THE FIELD OF BIOSTATISTICS

Program Director H. Hoffman

Mission

The mission of the master of public health in the field of biostatistics degree program is to educate students in the methodological and quantitative skills needed to apply statistical methods to the biological, biomedical, and health services sciences. In addition to enhancing students' capacity to think critically and creatively, the program deepens their commitment to improving the public's health and to engaging in and promoting public service—qualities essential to biostatisticians and public health practitioners.

Goals

The goals of the biostatistics program are to ensure that graduates:

- Understand and adhere to high scientific standards for research.
- Understand how to apply statistical methods to biological/biomedical sciences and health services.
- Understand and follow guidelines for ethical treatment of research participants.
- Communicate research findings to a lay audience.
- Respect cultural diversity throughout all of the above.

COMPETENCIES

The specialization in biostatistics focuses on developing students' skills in the statistical analysis and interpretation of health research data. The following competencies were developed in concert with professors of biostatistics courses (at GW as well as from other CEPH-accredited MPH programs), biostatistics textbooks, conversations with prospective employers likely to hire MPH-biostatistics graduates, and with experience teaching biostatistics courses to MPH students. ASPH Education Committee competencies were also consulted.

Upon completion of the Master of Public Health in the field of biostatistics, students will demonstrate functional competence to:

- Manipulate various databases from large scale epidemiological studies and clinical trials studies using statistical software, e.g. SAS®.

REQUIREMENTS

Program Prerequisites

All applicants must have completed two semesters of college-level calculus through calculus II with a minimum grade of *B* in order to be considered for admission.

M.P.H. Requirements

The following requirements must be fulfilled: 45 credits, including 15 credits in core courses, 20 credits in program-specific courses, 6 credits in electives, 2 credits in a practicum,* and 2 credits in a culminating experience.

Program Requirements

Code	Title	Credits
Required core courses		
PUBH 6001	Biological Concepts in Public Health	
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6004	Environmental and Occupational Health in a Sustainable World	
PUBH 6006	Management and Policy Approaches to Public Health	
PUBH 6007	Social and Behavioral Approaches to Public Health	
Required program-specific courses		
PUBH 6247	Design of Health Studies	
PUBH 6249	StatPackages/DataMgt&DataAnlys	
PUBH 6252	Advanced Epidemiology Methods	
PUBH 6258	Adv Topics/Biostat Consulting	
PUBH 6260	Adv DataAnalysis-Public Health	
PUBH 6261	Epi-Bio Skills Bldg Seminar	
PUBH 6264	Quantitative Methods	
PUBH 6266	Biostatistical Methods	
Electives		
Select epi-biostatics courses with advisor's approval		
Practicum and culminating experience		
PUBH 6014	Practicum	
PUBH 6015	Culminating Experience	

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

*Students should begin planning their practicum during year 1.

MASTER OF PUBLIC HEALTH IN THE FIELD OF EPIDEMIOLOGY

Program Co-Directors M. Magnus, H. Young

Mission

The mission of the master of public health in the field of epidemiology degree program is to help students develop the necessary methodological and quantitative skills to work successfully in the field. While nurturing students' capacity to think critically and creatively, students are encouraged to deepen their commitment to improving the public's health and to engaging in and promoting public service qualities essential for future epidemiologists and public health practitioners.

Goals

The goals of the program are to ensure that graduates:

- Understand and adhere to high scientific standards for research;
- Understand and follow guidelines for ethical treatment of research participants;
- Can communicate research findings to a lay audience; and
- Respect cultural diversity throughout all of the above.

COMPETENCIES

The epidemiology specialization prepares students for epidemiological research and evaluation in academic, governmental, private-sector, and community health care sites. The curriculum prepares students to design and conduct studies, manage health data, and make leadership decisions in public health and clinical epidemiology. The following competencies were developed in concert with professors of epidemiology courses (at GW as well as other CEPH-accredited MPH programs), epidemiology textbooks, conversations

with prospective employers likely to hire MPH-epidemiology graduates, and experience teaching epidemiology courses to MPH students. ASPH Education Committee competencies were also consulted.

Upon completion of the MPH in Epidemiology, students will demonstrate functional competence to:

- Apply epidemiological and biomedical concepts in identifying and describing the determinants and the distribution of disease in human populations.

  Relevant Courses

PUBH 6014	Practicum
PUBH 6015	Culminating Experience
PUBH 6247	Design of Health Studies
PUBH 6252	Advanced Epidemiology Methods

- Identify and assess patterns of emerging diseases to postulate hypotheses and to identify appropriate strategies in order to evaluate the impact of health problems.

  Relevant Courses

PUBH 6014	Practicum
PUBH 6015	Culminating Experience
PUBH 6247	Design of Health Studies
PUBH 6252	Advanced Epidemiology Methods

- Enumerate and apply underlying principles and methods to design, plan, and conduct epidemiologic studies including observational and experimental designs, screening programs, public health surveillance, and other epidemiologic designs.

  Relevant Courses

PUBH 6014	Practicum
PUBH 6015	Culminating Experience
PUBH 6247	Design of Health Studies
PUBH 6252	Advanced Epidemiology Methods

- Identify the appropriate data analysis methods, conduct data analysis using a computerized software program, and interpret the results from epidemiological studies.

  Relevant Courses

PUBH 6014	Practicum
PUBH 6015	Culminating Experience
PUBH 6249	StatPackages/DataMgt&DataAnlys
PUBH 6252	Advanced Epidemiology Methods
PUBH 6260	Adv DataAnalysis-Public Health
PUBH 6261	Epi-Bio Skills Bldg Seminar

- Demonstrate proficiency in constructing and managing databases from epidemiological studies using statistical software, e.g. The SAS® System.

  Relevant Courses

PUBH 6014	Practicum
PUBH 6015	Culminating Experience
PUBH 6249	StatPackages/DataMgt&DataAnlys
PUBH 6252	Advanced Epidemiology Methods
PUBH 6260	Adv DataAnalysis-Public Health

- Synthesize data and relevant literature to interpret findings in a causal framework, write manuscripts, and make oral presentations.

  Relevant Courses

PUBH 6014	Practicum
PUBH 6015	Culminating Experience
PUBH 6247	Design of Health Studies
PUBH 6249	StatPackages/DataMgt&DataAnlys
PUBH 6252	Advanced Epidemiology Methods
PUBH 6260	Adv DataAnalysis-Public Health
PUBH 6261	Epi-Bio Skills Bldg Seminar

- Work in a multidisciplinary research team and recognize and appropriately respond to ethical and legal issues that arise in research.

  Relevant Courses

PUBH 6014	Practicum
PUBH 6015	Culminating Experience
PUBH 6247	Design of Health Studies
PUBH 6249	StatPackages/DataMgt&DataAnlys
PUBH 6252	Advanced Epidemiology Methods
PUBH 6260	Adv DataAnalysis-Public Health
PUBH 6261	Epi-Bio Skills Bldg Seminar

- Define and critically assess issues in at least two of the following specialty areas in epidemiology:
  - Clinical epidemiology such as decision analysis, cost-effectiveness to clinical and public health problems.
  - Major topics in infectious disease epidemiology, including emerging infectious diseases, drug resistant pathogens, and perinatal and neonatal infections.
  - Methods and issues of cancer epidemiology including descriptive and analytical studies with emphasis on genetic and molecular epidemiology.
  - Methods and issues of chronic disease
  - Methods and issues of surveillance systems in public health

Relevant Courses

PUBH 6014	Practicum
PUBH 6015	Culminating Experience
PUBH 6247	Design of Health Studies
PUBH 6252	Advanced Epidemiology Methods

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 15 credits in core courses, 21 credits in program-specific courses, 5 credits in elective courses, 2 credits in a practicum, and 2 credits in a culminating experience.

Code	Title	Credits
Required core		
PUBH 6001	Biological Concepts in Public Health	
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6004	Environmental and Occupational Health in a Sustainable World	
PUBH 6006	Management and Policy Approaches to Public Health	
PUBH 6007	Social and Behavioral Approaches to Public Health	
Required program		
PUBH 6247	Design of Health Studies	
PUBH 6249	StatPackages/DataMgt&DataAnlys	
PUBH 6252	Advanced Epidemiology Methods	
PUBH 6260	Adv DataAnalysis-Public Health	
PUBH 6261	Epi-Bio Skills Bldg Seminar	
Epidemiology content foundation		
At least two of the following:		
PUBH 6242	ClinicalEpid&Decision Analysis	
PUBH 6244	Cancer Epidemiology	
PUBH 6245	InfectiousDisease Epidemiology	
PUBH 6250	Epidemiology of HIV/AIDS	
PUBH 6259	Epid Surveillance/PublicHealth	
Epidemiology-biostatistics electives		
4 elective credits from Department of Epidemiology-Biostatistics course offerings. A sample list of courses that would fulfill this requirement is below; other courses may be announced.		
PUBH 6236	Systematic Review of Public Health Literature	
PUBH 6237	Chronic Disease Epidemiology	
PUBH 6238	Molecular Epidemiology	
PUBH 6240	Pediatric HIV/AIDS	
PUBH 6241	Nutritional Epidemiology	
PUBH 6243	Topics:ClinicalEpi&DecAnalysis	
PUBH 6253	Issues in HIV Care & Treatment	
PUBH 6255	Org Responses to HIV/Epidemic	
PUBH 6258	Adv Topics/Biostat Consulting (Instructor's Approval Required)	
PUBH 6262	Intro-Geog Information Systems	
PUBH 6263	Advanced GIS	
PUBH 6267	Time Series:Applications in PH	
PUBH 6268	Advanced SAS	
PUBH 6269	Reproductive Epidemiology	
PUBH 6270	HIV/AIDS Surveillance	
PUBH 6271	Disaster Epidemiology	
PUBH 6272	Infectious Agents- Cancer	
PUBH 6273	Ethnographic Methods	

PUBH 6274	Emerging ID for PH Pro's
PUBH 6281	Analysis of Complex Surveys Using SAS and Stata
PUBH 6484	Prevention and Control of Vector Borne Diseases
PUBH 6485	Prevention and Control of Water and Sanitation Diseases
PUBH 6299	Topics in Epi/Bio (Behavioral Epidemiology)
PUBH 6299	Topics in Epi/Bio (Pesticide Exposures and Cancer)
Electives	
Any SPH graduate course(s).	
Practicum and culminating experience	
PUBH 6014	Practicum
PUBH 6015	Culminating Experience

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

MASTER OF SCIENCE IN THE FIELD OF BIOSTATISTICS

Program Director and Academic Advisor A. F. Elmi

The master of science (MS) degree program in biostatistics is jointly administered by the Department of Statistics in the Columbian College of Arts and Sciences (CCAS) and the Department of Epidemiology and Biostatistics in the Milken Institute School of Public Health (SPH) and its associated research facility, The Biostatistics Center. This degree program is accredited by the Middle States Commission on Higher Education through the CCAS and by the Council on Education for Public Health through the SPH Regulations, and requirements for this graduate degree have been designed to be compatible with policies and scholarship requirements of both CCAS and SPH. The degree is conferred by Columbian College.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://publichealth.gwu.edu/programs/biostatistics-ms) for additional information.

COMPETENCIES

At the completion of the MS program in Biostatistics students will be able to:

- Understand and the theory and principles behind statistical methods most commonly used in biomedical research (contingency tables, survival analysis, mixed models, and missing data).
- Understand and apply the underlying principles and methods to design, plan, and conduct biomedical studies.
- Provide biostatistical advice as a member of a team engaged in a biomedical research project. Includes manipulation and analysis of data.

REQUIREMENTS

Admission Considerations

The courses listed below (or course equivalents) are prerequisites for admission consideration and must appear on the student's transcript. Students may apply to the program only after they have fulfilled this requirement:

Code	Title	Credits
MATH 1231	Single-Variable Calculus I	
MATH 1232	Single-Variable Calculus II	
STAT 2118	Regression Analysis	

Applicants lacking the courses listed below (or course equivalents) will be considered for admission; however, if admitted, the student is required to complete these courses within two semesters of matriculation in the program. Credit earned in these courses does not count toward the 33 credits required for the degree and grades earned are not reflected in the overall grade point average.

Code	Title	Credits
MATH 2184	Linear Algebra I	
MATH 2233	Multivariable Calculus	
One of the following:		
STAT 1129	Introduction to Computing	

STAT 2183	Intermediate Stat Lab/Packages
PUBH 6249	StatPackages/DataMgt&DataAnlys

STAT 8226	Advanced Biostatistical Methods	
STAT 8265	Multivariate Analysis	
STAT 8273	Stochastic Processes I	
STAT 8281	Advanced Time Series Analysis	
STAT 8288	Modern Theory/Sample Surveys	
Consulting		
PUBH 6258	Adv Topics/Biostat Consulting	
PUBH 6283	Biostatistics Consulting Practicum	

The Master's Comprehensive Examination

The master's comprehensive examination is a written exam in the field of biostatistics and is based on the content covered in PUBH 6266 Biostatistical Methods. It is administered by the faculty of the Department of Epidemiology and Biostatistics in the Milken Institute School of Public Health.

MASTER OF SCIENCE IN THE FIELD OF EPIDEMIOLOGY

Program Director S.D. Cleary

The Department of Epidemiology and Biostatistics offers the master of science (M.S.) in the field of epidemiology degree program. The goals of the program are to prepare students for careers in industry or academia and for continued study in a doctoral program. The program includes course work that focuses on theoretical and applied epidemiological and statistical methods. Comprehensive examinations are required.

If desired, a student may apply for admission to the doctorate of philosophy (Ph.D). in the field of epidemiology degree program (http://bulletin.gwu.edu/public-health/epidemiology-biostatistics/phd-epidemiology) prior to completing the M.S. degree, in which case a maximum of 24 credits from the M.S. degree may be applied to the Ph.D. course work requirements. In this instance, the student will be required to take a minimum of 27 additional credits of course work. The distribution of these courses between epidemiology and statistics depends on the nature of the master's degree and whether the transferred

credits will be used to defray epidemiology and statistics course work.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://publichealth.gwu.edu/programs/epidemiology-ms) for additional program information.

COMPETENCIES

At the completion of the MS program in Epidemiology students will be able to:

- Demonstrate proficiency in basic epidemiology concepts, e.g., formulate hypotheses and research aims, select appropriate study design, identify risk and/or protective factors that contribute to disease outcomes, develop analytic plans, and identify bias.
- Demonstrate competence using standard statistical software packages to manage and analyze primary data or conduct secondary data analyses to address research questions
- Demonstrate proficiency in data analysis and interpretation of results, including discussion of threats to internal validity, and compose a formal presentation or report
- Describe and apply methods to conduct sound ethical research

REQUIREMENTS

Preparatory Requirements

The courses listed below (or equivalents) are prerequisites for admission consideration, and must appear on the student's transcript.

Code	Title	Credits
BISC 1111	Introductory Biology: Cells and Molecules	
BISC 1112	Introductory Biology: The Biology of Organisms	
MATH 1231	Single-Variable Calculus I	
MATH 1232	Single-Variable Calculus II	

Additional Course Requirements

Applicants lacking the courses listed below (or equivalents to these GW courses) will be considered for admission, but will be eligible for conditional admission only with the expectation that these courses will be completed satisfactorily within two semesters following matriculation in the program.

Code	Title	Credits
STAT 2183	Intermediate Stat Lab/Packages	
or PUBH 6249	StatPackages/DataMgt&DataAnlys	

Program Requirements

The following requirements must be fulfilled: 33 credits, including 17 credits in core courses and 13 credits in elective courses, and 3 credits in consulting and thesis.

Code	Title	Credits
Required core		
Public health core		
PUBH 6003	Principles and Practices of Epidemiology (basis for MS general comprehensive)	
PUBH 6247	Design of Health Studies (basis for MS general comprehensive)	
PUBH 6252	Advanced Epidemiology Methods (basis for MS general comprehensive)	
PUBH 6299	Topics in Epi/Bio (credits vary per course- may take 1 or 2 courses)	
Statistics core		
One of the following:		
STAT 4157 & STAT 4158	Introduction to Mathematical Statistics I and Introduction to Mathematical Statistics II	
STAT 6201 & STAT 6202	Mathematical Statistics I and Mathematical Statistics II (students interested in applying to the PhD program in epidemiology may register in STAT 6201 & STAT 6202 with advisor's approval)	
Electives		
13 credits from the following:		
Approved public health elective courses:		
PUBH 6001	Biological Concepts in Public Health	
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6004	Environmental and Occupational Health in a Sustainable World	
PUBH 6007	Social and Behavioral Approaches to Public Health	

PUBH 6121	Environmental and Occupational Epidemiology
PUBH 6123	Toxicology: Applications for Public Health Policy
PUBH 6124	Problem Solving in EOH
PUBH 6242	ClinicalEpid&Decision Analysis
PUBH 6243	Topics:ClinicalEpi&DecAnalysis
PUBH 6244	Cancer Epidemiology
PUBH 6245	InfectiousDisease Epidemiology
PUBH 6250	Epidemiology of HIV/AIDS
PUBH 6260	Adv DataAnalysis-Public Health
PUBH 6262	Intro-Geog Information Systems
PUBH 6283	Biostatistics Consulting Practicum
PUBH 6299	Topics in Epi/Bio
Approved statistics elective courses:	
STAT 2118	Regression Analysis
STAT 4181	Applied Time Series Analysis
STAT 3187	Introduction to Sampling
Consulting and thesis	
PUBH 6258	Adv Topics/Biostat Consulting
PUBH 6999	Master of Science in Epidemiology Thesis

Graduation Requirements

1. Graduate Credit Requirement: 33 graduate credits are required
2. Comprehensive Exam**:** A written comprehensive exam will be administered based on the course content of PUBH 6003 Prin & Practice/ Epidemiology, PUBH 6247 Design of Health Studies, and PUBH 6252 Advanced Epidemiology Methods. The exam is administered upon completion of all courses.
3. Grade Point Requirements**:** A 3.0 (B average) overall grade point average is required.
4. Time Limit Requirement**:** The MS must be completed within 4 years

MASTER OF SCIENCE IN THE FIELD OF PUBLIC HEALTH MICROBIOLOGY AND EMERGING INFECTIOUS DISEASES

Program Co-Directors A. Castel, J. Jordan

Mission

The mission of the master of science (M.S.) in the field of public health microbiology and emerging infectious diseases degree program is to provide training to a new generation of public health professionals to expand knowledge and expertise in the areas of disease mechanisms, with an emphasis on microbial pathogens, the use and application of modern biotechnologies, and in epidemiologic skills relevant to the prevention and control of problems in the community arising from infectious diseases.

Graduates of the M.S. program will have an in-depth understanding of the major laboratory, clinical, and public health aspects of humankind's microbial pathogens, and acquire epidemiologic skills relevant to the prevention and control of problems arising from infectious diseases and modern biotechnologies. Areas of emphasis will include: the design and analysis of epidemiologic data; emerging infections; tropical diseases; and applications of genomics, proteomics, and bioinformatics. M.S. graduates will be employed in academic and industrial research laboratories, international health agencies, NGOs, and private consulting groups. In addition, they may work in federal, state, and local public health agencies or state and local public health laboratories where their technical expertise and population-based perspective will be extremely useful. Students earning this degree will help meet a national demand that has reached critical proportions for a trained workforce in biodefense and emerging infections, and an international demand for training in diseases that affect the developing countries.

Goals

The goals of the M.S. program in the field of public health microbiology and emerging infectious diseases are to ensure that graduates:

- Understand the biological complexities of microbial pathogens and the diseases they cause;
- Recognize the major epidemiologic and clinical features of microbial disease;
- Understand how new biotechnologies (including genomics, proteomics, and bioinformatics) can be applied to the study and control of microbial pathogens;
- Develop an in-depth understanding of epidemiologic principles and practices;

- Apply the principles of epidemiology, microbiology, and public health practice toward the detection, surveillance, investigation, and control of microbial diseases.

REQUIREMENTS

Prerequisite requirements

- Bachelor's degree in the life sciences or at least 12 credits in the biological sciences other than botany
- Chemistry ≥ 3 credits
- 1 semester of calculus

Course requirements

Most students will be able to complete the 45 credit degree in approximately two to three years, depending on the course load taken each semester.

Foundation courses (10 credits)	
PUBH 6002	Biostatistical Applic for PubH
PUBH 6003	Prin & Practice/Epidemiology
PUBH 6004	Environmental and Occupational Health in a Sustainable World
PUBH 6275	Essential PH Lab Skills
Required program specific courses (22 credits)	
PUBH 6245	InfectiousDisease Epidemiology
PUBH 6247	Design of Health Studies
PUBH 6249	StatPackages/DataMgt&DataAnlys
PUBH 6259	Epid Surveillance/PublicHealth
PUBH 6262	Intro-Geog Information Systems
PUBH 6276	Health Microbiology
PUBH 6277	Public Health Genomics
PUBH 6278	Public Health Virology
MICR 8210	Infection and Immunity
Program-specific elective courses	
9 credits from the following:	
PUBH 6127	Germs: An Introduction to Environmental Health Microbiology
PUBH 6132	Design, Implementation and Evaluation of Global Water, Sanitation and Hygiene (WASH) Programs
PUBH 6239	Epidemiology of Foodborne and Waterborne Diseases
PUBH 6242	ClinicalEpid&Decision Analysis
PUBH 6243	Topics:ClinicalEpi&DecAnalysis
PUBH 6250	Epidemiology of HIV/AIDS
PUBH 6252	Advanced Epidemiology Methods
PUBH 6253	Issues in HIV Care & Treatment
PUBH 6261	Epi-Bio Skills Bldg Seminar
PUBH 6263	Advanced GIS
PUBH 6270	HIV/AIDS Surveillance
PUBH 6271	Disaster Epidemiology
PUBH 6299	Topics in Epi/Bio
PUBH 6358	Vaccine Policy
PUBH 6399	Topics in Health Policy (i.e.- Homeland Security and Public Health)
PUBH 6484	Prevention and Control of Vector Borne Diseases
PUBH 6487	Emerging Zoonotic Diseases & Global Food Production
MICR 6292	Tropical Infectious Diseases
Field/laboratory experience and final project (4 credits)	
PUBH 6016	Field/Laboratory Experience
PUBH 6280	MEID Final Project

Graduation requirements

1. Graduate Credit Requirement: 45 graduate credits required.
2. Course Requirements: Successful completion of the required courses.
3. Grade Point Requirements: An overall GPA of 3.0 (B average).
4. Time Limit Requirement: The degree must be completed within four years.
5. Transfer Credit Policy: Up to 12 credits that have not been applied to a previous graduate degree may qualify to be transferred to the MS program. Credits must have been earned from an accredited institution in the last 3 years with a grade point average of 3.0 or better.

Students will also be expected to participate in a poster presentation at GW Research Day.

DOCTOR OF PHILOSOPHY IN THE FIELD OF BIOSTATISTICS

Program Director and Academic Advisor E. Bura (CCAS)

The Ph.D. degree program in biostatistics provides doctoral training in the theory of probability, statistics focusing on biostatistical methodology. The 72-credit degree program is jointly administered by the Department of Statistics (https://statistics.columbian.gwu.edu) in the Columbian College of Arts and Sciences (CCAS) and the Department of Epidemiology and Biostatistics in the Milken Institute School of Public Health (http://publichealth.gwu.edu) (SPH) and its associated research facility, The Biostatistics Center. The program is accredited by the Middle States Commission on Higher Education through CCAS and by the Council on Education for Public Health through the Milken Institute SPH. Regulations and requirements for the graduate degree are compatible with policies and scholarship requirements of both CCAS and SPH. The degree is conferred by CCAS.

COMPETENCIES

At the completion of the PhD degree program in Biostatistics students will be able to:

- Conduct biostatistical methodology research.
- Have extensive knowledge of the theory and principles of probability, statistical inference, and biostatistical methods
- Apply and develop appropriate biostatistical methods for the design and analysis of biomedical studies.
- Provide biostatistical advice as a member of a team engaged in a biomedical research project
- Serve as biostatistics experts on collaborative teams of investigators

REQUIREMENTS

Undergraduate course requirements (or equivalents to these GW courses) for admission consideration:

MATH 1231	Single-Variable Calculus I
MATH 1232	Single-Variable Calculus II
STAT 2118	Regression Analysis
MATH 2233	Multivariable Calculus

Additional course requirements* (or equivalents to these GW courses):

MATH 2184	Linear Algebra I
One of the following:	
STAT 1129	Introduction to Computing
STAT 2183	Intermediate Stat Lab/Packages
PUBH 6249	StatPackages/DataMgt&DataAnlys

* Applicants lacking these courses (or equivalents to these GW courses) will be considered for admission, but, if admissible, will be admitted conditionally with the expectation that these courses will be satisfactorily completed within two semesters following matriculation in the program. These credits do not count as credit toward the 72-credit graduation requirement nor are grades earned in additional courses reflected in the overall grade-point average.

Ph.D. in the field of biostatistics degree requirements: 72 credits of coursework and research, with a minimum of 51 credits of courses and a minimum of 12 credits of dissertation research.

Required statistics and public health core courses:

Required statistics core courses: 27 credits	
STAT 6201	Mathematical Statistics I
STAT 6202	Mathematical Statistics II (* Comprehensive Exam)
STAT 6210	Data Analysis
STAT 6213	Intermediate Probability and Stochastic Processes (* Comprehensive Exam)
PUBH 8365	Design of Medical Studies
PUBH 8366	Biostatistical Methods (* Comprehensive Exam)
STAT 8226	Advanced Biostatistical Methods
STAT 6227	Survival Analysis
STAT 8263	Advanced Statistical Theory I
Required public health core courses: 12 credits	
PUBH 6001	BiologicalConcepts/PublicHlth
PUBH 6003	Prin & Practice/Epidemiology
PUBH 6121	Environmental and Occupational Epidemiology
One of the following:	
PUBH 6299	Topics in Epi/Bio
PUBH 6007	Social&BehaviorAppr-Pub.Hlth
or PUBH 6006	Mgt & Policy Approaches to PH
PUBH 6006	Mgt & Policy Approaches to PH

9 credits from the following approved elective courses:	
Approved statistics elective courses (at least 3 credits must be taken from among the first 3 courses noted below):	
STAT 6214	Applied Linear Models
STAT 6231	Contingency Table Analysis
STAT 8262	Nonparametric Inference
STAT 6207	Methods of Statistical Computing I
STAT 6208	Methods of Statistical Computing II
STAT 6215	Applied Multivariate Analysis I
STAT 6216	Applied Multivariate Analysis II
STAT 6217	Design of Experiments
STAT 6218	Linear Models
STAT 6223	Bayesian Statistics: Theory and Applications
STAT 6242	Regression Graphics/Nonparametric Regression
STAT 6287	Modern Theory of Sample Surveys
STAT 6289	Topics in Statistics
STAT 8257	Probability
STAT 8258	Distribution Theory
STAT 8263	Advanced Statistical Theory I
STAT 8264	Advanced Statistical Theory II
STAT 8265	Multivariate Analysis
STAT 8273	Stochastic Processes I
STAT 8274	Stochastic Processes II
STAT 8281	Advanced Time Series Analysis
STAT 8288	Modern Theory/Sample Surveys
BIOS 8998	Advanced Reading and Research (see advisor)
Approved public health elective courses:	
PUBH 6242	ClinicalEpid&Decision Analysis (recommended)
PUBH 6245	InfectiousDisease Epidemiology
PUBH 8419	Measurement in Public Health & Health Services

Consulting:

Note: May be waived by the Biostatistics Program Director, based on written documentation of prior equivalent coursework or relevant work experience. Waiver of the consulting course increases the total number of electives by the number of consulting credits waived.	
PUBH 6258	Adv Topics/Biostat Consulting
PUBH 6283	Biostatistics Consulting Practicum

Dissertation research:

12-24 credits of the following:	
BIOS 8999	Dissertation Research

General and final examinations

The General Examination is given in two parts:

- Part I is a written comprehensive examination based on the course content of STAT 6202 Mathematical Statistics II, STAT 6213 Intermediate Probability and Stochastic Processes (administered by faculty of the Department of Statistics), and PUBH 6266 Biostatistical Methods (administered by the faculty of the Department of Epidemiology and Biostatistics). Students are expected to take the comprehensive examination within 24 months from the date of enrollment in the program. In addition, students are required to make up any deficiencies prior to taking the examination, e.g., by enrolling in appropriate master's-level courses as needed. A student who fails to pass the comprehensive examination may, with the approval of the faculty, repeat the examination the following year. Failure on the second attempt will result in termination from the Ph.D. program.
- Part II, the research proposal, consists of an oral examination based on a written dissertation research proposal. As soon as feasible after successful completion of the comprehensive exam, students are encouraged to identify a dissertation advisor and a topic of research. The written dissertation proposal is then submitted to the student's Dissertation Research Committee, and the student will make an oral presentation of his or her proposal to the Committee. The Committee will determine the student's readiness to pursue and successfully complete the proposed research, in addition to the appropriateness of the specific problem for dissertation-level research.

Upon successful completion of the required coursework and both parts of the General Examination, the candidate will generally be recommended to the Associate Dean for Graduate Affairs of The Columbian College of Arts and Sciences (CCAS) for promotion to Ph.D. Candidacy: the dissertation research. A candidate must file an approved dissertation research plan with the CCAS before being admitted to Ph.D. Candidacy. Prior to completion of the

General Examination, a student may register for at most 6 credits of BIOS 8999 Dissertation Research.

Consult with the biostatistics program director or academic advisor for the dissertation guidelines.

Professional enhancement requirement: 8 hours

Professional enhancement activities supplement the academic curriculum and help prepare students to participate actively in the professional community. They enhance practical knowledge and awareness of public health issues – either in general or in a student's specific area of study.

Students can fulfill this requirement by attending workshops, seminars, or other relevant professional meetings, which are often held at SPH and in the metropolitan Washington, DC area. Examples of conference sponsors include the National Academy for State Health Policy, the Pan American Health Organization, the American Public Health Association, the American College of Healthcare Executives, the Area Health Education Center, the American College of Sports Medicine, and the National Athletic Trainer's Association. Opportunities for professional enhancement are regularly publicized via the SPH Listserv and through the department or the biostatistics academic advisor.

Students must submit documentation of professional enhancement activities to the biostatistics academic advisor, which includes a ***prior*** approval, a description of the program agenda, and proof of attendance before applying for graduation.

DOCTOR OF PHILOSOPHY IN THE FIELD OF EPIDEMIOLOGY

Program Director S. Cleary

The purpose of the doctor of philosophy program is to prepare students for a career in epidemiologic research in an academic or industry setting. The Ph.D. graduate is expected to have knowledge across a wide range of epidemiologic theories and methods and specific knowledge of the epidemiology of one of the following areas: chronic disease, infectious disease, environmental and occupational health.

Doctoral students are required to pass a written comprehensive examination and to complete a dissertation. For the comprehensive examination the student must demonstrate advanced knowledge of epidemiologic and biostatistical methods. For the dissertation, the student must design and execute an original research study that contributes new knowledge to the field and demonstrates proficiency using advanced analytic methods.

In addition to MS and MPH competencies, doctoral students in epidemiology must demonstrate competencies in the following areas: demonstrate understanding of general and specialized advanced epidemiologic concepts, develop a research protocol, conduct and analyze a research study, and disseminate research findings.

At the completion of the doctoral program in epidemiology students will be able to:

- Demonstrate understanding of general and specialized epidemiologic concepts: Demonstrate knowledge of advanced epidemiologic concepts with specialized knowledge in a specific area of epidemiology (e.g., methods, infectious diseases, chronic diseases, environmental, or occupational); apply knowledge of disease pathogenesis to a study protocol; discuss major public health problems; and exhibit knowledge of ethical issues in research;
- Develop a research protocol: Synthesize and identify gaps and/or limitations of published research and present appropriate hypotheses to address gaps; develop a research protocol including identification of data sources, evaluate appropriate instruments for data collection, discuss the advantages and disadvantages of different epidemiologic study designs and sources of potential bias;
- Conducting and analyzing data from a research study: Demonstrate proficiency in data collection, data cleaning, primary or secondary data analysis, summarizing statistical analyses and results, and evaluating potential for bias; and
- Dissemination of research findings: Provide a structured proposal of a research study including the background, study hypotheses, design, methodology, and contribution to the field; communicate dissertation results to lay and scientific communities through presentations at conferences and publications in the peer-reviewed literature.

Admissions Requirements

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Applicants must hold an undergraduate degree from an accredited institution of higher learning. Applicants should have academic backgrounds of excellence, usually with majors, or equivalent, in the fields in which they intend to study for advanced degrees. Normally, a B average (or equivalent) from an accredited college is required. With evidence of special promise, such as high Graduate Record Examination scores, an applicant whose academic record falls short of a B average may be accepted on a conditional basis. Meeting the minimum requirements does not assure acceptance. The departments may, and often do, set higher admission standards. Moreover, the number of spaces available for new graduate students limits the number who can be accepted. Students who apply in their senior year must provide evidence of the completion of their baccalaureate work before registration in SPH is permitted. Applicants should be aware that graduate courses taken prior to admission while in non-degree status are not used in assessing admissibility to degree programs and may

not be transferable into those programs. The SPH-at-a-Glance (http://sph.washington.edu/about/quickfacts.asp) presents the Ph.D. curriculum for students admitted to the program with no intermediate master's degree.

If desired, a student may complete the M.S. or M.P.H. program prior to admission to the Ph.D. degree program, in which case no more than 24 credits from the M.S. degree may be applied to the Ph.D. course work requirements. In this instance the student will be required to take a minimum of 27 additional credits of course work. The distribution of these courses between epidemiology and statistics will depend on the nature of the M\master's degree and whether the transferred credits will be used to defray epidemiology or statistics course work. All applications are submitted through SOPHAS.org (http://SOPHAS.org).

For reporting GRE general test scores use the following institutional code: 5268.

COMPETENCIES

At the completion of the doctoral program in epidemiology students will be able to:

- Demonstrate understanding of general and specialized epidemiologic concepts.
- Demonstrate knowledge of advanced epidemiologic concepts with specialized knowledge in a specific area of epidemiology (e.g., methods, infectious diseases, chronic diseases, environmental, or occupational); apply knowledge of disease pathogenesis to a study protocol; discuss major public health problems; and exhibit knowledge of ethical issues in research.
- Develop a research protocol: Synthesize, identify gaps and/or limitations of published research and present appropriate hypotheses to address gaps; develop a research protocol including identification of data sources, evaluate appropriate instruments for data collection, the advantages and disadvantages of different epidemiologic study designs and sources of potential bias.
- Conducting and analyzing data from a research study: Demonstrate proficiency in data collection, data cleaning, primary or secondary data analysis, summarizing statistical analyses and results, and evaluating potential for bias.
- Dissemination of research findings: Provide a structured proposal of a research study including the background, study hypotheses, design, methodology, and contribution to the field; communicate dissertation results to lay and scientific communities through presentations at conferences and publications in the peer-reviewed literature.

REQUIREMENTS

The following requirements must be fulfilled:

The requirements for the Doctor of Philosophy Program (p. 82).

72 credits

Preparatory Requirements

Code	Title	Credits
Minimum prerequisite courses for admission consideration		
BISC 1111	Introductory Biology: Cells and Molecules	
BISC 1112	Introductory Biology: The Biology of Organisms	
MATH 1231	Single-Variable Calculus I	
MATH 1232	Single-Variable Calculus II	
MATH 2233	Multivariable Calculus (option A only)	
Additional course requirements		
The courses listed below are additional course requirements. Applicants lacking these courses (or equivalents to these GW courses) will be considered for admission, but will be admitted conditionally with the expectation that these courses will be completed within two semesters following matriculation in the program. Credits for these courses do not count toward the 72-credit graduation requirement, or are grades earned in these additional courses reflected in the overall grade-point average.		
MATH 2184	Linear Algebra I	
STAT 2183	Intermediate Stat Lab/Packages	
or PUBH 6249	StatPackages/DataMgt&DataAnlys	

Degree Requirements

Code	Title	Credits
Public health core		
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6247	Design of Health Studies	
PUBH 6252	Advanced Epidemiology Methods	
PUBH 8419	Measurement in Public Health & Health Services	
One of the following for a total of 4 credits:		
PUBH 6299	Topics in Epi/Bio (taken for 2 credits)	
and		
PUBH 6004	Environmental and Occupational Health in a Sustainable World	

or PUBH 6007	Social and Behavioral Approaches to Public Health
OR	
PUBH 6299 & PUBH 6006	Topics in Epi/Bio and Management and Policy Approaches to Public Health (taken for 1 credit)
Statistics core	
STAT 6210	Data Analysis (OR)
PUBH 8365	Design of Medical Studies
PUBH 8366	Biostatistical Methods (basis for PhD general comprehensive)
Option A	
STAT 6201	Mathematical Statistics I
STAT 6202	Mathematical Statistics II
Option B	
PUBH 8364	Quantitative Methods
Electives	
A minimum of 17-20 public health elective credits, which may be selected from the following. Additional courses may be approved by the program director.	
PUBH 6299	Topics in Epi/Bio
PUBH 6123	Toxicology: Applications for Public Health Policy
PUBH 6124	Problem Solving in EOH
PUBH 6242	ClinicalEpid&Decision Analysis
PUBH 6244	Cancer Epidemiology
PUBH 6245	InfectiousDisease Epidemiology
PUBH 6250	Epidemiology of HIV/AIDS
PUBH 8242	DPH Topics:ClinEpi&DecAnalysis
PUBH 8244	DPH Topics:Cancer Epidemiology
PUBH 8245	DPH Topics:InfectDiseaseEpi
PUBH 8250	DPH Topics: Epi of HIV/AIDS
PUBH 6259	Epid Surveillance/PublicHealth
PUBH 6260	Adv DataAnalysis-Public Health
PUBH 6262	Intro-Geog Information Systems
PUBH 6263	Advanced GIS
PUBH 6267	Time Series:Applications in PH
PUBH 6268	Advanced SAS
Statistics electives (only students pursuing Option A)	
STAT 6213	Intermediate Probability and Stochastic Processes
STAT 6215	Applied Multivariate Analysis I
STAT 6216	Applied Multivariate Analysis II
STAT 6217	Design of Experiments
STAT 6223	Bayesian Statistics: Theory and Applications
STAT 6227	Survival Analysis
STAT 6231	Contingency Table Analysis
STAT 8226	Advanced Biostatistical Methods
Consulting	
Three credits from the following:	
PUBH 6258	Adv Topics/Biostat Consulting
PUBH 6283	Biostatistics Consulting Practicum
The consulting requiement may be waived by the Epidemiology Program Director based on written documentation of prior equivalent course work or relevant work experience. Waiver of the consulting course increases the total number of electives proportionally.	
Dissertation research	
12-21 credits of the following:	
PUBH 8999	Dissertation Research (taken in units of 3 credits)

Graduation Requirements

1. Program options: Students may choose either curriculum Plan A or curriculum Plan B for the Doctor of Philosophy degree in the field of epidemiology.
2. Graduate credit requirement: 72 graduate credits are required.
3. Prerequisites**:** Review official program guide for minimum prerequisite requirements for admission.
4. Comprehensive (General) exam
   a. A written comprehensive exam will be administered within 24 months from date of matriculation based on the course content of PUBH 6247 Design of Health Studies, PUBH 6252 Advanced Epidemiology Methods,

and PUBH 8419 Measrmnt/PublHlth&HlthSrvcsRes. The exam is administered once per year in August.

b. An oral presentation of the proposal for dissertation is made to the students' Dissertation Research Committee. The Committee will determine the student's readiness to pursue and complete the proposed research.

5. Dissertation: 12-21 credits of dissertation research are required. Students may register for up to 6 credits of PUBH 8999 Dissertation Research prior to completion of the proposal defense.
6. Grade point requirements: An overall GPA of 3.0 (B average) is required.
7. Time limit requirement: The degree must be completed 8 years.
8. Transfer credit policy: Up to 24 credits from an applicable masters program may be approved to be transferred to the doctoral program. Credits must have been earned from an accredited institution with a grade point average of B or better.

The General Examinations

Part I is a written comprehensive examination consisting of one examination in the field of biostatistics and one in the field of epidemiology. The epidemiology examination is based on the course content of PUBH 6247 Design of Health Studies, PUBH 6252 Advanced Epidemiology Methods, and PUBH 8419 Measrmnt/PublHlth&HlthSrvcsRes as well as the biostatistics examination is based on the course content of PUBH 8366 Biostatistical Methods and is administered by the faculty of the Department of Epidemiology & Biostatistics. Students are expected to take the comprehensive examination within 24 months from the date of enrollment in the program. In addition, students are required to make up any deficiencies prior to taking the examination, e.g., by enrolling in appropriate master's-level courses as needed. The doctoral comprehensive examination is administered once per year in late August. A student who fails to pass the comprehensive examination may, with the approval of the faculty, repeat all or portions of the examination. Failure on the second attempt will result in termination from the Ph.D. program.

Part II, the research proposal, consists of an oral examination based on a written dissertation research proposal. As soon as feasible after successful completion of the comprehensive exam, students are encouraged to identify a dissertation advisor and a topic of research. The written dissertation proposal is then submitted to the student's Dissertation Research Committee, and the student will make an oral presentation of his or her proposal to the Committee. The Committee will determine the student's readiness to pursue and successfully complete the proposed research, in addition to the appropriateness of the specific problem for dissertation level research.

Upon successful completion of the required course work and both parts of the General Examination, the candidate will generally be recommended for promotion to PhD Candidacy: the dissertation research. Prior to completion of the General examination, a student may register for at most 6 credit hours of PUBH 8999 Dissertation Research.

Professional Enhancement Requirement (Two Days)

Professional enhancement activities supplement the academic curriculum and help prepare students to participate actively in the professional community. They enhance practical knowledge and awareness of public health issues – either in general or in a student's specific area of study.

Students can fulfill this requirement by attending workshops, seminars, or other relevant professional meetings, which are often held at SPH and in the metropolitan Washington, DC area. Examples of conference sponsors include the National Academy for State Health Policy, the Pan American Health Organization, the American Public Health Association, the American College of Healthcare Executives, the Area Health Education Center, the American College of Sports Medicine, and the National Athletic Trainer's Association. Opportunities for professional enhancement are regularly publicized via the SPH Listserv and through your department or advisor. It is hoped that PhD students will fulfill one day of this two day requirement by participating in a poster presentation at GWUMC Research Day.

Students must submit documentation of Professional Enhancement activities to the Epidemiology Program Director, which includes a prior approval, a description of the program agenda, and proof of attendance before applying for graduation.

EXERCISE AND NUTRITION SCIENCES

The Department of Exercise and Nutrition Sciences holds a unique position as an academic unit within a school of public health. The exercise and nutrition sciences program gives students the opportunity to learn not only how exercise, physical activity, and nutrition affect the individual, but also how these factors affect the health and function of communities at large. The Department provides its students with research and practice opportunities in settings as diverse as the National Institutes of Health, professional sports team, the U.S. Department of Agriculture, the Pentagon, and the D.C. public school system.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Science with a major in exercise science (p. 885)
- Bachelor of Science with a major in exercise science, pre-athletic training/sports medicine concentration (p. 887)

- Bachelor of Science with a major in exercise science, pre-medical professional concentration (p. 890)
- Bachelor of Science with a major in exercise science, pre-physical therapy concentration (p. 892)

Minors

- Minor in exercise science (p. 897)
- Minor in nutrition (p. 898)

GRADUATE

Master's programs

- Master of Public Health in the field of physical activity in public health (p. 941)
- Master of Public Health in the field of public health nutrition (p. 944)
- Master of Science in the field of exercise science with a concentration in strength and conditioning (p. 947)

FACULTY

Professors J.V. Danoff, J.A. DeLoia, L. DiPietro *(Chair)*, L.F. Hamm

Associate Professors T. A. Miller, S.A. Talegawker, A. Visek, B.J. Westerman

Assistant Professors M. Barron, G.M. Hudson

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

- Exercise and Nutrition Sciences (EXNS) (p. 1214)
- Health and Wellness (HLWL) (p. 1253)
- Lifestyle, Sport, and Physical Activity (LSPA) (p. 1328)

MASTER OF PUBLIC HEALTH IN THE FIELD OF PHYSICAL ACTIVITY IN PUBLIC HEALTH

Program Director L. DiPietro

Mission Statement

The sedentary lifestyle and its consequent metabolic and cardiovascular complications now assumes a considerable public health burden in the United States. Indeed, the promotion of physical activity for people of all ages has become a top priority on public health agendas around the world. The mission of the Master of Public Health (M.P.H.) degree program in the Department of Exercise and Nutrition Sciences is to develop and train graduate students to integrate physical activity into the core of public health practice. The program encompasses an ecological perspective to the role of physical activity in the etiology, prevention, and treatment of chronic diseases at the community, national, and global levels. The program is designed to train students as public health scientists and practitioners in order to assist public and private agencies with program development and evaluation with regard to physical activity, health promotion, and disease prevention.

Goals

The goals of this M.P.H. program in the Department of Exercise and Nutrition Sciences are to ensure that graduates:

- Understand the pathophysiology of selected chronic disease processes.
- Understand exercise physiology and the role of physical activity and exercise in health promotion and disease prevention.
- Develop skills in physical activity assessment using state-of-the-art technology.
- Utilize epidemiological methods to develop and test hypotheses pertaining to physical activity and health and disease outcomes at the population level.
- Develop skills in designing, implementing, and evaluating interventions for improving physical activity at the community level.
- Appreciate the role of public health policy in altering physical activity patterns at the community level.

COMPETENCIES

Program Specific Competencies

Upon completion of the MPH in Physical Activity in Public Health, students will possess the following functional competencies:

Integrate evidence-based knowledge of the relation of physical activity to health and function across the life-span.

- Students will demonstrate knowledge and understanding of the pathophysiology of selected chronic disease processes. [Cognitive: levels 1 and 2].

EXNS 6202	Advanced Exercise Physiology I
EXNS 6203	Advanced Exercise Physiology II
EXNS 6208	Physical Activity: Physiology and Epidemiology
EXNS 6212	Exercise in Selected Chronic Diseases

- Students will demonstrate knowledge and understanding of the role of physical activity in the health and function of the general population. [Cognitive: levels 1 and 2].

EXNS 6202	Advanced Exercise Physiology I
EXNS 6203	Advanced Exercise Physiology II
EXNS 6208	Physical Activity: Physiology and Epidemiology
EXNS 6212	Exercise in Selected Chronic Diseases

- Students will demonstrate knowledge and understanding of various physiological and psychosocial mechanisms that mediate the relation between physical inactivity and chronic disease morbidity and mortality. [Cognitive: levels 1 and 2].

EXNS 6202	Advanced Exercise Physiology I
EXNS 6203	Advanced Exercise Physiology II
EXNS 6208	Physical Activity: Physiology and Epidemiology
EXNS 6212	Exercise in Selected Chronic Diseases

Utilize social and behavioral theories in designing physical activity and other health promotion programs.

- Students will apply various theories of social and behavioral change in patterns of physical activity adoption and maintenance. [Cognitive: level 3; Affective: levels 3 and 4].

EXNS 6208	Physical Activity: Physiology and Epidemiology
PUBH 6014	Practicum
PUBH 6015	Culminating Experience
Additional relevant courses for students in the Program Design and Evaluation option	
PUBH 6500	Planning and Implementing Health Promotion Programs
PUBH 6501	Program Evaluation

- Students will demonstrate skills in the design of physical activity interventions that are consistent with these social and behavioral theories. [Cognitive: levels 3-5].

EXNS 6208	Physical Activity: Physiology and Epidemiology
EXNS 6212	Exercise in Selected Chronic Diseases
PUBH 6014	Practicum
PUBH 6015	Culminating Experience
Additional relevant courses for students in the Program Design and Evaluation option	
PUBH 6500	Planning and Implementing Health Promotion Programs
PUBH 6501	Program Evaluation

Integrate physical activity within the core functions of public health.

- Students will demonstrate skills in physical activity assessment using state-of-the-art technology. [Cognitive: level 3; Affective: level 3; Psychomotor: level 4].

EXNS 6202	Advanced Exercise Physiology I
EXNS 6203	Advanced Exercise Physiology II
EXNS 6208	Physical Activity: Physiology and Epidemiology
PUBH 6014	Practicum
PUBH 6015	Culminating Experience

- Students will apply epidemiological methods to develop and test hypotheses pertaining to physical activity and health and disease outcomes at the population level. [Cognitive: level 3].

EXNS 6208	Physical Activity: Physiology and Epidemiology
EXNS 6212	Exercise in Selected Chronic Diseases
PUBH 6014	Practicum
PUBH 6015	Culminating Experience
Additional relevant courses for student in the Epidemiology option	
PUBH 6247	Design of Health Studies
PUBH 6249	StatPackages/DataMgt&DataAnlys
PUBH 6252	Advanced Epidemiology Methods

- Students will design and evaluate interventions for improving physical activity at the community level. [Cognitive: levels 3-6].

EXNS 6208	Physical Activity: Physiology and Epidemiology
EXNS 6212	Exercise in Selected Chronic Diseases
PUBH 6014	Practicum
PUBH 6015	Culminating Experience
Additional relevant courses for student in the Epidemiology option	
PUBH 6247	Design of Health Studies

PUBH 6252	Advanced Epidemiology Methods

- Students will appreciate the role of public health policy in altering physical activity patterns at the community level. [Affective: levels 3 and 4].

EXNS 6208	Physical Activity: Physiology and Epidemiology
PUBH 6014	Practicum
Additional relevant course for students in the Program Design and Evaluation Option	
PUBH 6500	Planning and Implementing Health Promotion Programs

Work with other public health professionals in promoting physical activity research, practice, and policy at the community, state, and federal level.

- Students will integrate the science and practice of exercise science and public health in promoting an active lifestyle in the workplace, the school system, and within the community. [Cognitive: level 5; Affective: levels 3-6].

EXNS 6208	Physical Activity: Physiology and Epidemiology
PUBH 6014	Practicum
Additional relevant courses for student in the Program Design and Evaluation option	
PUBH 6500	Planning and Implementing Health Promotion Programs
PUBH 6501	Program Evaluation
PUBH 6503	Introduction to Public Health Communication and Marketing

- Students will appreciate the role of both traditional and non-traditional public health partners in physical activity promotion. [Cognitive: level 2; Affective; levels 3 and 4].

EXNS 6208	Physical Activity: Physiology and Epidemiology
PUBH 6014	Practicum

- Students will design public health policy that can alter physical activity patterns across multiple settings. [Cognitive: levels 3-5; Affective: levels 3 and 4].

EXNS 6208	Physical Activity: Physiology and Epidemiology
PUBH 6014	Practicum

REQUIREMENTS

Course Requirements

All GW SPH, MPH students who select the Physical Activity in Public Health program enroll in core courses (15 credits), program-specific courses (20 credits), and electives (6 credits). Program-specific courses include options to focus in epidemiology or program design and evaluation. The 45 credit degree program includes a practicum (2 credits) and a culminating experience (2 credits).

Program Requirements

Prerequisites:	
EXNS 2111	Exercise Physiology I
Required core courses:	
PUBH 6001	BiologicalConcepts/PublicHlth
PUBH 6002	Biostatistical Applic for PubH
PUBH 6003	Prin & Practice/Epidemiology
PUBH 6004	Environmental and Occupational Health in a Sustainable World
PUBH 6006	Mgt & Policy Approaches to PH
PUBH 6007	Social&BehaviorAppr-Pub.Hlth
Required department courses:	
EXNS 6202	Advanced Exercise Physiology I
EXNS 6203	Advanced Exercise Physiology II
EXNS 6208	Physical Activity: Physiology and Epidemiology
EXNS 6212	Exercise in Selected Chronic Diseases
Required program-specific courses:	
Select Option A or B	
Option A: Epidemiology option	
PUBH 6247	Design of Health Studies
PUBH 6249	StatPackages/DataMgt&DataAnlys
PUBH 6252	Advanced Epidemiology Methods
Option B: Program design and evaluation option	
PUBH 6500	Planning and Implementing Health Promotion Programs
PUBH 6501	Program Evaluation

PUBH 6502	Practical Data Analysis: PCH
PUBH 6503	Introduction to Public Health Communication & Marketing
Sample electives:	
6 elective credits (5 credits in EXNS or PUBH):	
EXNS 6242	Nutrition Throughout the Life Cycle
PUBH 6260	Adv DataAnalysis-Public Health
PUBH 6262	Intro-Geog Information Systems
PUBH 6536	Workplace Health Promotion
PUBH 6556	Maternal & Child Nutrition
PUBH 6560	School Health and Safety
Practicum and culminating experience courses:	
PUBH 6014	Practicum
PUBH 6015	Culminating Experience

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

MASTER OF PUBLIC HEALTH IN THE FIELD OF PUBLIC HEALTH NUTRITION

Program Director K. Robien

Practicum Director K. Robien

Mission

The mission of the master of public health (M.P.H.) degree program in the field of public health nutrition is to develop and train graduate students to integrate nutrition into the core of public health practice. The program encompasses a social ecological perspective on the role of nutrition in the etiology, prevention, and treatment of both acute and chronic disease at the individual, community, national, and global levels. This program is designed to train students as public health scientists and practitioners in order to assist public and private agencies with program development, implementation, and evaluation with regard to nutrition in health promotion and disease prevention.

Goals

The goals of this M.P.H. program in the field of public health nutrition are to ensure that graduates:

- Understand the pathophysiology of common acute and chronic disease processes and the role that nutrition may play in the development of these diseases.
- Understand the factors impacting the accessibility, availability, adequacy, and safety of the food and water systems serving a community, and the relationship between community food and water systems and health outcomes.
- Develop skills in nutrition assessment of both individuals and communities.
- Utilize appropriate epidemiologic methods for developing and testing hypotheses relating to nutrition and health outcomes at the population level.
- Develop skills in designing, implementing, and evaluating nutrition interventions to improve the health of communities.
- Appreciate the role of public health policy in altering the food environment at the community level.

COMPETENCIES

Program-Specific Competencies

Upon completion of the MPH in Public Health Nutrition, students will possess the following functional competencies:

- Integrate nutrition within the core functions of public health.
  Students will be able to translate nutrition research into public health practice through application of skills in nutrition assessment/surveillance, program planning and evaluation, management, education and health promotion, public policy, and health communication.

  Relevant courses:

PUBH 6500	Planning and Implementing Health Promotion Programs
PUBH 6610	Public Health Nutrition Practice and Leadership

- Describe the international and US public health nutrition system.
  Students will identify the governmental structures and processes involved in the development of public policy, legislation, regulations and delivery of services that influence food intake, nutritional status, and health of populations. Students will identify with international,

federal, state and local level nutrition surveillance and assistance programs. Students will identify the political, economic and social processes that influence food and nutrition policies and legislation.

Relevant courses:

PUBH 6014	Practicum
PUBH 6015	Culminating Experience
PUBH 6482	International Food and Nutrition Policy
PUBH 6610	Public Health Nutrition Practice and Leadership
PUBH 6613	US Food Policy and Politics

- Assess the nutritional status of individuals and communities.
  Students will use appropriate and current methods to assess nutrition status and prioritize nutritional problems of target populations across the life span. Students will understand the process, rationale, and issues related to establishing nutrient requirements and dietary recommendations.

  Relevant courses:

EXNS 6242	Nutrition Throughout the Life Cycle
PUBH 6014	Practicum
PUBH 6015	Culminating Experience
PUBH 6241	Nutritional Epidemiology
PUBH 6610	Public Health Nutrition Practice and Leadership
PUBH 6611	Nutrition Assessment

- Evaluate the accessibility, adequacy and safety of the food and water systems for a given community, and understand how these factors could affect the desired outcomes of health promotion and disease prevention activities.
  Students will identify potential environmental, economic, behavioral, political, cultural and historical factors that impact the food system (including the production, processing, distribution, and consumption of food) and water supply. Students will implement or advocate for improvements in the food and water supply chain as needed to improve the health of the communities they serve.

  Relevant courses:

PUBH 6014	Practicum
PUBH 6015	Culminating Experience
PUBH 6610	Public Health Nutrition Practice and Leadership
PUBH 6612	Food Systems in Public Health
PUBH 6613	US Food Policy and Politics
EXNS 6242	Nutrition Throughout the Life Cycle

- Apply evidence-based knowledge and understanding of the relationship between nutrition and health outcomes across the life-span.
  Students will describe the role of nutrition in the health of the general population. Students will identify the health consequences of both under- and over-nutrition. Students will identify and critically evaluate relevant nutrition research, and apply research findings to food and nutrition programs and policies.

  Relevant courses:

EXNS 6242	Nutrition Throughout the Life Cycle
PUBH 6014	Practicum
PUBH 6015	Culminating Experience
PUBH 6241	Nutritional Epidemiology
PUBH 6610	Public Health Nutrition Practice and Leadership
PUBH 6613	US Food Policy and Politics

- Design, implement, and evaluate population-based nutrition interventions, policies, and programs.
  Students will apply the principles of community assessment, planning, marketing, implementation and evaluation in order to assure the success of food and nutrition interventions. Students will understand and apply theories of social and behavioral change when developing nutrition interventions.

  Relevant courses:

PUBH 6014	Practicum
PUBH 6015	Culminating Experience

- Demonstrate effective communication, management and leadership skills to ensure the success of public health nutrition programs and services.
  Students will communicate food and nutrition information appropriate for broad and diverse audiences, including individuals, families, communities, health professionals, media, policy and decision makers, food industries, and businesses. Students will interact sensitively, effectively and professionally with persons from diverse cultural,

socioeconomic, educational, and professional backgrounds, and with persons of all ages and lifestyle preferences.

Relevant courses:

PUBH 6014	Practicum
PUBH 6015	Culminating Experience
PUBH 6610	Public Health Nutrition Practice and Leadership

REQUIREMENTS

Preparatory Requirements

Prerequisites: Students who do not have an undergraduate degree in nutrition must complete successfully one introductory nutrition and one advanced nutrition or nutritional biochemistry course at the undergraduate level (or higher) with a minimum grade of *C* prior to matriculation into the program. GW's School of Public Health offers EXNS 2114 Nutrition Sciences I and EXNS 2115 Nutrition Sciences II. Together these courses satisfy the public health nutrition M.P.H. program prerequisite course work requirement. Alternatively, GW also offers graduate-level Introductory nutrition and nutritional biochemistry courses that satisfy the prerequisite requirement. Consult the Program Director for additional information.

The following requirements must be fulfilled: 45 credits, including 15 credits in core courses, 14 credits in program-specific courses, 4 credits in research courses, 8 credits in elective courses, and 4 credits in practicum and culminating experience courses.

Program Requirements

Code	Title	Credits
Core		
PUBH 6001	Biological Concepts in Public Health	
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6004	Environmental and Occupational Health in a Sustainable World	
PUBH 6006	Management and Policy Approaches to Public Health	
PUBH 6007	Social and Behavioral Approaches to Public Health	
Program-specific		
PUBH 6241	Nutritional Epidemiology	
EXNS 6242	Nutrition Throughout the Life Cycle	
PUBH 6500	Planning and Implementing Health Promotion Programs	
PUBH 6610	Public Health Nutrition Practice and Leadership	
PUBH 6611	Nutrition Assessment	
PUBH 6612	Food Systems in Public Health	
PUBH 6613	US Food Policy and Politics	
or PUBH 6482	International Food and Nutrition Policy	
Research		
4 credits from the following:		
PUBH 6236	Systematic Review of Public Health Literature	
PUBH 6247	Design of Health Studies	
PUBH 6249	StatPackages/DataMgt&DataAnlys	
PUBH 6260	Adv DataAnalysis-Public Health	
PUBH 6262	Intro-Geog Information Systems	
PUBH 6263	Advanced GIS	
PUBH 6268	Advanced SAS	
PUBH 6273	Ethnographic Methods	
PUBH 6281	Analysis of Complex Surveys Using SAS and Stata	
PUBH 6282	Introduction to R Programming	
PUBH 6410	Global Health Study Design	
PUBH 6411	Global Health Qualitative Research Methods	
PUBH 6412	Global Health Quantitative Research Methods	
PUBH 6437	Case Study Methods for Global Health Evaluation	
PUBH 6488	Cost-effectiveness Analysis in Public Health and Healthcare	
PUBH 6499	Topics in Global Health (Evaluation of Food and Nutrition Programs and Policies)	
PUBH 6501	Program Evaluation	

PUBH 6504	Social and Behavioral Science Research Methods
PUBH 6530	Qualitative Methods in Health Promotion
PUBH 6533	Design of Comm Health Surveys
PUBH 6534	Comm-Based Participatory Res
PUBH 6572	Marketing Research for Public Health
Electives	
8 credits in elective courses; suggested related courses include:	
PUBH 6127	Germs: An Introduction to Environmental Health Microbiology
PUBH 6237	Chronic Disease Epidemiology
PUBH 6305	Fundamentals for Health Policy: Public Health and Health Care
PUBH 6400	Global Health Frameworks
PUBH 6440	Global Health Economics and Finance
PUBH 6485	Prevention and Control of Water and Sanitation Diseases
PUBH 6487	Emerging Zoonotic Diseases & Global Food Production
PUBH 6503	Introduction to Public Health Communication and Marketing
PUBH 6514	Preventing Health Disparities
PUBH 6515	High Risk&Special Populations
PUBH 6550	Maternal & Child Health I
PUBH 6551	Maternal & Child Health II
PUBH 6552	Women's Health
PUBH 6553	Adolescent Health
PUBH 6556	Maternal & Child Nutrition
PUBH 6562	Physical Activity and Obesity Interventions: From the Individual to the Environment
EXNS 6202	Advanced Exercise Physiology I
EXNS 6203	Advanced Exercise Physiology II
EXNS 6208	Physical Activity: Physiology and Epidemiology
EXNS 6209	Advanced Concepts in Nutrition Science
Practicum and culminating experience	
PUBH 6014	Practicum
PUBH 6015	Culminating Experience

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

MASTER OF SCIENCE IN THE FIELD OF EXERCISE SCIENCE WITH A CONCENTRATION IN STRENGTH AND CONDITIONING

Program Director T.A. Miller

Mission Statement

The mission of the program is to provide formal graduate level academic instruction in the science and theory of resistance training, as well as to promote student production of research that directly relates to the neuromuscular adaptations involved with resistance training.

Goals

The goals of this program in the Department of Exercise and Nutrition Sciences are to:

- Establish scientific basis for the value of anaerobic exercise, and to provide internal and external programs that promote health behaviors across the lifespan;
- Meet an increasing demand for well-educated professionals capable of delivering a broad range of exercise-based preventive, technical, educational, and rehabilitative services;
- Gain insight into strategies for the prevention and treatment of sarcopenia, osteoporosis, and childhood obesity;
- Provide advanced training in exercise physiology as it relates specifically to resistance training for the purpose

of increasing athletic performance and the prevention or treatment of inactivity-related health disorders; and
- Prepare students with knowledge and skills to take the Certified Strength and Conditioning Specialist (CSCS) exam offered through the NSCA, and the Level One Weightlifting Coaching Course offered through United States Weightlifting (USAW).

This program is primarily delivered on-line. Contact Program Director for more information.

REQUIREMENTS

Course Requirements

The following requirements must be fulfilled: 36 credits, including 17 credits in core course, 19 credits in program-specific courses, a graduate internship, and successful completion of the comprehensive examination.

Program Requirements

Code	Title	Credits
Prerequisites		
Undergraduate exercise physiology - must be completed prior to beginning coursework at GW and must receive a grade of B or better.		
Core courses		
EXNS 6202	Advanced Exercise Physiology I	
EXNS 6203	Advanced Exercise Physiology II	
EXNS 6207	Psychological Aspects of Sport & Exercise	
EXNS 6208	Physical Activity: Physiology and Epidemiology	
EXNS 6209	Advanced Concepts in Nutrition Science	
PUBH 6002	Biostatistical Applications for Public Health	
Program-specific courses		
EXNS 6220	Power Training for Sports Performance	
EXNS 6221	Science & Theory of Training	
EXNS 6222	Current Topics in Strength and Conditioning	
EXNS 6223	Biomechanical Analysis	
Elective	Approved by the program director	
Culminating experience		
EXNS 6233	Graduate Internship	
Comprehensive examination		

Graduation requirements

1. Graduate credit requirement: 36 graduate credits
2. Course requirements: successful completion of core and program specific courses
3. Examination requirement: pass the American College of Sports Medicine Clinical Exercise Specialist® certification examination (clinical exercise physiology only)
4. Grade point requirement: 3.0 (B average) overall grade point average
5. Time limit requirement: the degree must be completed within four years
6. Transfer credit policy: up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the M.S.E.S. Courses need to have been taken within the past three years from an accredited institution with a grade of B or better.

GLOBAL HEALTH

The Department of Global Health offers diverse programs of study that prepare students to make a difference in the health of individuals and communities around the world. With three fields of study, a joint program with the department of Environmental and Occupational Health, a newly revised joint program managed in conjunction with the Department of Epidemiology and Biostatistics, several joint degree programs with other GW schools, and more than 20 international practicum opportunities, students have a wealth of opportunities to examine global health concepts and conduct interdisciplinary research.

GRADUATE

Master's programs

- Master of Public Health in the field of global environmental health (p. 951)
- Master of Public Health in the field of global health communication (p. 955)
- Master of Public Health in the field of global health epidemiology and disease control (p. 958)
- Master of Public Health in the field of global health policy (p. 960)
- Master of Public Health in the field of global health program design, monitoring, and evaluation (p. 962)

Doctoral program

- Doctor of Public Health in the field of global health (p. 965)

FACULTY

Professors M.C. Ellsberg, J.M. Sherry, L. Simonsen (*Research)*, C. Santos-Burgoa, J.M. Tielsch (*Chair)*, R.J. Waldman

Associate Professors S. Baird, J.F. Sandberg, P. Vigilance

Assistant Professors U. Colon-Ramos, C. Huang, S. Mookherji, K. Ndiaye, A. Roess, E. Uretsky

Adjunct Instructors K. Gamble-Payne, E.A. Migliaccio

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PUBH 2115. Health, Human Rights, and Displaced Persons. 3 Credits.
Concepts of health as a human right, ethics, and the participation of the international community in moving toward health for all. Civil and international conflict in the generation of displaced populations.

PUBH 2116. Global Delivery of Health Systems. 3 Credits.
Introduction to health systems and the basic concepts of health systems administration and financing and health care reform with examples from advanced, middle income, and poor countries.

PUBH 3133. Global Health and Development. 3 Credits.
Basic concepts of political, social, and economic determinants of health and how health status is measured; burden of diseases that impact development and their basic epidemiological characteristics including who they affect, when they occur, and where risk is greatest; relationships between socioeconomic development and global health can be observed, measured, and used for the management of health programs. Material are global in coverage, but with a strong emphasis on low-income countries. Students must have junior or senior standing. Prerequisites: BISC 1005, BISC 1111 and PUBH 2110.

PUBH 6400. Global Health Frameworks. 2 Credits.
Overview of current issues in global public health with particular emphasis on low and middle-income countries. Serves as both an introductory course for students entering the field of global health, as well as an update on current technical and policy issues for advanced students who may have considerable experience.

PUBH 6401. Comp Regional Determinants. 2 Credits.
Examines the set of social, cultural and economic issues most central to shaping health in each of the world's main regions. Overseas Learning Collaboration program in Bangladesh. Prerequisite: PubH 6400. Fee varies by year.

PUBH 6402. Washington Seminar. 2 Credits.
This seminar course will provide an overview of global health policy and practice institutional resources in Washington DC. Students gain an understanding of how global health issues are framed, presented and biased in a multi-institutional setting. This is a collaborative learning exercise where simple web based tools will be used to develop a virtual classroom of the current global health policy and practice dialogue among Washington DC based governmental, multilateral, NGO, private sector and policy institutes.

PUBH 6403. Scientific Basis GH Intervntn. 2 Credits.
Introduces the scientific basis of global health interventions and how they address proximal and underlying determinants of health. Successful students will obtain a strong technical grounding in the determinants, biology and pathogenesis of specific diseases, for which affordable tools for prevention, control, and case management exist and are in use in public health practice.

PUBH 6410. Global Health Study Design. 2 Credits.
A foundation in the tools necessary for planning and designing research related to identifying and solving problems in global health: choosing an appropriate research topic and research question, understanding the relationships between hypotheses and study objectives, conducting a literature review, choosing a research design to achieve the project purpose, writing a research proposal including planning for the challenges of global health research, and achieving productive dissemination of findings.

PUBH 6411. Global Health Qualitative Research Methods. 2 Credits.
An introduction to qualitative data collection and analysis in global health settings. Methodologies include survey design, interviews, focus groups, and participant observation. Archival research and clinical trial research are also addressed. The set of methods most commonly used to collect qualitative data in global health settings. Students are enabled to prepare interview guides, conduct in-depth interviews, and analyze and document the results from a qualitative field project. Prerequisites: PUBH 6002 and PUBH 6410.

PUBH 6412. Global Health Quantitative Research Methods. 3 Credits.
Continuation of the series of global health methods courses. Examination of the fundamental concepts of empirical analysis and qualitative analysis, including open and axial coding, the basis of grounded theory, and regression analysis. Prerequisites: PUBH 6002 and PUBH 6410.

PUBH 6430. Theories for Global Health Communication Interventions. 2 Credits.
Use of communication theory and methods in health promotion. Integration of multidisciplinary approaches to public health communication. Prerequisite: PUBH 6007, PUBH 6400.

PUBH 6431. Global Health Communication Strategies and Skills. 3 Credits.
Students conduct qualitative research to evaluate health communication programs, assess readability level and suitability of written health education materials, conduct content analyses, and review/critique current health communication literature. Prerequisites: PubH 6430-Theories and Applications in Global Health Promotion (unless waived by professor) PubH 6007- Social and Behavioral Approaches to Public Health.

PUBH 6435. Global Health Program Development and Implementation. 2 Credits.
Basic concepts and principles of program development and implementation including data collection methods, decision making, and problem-solving techniques. Application of program development techniques to specific interventions. Prerequisites: PUBH 6400.

PUBH 6436. Global Health Program Management and Leadership. 2 Credits.
Essential tools for successful project, personnel, and program management. Leadership and management theory; key issues in managing global health programs and projects; leadership and management skills development; use of data in management decision making; and importance of quality, supply chain, and resource management. Restricted to MPH in the field of global health program design, monitoring, and evaluation degree candidates. Prerequisites: PUBH 6400, PUBH 6400, and PUBH 6435.

PUBH 6437. Global Health Program Evaluation. 3 Credits.
Fundamentals of program monitoring and evaluation; developing and using program theory in evaluation; impact evaluation and mixed-methods approaches; qualitative methods and statistical analysis for program evaluation. Prerequisites: PubH 6002.

PUBH 6440. Global Health Economics and Finance. 2 Credits.
Examination of economics and finance principles as they apply to global health. Organization, delivery, and financing of health care in developing countries. Tools for analyzing issues related to global health economics and finance and application of those tools to a variety of a global health issues, including demand for health care, health care financing, social insurance, pharmaceuticals, and HIV/AIDS. Prerequisite: PUBH 6400.

PUBH 6441. Global Health Organizations and Regulations. 3 Credits.
The functions, capacities, and governance of international health organizations; the normative power of some international health organizations for regulatory processes; and evidence-based development of public health policies with attention to issues of global trade as it shapes worldwide and national health. Prerequisite: PUBH 6400.

PUBH 6442. Comparative Global Health Systems. 2 Credits.
Examination of national health systems, how they differ, and how they are performing. Health systems analyzed through four different lenses: health care organizations, health workforce development, health care financing, and health policy development. Comparison of health systems and health reforms in seven regions of the world and assessment of how health system performance might be improved. Course fee may apply. Prerequisite: PUBH 6400.

PUBH 6443. Global Health Agreements and Conventions. 2 Credits.
Explores the impact of regulations, trade and human rights on health by examining the relevant international declarations, agreements and conventions. This course will examine a variety of topics including the impact of international trade agreements on health, the International Health Regulations and other regulations affecting global health, and the relationship between health and human rights. Prerequisite: PUBH 6400.

PUBH 6480. Public Health in Complex Emergencies. 2 Credits.
Analyze security institutions, vulnerable groups, humanitarian operations and natural disasters and global security, the impact of global health threats such as HIV/AIDS, SARS, avian flu, tuberculosis and malaria on security institutions, vulnerable populations, civil/military cooperation, and humanitarian operations. Also explore the potential value of various institutions in mitigating global health threats and responding to humanitarian emergencies. Examine a range of scientific, policy, and program interventions designed to address these issues. Prerequisite: PUBH 6400.

PUBH 6481. Global Mental Health. 2 Credits.
Focus on global mental health knowledge and public health policy implementation skills regarding the integration of mental health, public health, and primary care in diverse health systems and challenging cultural contexts. Prerequisite: PubH 6400.

PUBH 6482. International Food and Nutrition Policy. 2 Credits.
Major global food and nutrition issues, their determinants, and the strategies that in place to address them. Students identify major nutrition and food challenges in a country or region as well as the policies and programs that have proven successful in addressing those challenges. Prerequisite: PUBH 6400.

PUBH 6484. Prevention and Control of Vector Borne Diseases. 2 Credits.
Study of insects and other vectors responsible for transmission of diseases in developing countries, including plague, malaria, dengue fever, onchocerciasis (river blindness), and chikungunya virus. Special focus on developing countries, particularly in the Middle East, Africa, Asia, and Latin America. Diseases such as West Nile Virus and Lyme disease in the United States and elsewhere are also addressed. New methods for effective management and control.

PUBH 6485. Prevention and Control of Water and Sanitation Diseases. 1 Credit.
Problems associated with providing adequate water and sanitation in developing countries; infectious diseases such as cholera, dysentery and typhoid. Innovative tools and solutions for improving water supply and sanitation.

PUBH 6492. Global Health Programs and Approaches to the Control of Chronic Diseases. 2 Credits.
Concepts, methods, and tools to address chronic non-communicable diseases (NCDs); global public health and development dimension of NCDs, their epidemiology and risks, and health systems approaches for their control with focus on low- and middle-income countries. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6400.

PUBH 6499. Topics in Global Health. 1-3 Credits.
Examination of a particular facet of public health. Topics vary by semester. May be repeated for credit provided topic differs. See the Schedule of Classes for more details.

MASTER OF PUBLIC HEALTH IN THE FIELD OF GLOBAL ENVIRONMENTAL HEALTH

Program Director G. Gray
Practicum Director S. McCormick

Mission

The mission of the master of public health (M.P.H.) in the field of global environmental health degree program—a joint program between the Departments of Global Health and Environmental and Occupational Health—is to educate individuals who are committed to working in resource-poor settings and applying analytic skills to prevent or mitigate the adverse impact of environmental hazards on human health. The program has a particular focus on traditional environmental health hazards—that is, health risks that are a consequence of a lack of access to clean water, inadequate sanitation, poor hygiene, household air pollution, solid waste disposal, and vector-borne diseases such as malaria.

Goals

The program seeks to help train graduates who will hold a multidisciplinary knowledge base and skill set that will provide them with a framework for addressing environmental health issues from environmentally mediated disease in the poorest performing regions of the world. They will understand the scientific and cultural foundations of environmental health in order to assess environmental exposures and understand the effects of these exposures on human health; interpret epidemiologic and other research findings related to global environmental health risks; and assume leadership roles in designing, implementing, and evaluating programs that focus on modification of environmental health-related behaviors at local, regional, national, and/or global levels.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://publichealth.gwu.edu/programs/global-environmental-health-mph) for additional information.

COMPETENCIES

Upon completion of the master of public health (M.P.H.) in the field of global environmental health degree program, students should possess the following functional competencies:

Epidemiology and Biostatistics

Critically assess existing epidemiologic research.

- Summarize goals, design, methods, and results of published research.

Code	Title	Credits
PUBH 6015	Culminating Experience	
PUBH 6121	Environmental and Occupational Epidemiology	
PUBH 6131	Applied Data Analysis in Environmental and Occupational Health	
PUBH 6400	Global Health Frameworks	
PUBH 6411	Global Health Qualitative Research Methods	

- Identify biases and evaluate the extent to which they threaten study validity.

Code	Title	Credits
PUBH 6121	Environmental and Occupational Epidemiology	
PUBH 6131	Applied Data Analysis in Environmental and Occupational Health	
PUBH 6411	Global Health Qualitative Research Methods	

- Apply statistical principles to interpret epidemiologic data.

Code	Title	Credits
PUBH 6121	Environmental and Occupational Epidemiology	
PUBH 6131	Applied Data Analysis in Environmental and Occupational Health	

Design appropriate studies for investigating EOH problems.

- Identify appropriate resources and databases to plan and conduct studies.

Code	Title	Credits
PUBH 6015	Culminating Experience	
PUBH 6121	Environmental and Occupational Epidemiology	
PUBH 6128	Global Environmental and Occupational Health	
PUBH 6400	Global Health Frameworks	
PUBH 6411	Global Health Qualitative Research Methods	

- Given a research question, identify appropriate study design, choose appropriate study populations, describe relevant exposure assessment methods, identify appropriate data collection instruments and processes, and describe procedures for protecting human subjects.

Code	Title	Credits
PUBH 6015	Culminating Experience	
PUBH 6121	Environmental and Occupational Epidemiology	
PUBH 6126	Assessment&Control/Env Hazards	
PUBH 6131	Applied Data Analysis in Environmental and Occupational Health	
PUBH 6411	Global Health Qualitative Research Methods	

Conceptualize and carry out data analysis to address study goals.

- Conceptualize research questions

Code	Title	Credits
PUBH 6015	Culminating Experience	
PUBH 6121	Environmental and Occupational Epidemiology	
PUBH 6128	Global Environmental and Occupational Health	
PUBH 6411	Global Health Qualitative Research Methods	

- Utilize appropriate approaches to manage and analyze data

Code	Title	Credits
PUBH 6015	Culminating Experience	
PUBH 6131	Applied Data Analysis in Environmental and Occupational Health	
PUBH 6411	Global Health Qualitative Research Methods	

Assess Global Environmental and Occupational Risks

Assess environmental and occupational exposures.

- Describe the principle of operation, capability, and limitations of assessment instrumentation.

Code	Title	Credits
PUBH 6126	Assessment&Control/Env Hazards	

- Assess severity of potential hazards and select the appropriate instrument and measurement method.

Code	Title	Credits
PUBH 6126	Assessment&Control/Env Hazards	

- Interpret exposure measurements to assess the severity of a chemical, physical, or biological hazard.

Code	Title	Credits
PUBH 6126	Assessment&Control/Env Hazards	
PUBH 6435	Global Health Program Development and Implementation	

- Compare exposure data against established occupational and environmental health standards and guidelines.

Code	Title	Credits
PUBH 6126	Assessment&Control/Env Hazards	
PUBH 6128	Global Environmental and Occupational Health	

- Evaluate the strengths and weaknesses of epidemiologic exposure assessments.

Code	Title	Credits
PUBH 6121	Environmental and Occupational Epidemiology	

PUBH 6128	Global Environmental and Occupational Health

Recommend strategies to prevent and control environmental and occupational exposures.

- Recommend appropriate control strategies, such as; environmental health interventions, protective equipment, behavior change campaigns, to mitigate health hazards.

Code	Title	Credits
PUBH 6126	Assessment&Control/Env Hazards	
PUBH 6128	Global Environmental and Occupational Health	
PUBH 6400	Global Health Frameworks	

Global Environmental Health Policy Analysis

Synthesize scientific evidence in order to inform global environmental health policy and reduce and prevent environmental health related disease and injury.

- Describe the authority and approaches of global environmental health agencies.

Code	Title	Credits
PUBH 6128	Global Environmental and Occupational Health	
PUBH 6435	Global Health Program Development and Implementation	

- Apply the risk assessment, risk management, and Source-to-Effect frameworks.

Code	Title	Credits
PUBH 6126	Assessment&Control/Env Hazards	
PUBH 6128	Global Environmental and Occupational Health	

- Explain the role of scientific, economic, ethical, and political interests in development and implementation of global environmental health policy.

Code	Title	Credits
PUBH 6126	Assessment&Control/Env Hazards	
PUBH 6128	Global Environmental and Occupational Health	
PUBH 6400	Global Health Frameworks	
PUBH 6435	Global Health Program Development and Implementation	

Conduct policy analysis relevant to global environmental health problems.

- Discuss interventions used in global environmental health.

Code	Title	Credits
PUBH 6126	Assessment&Control/Env Hazards	
PUBH 6128	Global Environmental and Occupational Health	
PUBH 6400	Global Health Frameworks	
PUBH 6435	Global Health Program Development and Implementation	

- Analyze approaches used in global environmental health policy development.

Code	Title	Credits
PUBH 6128	Global Environmental and Occupational Health	
PUBH 6400	Global Health Frameworks	
PUBH 6435	Global Health Program Development and Implementation	

- Analyze the role of global environmental health policies and politics in promoting sustainability.

Code	Title	Credits
PUBH 6128	Global Environmental and Occupational Health	
PUBH 6435	Global Health Program Development and Implementation	

Design, Implement, Monitor and Evaluate Global Environmental Health Programs

Synthesize relevant information in order to assess and manage environmental and occupational risks.

- Characterize political, social, cultural, religious and economic context to determine feasible interventions.

Code	Title	Credits
PUBH 6128	Global Environmental and Occupational Health	
PUBH 6400	Global Health Frameworks	
PUBH 6435	Global Health Program Development and Implementation	

- Given a specific context, design a plan to collect relevant information to fully characterize global environmental health hazards and related human health effects.

Code	Title	Credits
PUBH 6121	Environmental and Occupational Epidemiology	

PUBH 6128	Global Environmental and Occupational Health
PUBH 6435	Global Health Program Development and Implementation

- Evaluate data to characterize potential global environmental health hazards, potential for human exposure and health effects.

Code	Title	Credits
PUBH 6121	Environmental and Occupational Epidemiology	
PUBH 6128	Global Environmental and Occupational Health	
PUBH 6400	Global Health Frameworks	
PUBH 6411	Global Health Qualitative Research Methods	
PUBH 6435	Global Health Program Development and Implementation	

- Recommend possible approaches to reduce the risk and/or impact of exposure to global environmental health hazards, and evaluate these approaches with regard to ethical issues, technical feasibility, resource requirements, and policy context.

Code	Title	Credits
PUBH 6126	Assessment&Control/Env Hazards	
PUBH 6128	Global Environmental and Occupational Health	
PUBH 6400	Global Health Frameworks	
PUBH 6435	Global Health Program Development and Implementation	

- Communicate with relevant stakeholder groups about environmental and occupational health issues and recommendations, using appropriate terminology and data.

Code	Title	Credits
PUBH 6128	Global Environmental and Occupational Health

PUBH 6015	Culminating Experience (offered in two parts, 1 credit each)

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

MASTER OF PUBLIC HEALTH IN THE FIELD OF GLOBAL HEALTH COMMUNICATION

Program Director K. Ndiaye

Mission

The mission of the master of public health (M.P.H.) in global health communication degree program is to train the next generation of public health professionals engaged in addressing global health issues that are directly related to human behavior. Human behavior is at the core of many of the world's most pressing public health challenges, including HIV/AIDS and obesity. The program is designed to train professionals to approach the development and evaluation of behavior-change communication programs that address individual- and community-level factors relevant to particular populations and settings.

Goals

Understanding human behavior and developing ways to affect change requires a diverse set of skill. The goals of the M.P.H. in global health communication are to teach students the following:

- How to recognize the complexity of behavior change, especially the multiple levels of influence on human behavior.
- How to apply behavior change and communication theories in the development and evaluation of health communication programs and activities.
- Appreciation for the challenges that may arise in addressing behavior change in global settings.
- Critical thinking skills necessary to interpret and apply public health literature related to health communication and behavior change in global health settings.
- Skills for developing and evaluating health communication interventions in resource-limited settings or for vulnerable populations.
- Qualitative and quantitative research methods relevant to health communication.
- Knowledge of the various types of stakeholders, including governments, international donors, and local players, that may shape health communication interventions in global settings.
- Cultural competency skills necessary to develop programs and work in diverse cultural settings.
- Awareness of the benefits and challenges to collaborating with organizations that serve disenfranchised/vulnerable communities.

COMPETENCIES

By the end of their MPH program, students should be able to:

- Apply multi-disciplinary perspectives to identify, analyze and address global health challenges.

Relevant courses:

PUBH 6400	Global Health Frameworks
PUBH 6410	Global Health Study Design
PUBH 6411	Global Health Qualitative Research Methods

- Distinguish between qualitative and quantitative methods and select the appropriate method depending on the specific research or programmatic need.

Relevant courses:

PUBH 6411	Global Health Qualitative Research Methods
PUBH 6412	Global Health Quantitative Research Methods

- Interpret and critique research and best practices to inform the development of evidence-based solutions for global health challenges.·

Relevant courses:

PUBH 6400	Global Health Frameworks
PUBH 6410	Global Health Study Design
PUBH 6412	Global Health Quantitative Research Methods

- Communicate public health evidence on global health topics to a variety of audiences, such as technical experts, policymakers, lay audiences, and other relevant stakeholders.

Relevant courses:

PUBH 6412	Global Health Quantitative Research Methods

- Identify and address the ethical issues of global health programs, policies and research.

Relevant courses:

PUBH 6416	Ethical and Cultural Issues in Global Health Research and Programs

- Engage with diverse individuals, organizations, and communities with respect for different values, beliefs and practices.·

Relevant courses:

PUBH 6416	Ethical and Cultural Issues in Global Health Research and Programs

- Explain multilevel determinants of problems in Global Health and the basis for strategies and interventions.

Relevant courses:

PUBH 6400	Global Health Frameworks

- Describe the governance and institutional landscape of global health.

Relevant courses:

PUBH 6400	Global Health Frameworks

- Demonstrate professionalism in practice, research and in communication activities. ·

Relevant courses:

PUBH 6410	Global Health Study Design
PUBH 6411	Global Health Qualitative Research Methods
PUBH 6416	Ethical and Cultural Issues in Global Health Research and Programs

- Explain the ways in which behavior change and communication theories can inform the development and evaluation of health communication interventions.·

Relevant courses:

PUBH 6430	Theories for Global Health Communication Interventions
PUBH 6431	Global Health Communication Strategies and Skills

- Develop logic and conceptual models to design, monitor, and evaluate context-specific health communication interventions.

Relevant courses:

PUBH 6430	Theories for Global Health Communication Interventions
PUBH 6431	Global Health Communication Strategies and Skills
PUBH 6571	Social Marketing: Theory and Practice

- Identify and describe essential components of health communication interventions and strategies, linking theory with practice.

Relevant courses

PUBH 6430	Theories for Global Health Communication Interventions
PUBH 6431	Global Health Communication Strategies and Skills
PUBH 6571	Social Marketing: Theory and Practice

- Evaluate health communication activities and interventions.·

Relevant courses:

PUBH 6430	Theories for Global Health Communication Interventions

PUBH 6431	Global Health Communication Strategies and Skills

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 15 credits in core courses, 10 credits in global health departmental courses, 8 credits in communication program courses, 8 credits in electives, a 2-credit practicum, and a 2-credit culminating experience.

MASTER OF PUBLIC HEALTH IN THE FIELD OF GLOBAL HEALTH EPIDEMIOLOGY AND DISEASE CONTROL

Program Director J. Tielsch

Mission

The mission of the Global Health Epidemiology and Disease Control Program is to prepare global health professionals to develop and rigorously appraise programs for the control of infectious and chronic diseases as well as injuries. Students acquire the skills needed to improve program performance, thereby helping to ensure optimum investment of scarce resources in low and middle income countries and in underserved communities around the world.

Goals

The goals of the Global Health Epidemiology and Disease Control Program are to prepare students to be applied epidemiologists in public health program implementation and evaluation to:

- Use common epidemiological tools to generate evidence on interventions targeted to infectious and chronic disease control.
- Work within real-world settings to strengthen methodological rigor of program priority setting and evaluation.
- Generate and use data for assessing burden of disease, determining efficacy and effectiveness of interventions for infectious and chronic diseases.
- Translate evidence to support program and health systems improvements and policy recommendations.
- Communicate the results of research to a broad set of constituents.

COMPETENCIES

By the end of their MPH, Global Health Epidemiology and Disease Control program, students should be able to:

- Apply epidemiological and multi-disciplinary concepts to identify, analyze, and address global health challenges including burden of illness and the determinants and distribution disease in populations.

Relevant courses:

PUBH 6247	Design of Health Studies
PUBH 6400	Global Health Frameworks

- Select the appropriate qualitative and/or quantitative methods depending on the specific research or programmatic need and apply underlying principles to design and conduct such studies including observational and experimental designs, screening programs, and public health surveillance.

Relevant courses:

PUBH 6247	Design of Health Studies
PUBH 6249	StatPackages/DataMgt&DataAnlys
PUBH 6252	Advanced Epidemiology Methods
PUBH 6441	Global Health Organizations and Regulations

- Apply appropriate data analysis methods and interpret the results from epidemiological studies.

Relevant courses:

PUBH 6247	Design of Health Studies
PUBH 6249	StatPackages/DataMgt&DataAnlys
PUBH 6252	Advanced Epidemiology Methods

- Interpret and critique research and best practices to inform the development of evidence-based solutions for global health challenges.

Relevant courses:

PUBH 6247	Design of Health Studies
PUBH 6252	Advanced Epidemiology Methods
PUBH 6411	Global Health Qualitative Research Methods
PUBH 6486	Global Health Programs and Approaches to the Control of Infectious Diseases
PUBH 6492	Global Health Programs and Approaches to the Control of Chronic Diseases

- Communicate evidence on global health topics to a variety of audiences including technical experts, policymakers, lay audiences, and other relevant stakeholders.

Relevant courses:

PUBH 6014	Practicum
PUBH 6015	Culminating Experience
PUBH 6400	Global Health Frameworks

- Work in a multidisciplinary team to identify and address the ethical issues of global health programs, policies and research.

Relevant courses:

PUBH 6400	Global Health Frameworks
PUBH 6416	Ethical and Cultural Issues in Global Health Research and Programs

- Engage with diverse individuals, organizations, and communities with respect for different values, beliefs and practices.

Relevant course:

PUBH 6416	Ethical and Cultural Issues in Global Health Research and Programs

- Analyze multilevel determinants of problems in global health that form the basis for disease control strategies and interventions.

Relevant courses:

PUBH 6400	Global Health Frameworks
PUBH 6486	Global Health Programs and Approaches to the Control of Infectious Diseases
PUBH 6492	Global Health Programs and Approaches to the Control of Chronic Diseases

REQUIREMENTS

The following requirements must be fulfilled: 45 credits including, 15 credits in core courses, 18 credits in program specific courses, 8 credits in elective courses, a 2-credit practicum, and a 2-credit culminating experience.

MASTER OF PUBLIC HEALTH IN THE FIELD OF GLOBAL HEALTH POLICY

Program Director C. Santos-Burgoa

Mission

The mission of the master of public health in the field of global health policy degree program is to prepare global health professionals in the disciplines and perspectives necessary to contribute to the development, implementation, and evaluation of policies at the local, national, regional, and international levels that will improve the health and well-being of underserved populations in low and middle income settings abroad and within the United States.

Goals

The goals of the Global Health Policy program are to prepare students to:

- Assess the burden and determinants of health problems in an underserved low or middle income population.
- Assess and evaluate the relevant policy issues appropriate to addressing these health problems using a multidisciplinary approach.
- Assume leadership roles in the policy development process with the goal of maximizing the performance and financial integrity of the health system.

COMPETENCIES

By the end of their MPH, Global Health Policy program, students should be able to:

- Apply multi-disciplinary perspectives to identify, analyze and address global health challenges.

Relevant courses:

PUBH 6400	Global Health Frameworks
PUBH 6410	Global Health Study Design
PUBH 6411	Global Health Qualitative Research Methods

- Distinguish between qualitative and quantitative methods and select the appropriate method depending on the specific research or programmatic need.

Relevant courses:

PUBH 6411	Global Health Qualitative Research Methods
PUBH 6412	Global Health Quantitative Research Methods

- Interpret and critique research and best practices to inform the development of evidence-based solutions for global health challenges.

Relevant courses:

PUBH 6400	Global Health Frameworks
PUBH 6410	Global Health Study Design
PUBH 6412	Global Health Quantitative Research Methods

- Communicate public health evidence on global health topics to a variety of audiences, such as technical experts, policymakers, lay audiences, and other relevant stakeholders.

Relevant courses:

PUBH 6412	Global Health Quantitative Research Methods

- Identify and address the ethical issues of global health programs, policies and research.

Relevant courses:

PUBH 6416	Ethical and Cultural Issues in Global Health Research and Programs

- Engage with diverse individuals, organizations, and communities with respect for different values, beliefs and practices.

Relevant courses:

PUBH 6416	Ethical and Cultural Issues in Global Health Research and Programs

- Explain multilevel determinants of problems in Global Health and the basis for strategies and interventions.

Relevant courses:

PUBH 6400	Global Health Frameworks

- Describe the governance and institutional landscape of global health.

Relevant courses:

PUBH 6400	Global Health Frameworks

- Demonstrate professionalism in practice, research and in communication activities.

Relevant courses:

PUBH 6410	Global Health Study Design
PUBH 6411	Global Health Qualitative Research Methods
PUBH 6416	Ethical and Cultural Issues in Global Health Research and Programs

- Apply quantitative and qualitative tools and concepts to develop global health policy analyses for different audiences.

Relevant courses:

PUBH 6305	Fundamentals for Health Policy: Public Health and Health Care
PUBH 6315	Intro-Health Policy Analysis

- Analyze major multi-institutional and multi-sectoral initiatives in global health and make recommendations from an organizational and financial perspective on how they might be strengthened. ·

Relevant courses:

PUBH 6441	Global Health Organizations and Regulations
PUBH 6442	Comparative Global Health Systems

- Describe how health system performance is affected by various approaches to health system organization, financing and workforce development.

Relevant courses:

PUBH 6440	Global Health Economics and Finance
PUBH 6442	Comparative Global Health Systems

- Assess the historical and ongoing development of international health regulations and intellectual property rights and how they could be addressed through national and international policies. Understand the role they play in controlling a major epidemic or health emergency.

Relevant courses:

PUBH 6441	Global Health Organizations and Regulations
PUBH 6443	Global Health Agreements and Conventions

- Assess the relationship between the protection, promotion, and progressive realization of human rights and global health outcomes.

Relevant courses:

PUBH 6441	Global Health Organizations and Regulations
PUBH 6443	Global Health Agreements and Conventions

- Describe the economic challenges faced by low and middle-income countries regarding health status of their populations and health care delivery options and how different policy approaches can be used to address these challenges.

Relevant courses:

PUBH 6440	Global Health Economics and Finance
PUBH 6442	Comparative Global Health Systems

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 15 credits in core courses, 21 credits in program-specific courses, 5 credits in elective courses, a 2-credit practicum, and a 2-credit culminating experience.

Program Requirements

MASTER OF PUBLIC HEALTH IN THE FIELD OF GLOBAL HEALTH PROGRAM DESIGN, MONITORING, AND EVALUATION

Program Director S. Baird

Mission

The mission of the Global Health Program Design, Monitoring, and Evaluation (DME) degree program is to prepare the next generation of global health professionals to implement and evaluate global health programs and initiatives. This program aims to train professionals who use evidence to improve

performance of and investments in global health programs that will improve the health and well-being of populations in low and middle income settings abroad and within the United States.

Goals

The goals of the Global Health Design, Monitoring, and Evaluation program are to prepare students to be skilled evaluators and practitioners who know how to:

- Utilize the full range of evaluation design options to generate the best evidence on how well a program is working, how it is working, and why;
- Work within real-world confines to strengthen methodological rigor of evaluation and program implementation;
- Use theory to ground program design, implementation, and evaluation;
- Generate and use data for management decision-making; and
- Translate evidence into implementation improvements and policy recommendations.

COMPETENCIES

By the end of the MPH, Global Health Program Design, Monitoring, and Evaluation program, students should be able to:

- Apply multi-disciplinary perspectives to identify, analyze and address global health challenges.

Relevant courses:

PUBH 6400	Global Health Frameworks
PUBH 6410	Global Health Study Design
PUBH 6411	Global Health Qualitative Research Methods

- Distinguish between qualitative and quantitative methods and select the appropriate method depending on the specific research or programmatic need.

Relevant courses:

PUBH 6411	Global Health Qualitative Research Methods
PUBH 6412	Global Health Quantitative Research Methods

- Interpret and critique research and best practices to inform the development of evidence-based solutions for global health challenges.·

Relevant courses:

PUBH 6400	Global Health Frameworks
PUBH 6410	Global Health Study Design
PUBH 6412	Global Health Quantitative Research Methods

- Communicate public health evidence on global health topics to a variety of audiences, such as technical experts, policymakers, lay audiences, and other relevant stakeholders.

Relevant courses:

PUBH 6412	Global Health Quantitative Research Methods

- Identify and address the ethical issues of global health programs, policies and research.

Relevant courses:

PUBH 6416	Ethical and Cultural Issues in Global Health Research and Programs

- Engage with diverse individuals, organizations, and communities with respect for different values, beliefs and practices.·

Relevant courses:

PUBH 6416	Ethical and Cultural Issues in Global Health Research and Programs

- Explain multilevel determinants of problems in Global Health and the basis for strategies and interventions.

Relevant courses:

PUBH 6400	Global Health Frameworks

- Describe the governance and institutional landscape of global health.

Relevant courses:

PUBH 6400	Global Health Frameworks

- Demonstrate professionalism in practice, research and in communication activities. ·

Relevant courses:

PUBH 6410	Global Health Study Design
PUBH 6411	Global Health Qualitative Research Methods
PUBH 6416	Ethical and Cultural Issues in Global Health Research and Programs

- Utilize epidemiological data, program theory, programmatic evidence, and health systems and

policy contextual information for the design of effective global health interventions and programs, as well as their monitoring and evaluation.

Relevant courses:

PUBH 6435	Global Health Program Development and Implementation
PUBH 6501	Program Evaluation

- Compare and select monitoring frameworks and evaluation methods according to specified purposes for each.

Relevant courses:

PUBH 6435	Global Health Program Development and Implementation
PUBH 6501	Program Evaluation

- Identify frameworks for the design of culturally acceptable and contextually feasible global health interventions and evaluations.

Relevant courses:

PUBH 6435	Global Health Program Development and Implementation

- Apply research, leadership, and communication skills to support the design, implementation, evidence and policy cycle.

Relevant courses:

PUBH 6435	Global Health Program Development and Implementation
PUBH 6436	Global Health Program Management and Leadership

REQUIREMENTS

The following requirements must be fulfilled: 32 credits in required courses, 9 credits in elective courses, and 4 credits in practicum and culminating experience.

Practicum and culminating experience	
PUBH 6014	Practicum
PUBH 6015	Culminating Experience

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

DOCTOR OF PUBLIC HEALTH IN THE FIELD OF GLOBAL HEALTH

Program Director A. Roess

Mission

The doctor of public health in the field of global health (Dr.PH.) degree program is the terminal degree in the professional discipline of public health. Consistent with this advanced professional orientation, the Dr.PH. program prepares future public health leaders to apply critical thinking skills and rigorous research methods to the complex practical problems facing practitioners and policy-makers in public health practice. The program is designed to both follow and promote the principles of academic public health practice. As noted in a recent ASPH publication, public health practice is the strategic, organized, and interdisciplinary application of knowledge, skills, and competencies necessary to perform essential public health services and other activities to improve the populations' health. Academic public health practice is the applied, interdisciplinary pursuit of scholarship in the field of public health. Recent events sharply illustrate the need for public health professionals who can provide the leadership to expand and strengthen the US and global public health systems. The Dr.P.H program is designed to prepare professionals with skills to provide this leadership.

From the combination of course work and the implementation of the knowledge in the context of a thesis project in outstanding international placements, the Dr.P.H. degree program in Global Health will enable professionals to develop innovative approaches and ability to negotiate the complex interrelationship between health and political, economic, and human development.

Goals

The Dr.P.H. graduate will be prepared to assume an advanced level of leadership in global health, in the context of health research as well as implementation programs in an international setting.

Admissions Requirements

The Doctor of Public Health Program is designed for mid-career professionals seeking to become public health leaders. Applicants who have completed an M.P.H. degree from a Council of Education for Public Health (CEPH) accredited program are strongly preferred for admission to the Dr.P.H. program. Alternatively, applicants with a master's degree in another field may indicate their relevant training, research experience, or educational background comparable to the M.P.H. Doctoral applicants admitted without an M.P.H. will be required to take additional course work at the graduate level that does not apply toward the minimum 48 credits required for the Dr.P.H. Qualified applicants with degrees from institutions in foreign countries are also eligible for admission. All applicants must submit scores from the Graduate Record Exam (GRE) taken within five years of the date of application. Because admission to this program is highly selective, successful applicants have competitive academic credentials and substantial prior public health professional work experience related to the specialty field to which they are applying.

Program Policies and Procedures

For program policies and procedures, please refer to the Doctor of Public Health Handbook and other resources located on Dr.P.h. in the field of Global Health website (http://publichealth.gwu.edu/programs/global-health-drph).

REQUIREMENTS

Program requirements:

Code	Title	Credits
20 credits of required foundational courses and research methods		

PUBH 8401	Foundations in Public Health Leadership & Practice
PUBH 8402	Leadership in Public Health Practice & Policy
PUBH 8416	Study Design & Evaluation Methods
PUBH 8418	Applied Statistical Analysis
PUBH 8417	Qualitative Research Methods and Analysis
PUBH 8419	Measurement in Public Health & Health Services
PUBH 8420	Advanced Analysis & Dissemination
6 credits required global health specialty field courses	
PUBH 8406	Advanced Topics: Health Research in the Global Arena
PUBH 8407	Advanced Topics: Health Leadership in International Settings
Elective specialty field courses (sample list)	
7-10 credits from the following:	
PUBH 6123	Toxicology: Applications for Public Health Policy
PUBH 6128	Global Environmental and Occupational Health
PUBH 6242	ClinicalEpid&Decision Analysis
PUBH 6244	Cancer Epidemiology
PUBH 6245	InfectiousDisease Epidemiology
PUBH 6250	Epidemiology of HIV/AIDS
PUBH 6259	Epid Surveillance/PublicHealth
PUBH 6262	Intro-Geog Information Systems
PUBH 6263	Advanced GIS
PUBH 6270	HIV/AIDS Surveillance
PUBH 6430	Theories for Global Health Communication Interventions
PUBH 6431	Global Health Communication Strategies and Skills
PUBH 6435	Global Health Program Development and Implementation
PUBH 6440	Global Health Economics and Finance
PUBH 6441	Global Health Organizations and Regulations
PUBH 6442	Comparative Global Health Systems
PUBH 6443	Global Health Agreements and Conventions
PUBH 6481	Global Mental Health
PUBH 6482	International Food and Nutrition Policy
4 credits of professional leadership courses	
PUBH 8413	Research Leadership
PUBH 8415	Instructional Leadership
Dissertation	
8-11 credits of dissertation preparation and dissertation	
PUBH 8422	Advanced Health Care and Public Health Research Design
Before enrolling in PUBH 8422, students must have completed the comprehensive examination successfully, obtained the approval of the Program Director, and presented a one-page abstract	
PUBH 8423	Dissertation Research

Graduation Requirements

1. Graduate credit requirement: 48 graduate credits are required.
2. Course requirements: successful completion of the foundational and research methods courses. The program-specific specialty field courses and the professional leadership credits are required.
3. Comprehensive exam: Once the course of study is completed, students are required to pass the comprehensive exam to be officially admitted to the candidacy phase.
4. Dissertation: PUBH 8422 Advanced Health Care and Public Health Research Design plus 6-9 dissertation research credits are required. Once the proposal has been successfully defended and dissertation research credits have been met, the oral defense may be scheduled.
5. Grade point requirement: A 3.0 (B average) overall grade-point average is required.
6. Time limit requirement: The degree must be completed within seven (7) years.
7. No transfer credits are accepted.

HEALTH POLICY AND MANAGEMENT

In early 2015, the Department of Health Policy and the Department of Health Services Management and Leadership consolidated to create a larger, integrated department that is even better prepared to lead education, research, and practice efforts related to public health policy, health care policy, and health services management. This positive evolution creates new and dynamic synergies for faculty, staff, students, and alumni, and maximizes our education and research potential.

The mission of the Department of Health Policy and Management—a practice-oriented academic community in Washington, D.C.—is to improve health and health systems locally, nationally, and globally through: excellence in education; innovative scholarship; applied research that is translated into practice and policy; and the promotion of transformational leadership that advances health policy and health services management.

We are committed to:

- Preparing graduates who will become innovative and effective leaders in public health and health policy, health services delivery, and health system transformation.
- Conducting rigorous multidisciplinary research that addresses significant health challenges, is objective, and is translated to inform and affect health policy, health care management, and public health practice.
- Being a trusted resource for shaping and advancing health policy and management practices because of our research integrity and rigor, the real-world leadership experiences of our faculty and staff, and our exceptional students.
- Leveraging our unique location in Washington, DC which allows for strong collaborations with health policy and management leaders and practitioners.
- Improving the health and health care of under-served and vulnerable populations.
- Promoting and learning from the diversity among our faculty, staff, students, and alumni in terms of background, experience, and thought.

GRADUATE

Master's programs

- Master of Health Administration (p. 968)
- Master of Health Administration – online/executive program (p. 971)
- Master of Public Health in the field of health policy (p. 972)
- Master of Science in the field of health policy (p. 978)
- Master of Science in the field of management of health informatics analytics (p. 979)
- Health Services Administration Specialist (p. 979)

Doctoral programs

- Doctor of Philosophy in the field of public policy and administration (health policy track) (p. 980)
- Doctor of Public Health in the field of health policy (p. 981)

CERTIFICATE

- Graduate certificate in health administration generalist (p. 982)
- Graduate certificate in health policy (p. 983)
- Graduate certificate in long-term care (p. 984)

FACULTY

University Professor V.N. Gamble

Professors R.E. Burke, L. Chun-lee Ku, L.R. Deyton, A. Dor, L.H. Friedman, J.K. Greene, K.Horton *(Research)*, T.A. LaVeist *(Chair),* J.W. Levi, F.S.M. Mullan, M.J. Regenstein, J.J. Reum *(Emeritus),* S. Rosenbaum, J.L. Scott, J. P. Wisdom

Associate Professors T.L.Burke, L. Cartwright-Smith (*Research),* J.Fischer (*Research),* S.L. Frehywot (*Research),* M.M. Goldstein *(Teaching)*, L. Helmchen, R.L. Katz, A.R. Markus, M.McCarthy, P. Pittman, N.Seiler (*Research),* P.W. Shin, A.M.Stewart, J.B. Teitelbaum, J.H.Thorpe, S.F. Wood

Assistant Professors M. Harty (*Research),* S. Li, L. Masselink, K.H. Mead, W. Psek

Teaching Instructors S. Hanna

Aduncт Instructors T. Jazweicki, P.Z. Marghella, N. McKelvey

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

- Health Services Management and Leadership (HSML) (p. 1250)
- Public Health (PUBH) (p. 1420)

MASTER OF HEALTH ADMINISTRATION

Program Director L. Friedman

Mission

The master of health administration degree program will develop leaders who possess the values, knowledge, and skills to achieve optimal delivery of healthcare.

Overview

Since its founding in 1959, the master of health administration program (M.H.A.) has offered education in health services administration to help meet the growing need for skilled executives to manage health-related organizations and programs. Because it recognizes and responds to the fast-paced, dynamic changes occurring in the industry today, the program is well-positioned to prepare not only health care managers, but the health care leaders of tomorrow. An M.H.A. degree from the Department of Health Policy and Management incorporates business and medical informatics training, knowledge of health care systems, management theory, ethics, law, and policy, critical values in decision making, and much more.

The program's special strengths include an emphasis on experiential learning and community service, distinguished faculty, research collaborations, and relationships with policy-making and health care organizations in Washington, D.C. Active alumni (p. 968) and student (http://publichealth.gwu.edu/projects/hsml-student-association) associations foster mentoring, networking, and other professional development opportunities.

The curriculum focuses on leadership and strategic management trends, quality and performance improvement, leadership skills, community health planning and advocacy, organizational theory, finance, and health law. The program also offers residency and internship opportunities that allow students to apply their classroom knowledge in healthcare settings. Numerous seminar, conference, and networking opportunities are made possible through relationships with professional organizations and associations.

Goals

Graduates of the program will be able to:

- Effectively manage organizational change and promote organizational and clinical excellence.
- Manage health services organizations under alternative financing mechanisms.
- Lead and manage human resources in diverse organizational environments.
- Manage information resources to assist in effective decision making and clinical management.
- Use statistical, quantitative, and economic analyses in decision making.
- Have the skills to improve both business and clinical outcomes of health services organizations.

COMPETENCIES

Broadly defined, the goal of the Master of Health Administration program is to provide health care delivery organizations with talented graduates who possess the knowledge, skills, and attitudes to deliver health services in the most effective and efficient manner possible. The Master of Health Administration degree is designed to provide students with the ability to develop and demonstrate leadership, communication and relationship management, business skills and knowledge, professionalism and healthcare knowledge applied across the widest possible spectrum of health care delivery organizations. Upon completion of the Master of Health Administration graduates will be competent to:

1. Lead and manage others, plan and implement change and engage in honest self-assessment.

   Relevant courses:

HSML 6203	Introduction to Health Management
HSML 6213	Health Services, Marketing & Planning
HSML 6216	HumanResourcesMgt&OrgBehavior
HSML 6218	Sem-HlthServicesMgt&Leadership
HSML 6231	Management-Acute Care Hospital
HSML 6237	Managing/SkilledNursngFacility
HSML 6238	Ambulatory Care Management

2. Enhance and improve communication and relationship management within interpersonal communication, verbal and written communication, and team-based processes.

   Relevant courses:

HSML 6202	Intro/Health Services Delivery
HSML 6203	Introduction to Health Management
HSML 6204	Quality&PerformanceImprovement
HSML 6212	CommunityHealth Mgt & Advocacy
HSML 6213	Health Services, Marketing & Planning
HSML 6216	HumanResourcesMgt&OrgBehavior
HSML 6218	Sem-HlthServicesMgt&Leadership
HSML 6231	Management-Acute Care Hospital

HSML 6237	Managing/SkilledNursngFacility

3. Demonstrate the breadth of core business skills and knowledge in the following areas:
   - Solving business problems and decision making and project management.

     Relevant courses:

HSML 6203	Introduction to Health Management
HSML 6204	Quality&PerformanceImprovement
HSML 6213	Health Services, Marketing & Planning
HSML 6218	Sem-HlthServicesMgt&Leadership
HSML 6231	Management-Acute Care Hospital
HSML 6246	Service Line & Project Mgt

   - Quantitative skills, financial management, economic analysis and information and technology management.

     Relevant courses:

HSML 6206	QuanMethds&Epid/HealthServices
HSML 6207	HealthServicesInfoApplications
HSML 6208	Medical Informatics
HSML 6209	Health Services Finance
HSML 6210	Hlth Serv Financl Applications
HSML 6211	Health Economics

   - Legal principles, marketing, quality improvement, organizational dynamics, and governance.

     Relevant courses:

HSML 6203	Introduction to Health Management
HSML 6204	Quality&PerformanceImprovement
HSML 6213	Health Services, Marketing & Planning
HSML 6215	Health Law for Managers
HSML 6231	Management-Acute Care Hospital
HSML 6237	Managing/SkilledNursngFacility
HSML 6238	Ambulatory Care Management

4. Apply the core elements of ethics and professionalism to improve management practice within health care delivery organizations.

   Relevant courses:

HSML 6202	Intro/Health Services Delivery
HSML 6203	Introduction to Health Management
HSML 6212	CommunityHealth Mgt & Advocacy
HSML 6218	Sem-HlthServicesMgt&Leadership

5. Apply appropriate knowledge of healthcare issues and trends, healthcare personnel, standards and regulations and population health, and assessment to optimize the delivery of services.

   Relevant courses

HSML 6202	Intro/Health Services Delivery
HSML 6203	Introduction to Health Management
HSML 6204	Quality&PerformanceImprovement
HSML 6211	Health Economics
HSML 6212	CommunityHealth Mgt & Advocacy
HSML 6215	Health Law for Managers
HSML 6231	Management-Acute Care Hospital
HSML 6236	Aging&Disability:Needs&Srvcs
HSML 6245	Disaster Management for Healthcare Organizations
PUBH 6004	Environmental and Occupational Health in a Sustainable World

REQUIREMENTS

Prerequisites for admission into the M.H.A. program include an undergraduate course in introductory accounting and an introductory course in statistics earned with a minimum grade of *B*.

The following requirements must be fulfilled: 50 credits, including 31 credits in core courses, a 2-credit health policy selective course, 8-14 credits in elective courses, and 3-9 credits in field experience.

Students select one of five focus areas. The following two focus areas require 9 credits in a residency to fulfill the field experience requirements: acute and ambulatory care management and post-acute care management (including long-term care). The following three focus areas require 3 credits in an internship to fulfill the field experience requirement: information systems and financial management;

operations management; and strategic management and policy.

Code	Title	Credits
Core		
HSML 6202	Intro/Health Services Delivery	
HSML 6203	Introduction to Health Management	
HSML 6204	Quality&PerformanceImprovement	
HSML 6206	QuanMethds&Epid/HealthServices	
HSML 6207	HealthServicesInfoApplications	
HSML 6208	Medical Informatics	
HSML 6209	Health Services Finance	
HSML 6210	Hlth Serv Financl Applications	
HSML 6211	Health Economics	
HSML 6212	CommunityHealth Mgt & Advocacy	
HSML 6213	Health Services, Marketing & Planning	
HSML 6215	Health Law for Managers	
HSML 6216	HumanResourcesMgt&OrgBehavior	
HSML 6218	Sem-HlthServicesMgt&Leadership	
PUBH 6004	Environmental and Occupational Health in a Sustainable World	
Health policy elective		
One health policy course from the following:		
PUBH 6315	Intro-Health Policy Analysis	
PUBH 6325	Federal Policymaking and Policy Advocacy	
PUBH 6356	State Health Policy	
PUBH 6366	Health Care Corporate Compliance	
PUBH 6368	Law, Medicine, and Ethics	
PUBH 6374	Pharmaceutical Policy	
PUBH 6378	HIV Policy in the U.S.	
PUBH 6384	Health Care Quality and Health Policy	
PUBH 6399	Topics in Health Policy	
Program-specific electives		
Students whose focus area requires a residency select 8 credits from the following; students whose focus area requires an internship select 14 credits:		
HSML 6222	GroupLdrship&TeamFacilitation	
HSML 6231	Management-Acute Care Hospital	
HSML 6236	Aging&Disability:Needs&Srvcs	
HSML 6237	Managing/SkilledNursngFacility	
HSML 6238	Ambulatory Care Management	
HSML 6244	SupplyChainMgt/HealthServices	
HSML 6245	Disaster Management for Healthcare Organizations	
HSML 6246	Service Line & Project Mgt	
HSML 6247	Consulting in Health Care	
HSML 6270	Research-Health Services Admin (Independent Study)	
HSML 6285 & HSML 6286	Readings-Health Services Mgt and Readings-Health Services Mgt	
HSML 6299	Topics in HSML	
Field experience:		
Students select either the residency or internship focus area.		
Students pursuing the residency focus area in acute and ambulatory care management or post-acute care management (including long term care) take the following three courses for a total of 9 credits:		
HSML 6273	Residency	
HSML 6274	Residency	
HSML 6275	Residency	
Students pursuing an internship in one of the following areas take HSML 6271 Field Problem Studies for 3 credits.		
Information Systems and Financial Management		
Operations Management		
Strategic Management and Policy		

Graduation Requirements

1. Graduate Credit Requirement: 50 graduate credits are required.
2. Grade Point Requirement: A 3.0 (B average) overall grade point average is required.
3. Time Limit Requirement: The degree must be completed within five years.

4. Transfer Credit Policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the MHA, upon approval. Up to 18 credits may be transferred to the MHA from the Health Administration Generalist Certificate. Credits must have been earned from a CAHME accredited institution in the last 3 years with a grade point average of 3.0 or better.
5. Residency or Internship Requirement: Successful completion of a nine credit residency or three-credit internship.
6. Prerequisites: Undergraduate course in accounting and statistics with a grade of B or better.

MASTER OF HEALTH ADMINISTRATION – ONLINE/ EXECUTIVE PROGRAM

Program Director L. Friedman

Mission

The Executive Master of Health Administration (MHA@GW) degree program will develop leaders who possess the values, knowledge, and skills to achieve optimal delivery of healthcare.

Overview

The MHA@GW curriculum focuses on developing the leadership and ethical skills needed for persons who seek to create highly effective healthcare organizations. An MHA@GW degree from the Department of Health Policy and Management incorporates business and medical informatics training, knowledge of health care systems, law, and policy, critical values in decision making, and much more.

The Department's special strengths include an emphasis on experiential learning and community service, distinguished faculty, research collaborations, and relationships with policy making and health care organizations in Washington, DC. Active alumni (http://publichealth.gwu.edu/services/alumni/HSML-alumni) and student (http://publichealth.gwu.edu/projects/hsml-student-association) associations foster mentoring, networking, and other professional development opportunities.

Building on our 55 years of experience preparing health care leaders and our recent success in e-learning, the MHA@GW degree is designed for adult learners who possess either clinical or administrative experience in healthcare delivery. The MHA@GW is designed to be completed in two years but can be completed in five years. Classes are taught in a hybrid model combining online classes (ten weeks in length) and executive format intensive classes.

The MHA@GW curriculum focuses on two main themes. The first is developing the leadership and ethical skills needed for persons who seek to create highly effective healthcare organizations. Leadership and ethics will be taught throughout the curriculum. Eight online, integrated learning modules include: management and strategy; informatics and decision-science; finance; community and public health; economics and quantitative methods; quality improvement; law and policy; and a capstone seminar. The culminating activities for the MHA@GW are a field-based research project and completion of a leadership portfolio.

Students entering the program are expected to have undergraduate courses in financial accounting and statistics with a grade of *B* or better.

Goals

Graduates of the program will be expected to:

- Effectively manage organizational change and promote organizational and clinical excellence;
- Manage health services organizations under alternative financing mechanisms;
- Lead and manage human resources in diverse organizational environments;
- Manage information resources to assist in effective decision making and clinical management;
- Use statistical, quantitative, and economic analyses in decision making;
- Have the skills to improve both business and clinical outcomes of health services organizations; and
- Develop the skills to consistently use ethical decision making practices

COMPETENCIES

The goal of health services management and leadership is to provide health care delivery organizations with talented graduates who possess the knowledge, skills and attitude to deliver health services in the most effective and efficient manner possible. The Executive Master of Health Administration (MHA@GW) degree is designed to provide students with the ability to develop and demonstrate leadership, communication and relationship management, business skills and knowledge, professionalism and healthcare knowledge applied across the widest possible spectrum of healthcare delivery organizations. Upon completion of the MHA@GW in Health Services Management and Leadership, students will demonstrate competence to:

1. Demonstrate leadership by leading and managing others, planning and implementing change and engaging in honest self-assessment. Related courses: Modules 1 and 8 and immersions 1, 2 and 4
2. Enhance and improve communication and relationship management within interpersonal communication, verbal and written communication, and team based processes. Related courses: All modules, immersions, organizational research project and final portfolio
3. Demonstrate the breadth of core business skills and knowledge in the following areas:

4. Solving business problems and decision making, and project management. Related courses: Modules 1, 6 and 8 and immersion 2
5. Quantitative skills, financial management, economic analysis and information and technology management. Related courses: Modules 2, 3 and 5.
6. Legal principles, marketing, quality improvement, organizational dynamics and governance. Related courses: Modules 1, 6, 7, 8 and immersion 3
7. Apply the core elements of ethics and professionalism to improve management practice within health care delivery organizations. Related courses: All modules and immersions
8. Apply appropriate knowledge of healthcare policy issues and trends, healthcare personnel, standards and regulations and population health and assessment to optimize the delivery of services. Related courses: Module 4 and immersion 3.

REQUIREMENTS

The following requirements must be fulfilled: 50 credits in required courses.

Code	Title	Credits
HSML 6255	Leadership and Ethics I	
HSML 6256	Leadership and Ethics II	
HSML 6258	Health System Analysis	
HSML 6264	Healthcare Mgmt & Strategy	
HSML 6265	Medical Informatics and Decision Management	
HSML 6266	Healthcare Financial Management	
HSML 6267	Community Engagement	
HSML 6268	Health Economics & Quantitative Methods	
HSML 6269	Quality and Performance Improvement	
HSML 6280	Health Law and Policy	
HSML 6281	Systems Thinking and Learning	
HSML 6282	Organizational Research Project 1	
HSML 6283	Organization Research Project 2	

Visit the MHA@GW website (http://mha.gwu.edu) for additional information.

Graduation Requirements

1. Graduate Credit Requirement: 50 graduate credits are required.
2. Grade Point Requirement: A 3.0 (B average) overall grade point average is required.
3. Time Limit Requirement: The degree must be completed within five years.

MASTER OF PUBLIC HEALTH IN THE FIELD OF HEALTH POLICY

Program Director L. Cartwright-Smith

Practicum Directors L. Cartwright-Smith, M. Malcarney

Mission Statement

The Department of Health Policy and Management of the Milken Institute School of Public Health is an intellectual and practice-oriented community in the nation's capital dedicated to advancing innovative and effective health policy education, research, and service to improve public health and health services domestically and globally.

We are committed to:

- Offering a cutting-edge, multidisciplinary curriculum that provides students with deep content knowledge and the analytic, communication, and professional skills needed to be the next generation of health policy leaders.
- Conducting rigorous multidisciplinary research that addresses significant health challenges, is objective, and is translated to inform and impact health policy and public health practice.
- Being a trusted resource for shaping and advancing health policy options because of our research rigor, the real-world health policy leadership experiences of our faculty and staff, our deep expertise regarding a wide range of policy issues, and our exceptional students.
- Leveraging our unique location which allows for strong collaborations with health policy leaders and practitioners in Washington, D.C.
- Improving the health and health care of underserved and vulnerable populations.
- Learning from the diversity among our faculty, staff, and students in terms of background, experience, and thought.

Overview

The Department of Health Policy and Management is the home for health policy studies and research at the Milken Institute School of Public Health (SPH). The Department focuses on virtually all facets of U.S. health policy related to both public health and health services, and emphasizes preparing students to understand and analyze health policy matters in a broad, cross-cutting, and real-world context. Among schools of public health, the Milken Institute SPH Department of Health Policy and Management is unique, having been created to take maximum advantage of its location in Washington, D.C., the nation's health policy-making epicenter. The M.P.H. in Health Policy is for students who wish to develop in-depth policy

analysis skills for use in various practice settings, including both federal and state levels of government, private-sector health policy consulting, and not-for-profit advocacy. Additionally, this program is available to GW law students (the J.D./M.P.H. and LL.M./M.P.H. programs), lawyers seeking to develop expertise in all facets of health policy and practice, and to GW medical students (the M.D./M.P.H. and P.A./M.P.H. programs) who wish to enhance their clinical training with a thorough understanding of health policy.

COMPETENCIES

A. Knowledge Domain: Graduates of the program will have a thorough understanding of public health and health care system issues, specifically the following areas:

- The various theories of policymaking and politics.

Related courses:

PUBH 6015	Culminating Experience
PUBH 6315	Intro-Health Policy Analysis
PUBH 6320	Advanced Health Policy Analysis
PUBH 6325	Federal Policymaking and Policy Advocacy

- Comparative models of structuring and financing public health activities and health care services, with emphasis on the mechanisms employed in the U.S., including private health insurance, Medicare, Medicaid, managed care, and directly-financed services.

Related courses:

PUBH 6305	Fundamentals for Health Policy: Public Health and Health Care
PUBH 6325	Federal Policymaking and Policy Advocacy
PUBH 6335	Public Health and Law

- The complex systems for delivery of public health and health care services, including facilities, workforce, technology, and the incentives at work in these systems.

Related courses:

PUBH 6305	Fundamentals for Health Policy: Public Health and Health Care
PUBH 6320	Advanced Health Policy Analysis
PUBH 6325	Federal Policymaking and Policy Advocacy

- The methods and mechanisms for determining the benefits of public health and health care services, including measures of health outcomes and quality, measuring population health and disparities, public health surveillance, the use of HIT, and issues of privacy and access to data.

Related courses:

PUBH 6242	ClinicalEpid&Decision Analysis
PUBH 6305	Fundamentals for Health Policy: Public Health and Health Care
PUBH 6310	Statistical Analysis in Health Policy
PUBH 6320	Advanced Health Policy Analysis
PUBH 6335	Public Health and Law

- The systems and activities in place to provide a safety net for vulnerable populations and reduce health disparities, including community health centers, major federal programs, and public health clinics, and related concepts such as uncompensated care and disparities in access.

Related courses:

PUBH 6305	Fundamentals for Health Policy: Public Health and Health Care
PUBH 6325	Federal Policymaking and Policy Advocacy
PUBH 6330	Health Services and Law

- The framework of laws and regulations governing public health and health care services, including constitutional rights and limitations, federal and state statutes, regulations, judicial opinions, and other public policy instruments.

Related courses:

PUBH 6305	Fundamentals for Health Policy: Public Health and Health Care
PUBH 6325	Federal Policymaking and Policy Advocacy
PUBH 6330	Health Services and Law
PUBH 6335	Public Health and Law

B. Analysis Domain: Graduates of the program will have skills in policy analysis, legal analysis, economic analysis, statistical analysis and population health assessment, and will be able to:

Policy Analysis:

- Locate, assess, appropriately use and synthesize information relevant to key issues in health policy, including evidence related to the legislative, regulatory and judicial processes, peer-reviewed literature, and the "gray literature" produced by think tanks, research organizations, and government agencies.

Related courses:

PUBH 6305	Fundamentals for Health Policy: Public Health and Health Care
PUBH 6315	Intro-Health Policy Analysis
PUBH 6320	Advanced Health Policy Analysis
PUBH 6325	Federal Policymaking and Policy Advocacy
PUBH 6330	Health Services and Law
PUBH 6335	Public Health and Law
PUBH 6340	Health Economics and Finance
PUBH 6014	Practicum

- Understand and critique the research design/methods of different types of applied policy analyses, including program evaluations, cost benefit/cost effectiveness studies, and forecasting/simulation models.

Related courses:

PUBH 6242	ClinicalEpid&Decision Analysis
PUBH 6310	Statistical Analysis in Health Policy
PUBH 6315	Intro-Health Policy Analysis
PUBH 6320	Advanced Health Policy Analysis
PUBH 6335	Public Health and Law
PUBH 6340	Health Economics and Finance

- Apply the core elements of a sophisticated policy options analysis to key issues in health care and public health.

Related courses:

PUBH 6014	Practicum
PUBH 6015	Culminating Experience
PUBH 6315	Intro-Health Policy Analysis
PUBH 6320	Advanced Health Policy Analysis
PUBH 6325	Federal Policymaking and Policy Advocacy
PUBH 6335	Public Health and Law
PUBH 6340	Health Economics and Finance

- Design and implement process, impact and economic assessments of health programs and policies that have been implemented.

HSML 6209	Health Services Finance	
HSML 6216	HumanResourcesMgt&OrgBehavior	
HSML 6231	Management-Acute Care Hospital	
HSML 6238	Ambulatory Care Management	
HSML 6246	Service Line & Project Mgt	
HSML 6247	Consulting in Health Care	
Elective courses (9-10 credits):		
A personalized combination of elective courses		
Practicum and culminating experience courses (4 credits):		
PUBH 6014	Practicum	
PUBH 6015	Culminating Experience	

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

MASTER OF SCIENCE IN THE FIELD OF HEALTH POLICY

Program Director K.H. Meade

The master of science in health policy (M.S.) degree program is designed to prepare students to enter academic or research careers in health policy. The program prepares candidates for subsequent doctoral study or for research roles in health-delivery systems, regulatory and other government agencies, or university settings. The program emphasizes individual study design and allows students to focus their training in particular areas of health policy such as long-term care policy, maternal and child health policy, and health services research and policy. The M.S. is also suitable as a terminal degree for students, such as physicians in fellowship training, who wish to gain research skills.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://bulletin.gwu.edu/public-health/health-policy-management/ms/%20http://publichealth.gwu.edu/programs/health-policy-ms) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits, including 31-33 credits in required courses (including thesis) and 15-17 in elective courses.

Code	Title	Credits
Required

Graduation Requirements

1. Graduate Credit Requirement: 48
2. Course Requirements: Successful completion of the core and elective courses, including completion of the Master's Thesis, are required.
3. Grade Point Requirement: A 3.0 (B average) overall grade point average is required.
4. Time Limit Requirement: The degree must be completed within five years.
5. Transfer Credit Policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the MS. Credits must have been earned from an accredited institution in the last 3 years with a grade point average of 3.0 or better.

MASTER OF SCIENCE IN THE FIELD OF MANAGEMENT OF HEALTH INFORMATICS AND ANALYTICS

Program Director S.Hanna

The goal of the master of science in management of health informatics and analytics (MHIA) degree program is to develop leaders who possess the knowledge and skills to achieve optimal delivery of healthcare through the use of information to make sound decisions.

An informatics-related degree from the Department of Health Policy and Management incorporates business and medical informatics training, knowledge of healthcare systems, law and policy, critical values in decision making, and much more. The MHIA is designed for adult students who possess either clinical or administrative experience in health care delivery. Classes are taught in a hybrid model, combining ten-week distance learning modules and executive format, face-to-face immersion classes.

The MHIA curriculum focuses on developing the skills and values needed for persons who seek to create highly effective healthcare organizations and utilize technology to make better healthcare decisions. Culminating activities for MHIA students include a capstone course that gives students the opportunity to develop a practical solution for a major healthcare problem that can be solved using Informatics.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

REQUIREMENTS

The following requirements must be fulfilled: 45 credits in required courses.

HEALTH SERVICES ADMINISTRATION SPECIALIST

Program Director L. Friedman

Mission

The Health Services Administration Specialist degree program will develop leaders who possess the values, knowledge, and skills to achieve optimal delivery of healthcare. The degree is designed for individuals who have earned a post-baccalaureate degree and wish to either change careers by gaining knowledge and skills in health services administration

or to upgrade their formal knowledge and skills in healthcare administration to include the latest advancements in the field.

Applicants must hold a post-baccalaureate degree from an accredited college or university.

REQUIREMENTS

Course Requirements

All Health Services Administration Specialist degree candidates complete 30 graduate credits of approved coursework.

1. Thirty graduate credits are required. The Specialist has one required course: HSML 6270 Research-Health Services Admin (Independent Study). All other courses are chosen in consultation with the program director.
2. The program director must pre-approve all course selections and sequencing by developing a "program of study" with the student prior to initial registration. Specialist candidates must meet with the program director each semester before registration; all changes to the program of study must be approved.
3. The program director may approve up to eight graduate credits that have not been applied to a previous graduate degree as transfer credit into the Specialist degree program. Course(s) must be relevant to the Specialist degree; credit must have been earned from an accredited institution within the past three years with a grade of B, or better.
4. Grade Point Requirement: A 3.0 (B average) overall grade point average, or better, is required.
5. Time Limit Requirement: The degree must be completed within four years.

DOCTOR OF PHILOSOPHY IN THE FIELD OF PUBLIC POLICY AND ADMINISTRATION (HEALTH POLICY TRACK)

Program Director A. Dor

Students in the doctor of philosophy in the field of public policy and administration (health policy track) degree program are prepared to analyze a broad array of health policy issues, such as assessing health and health needs, financing health services, health care reform, global health, care for underserved populations, and long-term care. A multidisciplinary approach to these issues brings together the disciplines of economics, philosophy, sociology, law, public health, and health management.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program webpage (https://tspppa.gwu.edu/phd-field-health-policy) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits

Students who choose this field will be prepared to analyze a broad array of health policy issues. These problems include, for example, assessing health and health needs, financing health services, health care reform, global health, care for underserved populations and long-term care. A multidisciplinary approach to these issues will combine the curricula of economics, philosophy, sociology, law, public health and health management.

DOCTOR OF PUBLIC HEALTH IN THE FIELD OF HEALTH POLICY

Program Director A. Markus

Mission

The doctor of public health (DrPH) health policy specialty field degree program focuses on understanding and learning to apply to complex and real world problems the policy framework of public health and health care. Particular emphasis is placed on areas affecting medically underserved and vulnerable populations. The specialty field allows candidates to work at the nexus of health policy, public health practice, and health services research.

Goals

The goal of the health policy specialty field is to create doctoral-level public health professionals who are uniquely equipped to provide real-world leadership at the national and state levels in all phases of public health, health care, and health policy development and implementation. The objectives of this specialty field are to:

- Provide advanced training on cutting edge issues in health policy;
- Equip candidates with the research and analytic methods to conduct the types of advanced analyses that can make a real difference in health care and public health.

Admissions Requirements

The Doctor of Public Health Program is designed for mid-career professionals seeking to become public health leaders. Applicants who have completed an MPH degree from a Council of Education for Public Health (CEPH) accredited program are strongly preferred for admission to the program. Alternatively, applicants with a master's degree in another field may indicate their relevant training, research experience, or educational background comparable to the MPH. Doctoral applicants admitted without an MPH will be required to take additional course work at the graduate level that does not apply toward the minimum 48 credits required for the DrPH. Qualified applicants with degrees from institutions in foreign countries are also eligible for admission. All applicants must submit scores from the Graduate Record Exam (GRE) taken within five years of the date of application. Because admission

to this program is highly selective, successful applicants must have competitive academic credentials and substantial prior public health professional work experience related to the specialty field to which they are applying.

Program Policies and Procedures

For program policies and procedures, please refer to the Doctor of Public Health Handbook and other resources located on the program website (http://publichealth.gwu.edu/programs/health-policy-drph).

REQUIREMENTS

Code	Title	Credits
22 credits of required foundational and research methods courses		
PUBH 8401	Foundations in Public Health Leadership & Practice	
PUBH 8402	Leadership in Public Health Practice & Policy	
PUBH 8403		
PUBH 8416	Study Design & Evaluation Methods	
PUBH 8417	Qualitative Research Methods and Analysis	
PUBH 8418	Applied Statistical Analysis	
PUBH 8419	Measurement in Public Health & Health Services	
PUBH 8420	Advanced Analysis & Dissemination	
6 credits of required specialty field courses		
PUBH 8404	Advanced Topics: Health Systems and Health Policy Research	
PUBH 8405	Advanced Topics: Health Economics Research	
7 to 10 credits of specialty field courses		
PUBH 6330	Health Services and Law	
PUBH 6325	Federal Policymaking and Policy Advocacy	
PUBH 6335	Public Health and Law	
PUBH 6360	AdvMaternal&ChildHealthPolicy	
PUBH 6362	Civil Rights Issue/Health Care	
PUBH 6376	Primary Health Care Policy	
2 credits of professional leadership courses (minimum of 2 must be Instructional Leadership)		
PUBH 8413	Research Leadership	
PUBH 8415	Instructional Leadership	
8 to 11 credits of dissertation preparation and dissertation		
PUBH 8422	Advanced Health Care and Public Health Research Design	
PUBH 8423	Dissertation Research	

Graduation Requirements

1. Graduate credit requirement: 48 graduate credits are required.
2. Course requirements: successful completion of the foundational and research methods courses. The program-specific specialty field courses and the professional leadership credits are required.
3. Comprehensive exam: Once the course of study is completed, students are required to pass the comprehensive exam to be officially admitted to the candidacy phase.
4. Dissertation: PUBH 8422 Advanced Health Care and Public Health Research Design plus 6-9 dissertation research credits are required. Once the proposal has been successfully defended and dissertation research credits have been met, the oral defense may be scheduled.
5. Grade point requirement: A 3.0 (B average) overall grade-point average is required.
6. Time limit requirement: The degree must be completed within seven (7) years.
7. No transfer credits are accepted.

GRADUATE CERTIFICATE IN HEALTH ADMINISTRATION GENERALIST

Program Director L. Friedman
Program Advisor L. Friedman

The health administration generalist certificate develops health sector leaders, innovators, and managers who are dedicated to advancing the health of local, national, and global communities. Combining the master's degree in one of the Milken Institute School of Public Health academic departments with this graduate certificate uniquely positions graduates for careers that require breadth and depth of knowledge and skills in health services. This certificate program is open to applicants with a master's or higher degree who may wish to gain knowledge and skills in health services management. Applicants without a master's degrees (e.g., public health nursing (RN)) may be eligible depending on their professional

experience in public health. Students work with an advisor to tailor a program suited to the student's individual professional goals.

Specific admission requirements can be found on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs). (http://www.gwu.edu/all-graduate-programs)

Visit the program website (https://publichealth.gwu.edu/programs/health-administration-generalist-certificate) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses; substitutions may be allowed with the advisor's approval.

Required	
18 credits from the following (with advisor approval)	
HSML 6202	Intro/Health Services Delivery
HSML 6203	Introduction to Health Management
HSML 6204	Quality&PerformanceImprovement
HSML 6206	QuanMethds&Epid/HealthServices
HSML 6207	HealthServicesInfoApplications
HSML 6208	Medical Informatics
HSML 6209	Health Services Finance
HSML 6210	Hlth Serv Financl Applications
HSML 6211	Health Economics
HSML 6212	CommunityHealth Mgt & Advocacy
HSML 6213	Health Services, Marketing & Planning
HSML 6215	Health Law for Managers
HSML 6216	HumanResourcesMgt&OrgBehavior
HSML 6218	Sem-HlthServicesMgt&Leadership
PUBH 6004	Environmental and Occupational Health in a Sustainable World
Other courses may be used to fulfill the requirement with advisor approval.	

Graduation Requirements

1. The Program Director/Advisor must pre-approve all course selections and course sequencing by developing a "program of study" prior to the student's initial registration. Graduate Certificate students meet with their advisor each semester before registration. All changes in this program of study must be pre-approved by the Program Director/Advisor.
2. Course Requirements. Since most graduate certificate students are currently enrolled in an MPH program or have previously earned a graduate degree, most course credits will be selected from the program-specific course list. Under no circumstances may a certificate student enroll in fewer than 9 credits of program-specific courses.
3. Grade Point Requirement. A 3.0 (B average) overall grade point average or better is required for the award of the certificate
4. Time Limit Requirement. The certificate must be completed within 2 years.
5. Transfer Credit Policy. The Program Director/Advisor may approve up to 4 graduate credits that have not been applied to a previous graduate degree to be transferred to the Graduate Certificate. The course(s) must be relevant to the Graduate Certificate. Credits must have been earned in the last 3 years from an accredited institution with a grade point of 3.0 or better.

GRADUATE CERTIFICATE IN HEALTH POLICY

Program Director L. Cartwright-Smith

For those seeking a solid foundation in the substance of health policy and the skills of health policy analysis, but who do not wish to undertake the full master of public health degree program, the Milken Institute School of Public Health (SPH) Department of Health Policy and Management offers an 18-credit graduate certificate. Designed to provide both basic and advanced-level skills in policy research and analysis, the program curriculum includes elective course offerings; in consultation with their advisor, students use these options to craft a personalized course of study to fit their particular needs and interests.

The graduate certificate in health policy may be taken on its own; as a supplement to a master of public health degree from a different Milken Institute SPH department or as a supplement to a graduate degree from another school. When pursued as a supplement to the master's degree from a different Milken Institute SPH department, 6 credits from the M.P.H. degree may be counted toward the 18 credits required for the certificate, allowing students to complete both the degree and certificate program simultaneously by taking 57 credits.

Specific admission requirements are shown on the Graduate Program Finder.

Visit the program webpage (http://publichealth.gwu.edu/programs/health-policy-certificate) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 12 credits in required courses and 6 credits in elective courses.

Required

PUBH 6305	Fundamentals for Health Policy: Public Health and Health Care
PUBH 6310	Statistical Analysis in Health Policy
PUBH 6315	Introduction to Health Policy Analysis
PUBH 6320	Advanced Health Policy Analysis
Electives	
Six credits of elective courses in health policy	

Graduation Requirements

- Graduate credit requirement: 18 graduate credits are required.
- The program director/advisor must pre-approve all course selections and course sequencing by developing a "program of study" prior to the student's initial registration. Graduate certificate students meet with their advisor each semester before registration. All changes in this program of study must be pre-approved by the program director/advisor.
- Successful completion of the required on-line CITI human subject research training modules.
- Successful completion of 8 Professional Enhancement hours.
- Grade point requirement: A 3.0 (B average) overall grade point average or better is required.
- Time limit requirement: The certificate must be completed within 2 years.
- Transfer credit policy: The program director/advisor may approve up to 4 graduate credits that have not been applied to a previous graduate degree to be transferred to the graduate certificate. The course(s) must be relevant to the graduate certificate. Credits must have been earned in the last 3 years with a grade point average of 3.0 or better.

GRADUATE CERTIFICATE IN LONG-TERM CARE

Program Director R. Burke

The graduate certificate in long-term care program is designed to prepare students to best meet the needs of a rapidly aging population in the United States by providing the academic course requirements necessary for licensure of post-acute and senior services programs and facilities. The objectives of the certificate are to master the requirements and strengthen understanding of facility management, provider services and programs, and federal policies to achieve the highest levels of quality of care in senior and long-term care services.

Specific admission requirements are shown on the Graduate Program Finder (http://www.gwu.edu/all-graduate-programs).

Visit the program website (http://publichealth.gwu.edu/programs/long-term-care-certificate) for additional information.

REQUIREMENTS

Course Requirements

1. Graduate credit requirement. 18 graduate credits are required.
2. The program director/advisor must pre-approve all course selections and course sequencing by developing a "program of study" prior to the student's initial registration. Graduate certificate students meet with their advisor each semester before registration. All changes in this program of study must be pre-approved by the program director/advisor.
3. Course requirements. Since most graduate certificate students are currently enrolled in an MPH program or have previously earned a graduate degree, most course credits will be selected from the program-specific course list. Under no circumstances may a certificate student enroll in fewer than 9 credits of program-specific courses.
4. Grade point requirement. A 3.0 (B average) overall grade point average or better is required.
5. Time limit requirement. The certificate must be completed within 2 years.
6. Transfer credit policy. The program director/advisor may approve up to 4 graduate credits that have not been applied to a previous graduate degree to be transferred to the graduate certificate. The course(s) must be relevant to the graduate certificate. Credits must have been earned in the last 3 years from an accredited institution with a grade point of 3.0 or better.

Program Requirements

Required courses	**credits**	**semester offered**
HSML 6203	Intro to Health Management	
HSML 6207	HealthServicesInfoApplications	
HSML 6216	HumanResourcesMgt&OrgBehavior	
HSML 6236	Aging&Disability:Needs&Srvcs	
HSML 6237	Managing/SkilledNursngFacility	
Electives (6 credits)		

The following is a sample list. Topics vary from semester to semester.	
HSML 6299	Topics in HSML
HSML 6299	Topics in HSML
HSML 6299	Topics in HSML
HSML 6204	Quality&PerformanceImprovement
PUBH 6537	Health Promotion & Aging
PUBH 6099	Topics in Public Health
PUBH 6099	Topics in Public Health

PREVENTION AND COMMUNITY HEALTH

The Department of Prevention and Community Health is concerned with social and behavioral change for the health and well-being of people around the world. Its degree programs focus on prevention and the promotion of health and well-being with the active participation of individuals and communities, and are appropriate for students who are interested in putting into practice the latest public health research, or making significant scholarly contributions to the evidence base of public health. Master of public health students study four interrelated fields—community-oriented primary care; health promotion; maternal and child health; and public health communication and marketing. Doctoral students develop innovations in the science of health behavior.

GRADUATE

Master's programs

- Master of Public Health in the field of community oriented primary care (p. 1003)
- Master of Public Health in the field of health promotion (p. 1007)
- Master of Public Health in the field of maternal and child health (p. 1009)
- Master of Public Health in the field of public health communication and marketing (p. 1011)

Doctoral program

- Doctor of Philosophy in the field of social and behavioral sciences in public health (p. 1014)
- Doctor of Public Health in the field of health behavior (p. 1013)

FACULTY

Professors J.F. Cawley, W.D. Evans, K.A. Horn, R.N. Rimal *(Chair)*

Associate Professors L.C. Abroms, J. Bingenheimer, M.C. Edberg, K.A. McDonnell, M.A. Napolitano, O.A. Price, K.M. Roche, W.S. Schroth, S. Silver, C.H. Sparks, F. Spielberg, M. Turner, A.N. Vyas

Assistant Professors E.L. Andrade *(Research)*, C. Harrington, S. Hull, M.W. Long, E.B. Parrish, M. Ruiz *(Research)*, S. Straker

Adjunct Insturctor A.Franz

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PUBH 0920. Continuing Research - Master's. 1 Credit.
Continuing Research Credit- Master's Level.

PUBH 0940. Continuing Research - Doctoral. 1 Credit.
Continuing Research Credit- Doctoral.

PUBH 1101. Introduction to Public Health & Health Svcs. 3 Credits.
Introduction to aspects of public health and health services, including health services administration and policy, maternal and child health, environmental health, and health promotion.

PUBH 1102. History of Public Health. 3 Credits.
Historical and philosophical development of public health and its contributions to understanding, preventing, and controlling disease and disabilities.

PUBH 2110. Public Health Biology. 3 Credits.
Basic scientific mechanisms, concepts, and principles in health and the pathogenesis of diseases; a foundation for applications to public health. Prerequisite: BISC 1005 or BISC 1111.

PUBH 2112. Principles of Health Education and Health Promotion. 3 Credits.
Social and behavioral theories underlying health promotion program development and evaluation. Practical applications in a variety of domestic and global public health settings. PUBH 1101 may be taken as a corequisite. Prerequisite: PUBH 1101.

PUBH 2113. Impact of Culture upon Health. 3 Credits.
Relationships between cultural values and the development of modern health systems based on Western models of health care practice. Reliance upon traditional forms of health care. Examples of successful incorporation of traditional practices into evolving health care systems.

PUBH 2114. Environment, Health, and Development. 3 Credits.
Survey of the relationship between health and development and environmental trends. Topics include deforestation, urban contamination, and desertification.

PUBH 2115. Health, Human Rights, and Displaced Persons. 3 Credits.
Concepts of health as a human right, ethics, and the participation of the international community in moving toward health for all. Civil and international conflict in the generation of displaced populations.

PUBH 2116. Global Delivery of Health Systems. 3 Credits.
Introduction to health systems and the basic concepts of health systems administration and financing and health care reform with examples from advanced, middle income, and poor countries.

PUBH 2117. Service Learning in Public Health. 3 Credits.
A service-learning course that combines classroom instruction with practical learning. Students are responsible for securing an approved service site before the beginning of the semester; the instructor is available to assist with this placement.

PUBH 3130. Health Services Management and Economics. 3 Credits.
Basics of management theory, finance, and economics as applied to managing in the public health and health services field. Prerequisite: ECON 1011.

PUBH 3131. Epidemiology: Measuring Health and Disease. 3 Credits.
Principles of epidemiology applied to disease surveillance, control of infectious and chronic diseases, and health services/health policy. Understanding the basic research designs and their relationship to establishing cause and effect and effectiveness of interventions to prevent and cure disease. Prerequisite: PUBH 1101, STAT 1127 .

PUBH 3132. Health and Environment. 3 Credits.
Introduction to environmental and occupational health and implications for individual and population health. Issues of clean water, environmental toxins, air pollution, and the environmental impact on infectious diseases.

PUBH 3133. Global Health and Development. 3 Credits.
Basic concepts of political, social, and economic determinants of health and how health status is measured; burden of diseases that impact development and their basic epidemiological characteristics including who they affect, when they occur, and where risk is greatest; relationships between socioeconomic development and global health can be observed, measured, and used for the management of health programs. Material are global in coverage, but with a strong emphasis on low-income countries. Students must have junior or senior standing. Prerequisites: BISC 1005, BISC 1111 and PUBH 2110.

PUBH 3135W. Health Policy. 3 Credits.
An introduction to the fundamentals of the health care system in the United States and strategies available to policymakers when addressing problems relating to access, financing, and delivery of health care. Prerequisite: PUBH 1101.

PUBH 3136. Health Law. 3 Credits.
Legal concepts related to individual health care and public health systems in the United States. Health care law, public health law, and bioethics.

PUBH 3137. Global Public Health Nutrition. 3 Credits.
Consideration of hunger and other nutrition issues globally, including food insecurity, under/over nutrition, and micronutrient deficiencies. Application of UNICEF malnutrition framework to describe vulnerable groups, critique program strategies, and identify multisectorial strategies to reduce hunger and malnutrition. Prerequisites: Required: PubH 3133 Global Health and Development Recommended: EXSC 2119 Basic Nutrition.

PUBH 3150. Sustainable Energy & Env Hlth. 3 Credits.
Sustainability issues from the perspective of environmental health. Technical, social, and health implications of specific energy sources. Energy conservation and efficiency in the context of population growth, food and water resources, and maintenance of a healthy environment for future generations.

PUBH 3151. Current Issues in Bioethics. 3 Credits.
Recent advances in science and technology make biomedical ethics a continuing matter of concern for students, health professionals and laypersons alike. This course offers an opportunity to investigate both general and specific ethical questions and ethical decision making from both a personal and organizational perspective, including topics such as the right to health care, research with human subjects, reproductive issues, genetics, professional and student roles and responsibilities, and end-of-life issues. Such investigation requires exposure to the issues and to various attempts to address and resolve them. The course requires participation in group discussions as well as independent critical writing.

PUBH 3199. Topics in Public Health. 1-5 Credits.
Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

PUBH 4140W. Senior Seminar. 3 Credits.
Students develop a public health intervention incorporating various domains of the discipline of public health. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to public health majors in their senior year. Prerequisite: PUBH 3130.

PUBH 4199. Independent Study. 3 Credits.
For departmental majors only. Prerequisite: outline of intended project must be approved prior to registration by instructor and dean's office.

PUBH 6001. Biological Concepts in Public Health. 2 Credits.
An overview of current knowledge about biological mechanisms of major diseases causing death and disability in the United States and globally; understanding and interpreting the reciprocal relationships of genetic, environmental, and behavioral determinants of health and disease in an ecologic context; analyzing, discussing, and communicating biologic principles of disease from a public health perspective.

PUBH 6002. Biostatistical Applications for Public Health. 3 Credits.
Application of biostatistical principles to critical analysis of retrospective studies, prospective studies, and controlled clinical trials, as well as studies in the health services literature. Selection, basic calculations, and interpretation of statistical methods for detection of significant associations and differences.

PUBH 6003. Principles and Practices of Epidemiology. 3 Credits.
General principles, methods, and applications of epidemiology. Outbreak investigations, measures of disease frequency, standardization of disease rates, study design, measures of association, hypothesis testing, bias, effect modification, causal inference, disease screening, and surveillance. Case studies apply these concepts to a variety of infectious, acute, and chronic health conditions affecting the population.

PUBH 6004. Environmental and Occupational Health in a Sustainable World. 2 Credits.
Examination of the connection between population health and exposures to chemical, physical, and biological agents in the environment. Problem-solving frameworks familiarize students with data sources, methodologies, and policy approaches being used to address the public health impacts of environmental and occupational health hazards, including the consequences of climate change, natural resource degradation, and industrial chemicals. Integration of key concepts of environmental health with principles of sustainability illustrate how public policies and practices on the local, national, and global level affect population health.

PUBH 6006. Management and Policy Approaches to Public Health. 3 Credits.
Introduction to the basic principles, concepts, and skills related to public health management and policy. Management and policy approaches to public health at the system, organization, and group and individual levels. The interrelated nature of management and policy.

PUBH 6007. Social and Behavioral Approaches to Public Health. 2 Credits.
Social and behavioral science theories, models, and concepts that can be applied to public health problems and interventions. The role of social and community factors, including race, ethnicity, and culture, in both the onset and solution of public health problems; the interrelationship between the social and behavioral sciences.

PUBH 6010. Independent Study. 1-6 Credits.
Designed to provide the student with an opportunity to gain or enhance public health knowledge and to explore an area of interest related to public health research or the delivery and/or administration of health services. Permission of instructor/advisor required.

PUBH 6013. Master's Thesis. 3 Credits.
See Advisor.

PUBH 6014. Practicum. 1-3 Credits.
This course provides the opportunity for MPH students to apply the knowledge and skills acquired through their programs of study. A planned, supervised and evaluated practice experience that is relevant to the student's program is an essential component of a public health professional degree program. These opportunities can take place in a variety of agencies or organizations. Each program customizes Practicum requirements to meet students' needs. (Credit/No Credit) [For 45-credit MPH students who started Summer 06 or after.].

PUBH 6015. Culminating Experience. 1-3 Credits.
Students synthesize and integrate knowledge acquired in coursework and other learning experiences and apply theory and principles to a situation that approximates some aspect of professional practice. Program faculty evaluate the student's mastery of the body of knowledge and ability to demonstrate proficiency in the required competencies. Requirements evaluated are adapted to the degree program.

PUBH 6016. Field/Laboratory Experience. 2 Credits.
The overall purpose of the field/laboratory experience requirement is to introduce students in the MS-PHMEID degree program to a supervised practical experience in a Public Health Laboratory or other qualifying public health entity from the perspective of the actual wet laboratory operations. Students that already have this laboratory experience will be introduced to epidemiologic research, particularly surveillance, and its tie-in with laboratories either in the United States or in an international setting.

PUBH 6050. Introduction to Health Services Delivery. 2 Credits.
Introduction to the U.S. health services financing and delivery system with a focus on the major components of the system, the interaction of elements of the system, and the history of the development of today's system. Addresses the national context and history of health services, population health and health care spending in the US, employment-based health insurance, Medicaid and the uninsured, Medicare, international health care systems, managed care, hospitals and facilities, physicians and health workforce, long-term care and prescription drugs, and health care reform. (Same as HSML 6202).

PUBH 6052. Practical Data Management and Analysis for Public Health. 2 Credits.
Practical aspects of dataset creation, data management, rudimentary statistical analysis, and tabular and graphical presentation of results. Tasks covered include creating codebooks, entering and cleaning data, deriving new variables from existing ones, choosing and implementing appropriate analytical techniques, graphing and tabulating results, and documenting and protecting work.

PUBH 6054. Community Engagement and Advocacy. 2 Credits.
Tools and strategies for public health practitioners to understand, respect, organize, and collaborate with community groups and organizations for promotion of healthy behaviors. Development of practical skills to harness available resources in a community to advocate for healthy living and positive health outcomes.

PUBH 6056. Public Health Leadership Seminar. 1 Credit.
Leadership lessons taken from the careers of a diverse group of executives and entrepreneurs from the corporate, government, nonprofit, and art sectors. Leadership theory and styles. Building networks; skills for effectively engaging with peers, potential employers, and business partners.

PUBH 6058. Researching Violence Against Women and Girls. 2 Credits.
The intersection of violence against women and girls (VAWG) and public health; the impact that violence has on the health of the survivor, her current and future children, and communities; methods and best practices for designing applied research on VAWG. Prerequisites: PUBH 6001, PUBH 6002, PUBH 6003, PUBH 6004, PUBH 6006, and PUBH 6007.

PUBH 6090. Practicum/Culminating Exp. 4 Credits.
Individually tailored. Culminating Experience for the MPH program. Advisor approval required prior to registration.

PUBH 6091. Special Project. 1-4 Credits.
Under faculty supervision, the student undertakes an original project that applies the skills and knowledge gained in the chosen track and/or concentration within the MPH program. Prerequisite: Permission of the instructor. NOTE that credits vary by program; please consult your program plan to register for the appropriate number of credits. [For 36-credit MPH students only].

PUBH 6099. Topics in Public Health. 0-3 Credits.
In-depth examination of a particular facet of public health. Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

PUBH 6121. Environmental and Occupational Epidemiology. 3 Credits.
Demonstration and application of epidemiologic methods for the study of environmental and occupational health problems. Epidemiologic exposure assessment methods and methods relevant to cohort, case-control, cross-sectional, and case cross-over studies. Survey design and sources and evaluation of biases and confounding. Emphasis on written and oral communication skills. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6004.

PUBH 6122. Protecting Public Health and the Environment: Policies, Politics, and Programs. 3 Credits.
The legislative, regulatory, judicial, and political system in the United States developed to protect human health and the environment. National and global public and environmental health agencies, policy development, and current topics. Prerequisites: PUBH 6004 or permission of the intructor.

PUBH 6123. Toxicology: Applications for Public Health Policy. 3 Credits.
Toxicology as both a scientific discipline and a source of information for public health policy with respect to the regulation of foods, pesticides, drugs (pharmaceuticals), environmental chemical pollutants, and other chemicals that may affect human and environmental health. How chemicals interact with biological systems to produce adverse effects. The ways in which toxicologic information is developed and applied to regulatory decision making and the use of toxicology in regulatory risk assessment. Prerequisite: PUBH 6004.

PUBH 6124. Problem Solving in EOH. 3 Credits.
This culminating course uses problem-based learning methods to examine a variety of real-world EOH issues in depth. Cases stimulate students to integrate their cumulative knowledge across all required courses and demonstrate their professional competencies. Students to conduct activities characteristic of EOH practice: evaluating a variety of technical, public, and media, reports; integrating and interpreting environmental, exposure, and health information effectively; designing analytic and communication strategies; presenting in writing and orally relevant materials to address EOH issues; and, making appropriate policy and/or program decisions and recommendations. Prerequisites: PubH 6121, 6123, 6126.

PUBH 6125. Intro-Children's Health & Env. 2 Credits.
Describes the impact of environmental toxicants on children's health and reviews some of the major policy issues in the field of children's environmental health. Prerequisites: PubH 6004.

PUBH 6126. Assessment&Control/Env Hazards. 3 Credits.
Introduces the anticipation, recognition, assessment, and control of hazards in the workplace and the ambient environment. It emphasizes an understanding of the characteristic features of specific hazards, which may be chemical, biological, or physical/ergonomic.

PUBH 6127. Germs: An Introduction to Environmental Health Microbiology. 2 Credits.
Basics of public health microbiology as it relates to the environment, food, water, and bioterrorism. Examines from an environmental health perspective how the principles of microbiology are applied to current and emerging public health issues, whether from intentional or unintentional contamination of the environment. Specific topics will include: industrial animal production and increasing prevalence of antibiotic resistance; effectiveness of various point of use technologies for water purification; recent advances in quantitative microbial risk assessment; one medicine (where public and veterinary health meet); detection strategies for microorganisms (including bioterrorism agents); and current approaches in food defense and agroterrorism. Prerequisites: PUBH 6004.

PUBH 6128. Global Environmental and Occupational Health. 2 Credits.
Examination of the global environmental and occupational health factors that contribute significantly to the global burden of disease, focusing primarily on low- and middle-income countries. Principles from behavioral sciences, development economics, risk assessment, and epidemiology are included. Potential solutions to environmental health problems, metrics used to measure impacts, and areas for future research. Prerequisite: PUBH 6004.

PUBH 6130. Sustainable Energy and the Environment. 2 Credits.
The sustainability of various energy strategies, including energy conservation, green building principles, renewable energy, and mitigation and adaption policies for climate change. Emphasis on the life cycle framework. Topics include natural resource depletion, water and energy consumption, and air, water, and solid waste pollutant emissions. Prerequisite: PUBH 6004.

PUBH 6131. Applied Data Analysis in Environmental and Occupational Health. 3 Credits.
Application of biostatistical and epidemiologic concepts and methods to analysis of environmental and occupational health (EOH) data. Students manage datasets, conduct data analyses, present data graphically, and interpret data for relevance to EOH research, policy, and practice. Development and practice of skills needed for analyzing complex exposures and communicating environmental and occupational research findings. Prerequisites: PUBH 6002, PUBH 6003, and PUBH 6004.

PUBH 6132. Water, Sanitation, and Hygiene (WASH) in Low-Income Countries. 2 Credits.
Introduction to working in both disaster and development settings in countries where contaminated water, inadequate sanitation, and poor hygiene (WASH) cause serious health problems. Students gain practical experience applying WASH methods in the field. Prerequisite: PUBH 6004.

PUBH 6133. Social Dimensions in Climate Change and Health. 3 Credits.
The drivers of climate change and outcomes with particular focus on health dimensions; obstacles, vulnerabilities, inequality, and adaptation as well as technical and social solutions.

PUBH 6134. Communicating Science for Public Health. 2 Credits.
Evaluating the primary scientific literature and communicating research findings in outlets ranging from peer-reviewed journals to 140 character Tweets. Identifying target audiences and shaping messages to maximize impact, while maintaining the integrity of the supporting evidence. Written and oral communication and critical evaluation are emphasized. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6135. Researching Climate Change and Public Health. 3 Credits.
Study of the effects of climate change on human health using evidence compiled by the National Climate Assessment (NCA); widespread impacts, ecological context, oceans of change, infrastructure, water resources, energy, land use, heat, and air quality. Recommended background: PUBH 6003 and PUBH 6004.

PUBH 6136. Introduction to Environmental and Occupational Epidemiology. 3 Credits.
Epidemiologic research designs; methods for the study of environmental and occupational health problems; exposure assessment methods; design aspects of cross-sectional, case-control, cohort, and case cross-over studies; sources and evaluation of biases and confounding; survey and questionnaire design. Prerequisite: PUBH 6002, PUBH 6003 and PUBH 6004.

PUBH 6199. Topics in EOH. 0-3 Credits.
In-depth examination of a particular facet of public health. Topics and prerequisites vary.

PUBH 6235. Epidemiology of Obesity. 1 Credit.
Introduction to the epidemiology of obesity; descriptive epidemiology, measurement, consequences, and determinants of obesity; adiposity and body composition; obesity interventions and policy. Prerequisites: PUBH 6003.

PUBH 6236. Systematic Review of Public Health Literature. 1 Credit.
The process of conducting systematic reviews of literature in order to translate research into public health practice recommendations. Recommended for MPH candidates planning to conduct a systematic review of the literature for their culminating experience. Prerequisites: PUBH 6002 or EXNS 6204; PUBH 6003 or EXNS 6205.

PUBH 6237. Chronic Disease Epidemiology. 2 Credits.
An overview of the descriptive, analytic, and etiologic epidemiology of chronic diseases, with an emphasis on cardiovascular disease, cancer, and diabetes. The role of modifiable risk factors for chronic diseases such as obesity, diet, physical activity, smoking, and environmental exposures in relation to chronic disease prevention and control. Epidemiologic methods and study design and public health approaches to disease control, including surveillance, screening, and interventions. Past or concurrent enrollment in PUBH 6001 or EXSC 6202 and PUBH 6203 and PUBH 6247 or EXSC 6204 is strongly recommended. Prerequisites: PUBH 6002 or EXNS 6204 and PUBH 6003 or EXNS 6205.

PUBH 6238. Molecular Epidemiology. 1 Credit.
Concepts, principles, and use of molecular methods in epidemiologic and clinical research. Common molecular measures and their interaction with environmental factors. Development of a framework for interpreting, assessing, and incorporating molecular measures in their area of research. Prerequisites: PubH 6003.

PUBH 6239. Epidemiology of Foodborne and Waterborne Diseases. 1 Credit.
Foodborne and waterborne toxicants; diseases linked to eating and drinking and their prevention. Topics include transmission of disease and disease processes; microbial toxins, mycotoxins, chemical toxins, bacterial infections (e.g., salmonellosis, shigellosis, vibrio, listeria), virus and parasitic infections; issues in food and water safety. Prerequisites: PubH 6003.

PUBH 6240. Pediatric HIV/AIDS. 1 Credit.
Comprehensive overview of HIV infection in children, with emphasis on the global pediatric HIV epidemic. Biological, epidemiological, clinical, and psychosocial issues; public health programmatic approaches to prevention, care, and treatment. The national and global experience with scaling up prevention services in the global effort to virtually eliminate HIV/AIDS in children. Prerequisites: PubH 6003. Recommended background: PubH 6250 and PubH 6253.

PUBH 6241. Nutritional Epidemiology. 2 Credits.
Methodological issues related to dietary assessment, nutrition surveillance, and the epidemiology of obesity. Current trends, including the health impacts of vitamin D and sodium. Interpretation of the scientific literature in the field. Examples drawn from the National Health and Nutrition Examination Survey. Prerequisites: PubH 6003.

PUBH 6242. ClinicalEpid&Decision Analysis. 2,3 Credits.
Quantitative and qualitative approaches to decision making, including risk- benefit analysis, decision analysis, and cost-effective analysis. Applications to technology assessment; development of clinical guidelines. Note: MPH Health Policy, MS Health Policy and Doctoral Students concurrently take PubH 6299 topics course by the same name for 1 credit, thereby enrolling for three total credits (PubH 6242=2 credits plus PubH 6299.xx, same name =1 credit). Prerequisites: PUBH 6002, PUBH 6003.

PUBH 6243. Topics:ClinicalEpi&DecAnalysis. 1 Credit.
This class takes an evidence-based problem solving approach for Masters level students interested in the health policy focus of clinical epidemiology utilizing methods taught in PubH 6242. Prerequ: PubH 6003. Corequis: PubH 6242.

PUBH 6244. Cancer Epidemiology. 2 Credits.
Epidemiology of specific cancers, with an emphasis on molecular and genetic epidemiology. Current research in the field. Prerequisites: PubH 203.

PUBH 6245. InfectiousDisease Epidemiology. 2 Credits.
The role and conduct of laboratory and field investigations in the epidemiology of infectious diseases. Prerequisite: PubH 6003.

PUBH 6247. Design of Health Studies. 3 Credits.
Epidemiologic concepts and methods applied to specific research questions especially new types of public health problems. Recognition and development of the most appropriate study design for a specific health issue. Ecologic, cross-sectional, case-control, cohort studies and clinical trials. Sampling, measurement, questionnaire design, causality and causal criteria. Development of a research proposal. Co-requisite: PubH 6002. Prerequisite: PubH 6003.

PUBH 6248. Epidemiology of Aging. 2 Credits.
Methodological challenges in studying older populations. Epidemiologic endpoints in aging populations. Basic concepts and theories explored in aging research. Fall. Prerequisites: PUBH 6003.

PUBH 6249. StatPackages/DataMgt&DataAnlys. 3 Credits.
This course familiarizes the student with one of the most widely used database management systems and statistical analysis software packages, the SAS System, operating in a Windows environment. Throughout the course, several database management system techniques and data analytical strategies for the appropriate analysis of datasets obtained from a variety of studies will be presented. Statistical techniques covered include linear regression, analysis of variance, logistic regression, and survival analysis. Prerequisite: PubH 6002.

PUBH 6250. Epidemiology of HIV/AIDS. 2 Credits.
Methodological issues central to HIV/AIDS research. Biases peculiar to HIV/AIDS epidemiologic studies (both observational and experimental designs). The natural history of HIV, diagnosis, surveillance, vulnerable subpopulations, behavioral facets, and evaluation of epidemiologic studies with an emphasis on methodological considerations. Prerequisite: PubH 6003, Recommended PubH 6002.

PUBH 6252. Advanced Epidemiology Methods. 3 Credits.
Advanced quantitative epidemiologic methods, with a focus on basic data analytic techniques, identifying and evaluating bias and adjusting for confounding. Dose-response, trend analysis, and multiple linear and logistic regression models. Prerequisites: PubH 6002, 6003, 6247. Co- or prerequisite PubH 6249.

PUBH 6253. Issues in HIV Care & Treatment. 1 Credit.
This course will provide an overview and in depth consideration of some of the major issues in treatment of HIV disease, including the assessment of efficacy and effectiveness, drug resistance, monitoring of drug toxicity, special populations, the interrelationship between treatment and prevention, and quality of care. The course has been designed with an interdisciplinary audience in mind. In discussions and assignments, students will be able to emphasize their own area of interest and/or expertise (e.g. epidemiology, policy, etc).

PUBH 6255. Org Responses to HIV/Epidemic. 2 Credits.
This seminar focuses on the rapidly evolving responses of local, national and global governmental and non-governmental organizations to the HIV/AIDS epidemic. Inspirational leaders of selected HIV/AIDS organizations are invited to describe how their organizations contribute to fighting the epidemic; the leadership and management skills that they use in their daily work; and their strategic decision-making processes. Basic principles of epidemiology, leadership and organizational strategy and structure are addressed through didactic presentations and interactive faculty-student dialogue. Lessons learned through the lens of HIV/AIDS organizations are broadly applicable to other public health problems. Students will learn about the strengths and challenges of different types of public health organizations as they make career decisions about their own transition to the public health work force. Prerequisite: PubH 6003, HIV/AIDS experience, or permission of Instructor.

PUBH 6258. Adv Topics/Biostat Consulting. 1 Credit.
Principles and practice of biostatistical consulting in public health and medical research environments.

PUBH 6259. Epid Surveillance/PublicHealth. 2 Credits.
Focus on foundations of public health surveillance systems for communicable as well as chronic diseases. Outbreak investigation methods will be included, as well as surveillance data sources, data management, data analysis, ethical issues, surveillance system evaluation, and use of information for prevention. Surveillance systems for reportable diseases, nosocomial infections, bioterrorism events, cancer, environmental disease, vaccine-related adverse events, bovine spongiform encephalopathy, and military personnel will be discussed. Prerequisites: PubH 6003.

PUBH 6260. Adv DataAnalysis-Public Health. 3 Credits.
Advanced data analysis using the SAS System to expand on the analytic techniques gained in PubH 6002 and PubH 6249 and to provide students with the applied statistical skills required to analyze various types of public health datasets. Prerequisites: PubH 6002, 6249.

PUBH 6261. Epi-Bio Skills Bldg Seminar. 1 Credit.
Assists students in developing the skills needed to complete degree requirements and to provide them with practical applied public health training. By the end of the course, students will be able to describe essential skills needed for preparation, implementation, presentation and communication of public health data.

PUBH 6262. Intro-Geog Information Systems. 1 Credit.
Geographic information systems (GIS) for mapping and display of health data. The course makes use of ArcGIS 8.3. The use of spatial statistics for the detection of clusters and patterns in the spread of diseases. Working with geodatabases, shape files, layers, query information from attribute tables, geocode addresses and customizing GIS applications.

PUBH 6263. Advanced GIS. 1 Credit.
Provides mid to advanced level training in GIS for display and analysis of health data. Use software ArcGIS 9.3 and additional extensions such as Spatial Analyst and Geostatistical Analyst. Also uses GeoDa software. Emphasizes benefits of using GIS to do more than simply manage and map data. GIS supports a range of spatial analysis functions that enable researchers to extract additional meaning from manipulating geographic data. Learn to work with raster datasets and geodatabases to build spatial models for analyzing health data and evaluating spatial patterns of health events based on notion of distance. Prerequisite: PubH 6262.

PUBH 6264. Quantitative Methods. 3 Credits.
Introduces basic concepts in mathematical statistics. Topics will include probabilities (unconditional and conditional), density and distribution functions of continuous and discrete random variables, including expected values. Specific distribution functions discussed will be Binomial, Poisson, Hypergeometric, and Gaussian distributions. Additional topics include bivariable distributions, variance-covariance matrix, limiting theory, asymptotic results, and maximum likelihood estimation. Prerequisites: Math 1231, 1232 and PubH 6002, 6249.

PUBH 6265. Design of Medical Studies. 3 Credits.
Design of medical investigations, including the randomized clinical trial, observational cohort study, and the retrospective case-control study. Specific methods regarding sample size, power and precision and statistical procedures for randomization and sa.

PUBH 6266. Biostatistical Methods. 3 Credits.
Biostatistical methods for asymptotically efficient tests and estimates of relative risks and odds ratios from prospective and retrospective matched and unmatched studies. Fixed and random effects models. Logistic regression, conditional logistic regression. Poisson regression. Maximum likelihood and efficient scores. Prerequisites: STAT 6201-6202, PubH 6264.

PUBH 6267. Time Series:Applications in PH. 2 Credits.
Introduce basic concepts for the identification and modeling of time series in the time domain approach. Learn a new set of terminology standards and a different way to analyze these type of data and to forecast future values of a time series and its accuracy. Software used is SAS/ETS and 3 procedures: ARIMA, AUTOREG, FORECAST. New mathematical notation will be used. Prerequisite: PubH 6249.

PUBH 6268. Advanced SAS. 1 Credit.
Intensive in advanced programming using SAS. Expand technical skills to provide advanced SAS tools for data management and graphics. Topics to include Interactive Matrix Language (IML), SAS Macro facility language, and drill-down graphs using SAS/GRAPH. Prerequisites: PubH 6002, 6249 or Instructor's permission.

PUBH 6269. Reproductive Epidemiology. 1 Credit.
Current research, controversial issues and methodological problems in epidemiology of reproductive and perinatal health. Present reproductive health issues such as conception and infertility; perinatal issues such as complications of pregnancy, infections in pregnancy, adverse pregnancy outcomes, and birth defects. Prerequisite: PubH 6003.

PUBH 6270. HIV/AIDS Surveillance. 1 Credit.
Overview of surveillance methods used domestically and internationally to monitor HIV/AIDS epidemic. Surveillance systems including sentinel, population based, behavioral, and incidence surveillance will be presented and discussed. Strengths and weaknesses of these various systems will be discussed in addition to how data from these systems impact and inform HIV/AIDS related policies and programs. Prerequisite: PubH 6003.

PUBH 6271. Disaster Epidemiology. 1 Credit.
Introduction to disaster epidemiology that elucidates the important role epidemiologists play in assessing the health and psychological effects of natural and man-made disasters and in identifying factors that contribute to these effects. Focus will be on applications of epidemiologic methods to the study of public health consequences of disasters, case studies from actual disasters used to illustrate various roles of epidemiologist in responding to these events and lessons learned. Highlight key skills that epidemiologists need to be part of a response and recovery . Identify methodological issues for future work. Prerequisites: PubH 6002, 6003.

PUBH 6272. Infectious Agents- Cancer. 1 Credit.
Describes the role of infectious agents in the etiology of human cancer. Emphasis on differences between specific oncogenic viruses. Other oncogenic agents, bacterial and parasitic, will also be discussed. Discuss laboratory approaches to the documentation of their pathogenicity, how behavior affects mode of transmission, and which types of data provide strongest support for documenting oncogenic potential for humans. Prerequisite: PubH 6003.

PUBH 6273. Ethnographic Methods. 1 Credit.
Use ethnographic field methods in conjunction with epidemiological research. Introduction to specific methods used to examine health phenomena and determinants of disease. Learn specific applied skills that can be modified with socio-cultural modifications to evaluate urban sites and other settings. Basic skills in application of ethnographic methods, including recursive observations, participant observations, and variety of approaches to interviewing such as in-depth, structured and non-structured as well as conversational interviewing. Discuss use of multiple approaches in conjunction with ethnography, including focus groups, archival, document, statistical and secondary data analysis, and survey research methods. Course emphasizes use of ethnographic research methods in community-based health settings and evaluates issues in cultural competency and how to garner stakeholder support to conduct epidemiologic studies. Prerequisite: PubH 6003.

PUBH 6274. Emerging ID for PH Pro's. 2 Credits.
Focus on epidemiology of emerging infectious diseases of public health importance, including factors leading to their development, management of emerging infectious diseases from a public health and laboratory standpoint, including biosafety, and strategies for emergency preparedness from a national and international perspective. Course emphasizes the context of emerging infectious diseases and strategic approaches to their containment. Prerequisites: PubH 6003 or Micr 6292 or Instructor permission.

PUBH 6275. Essential PH Lab Skills. 2 Credits.
This course will provide public health students with practical laboratory experience Prerequ: Micr 6239 or Micr 6212 or permission of instructor.

PUBH 6276. Health Microbiology. 3 Credits.
Gain in-depth understanding of important non-viral pathogens pertinent to PH Microbiology. Learn how to isolate & identify pathogens using critical thinking & problem solving skills.

PUBH 6277. Public Health Genomics. 2 Credits.
Learn about molecular technology and how it is impacting public health practice & discourse in the post genomic era. Explore ways in which genomics is being used to solve or help alleviate PH problems through case-focused discussions. Prerequisite: genetics or molecular biology within 6 years or permission of course instructor.

PUBH 6278. Public Health Virology. 3 Credits.
In-depth understanding of viral pathogenesis by focusing on current research, controversial issues and PH relevance. Survey of family of viruses most relevant to today's public health efforts, concentrating on virus-host interactions & therapeutic strategies.

PUBH 6280. MEID Final Project. 2 Credits.
Focus on the synthesis and summary of data acquired through epidemiologic and/or public health laboratory research. Prerequisites: PubH 6002, 6003, 6292, 6245; Biosafety training, CITI training, HIPAA training, permission of instructor.

PUBH 6281. Analysis of Complex Surveys Using SAS and Stata. 1 Credit.
An applied data analysis course focusing on procedures commonly used to analyze data from complex surveys such as the National Health and Nutrition Examination Survey. Review of various types of sampling, sample design focusing on core components of complex surveys, and the statistical justification and procedures for including design effects in analytic models. Application of these concepts to real data using SAS and Stata. Prerequisites: PubH 6003 and PubH 6249 or equivalent Stata course.

PUBH 6282. Introduction to R Programming. 1 Credit.
R is an open source software environment for statistical computing and graphics. Data transfer between SAS and R, data manipulation and visualization within R, programming and debugging, R libraries, and graphics theory. Prerequisites: PubH 6249. Recommended background: Programming experience in a statistical package such as Stata or in high level language such as C, Python, Perl.

PUBH 6283. Biostatistics Consulting Practicum. 1 Credit.
Supervised experience involving the synthesis of biostatistical skills with client consultation. Students consolidate their skills through an experience-based understanding of how biostatistical skills are utilized in one or more domains of health research. Prerequisites: STAT 6201 and PUBH 6003. Recommended background: PUBH 6249 or PUBH 6210.

PUBH 6299. Topics in Epi/Bio. 1-3 Credits.
In-depth examination of a particular facet of public health. Topics and prerequisites vary.

PUBH 6305. Fundamentals for Health Policy: Public Health and Health Care. 2 Credits.
An overview of public health and health care in the United States as an introduction to the study and analysis of health policy. Presents the governmental framework, institutions, financing streams, workforce, constituencies, and interest groups engaged in the health sector to ensure that students begin their policy analytic training with grounding in the political, economic, and social realities of public health and health care.

PUBH 6310. Statistical Analysis in Health Policy. 3 Credits.
Quantitative and statistical methods of data analysis for health policy and health services research. Instruction in conducting data analyses using Stata statistical and data analysis software and application of acquired skills to health policy and health services research. Practical experience in programming and analysis of various health policy-related questions. Entering and importing data; creating, saving, and merging data sets; creating and modifying variables; labeling variables and values; and conducting analysis ranging from univariate to multivariate analyses, including multiple regression and logistic regression. The use of existing data sets to analyze health policy issues and interpret these analyses for policy purposes. Prerequisites: PUBH 6002.

PUBH 6315. Intro-Health Policy Analysis. 2 Credits.
Core elements of health policy analysis: problem definition, background, the political, economic, and social landscape; development of policy options and recommendations. Written, graphic, and oral presentation skills associated with policy analysis. Prerequisites: PubH 6305.

PUBH 6316. Introduction to Environmental and Occupational Epidemiology. 3 Credits.

PUBH 6320. Advanced Health Policy Analysis. 2 Credits.
Critical elements of health policy applications. Problem definition; political, social, and economic assessment of a problem; program evaluation and data analysis; development of policy options; and the written and oral presentation of findings and recommendations. Practical application of basic quantitative tools in health policy. Prerequisites: PUBH 6310 and PUBH 6315.

PUBH 6325. Federal Policymaking and Policy Advocacy. 2 Credits.
The federal health policymaking process, including an overview of the legislative, administrative, and judicial processes that affect policymaking. The federal budget, authorization, and appropriation processes. An advocacy campaign framework is used to demonstrate common techniques and strategies used to advance legislative and regulatory policies, including coalition building and the use of policy studies and media relations. Prerequisite: PUBH 6305.

PUBH 6330. Health Services and Law. 3 Credits.
Examination of the ways in which the law and legal system in the United States influence and are influenced by the health care system. How judicial, statutory, regulatory, and constitutional sources of law embody health policy and affect access to and quality and financing of health care, as well as the regulation of patient rights.

PUBH 6335. Public Health and Law. 3 Credits.
Designed for students in the health professions and law, to examine how law can both promote public health and conflict with the constitutionally-protected rights of individuals. Introduces the legal concepts that underlie the public health system and inform public health policymaking in the US. Topics include the role of law in public health care and policy (e.g., governmental powers vs. civil liberties, regulation of public health); major areas of public health activity (e.g., health promotion, immunization, screening, and treatment); and the future of public health (e.g., emerging infectious diseases, bioterrorism, obesity, and public health genetics).

PUBH 6340. Health Economics and Finance. 3 Credits.
Examination of economic principles as they apply to health policy in the public and private sectors. The basic framework of economics is used to analyze the behavior of consumers, hospitals, physicians, and insurers, as well as pharmaceutical companies and long-term care providers. Overview of Medicare and Medicaid. Economic analyses of current issues in the marketplace, including rising health spending in the context of the national economy and the federal budget, insurance market dynamics, key issues in the long-term care industry, shifting market forces and power within the health care arena, and new payment initiatives and delivery system models. Prerequisite: PUBH 6352 or an undergraduate economics course.

PUBH 6345. Health Policy Research Design. 2 Credits.

PUBH 6352. Basics of Econ for Health Pol. 1 Credit.
An introduction to modern microeconomics- the study of how consumers, firms, industries, and the public sector make decisions and allocate their resources in the economy. The principles of supply and demand and elasticity in both the private and public sectors will be analyzed.

PUBH 6353. Child Health Advocacy. 1 Credit.
Introduction to child health advocacy. Affordable Care Act (ACA), preventive care, school health, environmental issues, and emergency care. The use of data for advocacy.

PUBH 6354. Mental Health/Subst Abuse Pol. 2 Credits.
Provides an overview of the U.S. mental health and substance abuse delivery system, its components, and the policy challenges created by the organization of this system. Considers the behavioral health care system from the perspective of several main "actors" in the system: patients, providers 9primarily doctors & hospitals), health plans, and payers (public & private). Prerequisite: PubH 6305.

PUBH 6355. Comparative Health Policy. 1 Credit.
Introduction to international health systems and world health policy innovations and potential relevance to the United States. The origins and comparative performance of a range of international healthcare systems and comparative responses to specific health policy challenges. Methodological challenges of international comparisons and theoretical implications. Students design and conduct comparative analysis in the form of a short policy research proposal. Prerequisites: PubH 6305.

PUBH 6356. State Health Policy. 2 Credits.
Students develop a briefing on health and health care for a new governor and health secretary in order to gain a practical understanding of state health policy and programs. The course is designed to replicate the experience of a newly hired policy staff member learning the requirements for the position in a particular state. Prerequisite: PUBH 6305.

PUBH 6357. Health Economics and Policy: Cost Containment Strategies. 2 Credits.
Health care cost containment in the context of the current implementation of national health reform. Cost containment strategies; economic underpinnings, anticipated impacts, perspectives of and implications for health care providers and systems, and political considerations. Prerequisites: PubH 6340.

PUBH 6358. Vaccine Policy. 2 Credits.
Examines the development of U.S. vaccine policy and the growth of various markets targeting routine vaccination of all populations. The interactions among business, legal, political, public health, medical, federal/state/local government, and consumer communities that combine to influence vaccine delivery in a broad range of settings. Prerequisite: PUBH 6305.

PUBH 6359. Reproductive Health Policy. 1 Credit.
Overview of reproductive health policy at the federal and state levels. Balancing the interests of competing stakeholders; the fundamental underlying role of significant disparities in financing for and access to reproductive health services; and how policymaking can alleviate or exacerbate preexisting issues.

PUBH 6360. AdvMaternal&ChildHealthPolicy. 1 Credit.
In-depth exploration of maternal and child health policy in the U.S., with a particular emphasis on the role of personal and public health services for women, children, youth and their families in the context of health and human services system change. Prerequisite: PubH 6561.

PUBH 6361. Health Workforce Policy. 2 Credits.
Strategies for the prevention and control of infectious diseases; focus on low and middle income countries. Goals, strategies, and challenges of major global health intervention programs. Surveillance systems. Vaccination programs; chemotherapy as a prevention and treatment tool; nutritional supplementation; environmental approaches; and potential benefits of integrating multiple interventions. Prerequisites: PUBH 6305.

PUBH 6363. The Health Care Legislative Process. 1 Credit.
How health care legislation is developed in and moves through the U.S. House of Representatives and Senate. The roles of the committees of jurisdiction in each house and how the rules of each house affect legislative outcomes.

PUBH 6364. Fed Budget Process/Health Care. 1 Credit.
Focuses on how the Congressional budget process shapes the funding and design of federal health care programs, ranging from entitlement programs like Medicare to appropriated programs like community health centers. Discussions will cover budget resolutions, appropriations bills, and budget reconciliation legislation, as well as Congressional procedures & committees through which they are considered. Prerequisite: PubH 6305.

PUBH 6365. Advanced Global Health Security & Diplomacy. 2 Credits.
The development of foreign policy at the nexus of global health and national security; the evolving concept of global health diplomacy. Science and technology policy, biodefense and counter terrorism, weapons of mass destruction nonproliferation, food security, global health challenges, and U.S. diplomacy. Role of government and non-governmental organizations.

PUBH 6366. Health Care Corporate Compliance. 2 Credits.
The federal laws and regulations that affect U.S. health care industry participants, particularly those relating to the prevention of fraud and abuse, and the role of corporate compliance programs. Prerequisite: HSML 6215 or PUBH 6330.

PUBH 6368. Law, Medicine, and Ethics. 2 Credits.
Legal, ethical, and policy issues that arise in the biomedical arena. Controversial and challenging questions including those related to the definitions of life and death, nature of personal identity, requirements of justice, and boundaries of liberty. Legal, medical, and ethical/philosophical literature are used in examining these issues. Prerequisite: PUBH 6330.

PUBH 6370. Medicare/Medicaid Law & Policy. 2 Credits.
Describes current legal and public policy issues in the Medicare and Medicaid programs, including the legal, operational, financial, and organizational rules for the two programs. Prerequisite: PubH 6315.

PUBH 6372. Minority Health Policy. 2 Credits.
Introduces students to the concept of health disparities and the implications of disparities for health care practice and policy. Students will learn how disparities are defined and measured, as well as emerging approaches in practice and policy to reducing disparities. Prerequisite: 6315.

PUBH 6374. Pharmaceutical Policy. 2 Credits.
Legal and regulatory frameworks related to the demand for and supply / quality of pharmaceutical products. Policies specific to drug development, pricing, reimbursement, use, dissemination of information, and post-marketing surveillance. Prerequisite: PUBH 6315.

PUBH 6376. Primary Health Care Policy. 2 Credits.
Politics and policy behind the provision of primary healthcare in the United States. The rise of the field of primary care and how it is supported and financed; the role of insurers and government in regulation and oversight in the areas of access, cost, and quality. Prerequisite: PUBH 6315.

PUBH 6378. HIV Policy in the U.S.. 2 Credits.
Examines the policy response to the HIV epidemic in the United States and how the epidemic itself has helped to shape U.S. policy. How and why HIV became a national policy issue; circumstances surrounding the discovery of and early response to HIV; and main policy and programmatic developments and key players over time. The role and implications of the Affordable Care Act for individuals with HIV, the future of the Ryan White HIV/AIDS Program, and the impact of new treatment and prevention strategies on the future course of the epidemic.

PUBH 6380. Bridging Health Policy and Health Information Technology. 2 Credits.
Basics of health care informatics policy and core technological components for health services managers, public health professionals, health policy analysts, and health information technology staff. Policy and legal frameworks, governance and financial issues, technological infrastructure, and business and technological operations. Concepts and roles of information and how information technology can support the healthcare industry in promoting quality improvement.

PUBH 6382. Community Health Center Policy. 2 Credits.

PUBH 6384. Health Care Quality and Health Policy. 2 Credits.
The role of quality in the U.S. health care delivery system from the perspective of multiple stakeholders, including public and private payers, providers, consumers, and employers. Defining and measuring quality; how quality information is used; and policy implications of quality improvement. Recent changes under health reform legislation. Prerequisites: PUBH 6305.

PUBH 6386. Public Health Preparedness Policy. 2 Credits.
Issues in public health emergency preparedness and response at the nexus of homeland and national security. The relationship between public health and criminal investigation, forensic epidemiology, and surveillance; biodefense; and the role of the scientific community. Infrastructure, threat themes, and associated preparedness and response policy.

PUBH 6399. Topics in Health Policy. 0-3 Credits.
In-depth examination of a particular facet of public health policy. Topics and prerequisites vary.

PUBH 6400. Global Health Frameworks. 2 Credits.
Overview of current issues in global public health with particular emphasis on low and middle-income countries. Serves as both an introductory course for students entering the field of global health, as well as an update on current technical and policy issues for advanced students who may have considerable experience.

PUBH 6401. Comp Regional Determinants. 2 Credits.
Examines the set of social, cultural and economic issues most central to shaping health in each of the world's main regions. Overseas Learning Collaboration program in Bangladesh. Prerequisite: PubH 6400. Fee varies by year.

PUBH 6402. Washington Seminar. 2 Credits.
This seminar course will provide an overview of global health policy and practice institutional resources in Washington DC. Students gain an understanding of how global health issues are framed, presented and biased in a multi-institutional setting. This is a collaborative learning exercise where simple web based tools will be used to develop a virtual classroom of the current global health policy and practice dialogue among Washington DC based governmental, multilateral, NGO, private sector and policy institutes.

PUBH 6403. Scientific Basis GH Intervntn. 2 Credits.
Introduces the scientific basis of global health interventions and how they address proximal and underlying determinants of health. Successful students will obtain a strong technical grounding in the determinants, biology and pathogenesis of specific diseases, for which affordable tools for prevention, control, and case management exist and are in use in public health practice.

PUBH 6410. Global Health Study Design. 2 Credits.
A foundation in the tools necessary for planning and designing research related to identifying and solving problems in global health: choosing an appropriate research topic and research question, understanding the relationships between hypotheses and study objectives, conducting a literature review, choosing a research design to achieve the project purpose, writing a research proposal including planning for the challenges of global health research, and achieving productive dissemination of findings.

PUBH 6411. Global Health Qualitative Research Methods. 2 Credits.
An introduction to qualitative data collection and analysis in global health settings. Methodologies include survey design, interviews, focus groups, and participant observation. Archival research and clinical trial research are also addressed. The set of methods most commonly used to collect qualitative data in global health settings. Students are enabled to prepare interview guides, conduct in-depth interviews, and analyze and document the results from a qualitative field project. Prerequisites: PUBH 6002 and PUBH 6410.

PUBH 6412. Global Health Quantitative Research Methods. 3 Credits.
Continuation of the series of global health methods courses. Examination of the fundamental concepts of empirical analysis and qualitative analysis, including open and axial coding, the basis of grounded theory, and regression analysis. Prerequisites: PUBH 6002 and PUBH 6410.

PUBH 6416. Ethical and Cultural Issues in Global Health Research and Programs. 1 Credit.
Examine procedures and concerns for protecting communities and human subjects involved in public health programs and research. Consider cultural considerations integral to ethical conduct of public health research and programming in the global context. Discuss history behind rules and regulations that govern ethical principles around conduct of research involving human subjects. Consider contribution that awareness of cultural contexts where we work makes to ethical nature of our work as global health professionals.

PUBH 6430. Theories for Global Health Communication Interventions. 2 Credits.
Use of communication theory and methods in health promotion. Integration of multidisciplinary approaches to public health communication. Prerequisite: PUBH 6007, PUBH 6400.

PUBH 6431. Global Health Communication Strategies and Skills. 3 Credits.
Students conduct qualitative research to evaluate health communication programs, assess readability level and suitability of written health education materials, conduct content analyses, and review/critique current health communication literature. Prerequisites: PubH 6430-Theories and Applications in Global Health Promotion (unless waived by professor) PubH 6007- Social and Behavioral Approaches to Public Health.

PUBH 6435. Global Health Program Development and Implementation. 2 Credits.
Basic concepts and principles of program development and implementation including data collection methods, decision making, and problem-solving techniques. Application of program development techniques to specific interventions. Prerequisites: PUBH 6400.

PUBH 6436. Global Health Program Management and Leadership. 2 Credits.
Essential tools for successful project, personnel, and program management. Leadership and management theory; key issues in managing global health programs and projects; leadership and management skills development; use of data in management decision making; and importance of quality, supply chain, and resource management. Restricted to MPH in the field of global health program design, monitoring, and evaluation degree candidates. Prerequisites: PUBH 6400, PUBH 6400, and PUBH 6435.

PUBH 6437. Global Health Program Evaluation. 3 Credits.
Fundamentals of program monitoring and evaluation; developing and using program theory in evaluation; impact evaluation and mixed-methods approaches; qualitative methods and statistical analysis for program evaluation. Prerequisites: PubH 6002.

PUBH 6440. Global Health Economics and Finance. 2 Credits.
Examination of economics and finance principles as they apply to global health. Organization, delivery, and financing of health care in developing countries. Tools for analyzing issues related to global health economics and finance and application of those tools to a variety of a global health issues, including demand for health care, health care financing, social insurance, pharmaceuticals, and HIV/AIDS. Prerequisite: PUBH 6400.

PUBH 6441. Global Health Organizations and Regulations. 3 Credits.
The functions, capacities, and governance of international health organizations; the normative power of some international health organizations for regulatory processes; and evidence-based development of public health policies with attention to issues of global trade as it shapes worldwide and national health. Prerequisite: PUBH 6400.

PUBH 6442. Comparative Global Health Systems. 2 Credits.
Examination of national health systems, how they differ, and how they are performing. Health systems analyzed through four different lenses: health care organizations, health workforce development, health care financing, and health policy development. Comparison of health systems and health reforms in seven regions of the world and assessment of how health system performance might be improved. Course fee may apply. Prerequisite: PUBH 6400.

PUBH 6443. Global Health Agreements and Conventions. 2 Credits.
Explores the impact of regulations, trade and human rights on health by examining the relevant international declarations, agreements and conventions. This course will examine a variety of topics including the impact of international trade agreements on health, the International Health Regulations and other regulations affecting global health, and the relationship between health and human rights. Prerequisite: PUBH 6400.

PUBH 6450. Global Health Diplomacy. 2 Credits.
Introduction to the concept of global health diplomacy; how diplomacy has been used to advance health agendas and how health issues have been used to improve diplomatic relations between countries; formal health, multi-stakeholder health, and informal health diplomacy; comparative study of how different countries have devised health diplomacy strategies.

PUBH 6480. Public Health in Complex Emergencies. 2 Credits.
Analyze security institutions, vulnerable groups, humanitarian operations and natural disasters and global security, the impact of global health threats such as HIV/AIDS, SARS, avian flu, tuberculosis and malaria on security institutions, vulnerable populations, civil/military cooperation, and humanitarian operations. Also explore the potential value of various institutions in mitigating global health threats and responding to humanitarian emergencies. Examine a range of scientific, policy, and program interventions designed to address these issues. Prerequisite: PUBH 6400.

PUBH 6481. Global Mental Health. 2 Credits.
Focus on global mental health knowledge and public health policy implementation skills regarding the integration of mental health, public health, and primary care in diverse health systems and challenging cultural contexts. Prerequisite: PubH 6400.

PUBH 6482. International Food and Nutrition Policy. 2 Credits.
Major global food and nutrition issues, their determinants, and the strategies that in place to address them. Students identify major nutrition and food challenges in a country or region as well as the policies and programs that have proven successful in addressing those challenges. Prerequisite: PUBH 6400.

PUBH 6484. Prevention and Control of Vector Borne Diseases. 2 Credits.
Study of insects and other vectors responsible for transmission of diseases in developing countries, including plague, malaria, dengue fever, onchocerciasis (river blindness), and chikungunya virus. Special focus on developing countries, particularly in the Middle East, Africa, Asia, and Latin America. Diseases such as West Nile Virus and Lyme disease in the United States and elsewhere are also addressed. New methods for effective management and control.

PUBH 6485. Prevention and Control of Water and Sanitation Diseases. 1 Credit.
Problems associated with providing adequate water and sanitation in developing countries; infectious diseases such as cholera, dysentery and typhoid. Innovative tools and solutions for improving water supply and sanitation.

PUBH 6486. Global Health Programs and Approaches to the Control of Infectious Diseases. 2 Credits.
Review strategies used for the control of infectious diseases with a focus on the situation in low and middle income countries. Review and critique the goals, strategies and challenges of major global health intervention programs designed to prevent and control infectious diseases. Course includes a historical perspective of achievements to date and the importance of surveillance systems as a core component of effective programs. Intervention strategies addressed include vaccination programs and methods for analysis of effectiveness; the use of chemotherapy as prevention and treatment tools on a population basis; the role of nutritional supplementation; environmental approaches to infectious disease control; and combined/integrated approaches that involve multiple interventions and potential benefits. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6400.

PUBH 6487. Emerging Zoonotic Diseases & Global Food Production. 1 Credit.
Analysis of trends in emerging zoonotic diseases and their links to global food production. Case studies on the use of surveillance systems and outbreak detection techniques to monitor emerging zoonotic diseases. Development of skills to analyze surveillance systems, policy reports, and literature related to emerging zoonotic diseases and food-borne outbreaks within a global context. Prerequisites: PUBH 6003.

PUBH 6488. Cost-effectiveness Analysis in Public Health and Healthcare. 2 Credits.
The application of cost-effectiveness analysis (CEA) to enhance the efficiency of programs and services both in the United States and developing countries. A variety of topics and related analytical tools such as cost benefit analysis, decision analysis, and sensitivity analysis are covered. Students learn to perform cost-benefit and cost-effectiveness analyses and understand the strengths and limitations of these methods and how to apply them to a broad range of health issues.

PUBH 6489. Evaluation of Food and Nutrition Programs and Policies. 1 Credit.
Application of evaluation approaches to existing or proposed nutrition and food programs and policies; competencies in the use of program impact theory as the foundation for evaluating such programs. Students should have a basic knowledge of the biological determinants of various nutritional statuses and some familiarity with program evaluation fundamentals. Prerequisites: PUBH 6001.

PUBH 6491. Public Health Leadership Seminar. 1 Credit.
Leadership lessons derived from the careers of a diverse group of successful executives and entrepreneurs from multiple sectors, including corporate, government, non-profit, and the arts. Development of skills for effective engagement with peers, personal network, potential employers, and business partners. Restricted to students who have faculty permission to register for course.

PUBH 6492. Global Health Programs and Approaches to the Control of Chronic Diseases. 2 Credits.
Concepts, methods, and tools to address chronic non-communicable diseases (NCDs); global public health and development dimension of NCDs, their epidemiology and risks, and health systems approaches for their control with focus on low- and middle-income countries. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6400.

PUBH 6493. Fundamentals of Supply Chain Management in Developing Countries. 2 Credits.
Practical approaches used by government policymakers, essential drugs program managers, NGOs, donors, and others to ensure that high-quality essential drugs are available, affordable and used rationally; existing and potential challenges and workable solutions related to managing the drug supply in developing countries. Restricted to graduate students.

PUBH 6499. Topics in Global Health. 1-3 Credits.
Examination of a particular facet of public health. Topics vary by semester. May be repeated for credit provided topic differs. See the Schedule of Classes for more details.

PUBH 6500. Planning and Implementing Health Promotion Programs. 3 Credits.
Students develop skills to effectively plan, design, and implement programs that address public health problems for defined populations in a variety of settings. Prerequisites: PubH 6007.

PUBH 6501. Program Evaluation. 3 Credits.
The knowledge, competencies, and skills needed to plan and implement evaluations of public health programs in a variety of settings. Types of program evaluation, including needs assessment, process evaluation, quantitative and qualitative monitoring of outputs, outcomes, and impact. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6007, PUBH 6435, and PUBH 6500.

PUBH 6502. Practical Data Analysis: PCH. 1 Credit.
Practical aspects of dataset creation, data management, rudimentary statistical analysis & tabular/graphical presentation of results in the user-friendly environments of PASW (formerly SPSS) and MS Excel. Students will create codebooks, enter & clean data, derive new variables from existing ones, choose appropriate analytical techniques & implement them, graph & tabulate results, and document & protect work. Examples will be drawn from commonly-encountered situations in prevention and community health, such as needs assessments & program evaluations. Prerequisites: PUBH 6002, PUBH 6003, and PUBH 6500.

PUBH 6503. Introduction to Public Health Communication and Marketing. 3 Credits.
The application of health communication theories, principles and techniques, as well as marketing constructs and concepts, to advancing public health through practitioner-oriented health communication and social marketing campaign and programs.

PUBH 6504. Social and Behavioral Science Research Methods. 3 Credits.
The processes of study design, data collection, and analysis using SPSS for quantitative research in prevention and community health. All phases of the observational/survey research process considered sequentially, from formulation of research questions to preparation of the final report. Prerequisites: PubH 6002 and PubH 6007 or instructor permission.

PUBH 6510. COPC Principles and Practice. 3 Credits.
Theory and practice of community-oriented primary care, including an extended small group exercise carrying out a COPC project with a simulated community using Web-based data sets.

PUBH 6512. Comm-OrientedPrimryCarePol&Iss. 2 Credits.
Advanced work on COPC methods and policy, focusing on issues related to the provision of health care in underserved communities. Prerequisite: PubH 6510.

PUBH 6513. Community Health Management. 2 Credits.
Management and development of community health services. Builds upon principles for management and community-oriented primary care. Prerequisite: PubH 6510, 6003.

PUBH 6514. Preventing Health Disparities. 2 Credits.
Provides students with an understanding of how social, political, and economic factors contribute to disparities (e.g. racial, ethnic, gender, and geographical) in health and health care and how to use evidence-based approaches to prevent or address health disparities.

PUBH 6515. High Risk&Special Populations. 2 Credits.
Provides students with an overview of the methods to plan, implement and evaluation health promotion and education programs targeted towards high risk and special populations. The course will review the socioeconomic, political-economic, cultural and psychosocial factors of populations who are considered to be at high risk for specific health problems and efforts that have been addressed in current health promotion programs. Prerequisite: PubH 6007.

PUBH 6516. Community Health InfoResources. 2 Credits.
COPC and community health promotion require diverse information skills in order to assess community needs and strengths, determine priority health issues, analyze data, plan interventions, and evaluate programs. This course will introduce students to the information resources useful in planning and implementing COPC and community health projects that address racism. The selected resources will support methods for defining a community, characterizing a community's social and health characteristics, investigating a prioritized problem, and developing programs and solutions. Students will learn how to choose resources, search them, and consider bias in information sources.

PUBH 6530. Qualitative Methods in Health Promotion. 2 Credits.
Application of qualitative methods in the development of health promotion interventions, evaluations, and research. Collecting and analyzing qualitative date through participant observation, interviewing, group methods, and case studies. Prerequisite: PUBH 6007.

PUBH 6531. HlthPromotion/HlthCareSettings. 2 Credits.
Behavioral change counseling and training skills to improve health by changing individuals' behaviors and by developing training materials for use with providers, health professionals and high risk groups. This is an advanced course for second year students. Prerequisite: PubH 6007, 6500.

PUBH 6532. Commnty Org,Devlpmnt&Advocacy. 3 Credits.
Educates health promotion practitioners in how to organize community groups to promote health. The focus is on learning how to use resources available in the community to advocate change. Prerequisite: PubH 6007.

PUBH 6533. Design of Comm Health Surveys. 2 Credits.
This course teaches students how to frame questions in health promotion surveys using sound principles of questionnaire design with emphasis on reliability and validity. Students learn survey design principles and methods and how to analyze survey data.

PUBH 6534. Comm-Based Participatory Res. 1 Credit.
Students learn how to conduct community research in collaboration with community leaders and residents. This course emphasizes the principles of CBPR for addressing health promotion issues in communities including community needs and administrative and policy changes.

PUBH 6535. Promotion of Mental Health. 2 Credits.
Increases understanding about issues in mental health promotion. The emphasis is on mental health as a public health issue and linkages between individual mental health and the environment. Prerequisite: PubH 6007.

PUBH 6536. Workplace Health Promotion. 2 Credits.
Planning, management and evaluation of programs designed to serve employees' needs, promotion of employee health and reduction of health care costs in the workplace. Prerequisite: PubH 6007.

PUBH 6537. Health Promotion & Aging. 2 Credits.
Introduces students to the basic health aspects of the aging process and special health promotion needs for this group. Problems of aging and public health solutions for older Americans will be examined. Students will be able to define the public health concerns for aging Americans, how aging is affected by a multitude of factors, identify health promotion strategies to assist in reaching out to this population and develop methods of collaboration with agencies and organizations to improve the health of the aging population. Prerequisite: PubH 6007.

PUBH 6550. Maternal & Child Health I. 3 Credits.
Public health issues affecting the health and well-being of women, children, and families. A multidisciplinary perspective that integrates the biological, demographic, epidemiological, economic, behavioral, social, cultural and environmental aspects.

PUBH 6551. Maternal & Child Health II. 3 Credits.

PUBH 6552. Women's Health. 2 Credits.
Issues of women's health through the life cycle. The process of critically evaluating women's health research and issues.

PUBH 6553. Adolescent Health. 2 Credits.
Issues of physical, mental, and social development and their bearing on the health of adolescents, with special emphasis on prevention.

PUBH 6554. Children & Youth/Special Needs. 2 Credits.
In order to place children and youth with special needs into a public health framework, this course presents an introduction to and an overview of children and youth with special needs due to a developmental disability. Many aspects of developmental disability will be addressed including 'concept' and definitions of disability, causes, epidemiological considerations, and development of federal legislation. The scope and range of developmental disabilities will be reviewed along with classification schemes. Both national and international distributions will be considered from a sociopolitical viewpoint.

PUBH 6555. ReprodctvHealth:US&GloblPerspc. 2 Credits.
Reproductive health from a variety of public health perspectives, from defining reproductive health, past perspectives, needed improvements, and the factors that influence reproductive health.

PUBH 6556. Maternal & Child Nutrition. 2 Credits.
Covers the nutritional needs of women during the child bearing years, infants, children and adolescents. The course emphasizes the life course approach to nutrition and has a special emphasis on the effects of diet during infancy on obesity and degenerative diseases in later life. Students will examine the biological basis of nutrition, identify risk factors associated with poor nutrition in individuals and populations and evaluate domestic and international programs. Summer (1-credit) and Spring (2-credits).

PUBH 6557. ChildDevelopment&PublicHealth. 2 Credits.
Examination of the development of children from a public health perspective and provide a detailed examination of the indicators of children's health that are needed to assist public health professionals improve children's health.

PUBH 6558. Women, Gender and Health. 2 Credits.
Focuses on gender as a social determinant of health. Emphasis will be placed on examining the frameworks that are used in public health research to understand gender-based issues and how these frameworks affect the types of programs and intervention efforts developed.

PUBH 6559. HIV Prevntn:IntrdisplnryApprch. 2 Credits.
Provides an interdisciplinary overview of HIV prevention research from the behavioral, biological and biomedical perspective. Students are encouraged to approach the assignments and discussions from their own particular expertise and career interests/goals.

PUBH 6560. School Health and Safety. 1,2 Credit.
Examines the history, organization, financing, and politics of school health programs. It will provide an overview of the core components of school health as defined by the Center for Disease Control and Prevention: health services, health education, physical education, nutrition services, counseling or mental health, school environmental health, health promotion, and family/community involvement. Summer (1 credit); Spring (2 credits).

PUBH 6561. Maternal&ChildHlthPolAnalysis. 2 Credits.
Provides instruction in maternal and child health policy in the U.S. with a particular emphasis on policies related to the organization, financing, delivery, and quality oversight of personal health services for mothers and children.

PUBH 6562. Physical Activity and Obesity Interventions: From the Individual to the Environment. 2 Credits.
This course will broadly examine the public health issues related to physical activity and obesity, particularly as they relate to solutions for addressing individual factors and the obesogenic environment. Students will gain a further understanding of the social, physiological, behavioral, and environmental factors related to both obesity and physical activity. The course will focus on examining multiple levels of solutions, specifically: 1) individual and behavioral interventions; 2) school-based and community-level interventions; 3) environmental interventions; 4) policy-level interventions. Students will be expected to critically evaluate the necessary components of interventions, and apply that knowledge to future programmatic efforts.

PUBH 6563. Global Child Health. 2 Credits.
Science, policy, challenges, and successes of global child health; focus on low and middle income countries and children under five years of age. Communicable diseases of childhood and relevant chronic disease pandemics such as HIV and over-nutrition. The burden of disease and associated risk factors; cost-effective interventions and tools. Restricted to graduate students.

PUBH 6570. AdvPublHlthComm: Theory & Prac. 3 Credits.
Focuses on the use of communication to positively influence people's – and population's – understanding of health information, decision-making, and health behavior. In this skills-based course students will study, and in a group project apply, a range of theories and techniques germane to effective message design and delivery. Prereq: PubH 6503.

PUBH 6571. Social Marketing: Theory and Practice. 3 Credits.
The use of marketing to change the behavior of people, populations, and policy makers in ways that are in their, and society's, best interests. Students in this skills-based course study and work in teams to apply a range of marketing strategies to a real-world situation. Prerequisites: PUBH 6503.

PUBH 6572. Marketing Research for Public Health. 3 Credits.
The use of marketing research techniques used to better understand customers of public health programs in order to improve program design, implementation, and effectiveness. A range of qualitative and quantitative techniques are studied for their relevance to program planning, development, and continuous improvement.

PUBH 6573. Media Advocacy for Public Hlth. 3 Credits.
Focuses on the use of communication to positively influence public policy and public opinion. In this skills-based course students will study and apply a range of theories and techniques germane to the policy advocacy process. Prereq: PubH 6503.

PUBH 6574. Pub Hlth Branding Theory&Pract. 2 Credits.
This course focuses on the use of branding in the public health and social sectors. Learning from the commercial sector, we will examine how to brand behaviors as well as products and services. We will review branding methods, examine research on branding and its effectiveness, and build skills in branding for public health objectives.

PUBH 6575. CommunSkills for PubHProfsnls. 1 Credit.
Helps students develop writing and oral presentation skills through intensive, interactive training, practice, and feedback. Provides participants with a solid foundation for all forms of public health and other scientific and technical written and oral communication.

PUBH 6590. Intro Social Entrepreneurship. 2 Credits.
Examine innovative organizations created to improve people's lives and contribute to improved social & economic conditions. Course emphasis on how such organizations are started, how they are sustained, and the various business models that are adopted to achieve an organizational mission.

PUBH 6591. P.A./M.P.H. Clinal Leadership Seminar. 1 Credit.
For first-year physician assistant and master of public health program students, an orientation to their roles as health professionals. Special emphasis on preventive and community medicine.

PUBH 6599. Topics in PCH. 1-3 Credits.
In-depth examination of a particular facet of prevention and community health. Topics and prerequisites vary.

PUBH 6610. Public Health Nutrition Practice and Leadership. 1 Credit.
This course provides an overview of public health nutrition practice. Students develop communication, management and leadership skills necessary for successful careers. Students will also explore potential practicum and culminating experience options, and how to use these experiences to achieve their career goals. This course is designed for first year students in the public health nutrition MPH program.

PUBH 6611. Nutrition Assessment. 2 Credits.
This course examines the anthropometric, biochemical, clinical and dietary methods for assessing nutritional status in individuals. The process of conducting a food and nutrition environment assessments will also be addressed.

PUBH 6612. Food Systems in Public Health. 2 Credits.
A systems approach to understanding food systems and associated public health issues. How the current food system evolved, and how issues such as climate change and population growth may affect food systems in the future. The role of public health practitioners in meeting the population's need for safe, sufficient, and nutritious food. Policies, programs, and proposals aimed at creating healthier, more sustainable food systems. Prerequisite: PUBH 6004.

PUBH 6613. US Food Policy and Politics. 2 Credits.
The programs, regulations and legislation that pertain to food production, food safety, nutrition assistance and dietary guidance in the United States at the federal, state and local levels.

PUBH 6619. Fundamentals of Nutrition Science. 3 Credits.
The fundamental scientific principles of human nutrition; improving diet and nutritional status in the broader context of public health; nutrition assessment, study designs in nutrition science research, the role of nutrition in chronic disease, and current topics in nutrition science.

PUBH 6699. Topics in Nutrition Sciences. 1-3 Credits.
Examination of a particular facet of nutrition sciences. Topics vary by semester. May be repeated for credit provided topic differs. See the Schedule of Classes for more details.

PUBH 6999. Master of Science in Epidemiology Thesis. 2 Credits.
Thesis research. Restricted to MS in Epidemiology candidates.

PUBH 8242. DPH Topics:ClinEpi&DecAnalysis. 1 Credit.
An evidence-based problem solving approach for doctoral level students utilizing methods taught in PubH 6242. Prerequis: PubH 6002, PubH 6003. Corequis: PubH 6242.

PUBH 8244. DPH Topics:Cancer Epidemiology. 1 Credit.
Course focuses on critical review and interpretation of cancer epidemiology literature as well as issues in research design in the field. Prerequ:PubH 6001 & PubH 6003. Corequis: PubH 6244.

PUBH 8245. DPH Topics:InfectDiseaseEpi. 1 Credit.
Provides doctoral level material on the content of infectious disease epidemiology. The course focuses on critical review and interpretation of infectious disease literature as well as issues preparing an analytic research paper on an emerging infectious disease and the application of tools used to describe the epidemiology of those diseases. Prerequ: PubH 6003. Corequis: PubH 6245. Spring.

PUBH 8250. DPH Topics: Epi of HIV/AIDS. 1 Credit.
Students select specific topic within area of HIV/AIDS epidemiology. Options include responding to a data analysis problem; responding to a methodological problem found within HIV/AIDS research; or another topic approved by instructor. Prerequ: PubH 6001 & PubH 6003. Corequis: PubH 6250.

PUBH 8259. DPH Topics:EpiSurveillanceinPH. 1 Credit.
Course provides doctoral level material on the content of surveillance offered in PubH 6259. Focus is on critical review and interpretation of surveillance literature as well as issues preparing an analytic research paper. Prerequ: PubH 6002 & PubH 6003. Corequis: PubH 6259.

PUBH 8364. Quantitative Methods. 3 Credits.
Introduces basic concepts in mathematical statistics. Topics will include probabilities (unconditional and conditional), density and distribution functions of continuous and discrete random variables, including expected values. Specific distribution functions discussed will be Binomial, Poisson, Hypergeometric, and Gaussian distributions. Additional topics include bivariable distributions, variance-covariance matrix, limiting theory, asymptotic results, and maximum likelihood estimation. Prerequisites: Math 1231, 1232 and PubH 6002, 6249.

PUBH 8365. Design of Medical Studies. 3 Credits.
Design of medical investigations, including the randomized clinical trial, observational cohort study, and the retrospective case-control study. Specific methods regarding sample size, power and precision and statistical procedures for randomization and sampling. Ethics of clinical trials and the intention-to-treat principle. Prerequisite: PubH 6002.

PUBH 8366. Biostatistical Methods. 3 Credits.
Biostatistical methods for asymptotically efficient tests and estimates of relative risks and odds ratios from prospective and retrospective matched and unmatched studies. Fixed and random effects models. Logistic regression, conditional logistic regression. Poisson regression. Maximum likelihood and efficient scores. Prerequisites: STAT 6202 or Instructor's permission.

PUBH 8401. Foundations in Public Health Leadership & Practice. 3 Credits.
Interactive seminar course provides students in the doctor of public health (DrPH) program with a fundamental understanding of the history of and current issues associated with the four principal DrPH program areas: health policy, health behavior, global health and environmental and occupational health.

PUBH 8402. Ldrshp/PublicHlthPractc&Policy. 2 Credits.
Principles of public health practice and policy with a focus on the interdisciplinary and strategic application of skills, knowledge and competencies necessary both to perform public health core functions and to enhance the capacity to perform these functions.

PUBH 8404. Advanced Topics: Health Systems and Health Policy Research. 3 Credits.
Examination and assessment of issues related to the intersection of healthcare systems and health policy, and how health policy and health services research can inform the development and evaluation of healthcare systems and health policy. Prerequisites: PUBH 6315. Restricted to doctoral candidates.

PUBH 8405. Advanced Topics: Health Economics Research. 3 Credits.
Critical financing issues for U.S. public health and health care services and systems. The role of health services research in understanding the effects of these issues and informing the deliberations and decisions of policymakers.

PUBH 8406. Advanced Topics: Health Research in the Global Arena. 3 Credits.
Alternative field methods adopted from sociology, anthropology, economics, and political sciences for social sciences and policy research. Builds data collection, instruments, measurements, indicators, and data analysis and interpretation skills in specific socio-cultural contexts. Ethical issues in international research.

PUBH 8407. Advanced Topics: Health Leadership in International Settings. 3 Credits.
Doctoral students develop the tools and experiences needed to build capacity for leadership in global health. Prerequisite: PUBH 8406.

PUBH 8408. Advanced Topics: Health Behavior Research & Practice Applications. 3 Credits.
Advanced topics relating theory to practice in areas of health education and behavioral change. Application of qualitative and quantitative research to health related behavior at individual and community levels.

PUBH 8409. Advanced Topics: Health Communication Research. 3 Credits.
Methods of communications research designed to alter health behavior. Emphasis on critical analysis of communications research aimed at the mass public, groups, and interpersonal level.

PUBH 8411. Advanced Topics - Principles of Human Health Risk Science. 3 Credits.
This course provides the doctoral student with a comprehensive orientation to the frameworks, principles and issues involved in assessing, managing and communicating environmental health risks. This fundamental, interdisciplinary course is designed to foster dialogue and insights about contemporary risk science and management issues, including ethical concerns and technical issues that influence policy making. Restricted to EOH DrPH program students only; other students by permission of instructor.

PUBH 8412. Advanced Topics - Environmental and Occupational Health Research and Practice. 3 Credits.
This course exposes students to the theory and reality of both research and practice in environmental and occupational health. There is an emphasis on the use of public health science in policy and regulatory decisions. Prerequisite: PUBH 8411 or permission of instructor.

PUBH 8413. Research Leadership. 1-10 Credits.
Students participate in a range of activities designed to develop and enhance their research methods and analytic skills. These activities include participating in the development and submission of sponsored research proposals; being formally affiliated with a research project, assuming responsibility for completing a real-world research project; engaging in empirical data collection and analysis efforts.

PUBH 8414. Policy and Management Leadership. 1-10 Credits.
Students develop and enhance their management, leadership, and policymaking skills for problem solving in real-world settings; public health departments, community health centers, legislative settings, and public or teaching hospitals.

PUBH 8415. Instructional Leadership. 1-10 Credits.
Students participate in a range of activities designed to develop and enhance their teaching skills. These activities include course development, teaching master's level courses, acting as TA for undergraduate courses, advising students about their class performance, evaluating student performance, and developing remedial programs for students.

PUBH 8416. Study Design & Evaluation Methods. 3 Credits.
Prepares doctoral students to design and conduct program and policy evaluation in public health. Intensive introduction to the principles of study program design and evaluation research emphasizing the ability to synthesize the population-based intervention literature, apply planning and management methods, describe and apply research methods from a range of disciplines, and prepare a program research proposal.

PUBH 8417. Qualitative Research Methods and Analysis. 3 Credits.
Techniques for designing and conducting qualitative research and for analyzing and reporting qualitative data relevant to program development and implementation, community assessment, and policy analysis. Prerequisite: PUBH 8416.

PUBH 8418. Applied Statistical Analysis. 3 Credits.
Intensive course in data management and data analysis using STATA® . Database management system techniques and data analytical strategies for the appropriate analysis of data sets obtained from a variety of studies will presented. The student will manipulate national data sets from epidemiological studies as well as Demographic and Health Survey (DHS) data. Prereq: PubH 8416.

PUBH 8419. Measrmnt/PublHlth&HlthSrvcsRes. 3 Credits.
In this course students review principles of measurement and assessment as they apply to public health and health services research constructs, review existing state-of –the-art measures of individual and population health status (e.g., morbidity, mortality, functioning and health-related quality of life) and of individual and community health behavior, and explores current measurement issues in health research. Prerequisite: PubH 8418.

PUBH 8420. Advanced Analysis & Dissemination. 3 Credits.
Advanced multivariate data analyses of complex datasets and programs, including advanced cross-sectional techniques, time-series analysis, and the use of panel data. Evaluation of results, and dissemination of findings to relevant stakeholders. Prereq: PubH 8417, 8418.

PUBH 8422. Advanced Health Care and Public Health Research Design. 2 Credits.
Design of protocol suitable for implementation as part of DrPH dissertation requirement. Enrollment only after completion of required coursework and successful completion of the comprehensive examination. Instructor's approval required.

PUBH 8423. Dissertation Research. 1-12 Credits.
Dissertation Research for DrPH. Prereq: PubH 8422.

PUBH 8999. Dissertation Research. 1-12 Credits.
Dissertation research.

MASTER OF PUBLIC HEALTH IN THE FIELD OF COMMUNITY ORIENTED PRIMARY CARE

Program Director F. Spielberg

Practicum Director K. Pomerantz

Mission Statement

The Community Oriented Primary Care (COPC) program at the Milken Institute School of Public Health offers master of public health (M.P.H.) and graduate certificate programs designed to train health professionals and public health practitioners to implement and evaluate evidence-based interventions to improve community health, clinical care outcomes, and patient experience, while lowering health care costs and decreasing health disparities.

COPC

The COPC program trains future health care innovators in the methods of COPC which provide skills to conceptualize, implement, evaluate, and disseminate interventions that bridge public health and clinical medicine. COPC begins by teaching practitioners methods to fully understand the needs of communities, health care providers and policy makers. Concurrently, skills are developed to read and interpret literature to inform future intervention design. With this in-depth understanding, COPC practitioners learn to work with stakeholders to prioritize interventions that will have a high likelihood of improving health outcomes and patient experience while lowering health care costs and decreasing health disparities. COPC practitioners learn to conduct in-depth assessments, which help to shape intervention design and serve as baseline data to evaluate intervention impact. Acquired Intervention skills include implementation of social marketing campaigns, advocacy campaigns, mobile health interventions, individual brief behavioral interventions, peer interventions, quality improvement projects using data from electronic health records, structural interventions to impact health behaviors, and health system innovations to improve the ability of community based organizations to educate, test, and link to care patients with preventable and chronic health conditions. Evaluation skills are acquired that include analysis of qualitative, quantitative, and cost data. Dissemination skills are acquired to take best practices to scale. Through

experiential learning COPC practitioners will develop the skills necessary to lead health improvement projects in community, health department, academic, and clinical settings.

Goals

The following are goals of this educational program:

- Provide the knowledge and skills necessary to implement a COPC program.
- Provide an analytical framework for evaluating community-based interventions using the principles and methods of COPC as a reference.
- Provide opportunities for COPC practice, especially within vulnerable communities.
- Create health and public health practitioners with skills necessary to excel in the following positions:
  - Clinic Quality Improvement Specialist (clinic setting)
  - Patient Centered Medical Home team leader (clinic setting)
  - Supervisor of patient care coordination (clinic or MCO setting)
  - Community health specialist (community, clinic or public health setting)
  - Health promotion specialist (community or clinic setting)
  - Supervisor of Community Health Worker program (community or clinic setting)
  - Community Health Research coordinator (academic, clinic or community setting)
  - Director of community clinic or community health organization (With dual health and MPH degree)

Background

COPC provides the bridge between clinical medicine and public health, in which the community is the focal point in the delivery of health care. It provides a conceptual and methodological framework to rationalize, organize, and adapt available resources to the delivery of health services. The methods are essential to the organized delivery of health care in community based practices, organizations engaged in managed care, and responsive governmental health systems.

The basic concepts of COPC were initially implemented in South Africa during the early 1940's by Sidney and Emily Kark with the creation of community health centers. These centers promoted a reorientation of health services at the community level through a unique linkage between individual clinical care and public health. They served as a laboratory for teaching and training health professionals.

Since that time, COPC has been taught and practiced in a number of settings around the world. Significantly, it has been an important element in the Community Health Center movement, the Indian Health Service, and a number of urban health departments in the United States as well as a variety of public health and primary care systems around the world. Developments in computer-based information management, mobile health, geographic information systems, and qualitative information gathering techniques have proved important assets to COPC practice.

The Concept of COPC

The essence of COPC is the planning and delivery of health care to a defined community in response to the defined needs of that community. To do this successfully requires the planned integration of the classical public health roles of health promotion and disease prevention at population levels with the delivery of primary health care, which focuses on the clinical treatment of disease and its sequelae. COPC recognizes that, in line with the World Health Organization definition of health as being far more than the absence of disease, a clinical practice should be responsive to the broad health needs of the community and should be flexible enough to respond to changes in those needs. COPC can be defined as a continuous process by which primary care is provided to a defined community on the basis of its assessed health needs through the planned integration of public health with clinical practice The COPC program curriculum will teach a six-step process as follows:

1. Community definition
2. Community characterization
3. Problem prioritization
4. Detailed assessment
5. Intervention
6. Evaluation

The overall curriculum is designed to give the learner the necessary public health tools to apply the principles of COPC in the context of community health practice and to be well educated in the disciplines of applied public health.

COMPETENCIES

All MPH students in the Prevention and Community Health Department should possess the following functional competencies:

- Identify the causes of social and behavioral factors that affect health of individuals and populations.

PUBH 6500	Planning and Implementing Health Promotion Programs
PUBH 6501	Program Evaluation

- Apply appropriate theories toward the development, implementation, and evaluation of health promoting programs, interventions, and policies.

PUBH 6500	Planning and Implementing Health Promotion Programs
PUBH 6501	Program Evaluation

- Develop interventions, programs, and policies to affect change at the individual, interpersonal, community, and population level.

PUBH 6500	Planning and Implementing Health Promotion Programs
PUBH 6501	Program Evaluation

- In collaboration with others, prioritize individual, organizational, and community concerns and resources for public health programs.

PUBH 6500	Planning and Implementing Health Promotion Programs
PUBH 6501	Program Evaluation

- Apply theory and strategy-based communication principles across different settings and audiences.

PUBH 6500	Planning and Implementing Health Promotion Programs
PUBH 6501	Program Evaluation

- Apply ethical principles to public health program planning, implementation, evaluation, communication, and dissemination.

PUBH 6500	Planning and Implementing Health Promotion Programs
PUBH 6501	Program Evaluation

Upon completion of the MPH in Community Oriented Primary Care students should possess the following functional competencies:

- Communicate and discuss the principles and methods of COPC.
  Students should have the knowledge and understanding to be able to discuss the principles of COPC and describe the 6 steps which are:

1. defining the community,
2. characterizing the community,
3. prioritizing community health issues and problems,
4. conducting a detailed assessment of the priority health issue,
5. planning and implementing COPC interventions, and
6. evaluating the interventions.

  Overarching principles include community participation and partnership. Students should be capable of communicating these to audiences with different educational levels and cultural backgrounds.

PUBH 6510	COPC Principles and Practice
PUBH 6512	Comm-OrientedPrimryCarePol&Iss
PUBH 6513	Community Health Management
PUBH 6514	Preventing Health Disparities
PUBH 6516	Community Health InfoResources

- Define, characterize communities and identify its health needs which will be the focus of a COPC practice.

Relevant Courses

PUBH 6504	Social and Behavioral Science Research Methods
PUBH 6510	COPC Principles and Practice
PUBH 6512	Comm-OrientedPrimryCarePol&Iss
PUBH 6530	Qualitative Methods in Health Promotion

- Prioritize community health issues using the principles of COPC.

PUBH 6015	Culminating Experience

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

MASTER OF PUBLIC HEALTH IN THE FIELD OF HEALTH PROMOTION

Program Director C.Sparks

Practicum Director T. Henry

Mission Statement

The mission of the master of public health degree in health promotion degree program is to train students to enhance and protect the health of the public.The program is designed to assist individuals to become responsible and productive public health professionals who are capable of assessing, implementing, managing, and evaluating health promotion and health education programs for the public and for at-risk populations. The required courses as well as the suggested electives are intended to train students in social and behavioral approaches and applications for improving public health using interventions at the individual, group, organizational, and societal level.

Goals

The goals of this educational program are to provide and improve:

- Knowledge of and ability to use social and behavioral theory and behavior change models and strategies that have been shown to be successful in improving health behaviors and practices for a variety of populations.
- Knowledge and skills to assess needs for health interventions for the general public as well as at-risk populations.
- Ability to plan, design, implement, evaluate, and communicate programs and research targeted toward health promotion and/or disease prevention for the public.
- Ability to advocate for improvements in social practices, policy, and law that will provide supportive environments for the improvement of public health.
- Use of structures and resources of organizations and governments to create healthy environments that promote health.

Specific admission requirements are shown on the Graduate Program Finder. (http://www.gwu.edu/all-graduate-programs)

Visit the program website (http://publichealth.gwu.edu/programs/health-promotion-mph) for additional information.

COMPETENCIES

The competencies for the Health Promotion Program are based on the Association of Schools of Public Health (ASPH) competencies in social and behavioral health, as well as the National Health Educator Competencies that students need to qualify at the master's level as certified health education specialists (CHES) which are recognized by the Society for Public Health Education. Upon Completion of the Health Promotion Program should possess the following seven functional competencies:

- Assess the individual, community, organizational and societal health and mental health needs of the general public and at-risk populations.

PUBH 6503	Introduction to Public Health Communication and Marketing
PUBH 6504	Social and Behavioral Science Research Methods
PUBH 6530	Qualitative Methods in Health Promotion
PUBH 6531	HlthPromotion/HlthCareSettings
PUBH 6532	Commnty Org,Devlpmnt&Advocacy

- Plan health promotion/education strategies, interventions and programs based on theory and evidence and cultural appropriateness for individuals, groups and communities.

PUBH 6503	Introduction to Public Health Communication and Marketing
PUBH 6531	HlthPromotion/HlthCareSettings
PUBH 6532	Commnty Org,Devlpmnt&Advocacy

- Implement health promotion and health education strategies, interventions and programs to meet the health and mental health needs of the public.

PUBH 6531	HlthPromotion/HlthCareSettings
PUBH 6532	Commnty Org,Devlpmnt&Advocacy

- Conduct evaluation of health promotion program and conduct research related to health promotion and health education.

PUBH 6503	Introduction to Public Health Communication and Marketing
PUBH 6504	Social and Behavioral Science Research Methods
PUBH 6530	Qualitative Methods in Health Promotion
PUBH 6531	HlthPromotion/HlthCareSettings
PUBH 6532	Commnty Org,Devlpmnt&Advocacy

- Administer and manage health promotion strategies, interventions and programs.

PUBH 6503	Introduction to Public Health Communication and Marketing
PUBH 6504	Social and Behavioral Science Research Methods
PUBH 6531	HlthPromotion/HlthCareSettings
PUBH 6532	Commnty Org,Devlpmnt&Advocacy

- Develop communication campaigns and strategies to disseminate health promotion information through media channels.

PUBH 6503	Introduction to Public Health Communication and Marketing
PUBH 6530	Qualitative Methods in Health Promotion
PUBH 6532	Commnty Org,Devlpmnt&Advocacy

- Develop and implement advocacy strategies to create interventions at the population level that improve or alter social norms, policy and law to support public health.

PUBH 6503	Introduction to Public Health Communication and Marketing
PUBH 6532	Commnty Org,Devlpmnt&Advocacy

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 41 credits in required courses and 4 credits in practicum and culminating experience.

MASTER OF PUBLIC HEALTH IN THE FIELD OF MATERNAL AND CHILD HEALTH

Program Director A. Vyas

Faculty Advisors M. Napolitano, K. McDonnell, K. Roche, M. Ruiz

Mission Statement

The maternal and child health program (MCH) at the Milken Institute School of Public Health (SPH) is a Master of Public Health (MPH) degree program designed to train individuals to become responsible and productive public health professionals with an emphasis on MCH populations. This program investigates maternal and child health from a multi-disciplinary perspective that integrates the life course, biological, demographic, epidemiological, developmental, environmental, behavioral, and social characteristics that are unique to the health and well-being of women, children, and families.

Goals

The goals of this educational program are to provide and improve:

- Knowledge and skills to assess the health care needs of women, children, and families; and
- Ability to plan, design, implement, evaluate, and communicate programs and research targeted toward health promotion and disease prevention among women, children, and families,

COMPETENCIES

Program-Specific Competencies

The Association of Teachers of Maternal and Child Health have outlined 5 basic competency areas in MCH that our program strives to attain:

1. Scientific Basis of MCH public health practice
2. Methodological/Analytical Skills
3. Management and Communication Skills
4. Policy and Advocacy Skills
5. Values and Ethics in MCH Public Health Practice

Upon Completion of the MPH, Maternal and Child Health Program students should possess the following functional competencies:

- Assess the individual, community, organizational and societal needs of women, children, and families.

Relevant courses:

PUBH 6550	Maternal & Child Health I
PUBH 6551	Maternal & Child Health II

- Develop and implement strategies and interventions to improve the health needs of women, children and families.
- **Relevant courses:**

PUBH 6550	Maternal & Child Health I
PUBH 6551	Maternal & Child Health II

- Conduct evaluation and research related to the health and well-being of women, children and families.

Relevant courses:

PUBH 6550	Maternal & Child Health I
PUBH 6551	Maternal & Child Health II

- Administer MCH strategies and policies to improve the heath and well-being of women, adolescents, children and families.

Relevant courses:

PUBH 6550	Maternal & Child Health I

- Communicate and advocate for health and well-being of women, children and families.

Relevant courses:

PUBH 6550	Maternal & Child Health I
PUBH 6551	Maternal & Child Health II

- Incorporate a life course perspective to the health and well-being of women, children and families.

Relevant courses:

PUBH 6550	Maternal & Child Health I
PUBH 6551	Maternal & Child Health II

REQUIREMENTS

MPH students who select the Maternal and Child Health Program enroll in Core Courses (15 credits), Department and Program-Specific Required Courses (12 credits), Program-Specific Electives (11 credits), and an additional 3 credits of any SPH elective(s). The 45 total credit requirements include a Practicum and Culminating experience (4 credits), where students apply their classroom education in a Maternal and Child Health organization and/or research endeavor.

Begin planning Practicum during Year 1; complete Culminating Experience in Year 2.

Program Requirements

Code	Title	Credits
Required core courses (15 credits)		
PUBH 6001	Biological Concepts in Public Health	
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

MASTER OF PUBLIC HEALTH IN THE FIELD OF PUBLIC HEALTH COMMUNICATION AND MARKETING

Program Director L. Abroms

Practicum Director K. Pomerantz

Mission

Based on an ecological model of health, the mission of this program is to educate public health professionals to use communication and marketing as strategic tools to influence people, places, and environmental conditions in ways that advance public health objectives.

Goals

Graduates will possess the skills necessary to become highly effective public health practitioners and leaders. Their specific expertise in the strategic use of communication and marketing tools will enable them to work collaboratively with a broad range of other public health experts to plan high-impact health enhancement initiatives, and to implement or supervise the implementation of the communication and marketing components of public health initiatives.

Specifically, students will become proficient at developing, implementing, and evaluating:

- Communication programs that help people make sound health decisions and effectively manage their health behaviors.
- Marketing programs that improve the health capacity of communities by enhancing the competitiveness of the healthful (versus unhealthful) products and services offered to community members.
- Communication programs that promote the adoption of policies--in the public and private sector--which enhance health.

COMPETENCIES

Program-Specific Competencies

Upon completion of the MPH Program in Public Health Communication and Marketing, students will be able to:

- Apply an ecological framework to assess and promote population health.

  Relevant courses:

PUBH 6502	Practical Data Analysis: PCH
or PUBH 6504	Social and Behavioral Science Research Methods
PUBH 6503	Introduction to Public Health Communication and Marketing
PUBH 6570	AdvPublHlthComm: Theory & Prac
PUBH 6571	Social Marketing: Theory and Practice
PUBH 6573	Media Advocacy for Public Hlth
PUBH 6575	CommunSkills for PubHProfsnls

- Use marketing research to develop and improve public health programs.

  Relevant courses:

PUBH 6503	Introduction to Public Health Communication and Marketing
PUBH 6570	AdvPublHlthComm: Theory & Prac
PUBH 6571	Social Marketing: Theory and Practice
PUBH 6572	Marketing Research for Public Health
PUBH 6574	Pub Hlth Branding Theory&Pract

- Develop and administer communication programs to promote individual- and population-level behavior change.

Relevant courses:

PUBH 6503	Introduction to Public Health Communication and Marketing
PUBH 6570	AdvPublHlthComm: Theory & Prac
PUBH 6571	Social Marketing: Theory and Practice
PUBH 6572	Marketing Research for Public Health
PUBH 6573	Media Advocacy for Public Hlth
PUBH 6574	Pub Hlth Branding Theory&Pract
PUBH 6575	CommunSkills for PubHProfsnls

- Develop and administer marketing programs to promote individual- and population-level behavior change and improve the health capacity of communities.

Relevant courses:

PUBH 6503	Introduction to Public Health Communication and Marketing
PUBH 6570	AdvPublHlthComm: Theory & Prac
PUBH 6571	Social Marketing: Theory and Practice

PUBH 6536	Workplace Health Promotion
PUBH 6537	Health Promotion & Aging
Or select other SPH course(s) with advisor's advanced approval	
Practicum and culminating experience:	
PUBH 6014	Practicum
PUBH 6015	Culminating Experience

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

DOCTOR OF PUBLIC HEALTH IN THE FIELD OF HEALTH BEHAVIOR

Program Director M. Napolitano

Mission

The mission of the Department of Prevention and Community Health is to train professionals to provide leadership in the field of health behavior. The doctor of public health in the field of health behavior degree program is based on the ecological model of health and well-being and is aimed at understanding and having an impact on the health of populations and cultures, with special emphasis on underserved populations. Graduates are prepared to apply their research and analytic skills to a range of implementation, evaluation, and advocacy needs of various cultural and socioeconomic groups and communities.

Specific admission requirements are shown on the Graduate Program Finder (https://www.gwu.edu/all-graduate-programs).

For program policies and procedures, please refer to the Doctor of Public Health Handbook and other resources located on the Dr.PH. in the field of Health Behavior website (https://publichealth.gwu.edu/programs/health-behavior-drph).

REQUIREMENTS

The following requirements must be fulfilled: 48 credits, including 30 credits in required courses, 7-10 credits in elective courses, and 8-10 credits in dissertation.

Program requirements

Code	Title	Credits
Required		
Foundational and research methods (20 credits)

Dissertation	
8-11 credits in preparation and dissertation	
PUBH 8422	Advanced Health Care and Public Health Research Design
PUBH 8423	Dissertation Research
Other	
Successful completion of a comprehensive examination.	

Graduation Requirements

1. Graduate credit requirement: 48 graduate credits are required.
2. Course requirements: successful completion of the foundational and research methods courses. The program-specific specialty field courses and the professional leadership credits are required.
3. Comprehensive exam: Once the course of study is completed, students are required to pass the comprehensive exam to be officially admitted to the candidacy phase.
4. Dissertation: PUBH 8422 Advanced Health Care and Public Health Research Design plus 6-9 dissertation research credits are required. Once the proposal has been successfully defended and dissertation research credits have been met, the oral defense may be scheduled.
5. Grade point requirement: A 3.0 (B average) overall grade-point average is required.
6. Time limit requirement: The degree must be completed within seven (7) years.
7. No transfer credits are accepted.

DOCTOR OF PHILOSOPHY IN THE FIELD OF SOCIAL AND BEHAVIORAL SCIENCES IN PUBLIC HEALTH

Program Director M. Napolitano

Mission

The Ph.D. in social and behavioral sciences in public health degree program is designed to develop public health scholars who are at the forefront of social and behavior change. The program trains students to conduct independent research that is theoretically sound and applicable across a variety of contexts in order to prevent diseases and promote health and well-being.

Goals

The goal of the Ph.D. degree program is to train students to conduct rigorous and state-of-the-art independent research to advance understanding of social and behavioral sciences in public health. The program is designed to be four years in duration, with comprehensive exams at the end of the second year, and full dissertation work during the remaining two years.

COMPETENCIES

PhD, Social and Behavioral Sciences in Public Health Competencies include:

- Synthesize the research literature in public health social and behavioral sciences as well as be able to compare and contrast prominent social and behavioral science theories.
- Critically examine and employ distinct theories, or combinations of theories, at multiple levels to study health outcomes.
- Demonstrate advanced knowledge in the principles of evaluation and study design and data analysis as well as develop evidence based questions and predictions, gather, synthesize, and interpret empirical evidence.
- Exhibit the ability to apply scientific knowledge to develop new conceptual models and/or research predictions, including, justifying new questions with existing literature, selecting appropriate research methods to study those questions, and indicate the potential contributions of the proposed research.
- Report research objectively, insightfully, and in the context of theory and prior research.
- Have an awareness of, and adhere to, the ethical standards of the discipline for the conduct of scientific research.
- Gain competency in classroom instruction and practices in substantive issues in public health social and behavioral sciences.

REQUIREMENTS

Program requirements

The following requirements must be fulfilled: 48 credits, including 12 credits in foundation courses, 9 credits in required courses, 6 credits in advanced research courses, 14 credits in elective courses, and 7 credits in dissertation courses.

EDUC 8173	Structural Equation Modeling	
EDUC 8131	Case Study Research Methods	
PSYC 8231	Development of Psychometric Instruments	
PUBH 6263	Advanced GIS	
PUBH 6273	Ethnographic Methods	
PUBH 6310	Statistical Analysis in Health Policy	
PUBH 6533	Design of Comm Health Surveys	
PUBH 8364	Quantitative Methods	
PUBH 8366	Biostatistical Methods	
Electives		
14 credits in pre-approved elective courses selected from among any the following subject areas as well as the Advanced Research Methods and Statistics area, above.		
Social and Behavioral Sciences		
PSYC 8204	Experimental Foundations of Psychology: Biological Basis of Behavior	
PSYC 8211	Community Psychology I	
PSYC 8253	Social Cognition	
PSYC 8277	Health Psychology	
PSYC 8278	Behavioral Medicine	
PSYC 8287	Current Topics in Clinical Psychology	
Global Health		
PUBH 6262	Intro-Geog Information Systems	
PUBH 6400	Global Health Frameworks	
PUBH 6416	Ethical and Cultural Issues in Global Health Research and Programs	
PUBH 6431	Global Health Communication Strategies and Skills	
PUBH 6442	Comparative Global Health Systems	

Current Issues in Public Health	
ECON 8375	Econometrics I
HCS 8369	Issues in Health Care
HDEV 8100	Issues and Special Topics in Human Development
PUBH 6274	Emerging ID for PH Pro's
PUBH 6368	Law, Medicine, and Ethics
PUBH 6532	Commnty Org,Devlpmnt&Advocacy
PUBH 6573	Media Advocacy for Public Hlth
PUBH 8405	Advanced Topics: Health Economics Research
PUBH 8422	Advanced Health Care and Public Health Research Design
Students may be permitted to take alternative elective course with the approval of the program director.	
Dissertation Preparation and Dissertation	
7 credits taken as follows:	
1 credit in Advanced Theorizing in Social and Behavioral Sciences in Public Health (course pending)	
and 6 credits in:	
PUBH 8999	Dissertation Research

ACADEMIC CALENDAR

Summer Session 2016

Session I begins (6-, 8,-10-, and 14-week sessions)	Monday, May 16
Memorial Day (no classes)	Monday, May 30
6-week Session I ends	Saturday, June 25
Independence Day observed (no classes)	Monday, July 4
Session II begins (6-week session)	Tuesday, July 5
8-week Session I ends	Saturday, July 9
10-week Session I ends	Saturday, July 23
6-week Session II ends	Saturday, August 13
14-week session I ends	Saturday, August 20

Fall Semester 2016

Classes begin	Monday, August 29
Labor Day (no classes)	Monday, September 5
Fall break (no classes)	Monday, October 24 - Tuesday, October 25
Thanksgiving break (no classes)	Wednesday, November 23 – Saturday, November 26
Last day of classes	Monday, December 12
Make up/ Reading day	Tuesday, December 13
Final examinations	Wednesday, December 14 – Thursday, December 22

Spring Semester 2017

Classes begin	Tuesday, Jan 17
Inauguration Day (no classes)	Friday, January 20
Presidents' Day (no classes)	Monday, February 20
Spring break (no classes)	Monday, March 13 – Saturday, March 18
Last day of classes	Monday, May 1
Designated Friday	Tuesday, May 2
Designated Monday	Wednesday, May 3
Make up/ Reading days	Thursday, May 4 – Friday, May 5
Final examinations	Monday, May 8 – Tuesday, May 16
Commencemer weekend	Friday, May 18 – Sunday, May 21
Spring degree conferral	Sunday, May 21

Please note that these dates are subject to change. Updates can be found online (http://www.gwu.edu/academic-calendar).

ACADEMY FOR CLASSICAL ACTING (ACA)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ACA 6201. Acting I. 3 Credits.
The focus of the acting sequence shifts with each session, providing a studio structure to explore and meet the demands of the classical canon. Portions of the sequence focus on the history plays and tragedies, classic comedy, high comedy, the Jacobeans, and master classes.

ACA 6202. Acting II. 2,3 Credits.
The focus of the acting sequence shifts with each session, providing a studio structure to explore and meet the demands of the classical canon. Portions of the sequence focus on the history plays and tragedies, classic comedy, high comedy, the Jacobeans, and master classes.

ACA 6203. Acting: Classical Comedy. 2,3 Credits.
The focus of the acting sequence shifts with each session, providing a studio structure to explore and meet the demands of the classical canon. Portions of the sequence focus on the history plays and tragedies, classic comedy, high comedy, the Jacobeans, and master classes.

ACA 6204. Acting: Master Class. 2,3 Credits.
The focus of the acting sequence shifts with each session, providing a studio structure to explore and meet the demands of the classical canon. Portions of the sequence focus on the history plays and tragedies, classic comedy, high comedy, the Jacobeans, and master classes.

ACA 6205. Topics in Classical Drama and Culture. 2 Credits.
Plays and other writings from the Elizabethan, Jacobean, and Restoration eras and the 18th century. The historical world in which the plays were written as well as the imaginary worlds created in the plays themselves.

ACA 6206. Topics in Classical Drama and Culture. 2 Credits.
Plays and other writings from the Elizabethan, Jacobean, and Restoration eras and the 18th century. The historical world in which the plays were written as well as the imaginary worlds created in the plays themselves.

ACA 6207. Topics in Classical Drama and Culture. 2 Credits.
Plays and other writings from the Elizabethan, Jacobean, and Restoration eras and the 18th century. The historical world in which the plays were written as well as the imaginary worlds created in the plays themselves.

ACA 6208. Topics in Classical Drama and Culture. 1 Credit.
Plays and other writings from the Elizabethan, Jacobean, and Restoration eras and the 18th century. The historical world in which the plays were written as well as the imaginary worlds created in the plays themselves.

ACA 6209. Text I. 2 Credits.
Textual analysis emphasizing development of aesthetic expression. The forms and rules of verse: its meter, scansion, and overall structure in the early, middle, and late Shakespeare plays, as well as the intricacies of the prose.

ACA 6210. Text II. 2 Credits.
Textual analysis emphasizing development of aesthetic expression. The forms and rules of verse: its meter, scansion, and overall structure in the early, middle, and late Shakespeare plays, as well as the intricacies of the prose.

ACA 6211. Voice and Speech I. 3 Credits.
The development of clear, supported speech and sound that can meet the demands and challenges of classical texts. Resonators, articulators, breathing, and placement; phonetics and ear training; defining the character through the voice.

ACA 6212. Voice and Speech II. 2,3 Credits.
The development of clear, supported speech and sound that can meet the demands and challenges of classical texts. Resonators, articulators, breathing, and placement; phonetics and ear training; defining the character through the voice.

ACA 6213. Voice and Speech III. 3 Credits.
The development of clear, supported speech and sound that can meet the demands and challenges of classical texts. Resonators, articulators, breathing, and placement; phonetics and ear training; defining the character through the voice.

ACA 6214. Voice and Speech IV. 2 Credits.
The development of clear, supported speech and sound that can meet the demands and challenges of classical texts. Resonators, articulators, breathing, and placement; phonetics and ear training; defining the character through the voice.

ACA 6215. Movement I. 1,2 Credit.
The development of an awareness of the body and its expressive abilities through an integrated approach that includes ballet, modern dance, Hatha Yoga, and Feldenkrais for coordination, focus, and expression.

ACA 6216. Movement II. 1,2 Credit.
The development of an awareness of the body and its expressive abilities through an integrated approach that includes ballet, modern dance, Hatha Yoga, and Feldenkrais for coordination, focus, and expression.

ACA 6217. Movement III. 1,2 Credit.
The development of an awareness of the body and its expressive abilities through an integrated approach that includes ballet, modern dance, Hatha Yoga, and Feldenkrais for coordination, focus, and expression.

ACA 6218. Movement IV. 1,2 Credit.
The development of an awareness of the body and its expressive abilities through an integrated approach that includes ballet, modern dance, Hatha Yoga, and Feldenkrais for coordination, focus, and expression.

ACA 6219. Alexander Technique I. 1,2 Credit.
Through group work and individual sessions, students develop a further awareness of the body toward expression of imagination and the creative process, enabling powerful characterization without stress or personal physical distortion.

ACA 6220. Alexander Technique II. 1,2 Credit.
Through group work and individual sessions, students develop a further awareness of the body toward expression of imagination and the creative process, enabling powerful characterization without stress or personal physical distortion.

ACA 6221. Alexander Technique III. 1,2 Credit.
Through group work and individual sessions, students develop a further awareness of the body toward expression of imagination and the creative process, enabling powerful characterization without stress or personal physical distortion.

ACA 6222. Alexander Technique IV. 1,2 Credit.
Through group work and individual sessions, students develop a further awareness of the body toward expression of imagination and the creative process, enabling powerful characterization without stress or personal physical distortion.

ACA 6223. Stage Combat I. 2 Credits.
Skills in stage combat techniques, including unarmed combat and broadsword, buckler, rapier, dagger, and other lighter weapons, toward development of greater physical strength and an awareness of safety issues. The course is designed to lead to certification as an actor/combatant through the Society of American Fight Directors.

ACA 6224. Stage Combat II. 2 Credits.
Skills in stage combat techniques, including unarmed combat and broadsword, buckler, rapier, dagger, and other lighter weapons, toward development of greater physical strength and an awareness of safety issues. The course is designed to lead to certification as an actor/combatant through the Society of American Fight Directors.

ACA 6225. Practicum I. 2 Credits.
This sequence of courses includes scene preparation, rehearsal/production, clown class, and other performance skills.

ACA 6226. Practicum II. 1-6 Credits.
This sequence of courses includes scene preparation, rehearsal/production, clown class, and other performance skills.

ACA 6227. Practicum III. 1-6 Credits.
This sequence of courses includes scene preparation, rehearsal/production, clown class, and other performance skills.

ACA 6228. Practicum IV. 1-6 Credits.
This sequence of courses includes scene preparation, rehearsal/production, clown class, and other performance skills.

ACA 6229. Audition Techniques. 3 Credits.
A set of workshops to help students develop strong audition skills. Business aspects of acting, such as selection of agents, Equity status, and taxation issues. The workshop concludes with a showcase performance for casting directors, agents, and theatre directors.

ACA 6595. Selected Topics. 1 Credit.

ACCOUNTANCY (ACCY)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ACCY 2001. Intro Financial Accounting. 3 Credits.
The fundamental concepts underlying financial statements and the informed use of accounting information. Analysis and recording of business transactions; preparation and understanding of financial statements. Measurement of the profitability and financial position of a business. Restricted to sophomore standing.

ACCY 2002. Introductory Managerial Accounting. 3 Credits.
The use of accounting information to plan and control the activities of a business. Several widely used methods of determining the cost of business activities for use in making business decisions. Prerequisite: ACCY 2001.

ACCY 3101. Intermediate Accounting I. 3 Credits.
Financial accounting concepts underlying the preparation and interpretation of financial statements. Topics include revenue and expense recognition; accounting for receivables, inventories, fixed assets, intangible assets, and liabilities. Prerequisite: ACCY 2001.

ACCY 3102. Intermediate Accounting II. 3 Credits.
Financial accounting concepts underlying the preparation and interpretation of financial statements; accounting for stockholders' equity, earnings per share, debt and equity investments, income taxes, pensions and other postretirement benefits, accounting changes, statements of cash flows, financial statement analysis, and disclosure. Prerequisite: ACCY 3101.

ACCY 3106. Financial Statement Analysis. 3 Credits.
Introduction to the analysis and interpretation of corporate financial statements within the context of a company's industry and economic environment. Cash flow analysis, profitability and risk analysis, accounting policy analysis, forecasting and performance analysis, elements of equity valuation, and decision perspectives of creditors. Students cannot earn credit for both this course and ACCY 4801. Prerequisite: ACCY 2002.

ACCY 3401. Federal Income Tax:Individuals. 3 Credits.
A study of federal income tax concepts, including what shall be taxed, and when, and at what rate. Taxable entities, income measurement, the use of different tax rates for different types of income, and the use of the tax laws to motivate taxpayer behavior to achieve economic goals.

ACCY 3403. Advanced Tax. 3 Credits.
Taxation of partnerships, corporations, and their owners. Formation, operation, and liquidation of each type of entity. Financial and tax accounting for each type of transaction, with the goal of gaining a better understanding of each system by comparing and contrasting it with the other one. Prerequisites: ACCY 2001 & ACCY 3401.

ACCY 3601. Business Law: Contracts, Torts, and Property. 3 Credits.
Essential legal principles of contracts, torts, and property, including trusts and estates, leases, professional liability, and the Uniform Commercial Code.

ACCY 4107. Advanced Accounting. 3 Credits.
Accounting for corporate combinations, foreign currency financial statements, and derivative financial instruments. Governmental and not-for-profit accounting. Prerequisites: ACCY 3101 and ACCY 3102.

ACCY 4301. Auditing. 3 Credits.
A study of generally accepted auditing standards and accepted professional auditing practices and procedures, including reviewing and evaluating financial controls, auditing financial statements, and testing financial data of manual and automated accounting systems. Prerequisite: ACCY 3102.

ACCY 4501. Accounting Systems. 3 Credits.
Introduction to the design and operation of accounting systems and data management controls. Principles and applications of internal control applicable to manual and automated accounting systems. Prerequisite: ACCY 3102.

ACCY 4601. Business Law: Enterprise Organization. 3 Credits.
The legal aspects of organizing, financing, and operating an enterprise: agency, partnerships, corporations, securities regulation, insurance, secured credit financing, and commercial paper. Prerequisite: ACCY 2001.

ACCY 4801. Financial Accounting Capstone. 3 Credits.
Synthesis and application of knowledge of financial accounting to specific contexts, using the perspectives of the preparer and user of financial statements. Students cannot earn credit for both this course and ACCY 3106. Restricted to seniors only.

ACCY 4900. Special Topics. 3 Credits.
Experimental offering; new course topics and teaching methods. Restricted to department approval.

ACCY 4995. Independent Study. 3 Credits.
Assigned topics. Admission by permission of the department chair.

ACCY 6101. Financial Accounting. 3 Credits.
The basic concepts and methods used in financial reports for understanding their content and context. The income statement, balance sheet, and statement of cash flows. Detailed accounting procedures and choices. How the most important accounting procedures are calculated and how different choices impact financial statements. Same as MBAD 6211.

ACCY 6104. Intermediate Accounting I. 3 Credits.
Accounting principles and concepts for financial accounting and reporting; emphasis on the preparation of general-purpose financial statements. Restricted to School of Business graduate degree students. Prerequisite: ACCY 6101 and MBAD 6211.

ACCY 6105. Intermediate Accounting II. 3 Credits.
Revenue recognition, employee compensation and pension plans, income tax expense, and earnings per share. Prerequisites: ACCY 6104.

ACCY 6106. Financial Statement Analysis. 3 Credits.
Analysis and interpretation of financial statements for managers, stockholders, creditors, and financial analysts; ratio-driven financial analysis; earnings-based and cash-flow-based equity valuation; sales and EPS forecasting; preparation of projected financial statements. Prerequisites: ACCY 6101/ MBAD 6211.

ACCY 6110. International Reporting and Control. 1.5 Credit.
International comparisons of forces that shape financial management, such as corporate governance mechanisms, tax policies, economic development, and privatization. Same as IBUS 6308.

ACCY 6112. International Financial Reporting Standards. 1.5 Credit.
Financial reporting standards that are used throughout most of the world other than the United States. Comparisons of these standards with those of the United States. Prerequisite: ACCY 6101/MBAD 6211. Same as IBUS 6310.

ACCY 6201. Managerial Accounting I. 1.5 Credit.
Effective use of accounting information in decision making and control of organizations. Same as MBAD 6213. Prerequisite: ACCY 6101/MBAD 6211.

ACCY 6202. Managerial Accounting II. 1.5 Credit.
Further topics in applying concepts of control and decision analysis to optimize the financial management of organizations. Prerequisite: ACCY 6201/MBAD 6213.

ACCY 6203. Controls, Alignment & the Org.. 1.5 Credit.

ACCY 6301. Contemporary Auditing Theory. 3 Credits.
A comprehensive survey of contemporary auditing as practiced by external auditors (primarily certified public accountants) and internal auditors (those employed within government and corporate entities). Generally accepted auditing standards; government auditing standards. Planning, directing, and reporting on various audits. Prerequisite: ACCY 6101/MBAD 6211; corequisite: ACCY 6104.

ACCY 6302. Fraud Examination and Forensic Accounting. 3 Credits.
Financial statement fraud, misappropriation of assets, and methods of deterrence, prevention, detection, and investigation. Prerequisite: ACCY 6101/MBAD 6211; a course in auditing preferred but not required.

ACCY 6401. Federal Income Taxation. 3 Credits.
A study of federal income taxation, covering gross income, deductions and credits, sales and other disposition of property, capital gains and losses, and timing of income and deductions.

ACCY 6402. Federal Income Taxation of Partnerships. 3 Credits.
Financial and tax accounting for partnerships; formation and operation, distribution to partners, liquidation, and transfer of partnership interests. S corporations are also considered. Prerequisite: ACCY 6401.

ACCY 6403. Federal Income Taxation of Corporations. 3 Credits.
Federal income taxation of C corporations, covering formation, capital structure, nonliquidating distributions, complete liquidations, corporate accumulations, and the alternative minimum tax.

ACCY 6501. Accounting Information Systems and EDP. 3 Credits.
Development and application of accounting system theory, including analysis, design, control concepts, and implementation. Integration of electronic data processing, accounting systems, and management information systems. Prerequisite: ACCY 6101/MBAD 6211.

ACCY 6601. Business Law: Contracts, Torts, and Property. 3 Credits.
Essential legal principles of contracts, torts, and property, including trusts and estates, leases, professional liability, and the Uniform Commercial Code.

ACCY 6602. Business Law: Enterprise Organization. 3 Credits.
The legal aspects of organizing, financing, and operating an enterprise: agency, partnerships, corporations, securities regulation, insurance, suretyship, secured credit financing, and commercial paper.

ACCY 6701. Government and Nonprofit Accounting and Auditing. 3 Credits.
The budgeting, accounting, financial reporting, and auditing required of federal, state, and local governments, nonprofit organizations, and colleges and universities. The financial practices and requirements applicable to organizations receiving governmental financial assistance and those subject to governmental audits. Prerequisite: ACCY 6101/MBAD 6211.

ACCY 6801. Corporate Governance and Ethics. 3 Credits.
The theory, practice, and public policy environment of corporate governance. Purpose, functioning, and responsibilities of boards of directors. Power, control, and compensation of corporate management. Shareholders and stakeholders. Corporate governance in comparative national settings. Same as SMPP 6215.

ACCY 6900. Special Topics. 1-3 Credits.
Experimental offering; new course topics and teaching methods.

ACCY 6998. Directed Readings and Research. 1-3 Credits.

ACCY 8001. Doctoral Seminar. 1-12 Credits.
Reasoning and research in technical areas of accounting; theoretical issues and their application to practice; conceptual themes in professional literature; comparative accounting research analyses.

ACCY 8009. Dissertation Research. 1-12 Credits.
Limited to doctoral candidates. May be repeated for credit.

ACCY 8999. Advanced Reading and Research. 1-12 Credits.
Limited to doctoral candidates preparing for the general examination. May be repeated for credit.

AFRICANA STUDIES (AFST)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

AFST 1001. Introduction to Africana Studies. 3 Credits.
An interdisciplinary introduction to the study of people of Africa and the African diaspora in historical context. Links in the cultural, political, and intellectual experiences of people of African descent in the Americas, Caribbean, Europe, and Africa.

AFST 3001. Research in Africana Studies. 3 Credits.

AMERICAN STUDIES (AMST)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

AMST 1000. Dean's Seminar. 3 Credits.
The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the schedule of classes for more details. Restricted to CCAS freshmen only.

AMST 1050. Explorations in American Culture. 0-3 Credits.
Exploration of different aspects of American culture depending on the topic. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AMST 1070. The American Cinema. 3 Credits.
History and criticism of American films. The course enables the student to recognize and evaluate cinema techniques, to express the evaluation clearly in writing, and to understand the role of films in the context of American culture. Laboratory fee. Same as AH 1070.

AMST 1100. Politics and Film. 0-3 Credits.
How American films interpret and challenge political power in America.

AMST 1160. Race, Gender and Law. 0-3 Credits.
Significant civil rights cases, critical race theory, feminist theory, and current public policy debates on domestic violence, mass imprisonment, sexual assault, and racial profiling.

AMST 1200. The Sixties in America. 3 Credits.
A survey of American society, culture, and politics during the decade of the 1960s. Topics include the civil rights movement, the student movement, the Vietnam War, and the counterculture.

AMST 2000. Sophomore Colloquium. 3 Credits.
The Sophomore Colloquia are small seminar-style courses limited to second-year students in Columbian College. These courses engage students deeply in a discipline, focus on a narrow issue of high interest and impact, and require independent research projects of the students. Topics vary by semester. Consult the Schedule of Classes for more details. Restricted to Permission of the instructor.

AMST 2010. Early American Cultural History. 3 Credits.
How culture was important in the creation of the United States —in its origins as a colonial outpost and its expansion across the continent; in its hierarchies and expressions of power, especially as organized by race, class, ethnicity, or gender; in the creation of democracy and the valuing of free expression; and in the development of cities and the varied uses of the countryside. Same as HIST 2010.

AMST 2011. Modern American Cultural History. 3 Credits.
The effects of culture in the shaping of the United States since 1876. The role of the mass media; effects of cultural conceptions on the physical landscape; changing ideas of race, ethnicity, gender, and sexuality; and the political meanings of cultural conflict. Transnational influences on U.S. culture and effects of U.S. culture abroad. Same as HIST 2011.

AMST 2020. Washington, D.C.: History, Culture, and Politics. 0-3 Credits.
Introduction to interdisciplinary methods of studying the contemporary city. Major problems of metropolitan life, past and present, analyzed by faculty and community leaders. Emphasis on experiential team projects. Same as HIST 2020.

AMST 2020W. Washington, D.C.: History, Culture, and Politics. 0-3 Credits.
Introduction to interdisciplinary methods of studying the contemporary city. Major problems of metropolitan life, past and present, analyzed by faculty and community leaders. Emphasis on experiential team projects. Same as HIST 2020.

AMST 2071. Introduction to the Arts in America. 3 Credits.
A survey of American art from the period of colonial exploration and settlement to the postmodern present. Political and social meanings of painting, sculpture, architecture, prints, and photographs. The relationship of art to religion and nationalism; issues of class, race, and gender. Same as AH 2071.

AMST 2120W. Freedom in American Thought and Popular Culture. 0-3 Credits.
America was founded on the premise of providing freedom to its people. But what, exactly, is freedom? The question has been debated in America since its founding and continues today; this course examines varied answers provided by American political thought and popular culture. Same as PSC 2120.

AMST 2125. Varieties of Feminist Theory. 3 Credits.
Classical and contemporary texts on feminist explanations of women's status. Relationships within the sex/gender system and arrangements based on class and race. Evaluation, through the lens of feminist theory, of several academic disciplines in the sciences, social sciences, and humanities. Same as WSTU 2125. Prerequisite: WSTU 1020 or WSTU 2120 or permission of instructor.

AMST 2144. Explorations in Historical Geography. 3 Credits.
Examination of selected themes in the cultural geography of the United States over the course of its history, in relation to an overview of the historical geography of the country. Same as GEOG 2144.

AMST 2210. The African American Experience. 3 Credits.
This course will provide a survey of the historical, political, and cultural dimensions of the African American experience in the U.S. The course will be organized chronologically and thematically and will cover topics such as American slavery, medical experimentation, Hurricane Katrina, aesthetics, hip-hop, and Afro-futurism.

AMST 2320. U.S. Media and Cultural History. 3 Credits.
History and analysis of 20th-century U.S. media and culture, including the rise of consumer culture, film, and television. Racial, gendered, and national identities in the context of modernism, mass culture, and globalization. Same as HIST 2320.

AMST 2350. U.S. Religion and Politics. 3 Credits.
How religion and politics have influenced each other in the United States and how Americans have understood those influences. Religious violence; conflicts between faith and science; religious factors in racial and gender politics; and the separation of church and state. Same as HIST 2350.

AMST 2380. Sexuality in US History. 3 Credits.
Examination of the changing social organization and meaning of sexual practices and desires in American culture, with particular attention to the relationship between sexuality and gendered racial and class identities and politics. Same as HIST 2380/ WSTU 2380.

AMST 2410. 20th-Century U.S. Immigration. 3 Credits.
Survey of immigration policy and immigrants' lives. How immigrants have changed the United States and how the United States has changed immigrants. Same as HIST 2410.

AMST 2440. The American City. 3 Credits.
An interdisciplinary introduction to the ethnic, cultural, political, and architectural landscape of the American city. Urban theory, race and ethnicity, urban history, planning and architecture, city politics, and cultural representations of the city. Same as HIST 2440.

AMST 2490. Themes in U.S. Cultural History. 3 Credits.
Topical examination of the ideas, values, and modes of expression that have made American life distinctive, as revealed through a cross-cultural or global perspective. Topic vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. (Same as HIST 2490).

AMST 2490W. Themes in U.S. Cultural History. 3 Credits.
Topical examination of the ideas, values, and modes of expression that have made American life distinctive, as revealed through a cross-cultural or global perspective. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs. (Same as HIST 2490W).

AMST 2495. Special Topics in African American History. 3 Credits.
Concentration on specific issues central to the African American experience. Consult the Schedule of Classes for issues to be addressed.

AMST 2520. American Architecture I. 3 Credits.
Stylistic properties, form and type characteristics, technological developments, and urbanistic patterns are introduced as a means of interpretation of historic meaning. Buildings are analyzed both as artifacts and as signifiers of social, cultural, and economic tendencies. 1600–1860. Same as AH 2154.

AMST 2521. American Architecture II. 3 Credits.
Continuation of AMST 2520. Stylistic properties, form and type characteristics, technological developments, and urbanistic patterns are introduced as a means of interpretation of historic meaning. Buildings are analyzed both as artifacts and as signifiers of social, cultural, and economic tendencies. 1860–present. Same as AH 2155.

AMST 2533. Material Culture in America. 3 Credits.
Review and analysis of the cultural messages embedded in our material surroundings. Consideration of a range of humanly created artifacts, ranging from specific objects to vast landscapes. Same as ANTH 2533.

AMST 2710. The United States in Global Context, 1898–Present. 0-3 Credits.
How the 20th- and 21st-century U.S. has been engaged globally, both politically and culturally, with attention to global culture, transnational ideas and social movements, foreign policy, and economic transformations. Same as HIST 2710.

AMST 2730. World War II in History and Memory. 0-3 Credits.
Examination of Americans' histories and memories of World War II. Same as HIST 2730.

AMST 2730W. World War II in History and Memory. 0-3 Credits.
Examination of Americans' histories and memories of World War II. Same as HIST 2730.

AMST 2750W. Latinos in the United States. 3 Credits.
Exploration of the term Latino and its impact on discussions of race, identity, and citizenship expectations throughout U.S. history. How geographic, linguistic, aesthetic, political, and economic factors construct Latino identity and influence policymaking and international relations. (Same as ANTH 2750W).

AMST 3151. American Art in the Age of Revolution. 3 Credits.
Same as AH 3151.

AMST 3152. American Art in the Era of National Expansion. 3 Credits.
American art from the opening of the Erie Canal in 1825 to the Spanish-American War in 1898. Emphasis on the role of art in the expansion of the United States, exploring issues of race, class, and gender; art, and religion. (Same as AH 3152).

AMST 3324. US Urban History. 3 Credits.
History of American urban life and culture from the colonial era to the present, focusing on transitions from pre-industrial to industrial and post-industrial forms. The social and spatial configuration of U.S. cities, and the urban politics of race, class, and gender. Same as HIST 3324.

AMST 3351. U.S. Social History. 3 Credits.
Survey of American society and social change from the Civil War to the present. Gender, sexuality, race, ethnicity, and class perspectives. (Same as HIST 3351).

AMST 3352. Women in the United States to 1865. 3 Credits.
Survey of women's experience in U.S. history, the way gender has organized relations of power, and the impact of race, region, class, and ethnicity on women and on gender roles. (Same as HIST 3352, WSTU 3352).

AMST 3352W. Women in the United States to 1865. 3 Credits.
Survey of women's experience in U.S. history, the way gender has organized relations of power, and the impact of race, region, class, and ethnicity on women and on gender roles. (Same as HIST 3352W, WSTU 3352W).

AMST 3353. Women in the United States II. 3 Credits.
Continuation of AMST 3352. Survey of women's experience in U.S. history, the way gender has organized relations of power, and the impact of race, region, class, and ethnicity on women and on gender roles. Same as HIST 3353/ WSTU 3353.

AMST 3360. African American History to 1865. 3 Credits.
Major themes and concepts emerging from the early history of the African presence in the Americas and black experiences in the new nation of the United States. Focus on the emergence and evolution of the concept of race, the ways race evolved in concert with Atlantic slavery, and how race intersected with gender, economics, religion, and nationality. (Same as HIST 3360).

AMST 3361. African American History II. 3 Credits.
Continuation of AMST 3360. Survey of the African American experience, emphasizing the contributions of black Americans to and their impact upon American history. Same as HIST 3361.

AMST 3362. African American Women's History. 3 Credits.
Addresses the history of African American women's labor, cultural expression, institution-building, activism and strategies to combat oppression from the antebellum period through the late 20th century. Investigates the intersection of race, gender, and class as it has shaped U.S. society, racism, the black freedom movement and African American women's experiences. (Same as HIST 3362, WSTU 3362).

AMST 3362W. Black Women in U.S. History. 3 Credits.
Black women from the Middle Passage to contemporary times. Same as HIST 3362/WSTU 3362.

AMST 3367. The American Jewish Experience. 3 Credits.
The study of the Jewish minority in America from colonial times to the present. Emphasis on the interaction between a powerful majority culture and that of protean minority people. (Same as HIST 3367).

AMST 3810. Planning Cities. 3 Credits.
An examination of historical and contemporary trends and dynamics in urban planning in the United States and abroad. Same as GEOG 3810. Prerequisite: GEOG 1001.

AMST 3811. Historical Archaeology. 3 Credits.
Survey of the basic data and methods of research in the material culture of recent history. Same as ANTH 3811.

AMST 3835. Historical Archaeology Field Program. 3 Credits.
Practical experience with a variety of excavation and laboratory techniques in historical archaeology; specific site and topics announced in the Schedule of Classes. Same as ANTH 3835.

AMST 3900. Critiquing Culture. 3 Credits.
Modes of analysis, including ethnography and other cultural studies methods, applied to examination of the interaction of cultural texts and practices with structures of power. Theories and themes central to American studies; scholarly debate about mass culture, ideology, visuality, discourse, and affect. For departmental majors; minors admitted with permission of instructor.

AMST 3901. Examining America. 3 Credits.
Modes of power and forms of identification within and across U.S. national borders. Social constructions of the nation; forms of diversity and identity, such as race, gender, and sexuality; and the transnational flow of people, ideas, culture, and religion. Restricted to American Studies majors.

AMST 3950. Special Topics. 3 Credits.
May be repeated for credit provided the topic differs. Topics announced in the Schedule of Classes.

AMST 3950W. Special Topics. 3 Credits.
May be repeated for credit provided the topic differs. Topic announced in the Schedule of Classes.

AMST 4400. Independent Study. 1-3 Credits.
Open to a limited number of American studies majors as directed research or as an internship with a Washington museum or historical society. Approval of advisor required.

AMST 4450. Internship. 1-3 Credits.
Open to a limited number of American studies majors pursuing an internship directly related to the study of American culture. Students must make the case for a scholarly project that emerges from the internship and must write a significant final paper. Approval of a supervising faculty member required for registration. P/NP grading only.

AMST 4500. Proseminar in American Studies. 3 Credits.
For American studies majors. Directed research and writing on special topics. Prerequisite: at least two of the required courses for the major (AMST 2010, AMST 2011, AMST 3900, AMST 3901). May be repeated for credit provided the topic differs.

AMST 4500W. Proseminar in American Studies. 3 Credits.
For American studies majors. Directed research and writing on special topics. Prerequisite: at least two of the required courses for the major (AMST 2010, AMST 2011, AMST 3900, AMST 3901). May be repeated for credit provided the topic differs.

AMST 4701W. Epidemics in American History. 3 Credits.
The history of epidemics in the United States from the late nineteenth to the early twentieth century. The development of medical and public health responses to epidemics, and their social, political, cultural, and economic impacts. Sources include primary documents, historical accounts, memoirs, fiction, and films.

AMST 4702W. Race, Medicine, and Public Health. 3 Credits.
The experiences of African Americans as patients and health care providers; the history of the relationship between race, American medicine, and public health. Emphasis on the importance of understanding the historical roots of contemporary policy dilemmas such as racial and ethnic disparities in health and health care.

AMST 6100. Scope and Methods in American Studies. 3 Credits.
Consideration of American studies as an area for research and teaching; introduction to bibliography. Required of candidates for the degree of Master of Arts in the field of American studies.

AMST 6110. Cultural Theory and American Studies. 3 Credits.
Major issues in critical and cultural theory as they relate to American culture. Various interpretive approaches including discourse analysis, cultural studies, new historicism, anthropological theory, etc. Prerequisite: AMST 6100 or permission of instructor.

AMST 6120. Theories and Practices in the Study of Media. 3 Credits.
Examination of theories and methods in the study of media and popular culture; case studies explore specific issues related to cultural products such as film, television, music, and the Internet.

AMST 6190. Topics in American Studies. 1-4 Credits.
Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

AMST 6195. Research Seminar in American Studies. 3 Credits.
May be repeated for credit provided the topic differs.

AMST 6210. The United States in a Global Context. 3 Credits.
Analysis of the cultural constructions of the nation and international power, comparing the context of the 18th and 19th century, European colonialism, and U.S. expansion in the 20th century. The role of literature and mass media in furthering the logic of globalization. Readings are both theoretical and historical.

AMST 6220. Theory and Emotions. 3 Credits.
Interdisciplinary exploration of politics of emotion, with an emphasis on the emotions that attach to race, gender, and sexuality.

AMST 6230. The Politics of Freedom. 3 Credits.
This seminar examines critical interventions into the theories, rhetorics, and practices of freedom. It will focus on the politics of freedom in relation to an array of themes that may include liberalism, slavery, imperialism, political economy, individualism, and neoliberalism.

AMST 6240. Borders and Boundaries. 3 Credits.
Exploration of borders (the literal edge or limit of a territory) and boundaries (intra-societal differences). Readings from cultural anthropology, political science, and social history examine classic tensions between state formation and nation building. The U.S.–Mexico border and other border zones across the globe are used to assess and challenge what is local and particular about border space.

AMST 6410. Readings in American Cultural History. 3 Credits.
Studies in the cultural history of the United States.

AMST 6420. Religion & American Culture. 3 Credits.
Interdisciplinary analysis of religious beliefs, practices, and representations in the United States, as well as intersections of the religious and the secular. Relationships of religion to race, gender, capitalism, science, mass media, and material culture. Same as HIST 6420.

AMST 6430. Gender, Sexuality, and American Culture I. 3 Credits.
The changing social organization, cultural representation, and meaning of gender and sexuality in the United States, with emphasis on their relationship to race, class, region, nationality, empire, and globalization. Pre-colonial to 1877. (Same as HIST 6430, WSTU 6430).

AMST 6431. Gender, Sexuality, and American Culture II. 3 Credits.
Continuation of AMST 6430. The changing social organization, cultural representation, and meaning of gender and sexuality in the United States, with emphasis on their relationship to race, class, region, nationality, empire, and globalization. 1877 to present. Same as HIST 6431/ WSTU 6431.

AMST 6435. Readings on Women in American History. 3 Credits.
Important works in American women's history; evolution of the field in historiographical context. Same as HIST 6435/ WSTU 6435.

AMST 6450. Race in America. 3 Credits.
Interdisciplinary analysis of the history of race and its changing political, social, and cultural meanings in the United States. Transnational racial formations, struggles for and against civil rights, multiracialism, and interracialism. Same as HIST 6450.

AMST 6455. American Social Movements. 3 Credits.
The history of social movements in the United States, with emphasis on civil rights, feminism, conservatism, and labor in local, national, and transnational contexts; the historical rise and fall of these movements and their larger impact on American life. Same as HIST 6455.

AMST 6460. Popular Music Studies. 3 Credits.
Readings in popular music studies; varying methodologies for American studies work on sound and popular music; cultural histories of popular music; American music transnationally. Restricted to Registration restricted to graduate students.

AMST 6470. Cityscapes. 3 Credits.
Interdisciplinary examination of the American city, including urban theory, history, planning, architecture, urban politics, and cultural representations of the city. Same as HIST 6470.

AMST 6475. US Urban History. 3 Credits.
History of American urban life and culture from the Colonial era to the present, focusing on the transitions from pre-industrial to industrial and post-industrial forms, the social and spatial configuration of U.S. cities, and the urban politics of race, class, and gender. Same as HIST 6475.

AMST 6480. Theory and Practice of Public History. 3 Credits.
Theoretical and practical dimensions of public history, as illustrated by recent controversies surrounding public exhibitions and debates on revisionist history as well as more traditional means of presenting the past in public forums. Same as HIST 6480.

AMST 6495. Historic Preservation: Principles and Methods. 3 Credits.
The scope and purpose of the preservation movement in the United States, with focus on developments since the 1960s. Preservation theories, attitudes toward the past and toward design, the intent and impact of legislation, approaches to documentation, the concept of significance, and preservation as an instrument of change. Same as HIST 6495.

AMST 6496. Historic Preservation: Principles and Methods. 3 Credits.
Continuation of AMST 6495. The scope and purpose of the preservation movement in the United States, with focus on developments since the 1960s. Preservation theories, attitudes toward the past and toward design, the intent and impact of legislation, approaches to documentation, the concept of significance, and preservation as an instrument of change. Same as HIST 6496.

AMST 6520. Economics of Preservation. 3 Credits.
Analysis of economic techniques and benefits used to encourage the retention and reuse of historic buildings and districts in the United States. Emphasis on revitalization of older commercial centers and the Mainstreet program. Prerequisite: Permission of instructor.

AMST 6525. The Politics of Historic Preservation. 3 Credits.
Overview of the political issues, forces, events, and players that have shaped contemporary preservation practice, with an emphasis on public policy issues that have not been resolved and continue to confront preservation objectives. Prerequisite: Permission of instructor.

AMST 6530. Field Methods in Architectural Documentation. 3 Credits.
In-depth thematic examination of cultural landscape, focusing on field techniques for recording, analysis, and interpretation of historic properties. Work at field sites is supplemented by lectures, discussion, and readings.

AMST 6550. Seminar in American Architecture. 3 Credits.
Advanced research problems addressing artistic, cultural, social, technical, and urbanistic aspects of American architecture in the 19th and 20th centuries. Topics vary. Prerequisite: AMST 2520 or AMST 2521 , or permission of instructor.

AMST 6560. Vernacular Architecture. 3 Credits.

AMST 6650. Advanced Workshop in American Studies. 1-4 Credits.
Required for first- and second-year PhD students; open to other graduate students. Provides instruction and guidance in the process of writing, revising, and submitting journal articles, conference papers, and dissertations. Faculty and peer review of written work. Students are expected to enroll for the full academic year. Restricted to American studies graduate students.

AMST 6709. Interpretation in the Historic House Museum. 3 Credits.
Seminar integrating advanced practices of museum education with current scholarship in architectural history, material culture, and social history. Extensive use of Washington museum resources. Admission by permission of instructor. Same as EDUC 6709.

AMST 6710. American Material Culture. 3 Credits.
Opportunities for research and publication based on historical objects in the collections of the Smithsonian Institution.

AMST 6720. American Decorative Arts I. 3 Credits.
Recognition and evaluation of domestic artifacts from the 17th, 18th, and 19th centuries.

AMST 6721. American Decorative Arts II. 3 Credits.
Continuation of AMST 6720. Recognition and evaluation of domestic artifacts from the 17th, 18th, and 19th centuries.

AMST 6730. Studies in American Art and History. 3 Credits.
Selected problems and themes in American cultural history involving the use of artistic materials in different media; emphasis on methodology and analytic techniques. May be repeated for credit. Same as AH 6255.

AMST 6835. Historical Archaeology Field Program. 3 Credits.
Practical experience with a variety of excavation and laboratory techniques in historical archaeology; specific site and topics announced in the Schedule of Classes. Same as ANTH 6835.

AMST 6930. Independent Study. 3 Credits.
Limited to master's and doctoral candidates. Written permission of instructor required.

AMST 6998. Thesis Research. 3 Credits.

AMST 6999. Thesis Research. 3 Credits.

AMST 8998. Advanced Reading and Research. 3-9 Credits.
Limited to students preparing for the Doctor of Philosophy general examination. May be repeated for credit.

AMST 8999. Dissertation Research. 3-12 Credits.
Limited to Doctor of Philosophy candidates. May be repeated for credit.

ANATOMY & REGENERATIVE BIOLOGY (ANAT)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ANAT 2130. Human Embryology. 3 Credits.
Development of the basic organ systems; molecular control of development, congenital birth defects, and assisted reproductive technologies.

ANAT 2150. Human Microscopic Anatomy. 3 Credits.
Normal histological structure of cells, tissues, and organs. Structural–functional correlates; the relationship between histological structure–function and the etiology of disease states.

ANAT 2160. Human Functional Neuroanatomy. 3 Credits.
The central and peripheral nervous systems; diseases and injuries with impact on the normal structural-functional relationship.

ANAT 2181. Human Gross Anatomy. 3 Credits.
Structure and function of the musculoskeletal system; regional organization, structure, and function of the major organ systems; structural organization of the head and neck. Same as BISC 2581.

ANAT 6130. Clinically Oriented Human Embryology. 3 Credits.
The mechanisms of human embryology with clinical correlations of embryological development. Developmental control mechanisms and development of basic organ systems. Molecular control of development. Assisted reproductive technologies. Congenital birth defects. Demonstration labs and online animations for clinical correlates. Restricted to students enrolled in the Graduate Certificate in Anatomical and Translational Sciences program. Recommended background: introductory course in biology or its equivalent. Same as ANAT 2130.

ANAT 6150. Clinically Oriented Human Microscopic Anatomy. 3 Credits.
The normal histological structure of cells, tissues, and organs of the human body with emphasis on clinical relevance; structural/functional correlates at both the light and electron microscopic levels; alterations in normal histology through disease or injury and the etiology of various disease states; integration of histological concepts with clinical correlates. Restricted to students in either the Graduate Certificate in Anatomical and Translational Sciences (GCATS) or Special Master's in Anatomical and Translational Sciences (M-ATS) program. Prerequisites: BISC 1111 and BISC 2202.

ANAT 6160. Clinically Oriented Human Functional Neuroanatomy. 3 Credits.
Structure/function relationships of the human central and peripheral nervous systems and clinical correlations of diseases or injuries whose occurrence or expression has an abnormal impact on the normal structure/function relationship. Integration of neuroanatomy concepts with contemporary clinical neuroscience. Demonstrations of human brain material in the anatomy lab. Prerequisites: Introductory Biology for Science or non-Science Majors. Restricted to students enrolled in the Graduate Certificate in Anatomical and Translational Sciences program.

ANAT 6181. Clinically Oriented Human Gross Anatomy. 3 Credits.
Structural organization of the human body and the relationship of the organization to regional and systems-related functions. Clinical implications and how disease or injury affects normal anatomical structure/function relationships. Clinical cases match the topic of each lecture. Online manual uses content from the department's NetAnatomy website. Demonstrations in the gross anatomy laboratory. Restricted to Graduate Certificate in Anatomical and Translational Sciences. Prerequisites: Introductory Biology for Science or non-Science Majors.

ANAT 6182. Fundamentals of Regenerative Biology and Systems Physiology. 4 Credits.
This course is similar to BMSC 8212 but with additional time to introduce techniques of confocal laser scanning microscopy and laser-based quantitative and functional cell analyses. Topics include genetic control mechanisms, cell signaling pathways, and tissue regeneration and repair. Introduction of concepts on the functions and regulation of organ systems complement the learning objectives of human gross anatomy and microscopic anatomy. Restricted to Graduate Certificate in Anatomical and Translational Sciences. Prerequisites: Introductory Biology for Science or non-Science Majors.

ANAT 6203. Human Developmental Anatomy. 1 Credit.

ANAT 6204. Neuroanatomy. 2 Credits.

ANAT 6212. Neurobiology. 3 Credits.
Same as Idis 212.

ANAT 6213. Microscopic Anatomy. 4 Credits.
Required for medical students.

ANAT 6215. Anatomy for Health Sciences Students. 3 Credits.
A gross anatomy course that includes examination of prosected cadavers. Sessions on how to conduct a physical examination of a particular body region are preceded immediately by lectures on the same region.

ANAT 6216. Cellular Anatomy & Histology. 2 Credits.

ANAT 6221. Spec Topics-Stem Cell Biology. 1-3 Credits.

ANAT 6222. Spec Topics-Stem Cell Biology. 1-3 Credits.

ANAT 6223. Special Topics in Regenerative Medicine. 2 Credits.
Students attend seminars given by invited lecturers to present their research findings and breakthroughs on topics of regenerative medicine. Seminars can be sponsored by the Department of Anatomy and Regenerative Biology, the Stem Cell Interest Group Journal and Data Club, the Molecular Medicine Graduate Program (MMED 8214), and the GW Institute for Neuroscience. Restricted to Graduate Certificate in Anatomical and Translational Sciences only. Prerequisites: Introductory Biology for Science or non-Science Majors.

ANAT 6249. Intro to Anatomical Research. 1 Credit.

ANAT 6252. Human Variation. 1 Credit.

ANAT 6253. Developmental Neurobiology. 3 Credits.

ANAT 6260. Developmental Genetics. 2 Credits.

ANAT 6262. Gross Anat-Upper/Lower Extrem. 2 Credits.

ANAT 6264. Gross Anatomy of Head & Neck. 2 Credits.

ANAT 6266. Gross Anatomy-Thorax & Abdomen. 2 Credits.

ANAT 6268. Gr Anat-Pelvis/Perineum/Low Ex. 2 Credits.

ANAT 6275. Advanced Studies in Translational Sciences. 3 Credits.
Student research opportunities in laboratories conducting translational research. Application of fundamental concepts learned in didactic courses. Development of versatility with new technologies. Students spend the equivalent of three full days per week in a research laboratory during the semester. The course director must approve all laboratory assignments prior to initiating research studies in a laboratory. Restricted to students in the Graduate Certificate in Anatomical and Translational Sciences. Prerequisites: Introductory Biology for Science or non-Science Majors.

ANAT 6276. Advanced Studies in Anatomy. 1 Credit.
Detailed study of an anatomic topic tailored to the needs of the individual student. Restricted to graduate students who are in the Graduate Certificate in Anatomical and Translational Sciences program or who have permission of the program director and medical students.

ANAT 6277. Special Topics in Neurobiology. 1-3 Credits.

ANAT 6279. Applied Regional Anatomy. 1-5 Credits.
Regional dissection, guided readings.

ANAT 6284. Appl Surface Anat & Radiology. 5 Credits.

ANAT 6288. Surface Anatomy and Radiology. 1 Credit.

ANAT 6291. Special Projects in Anatomy. 1-12 Credits.
Independent study on any aspect of gross anatomy.

ANAT 6292. Projects in Anatomical Sciences. 2 Credits.
Various imaging techniques and approaches to visualize normal anatomy toward development and application of skills in teamwork, presentation, and discussion. Literature searches. The course is taken in conjunction with ANAT 6181. Restricted to Graduate Certificate in Anatomical and Translational Sciences. Prerequisites: ANAT 6181. Recommended background: Human clinically-oriented gross anatomy (previously or simultaneously).

ANAT 6295. Research. 1-12 Credits.

ANAT 8120. Graduate Human Gross Anatomy. 4 Credits.
An in-depth introduction to human gross anatomy with cadaveric dissection. The structural organization of the human body, including its regional and systems-related functions. The relationship between normal human anatomical variation in structure and function and how disease and/or injury affect these relationships. Prerequisites: Permission of the instructor. Recommended background: Graduate students with prior coursework in the biological sciences or anthropology.

ANAT 8501. Didactic Anatomy. 3 Credits.
Development of a didactic program to include human developmental anatomy, microscopic anatomy, gross anatomy, and/or neuroanatomy. May also include interdepartmental study.

ANAT 8800. Summer Remedial: Gross Anatomy. 6 Credits.

ANAT 8802. Summer Remedial:Human Dev Anat. 1 Credit.

ANTHROPOLOGY (ANTH)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ANTH 1000. Dean's Seminar. 3 Credits.
The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the schedule of classes for more details.

ANTH 1001. Biological Anthropology. 0-4 Credits.
Survey of human evolution, genetics and physical variation, and primatology. Regular laboratory exercises. Laboratory fee.

ANTH 1002. Sociocultural Anthropology. 3 Credits.
Survey of the world's cultures, illustrating the principles of cultural behavior.

ANTH 1002W. Sociocultural Anthropology. 3 Credits.
Survey of the world's cultures, illustrating the principles of cultural behavior.

ANTH 1003. Archaeology. 0-3 Credits.
Introduction to archaeological survey and excavation techniques and laboratory methods of dating and analysis. Brief history of archaeology and survey of world prehistory. Films and laboratory exercises. (Fall and spring).

ANTH 1004. Language in Culture and Society. 3 Credits.
Comparison and analysis of how cultures use language to communicate. The relationship of language to issues of human nature, gender, race, class, artistic expression, and power. Laboratory fee.

ANTH 1005. The Biological Bases of Human Behavior. 4 Credits.
Human behavior from an evolutionary perspective, including issues such as communication, intelligence, reproductive behavior, parental behavior, aggression, and cooperation, and drawing on an understanding of the behavior and biology of the nonhuman primates. Laboratory fee.

ANTH 2008. Foundations of Anthropological Thought. 3 Credits.
The development of anthropological thought in historical context. Exploration of selected basic concepts and theories of contemporary anthropology. To be taken in the junior or senior year. Prerequisite: ANTH 1002.

ANTH 2008W. Foundations of Anthropology. 3 Credits.
The development of anthropological thought in historical context. Exploration of selected basic concepts and theories of contemporary anthropology. To be taken in the junior or senior year. Prerequisites: ANTH 1002 or ANTH 1002W.

ANTH 2406. Human Evolutionary Genetics. 3 Credits.
Introduction to the patterns and processes of human genetic variation. Topics include human origins and migration; molecular adaptations to environment, lifestyle, and disease; ancient and forensic DNA analyses; and genealogical reconstructions.

ANTH 2501. The Anthropology of Gender: Cross-Cultural Perspectives. 3 Credits.
Anthropological representations of gender relations in "other" cultures have provided important case material for feminist theorizing of sex differences and gender roles and statuses. How a cross-cultural approach can inform our understanding of gender. Same as WSTU 2121.

ANTH 2502. Anthropology of Science and Technology: 21st-Century Brave New Worlds. 3 Credits.
The relationship between science and society, with consideration of how scientific knowledge and emergent technologies affect our lives, identities, social relations, and material conditions. The sociopolitical context in which scientific knowledge is produced and the ethnographic study of biotechnology, especially genetics and its various applications.

ANTH 2505. Introduction to Ethnomusicology. 3 Credits.
Models of understanding music as a cultural endeavor. Application and critique of models in the design and execution of student independent field research. Same as MUS 2105. Prerequisite: MUS 1101 or ANTH 1002 or ANTH 1004 or permission of instructor.

ANTH 2506. Religion, Myth, and Magic. 3 Credits.
Theories of religion developed by anthropologists; survey of world religions with emphasis on non-Western societies; religious process and change. (Same as REL 3506).

ANTH 2533. Material Culture in America. 3 Credits.
Review and analysis of the cultural messages embedded in our material surroundings. Consideration of a range of humanly created artifacts, ranging from specific objects to vast landscapes. Same as AMST 2533.

ANTH 2750. Latinos in the United States. 3 Credits.
Exploration of the term Latino and its impact on discussions of race, identity, and citizenship expectations throughout U.S. history. How geographic, linguistic, aesthetic, political, and economic factors construct Latino identity and influence policymaking and international relations.

ANTH 2750W. Latinos in the United States. 3 Credits.
Exploration of the term Latino and its impact on discussions of race, identity, and citizenship expectations throughout U.S. history. How geographic, linguistic, aesthetic, political, and economic factors construct Latino identity and influence policymaking and international relations. Same as AMST 2750.

ANTH 3401. Human Functional Anatomy. 3 Credits.
The anatomy of the human body, how it works, and how it differs from other animals, especially other primates. Principles and approaches of functional morphology and biomechanics and how function can be reconstructed from fossils, with special focus on the musculoskeletal system. No prior knowledge of anatomy is required. Laboratory fee. Prerequisite: ANTH 1001.

ANTH 3402. Human Evolutionary Anatomy. 3 Credits.
The structure and function of human anatomy, as compared to our closest relatives, the great apes. Using this comparative approach, the course investigates the fossil record of human evolution, with an emphasis on reconstructing relationships, function, behavior, and adaptation in fossil hominins. Prerequisite: ANTH 1001.

ANTH 3403. Forensic Anthropology Laboratory. 2 Credits.
Identification of human skeletal remains by body part, age, sex, race, and individual disease or trauma history; study of skeletal variation in modern and recent populations. Taught at the Smithsonian. Corequisite: Anth 3404.

ANTH 3404. Human Variation. 1 Credit.
An overview of human variation, with special emphasis on the skeleton. Includes history of physical anthropology, individual and population variations, archaeological recovery of human remains, paleodemography, growth, paleopathology, and forensic anthropology. Prerequisite: Anth 1001; corequisite for undergraduates: ANTH 3403.

ANTH 3406. Advanced Human Osteology. 3 Credits.
Advanced techniques in determination of age, sex, ancestry, and pathological conditions using the skeleton. Taught at the Smithsonian. Prerequisite: ANTH 3403, ANTH 3404.

ANTH 3407. Conservation in a Changing World: Human and Animal Behavior. 3 Credits.
How humans and animals interact in a wide variety of settings, how human and animal welfare can be ensured, and how we can create a scientifically sound, yet socially and economically acceptable, conservation of the planet's biodiversity. Prerequisites: ANTH 1001.

ANTH 3408. The Evolution of Human Families. 3 Credits.
Human parental behavior considered from an evolutionary perspective, including parental care among mammals, concepts of parental investment, and parent-offspring conflict. Focus on parenting in the human lineage from early hominins to hunter-gatherers to the modern context. Prerequisites: ANTH 1001.

ANTH 3411. Primatology. 3 Credits.
Physical and behavioral characteristics of the various primate groups and their relationship to human physical and cultural evolution. Prerequisite: ANTH 1001.

ANTH 3412. Hominin Evolution. 3 Credits.
The fossil record of human evolution, including its context. Review of the fossil evidence that concentrates on the distinctive features of each taxon. Pleistocene remains. Laboratory fee. Prerequisite: ANTH 1001.

ANTH 3412W. Hominin Evolution. 3 Credits.
The fossil record of human evolution, including its context. Review of the fossil evidence that concentrates on the distinctive features of each taxon. Pleistocene remains. Laboratory fee. Prerequisite: ANTH 1001.

ANTH 3413. Evolution of the Human Brain. 3 Credits.
Examination of how the human brain is unique in comparison to other animals, with an emphasis on understanding our species' distinctive neurobiology in terms of the evolution of cognitive abilities such as language, social comprehension, tool making, and abstract thinking.

ANTH 3491. Topics in Biological Anthropology. 3 Credits.
Topic announced in the Schedule of Classes. Instructors will be drawn from GW faculty and Smithsonian Institution staff. May be repeated for credit if topic varies. Prerequisite: ANTH 1001.

ANTH 3501. Anthropology of Development. 3 Credits.
The impact of the world economy on nonindustrial societies. Analysis of the role of anthropology in international development programs aimed at alleviating problems in the Third World. Prerequisites: ANTH 1002 or ANTH 1002W.

ANTH 3502. Cultural Ecology. 3 Credits.
Basic principles of cultural ecology. Human interaction with the ecosystem both past and present; emphasis on the application of anthropological precepts to current environmental problems. Prerequisites: ANTH 1002 or ANTH 1002W or ANTH 1004 or ANTH 1004W or permission of instructor.

ANTH 3503. Psychological Anthropology. 3 Credits.
The cross-cultural study of the relationship between culture and personality. Topics include emotion, conceptions of the self, mental health and illness, sexuality, marriage and parenting, and cognition. Psychobiological, cultural, ecological, and psychoanalytical theories are examined. Prerequisite: ANTH 1002 or permission of instructor.

ANTH 3504. Illness, Healing, and Culture. 3 Credits.
Introduction to medical anthropology. What the record of human evolution and prehistory tells about human health; the epidemiology of health and illness; how different cultures define disease; understanding illness and healing systems cross-culturally; and the role of medical anthropology in health care and international development. Prerequisite: ANTH 1002 or permission of instructor.

ANTH 3506. Politics, Ethnicity, and Nationalism. 3 Credits.
Comparative analysis of political systems; political processes, such as factionalism, styles of leadership, political ritual. Prerequisite: ANTH 1002 or permission of instructor.

ANTH 3507. Kinship, Family, and Community. 3 Credits.
Cross-cultural analysis of how people form, maintain, and transform social groups and boundaries. Focus on how communities such as family, ethnic group, and nation are defined in moral terms. Prerequisite: ANTH 1002 or permission of instructor.

ANTH 3508. Art and Culture. 3 Credits.
The role of art in culture, with emphasis on small-scale societies; influences upon the artist, and beliefs and practices associated with art production. Prerequisite: ANTH 1002 or permission of instructor.

ANTH 3513. Anthropology of Human Rights. 3 Credits.
Issues of basic human rights and their violation by different cultures, states, and organizations. Genocide, ecocide, abuses on the basis of ethnicity, religion, or similar factors, and the treatment of those seeking asylum. Rights of informants and groups studied in anthropological research. Prerequisites: ANTH 1002 or ANTH 1002W.

ANTH 3513W. Anthropology of Human Rights. 3 Credits.
Issues of basic human rights and their violation by different cultures, states, and organizations. Genocide, ecocide, abuses on the basis of ethnicity, religion, or similar factors, and the treatment of those seeking asylum. Rights of informants and groups studied in anthropological research. Prerequisites: ANTH 1002 or ANTH 1002W.

ANTH 3521. Ethnographic Film. 3 Credits.
Still and motion-picture photography as an integral aspect of anthropological research. A study of recent and historic ethnographic films and an introduction to the forms and methods of making visual ethnographic records. Material fee. Prerequisites: ANTH 1002 or ANTH 1002W or permission of instructor.

ANTH 3531. Methods in Sociocultural Anthropology. 3 Credits.
Approaches to field research. Conceptual bases and biases in the delineation of problems and in the selection, analysis, and organization of data. Students design and carry out their own field projects in the Washington area. Prerequisite: ANTH 1002.

ANTH 3601. Language, Culture, and Cognition. 3 Credits.
The role of language and culture in the organization of human experience. Beginning with debates about linguistic relativity, the course explores the way language use shapes cognition and practice in a variety of cultures and social contexts. Same as LING 3601. Prerequisite: ANTH 1004. Laboratory fee.

ANTH 3602. Ethnographic Analysis of Speech. 3 Credits.
Linguistic variation and change in discourse practices; social and political correlates of linguistic interaction; recording, transcription, and analysis of verbal interaction. Prerequisites: ANTH 1004. (Same as LING 3602).

ANTH 3602W. Ethnographic Analysis of Speech. 3 Credits.
Linguistic variation and change in discourse practices; social and political correlates of linguistic interaction; recording, transcription, and analysis of verbal interaction. Prerequisites: ANTH 1004.

ANTH 3603. Psycholinguistics. 3 Credits.
Language as species-specific property of the human mind. Psychological processes involved in the encoding and decoding of language; first and second language acquisition and bilingualism. Same as LING 3603.

ANTH 3691. Special Topics in Linguistic Anthropology. 3 Credits.
Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Same as LING 3691. Prerequisite: ANTH 1004 or permission of instructor.

ANTH 3701. Native Peoples - North America. 3 Credits.
Comparative study of Indian groups representative of the different culture areas of the United States and Canada. Contemporary issues involving indigenous groups, the wider society, and the state. Prerequisite: ANTH 1002 or permission of instructor.

ANTH 3702. Anthropology of Latin America. 3 Credits.
Culture history and ways of life in a selected region of Central or South America. Regional focus to be announced in the Schedule of Classes. Prerequisites: Anth 1002 or Anth 1002W or ANTH 1004.

ANTH 3703. Cultures of the Pacific. 3 Credits.
Culture history and ways of life among native peoples of Melanesia, Micronesia, and Polynesia. Prerequisites: ANTH 1002 or 1002W or 1004 or 1004W.

ANTH 3704. Cultures of Southeast Asia. 3 Credits.
Introduction to the history, art, ecology, and politics of Southeast Asia. Comparison and interpretation of recent ethnographic case studies, archaeological evidence, and current political events in order to understand the diversity of Southeast Asian traditions. Prerequisite: ANTH 1002 or ANTH 1002W or ANTH 1004.

ANTH 3705. Anthropology of East Asia. 3 Credits.
Intensive study of the culture and history of selected peoples of East or Central Asia. Specific area to be announced in the Schedule of Classes. May be repeated for credit. Prerequisites: ANTH 1002 or ANTH 1002W or ANTH 1004 or ANTH 1004W.

ANTH 3707. Anthropology of the Middle East. 3 Credits.
Geographic environment, language, religion, and social structure of settled and nomadic peoples of the Middle East; emphasis on the Arab world. Prerequisites: ANTH 1002 or ANTH 1002W or ANTH 1004 or ANTH 1004W.

ANTH 3708. Anthropology of Africa. 3 Credits.
Comparative examination of the history, cultural development, and contemporary problems of sub-Saharan African cultures. New World African cultures are also considered. Prerequisites: ANTH 1002 or 1002W or 1004 or 1004W.

ANTH 3709. Japanese Culture Through Film. 3 Credits.
Survey of the Japanese cultural heritage presented through films. Topics include literature, philosophy, art, religion, and social history from premodern times to the modern era. Lectures and discussion in English. Same as JAPN 3162.

ANTH 3791. Topics in Regional Anthropology. 3-4 Credits.
Culture, history, and ways of life in a selected region of the world. Topics vary. Consult the Schedule of Classes for more details. Prerequisites: ANTH 1002 or ANTH 1002W or ANTH 1004.

ANTH 3801. African Roots from Australopithecus to Zimbabwe. 3 Credits.
The development and contributions of Africa from human beginnings through medieval states. Topics include human evolution, origins of art, technology, trade, and animal/plant domestication, rise of African states, early relations with Europe and Asia, antecedents of contemporary African diversity. Prerequisite: ANTH 1003 or permission of instructor.

ANTH 3801W. African Roots from Australopithecus to Zimbabwe. 3 Credits.
The development and contributions of Africa from human beginnings through medieval states. Topics include human evolution, origins of art, technology, trade, animal/plant domestication, rise of African states, early relations with Europe and Asia, antecedents of contemporary African diversity. Prerequisites: ANTH 1003.

ANTH 3802. Human Cultural Beginnings. 3 Credits.
Survey of prehistory in Europe, Africa, and Asia from the earliest hominid cultures to the beginnings of agriculture. Prerequisite: ANTH 1003.

ANTH 3802W. Human Cultural Beginnings. 3 Credits.
Survey of prehistory in Europe, Africa, and Asia from the earliest hominid cultures to the beginnings of agriculture. Prerequisite: ANTH 1003.

ANTH 3803. Old World Prehistory: First Farmers to First Cities. 3 Credits.
Archaeology of the Near East, Egypt, Europe, and other areas, from the beginnings of agriculture to the rise of Babylon. Prerequisites: ANTH 1003.

ANTH 3803W. Old World Prehistory: First Farmers to First Cities. 3 Credits.
Archaeology of the Near East, Egypt, Europe, and other areas, from the beginnings of agriculture to the rise of Babylon. Prerequisites: ANTH 1003.

ANTH 3804. Origins of the State and Urban Society. 3 Credits.
Emergence of urbanism and the state in the prehistory of various world regions. Regions covered might include India, China, Mexico, and the Pacific, among others. Prerequisites: ANTH 1003.

ANTH 3805. Archaeology of Israel and Neighboring Lands. 3 Credits.
The archaeology of Israel and adjacent areas (Syria, Jordan, Lebanon). Examination of many major sites and monuments. Significant problems and current debates. Same as AH 3106.

ANTH 3806. Art and Archaeology of the Aegean Bronze Age. 3 Credits.
Excavational and multidisciplinary aspects of classical archaeology. Minoan and Mycenaean civilizations (1700–1200 B.C.) Same as AH 3104.

ANTH 3808. Archaeology and the Celts. 3 Credits.
Historical and archaeological study of the Celtic people.

ANTH 3811. Historical Archaeology. 3 Credits.
Survey of the basic data and methods of research in the material culture of recent history. Same as AmSt 3811.

ANTH 3812. The Aztec Empire. 3 Credits.
The Aztecs (or Mexica) of Mexico created a large empire, and while frequently the focus is on warfare and human sacrifice, they produced some of the most naturalistic art and reflective poetry that have survived the Spanish Conquest. Using archaeology, art, and ethnohistoric documents, this course focuses the importance of power in Aztec society and how the normalization of violence created a form of social cohesion central to the state. Prerequisites: ANTH 1003. (Same as AH 3116).

ANTH 3813. Archaeology of North America. 3 Credits.
History of American archaeology; survey of North American culture history from human entry into the Americas during the Pleistocene period until the time of the first European contacts. Focus on peoples north of Mexico. Prerequisite: ANTH 1003.

ANTH 3814. Ancient Mexican Civilizations. 3 Credits.
Cultural history of pre-Columbian societies in Middle America; the emergence of Mesoamerican civilization from the earliest hunter–gatherers and first farmers to the Aztec Empire. Prerequisites: ANTH 1003. Same as AH 3107.

ANTH 3821. Myths and Mysteries in Archaeology. 3 Credits.
Topics ranging from King Arthur to Atlantis are used to illustrate how archaeological methods and techniques can falsify-or support-exotic beliefs about the past.

ANTH 3822. Archaeology in Film and Television. 3 Credits.
As visual media increase public awareness of archaeology, misrepresentations and distortions abound. This course examines the relationships among archaeology, the media, and popular culture. Issues considered include nationalism, descendant communities, gender, race, and colonialism.

ANTH 3823. Archaeology of Ritual and Religion. 3 Credits.
Archaeological and ethnographic examples from around the world are used to critically evaluate how archaeologists make inferences about ritual practices and the religious lives of past peoples. Issues include the origins of symbolic behavior, sacred landscapes, shamanism, ancestor veneration, and sorcery/witchcraft.

ANTH 3832. Paleoanthropological Field Program. 0-4 Credits.
Field research in paleoanthropology, including excavation methods, identification and analysis of materials, paleoecology, archaeology, and human anatomy. Conducted at selected sites in Eurasia, Africa, or Australia. Visits to comparative sites and collections in the region.

ANTH 3833. Field Research: New World. 1-6 Credits.
Survey, excavation, and/or laboratory analysis at localities in North or South America. See Schedule of Classes for details.

ANTH 3834. Field Research: Old World. 1-6 Credits.
Survey, excavation, and/or laboratory analysis at Neolithic or later localities in Eurasia, Africa, or Oceania. See Schedule of Classes for details.

ANTH 3835. Historical Archaeology Field Program. 3 Credits.
Practical experience with a variety of excavation and laboratory techniques in historical archaeology; specific site and topics announced in the Schedule of Classes. Same as AMST 3835.

ANTH 3838. Theory and Practice in Archaeology. 3 Credits.
The primary literature in archaeology theory since the 1960s. Ethics, topical issues, and archaeological practice. Prerequisite: Anth 1003.

ANTH 3838W. Theory and Practice in Archaeology. 3 Credits.
The primary literature in archaeology theory since the 1960s. Ethics, topical issues, and archaeological practice. Prerequisite: ANTH 1003.

ANTH 3839. Lab Research Methods in Archaeology. 3 Credits.
Research methods and techniques used by archaeologists. Emphasis on hands-on experience in one or more techniques. Prerequisite: Anth 1003.

ANTH 3891. Special Topics in Archaeology. 3 Credits.
Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Prerequisite: ANTH 1003 or permission of instructor.

ANTH 3991. Special Topics. 0-3 Credits.
Topics announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

ANTH 3991W. Special Topics. 3 Credits.
Topics announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

ANTH 3995. Undergraduate Research. 1-12 Credits.
Individual research problems to be arranged with a member of the faculty. May be repeated for credit. Prerequisite: permission of instructor.

ANTH 4008. Seminar: Contemporary Anthropological Theory. 3 Credits.
The development of major trends in anthropological theory. How anthropologists from the four fields—sociocultural, linguistic, biological, and archaeology—have deployed and developed the ideas of theorists in their own empiricalresearch and theorizing about specific processes. Prerequisite: ANTH 2008.

ANTH 6101. Proseminar in Biological Anthropology. 3 Credits.
Comprehensive overview of theory and practice in biological anthropology.

ANTH 6102. Proseminar in Sociocultural Anthropology. 3 Credits.
Comprehensive overview of theory and practice in sociocultural anthropology.

ANTH 6103. Proseminar in Archaeology. 3 Credits.
Survey of the most recent archaeological techniques and theoretical approaches to reconstructing and interpreting the cultures of the past.

ANTH 6104. Proseminar in Linguistic Anthropology. 3 Credits.
Contemporary anthropological studies of language in biological, social, and historical perspectives.

ANTH 6200. Museum Anthropology. 3 Credits.
How anthropological collections take shape in the past and carry meaning in the present. Critical examination of artifacts and forms of documentation. Application of material culture theory to museum records, collected objects, the changing meaning given to objects, and the context of collecting.

ANTH 6201. Methods in Museum Anthropology. 3 Credits.
How anthropological collections take shape in the past and carry meaning in the present. Research and analysis of existing collections; issues in museum anthropology.

ANTH 6202. Museums and the Public: Exhibiting Culture. 3 Credits.
Study of the issues and problems involved in "exhibiting culture," past and present, including issues of representation, message and interpretation, audience, ownership of objects and symbols, and ways of reconstructing the past. Critical examination of museum exhibits.

ANTH 6203. Preventive Conservation Concepts. 3 Credits.
Historical development of preventive conservation in museums, conservation ethics, team approaches to conservation, interactions of various materials with agents of deterioration. Basics of materials testing, preparation of condition reports, choosing museum storage and exhibition materials, and risk assessment. Same as MSTD 6203/ AH 6286.

ANTH 6204. Preventive Conservation Techniques. 3 Credits.
Practical applications of preventive conservation of materials, monitoring environmental conditions, conducting risk assessments, evaluation of exhibit and storage areas; developing plans, policies, and procedures for collections care; grant proposal preparation for collections care initiatives. Same as MSTD 6204/ AH 6287.

ANTH 6205. Problems in Conservation. 3 Credits.
Individual conservation projects to determine composition, construction, decomposition of materials, and possible stabilization techniques. Conservation laboratory experience. Prerequisite or concurrent registration: Anth 6203/AH 6286.

ANTH 6230. Internship in Museum Anthropology. 1-6 Credits.
Supervised individual research and/or field work at the Smithsonian Institution or other area museums, arranged in consultation with the museum and the Anthropology Department. Admission by arrangement with the department chair or museum training advisor. May be repeated for credit up to a maximum of 6 credits.

ANTH 6301. The Anthropology of Development. 3 Credits.
Theoretical perspectives that distinguish the contribution of anthropology to understanding processes of change in the Third World. Focus on health, population, environment, gender, and tourism issues. The role of anthropology in planning and implementing projects and policy.

ANTH 6302. Issues in Development. 3 Credits.
Topic to be announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

ANTH 6330. Internship in Development Anthropology. 3 Credits.
Supervised participation in a selected development agency or other relevant organization. Opportunity to observe agency procedures and gain practical experience. Admission by permission of instructor or department chair.

ANTH 6331. Research Methods in Development Anthropology. 3 Credits.
Anthropologists' roles in research-related activities, such as feasibility studies, social soundness analysis, and evaluations. Innovative research techniques, such as interactive data gathering, team survey methods, and rapid rural appraisal. Admission by permission of instructor.

ANTH 6391. Anthropology and Contemporary Problems. 3 Credits.
Exploration of anthropological perspectives on a current issue, such as refugees, ethnic violence, national mythologies, and women's health in developing countries. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

ANTH 6401. Human Functional Anatomy. 3 Credits.
Growth and function of the musculoskeletal system, including the development, anatomy, and histology of bone, biomechanics of muscle and skeletal tissue, craniofacial and dental growth and morphology, and locomotion. No prior knowledge of anatomy required. Laboratory fee.

ANTH 6404. The Evolution of Primate Life Histories. 3 Credits.
Recent developments in the study of human and non-human life histories. Life history theory. Life history traits compared among primate groups in order to determine how selective pressures have shaped extant primate life history patterns. Laboratory fee.

ANTH 6406. Human Genetic Variation. 3 Credits.
The genetic variation in human populations as a framework for measurement and analysis of genetic diversity and evolutionary process. Consideration of the possible roles of cultural change leading to adaptive/selective events. Same as FORS 6246.

ANTH 6412. Paleoanthropology. 1-3 Credits.
Survey of current research in hominid and hominoid evolution, focusing on the integrated nature of the field. Contributions from the geological and biological sciences will be stressed, together with innovative geochemical techniques for establishing chronological sequences. Prerequisite: ANTH 3412 or BISC 2450 .

ANTH 6413. Analytical Methods in Human Evolutionary Studies. 3 Credits.
A survey of methods and approaches for data collection and analysis in human evolutionary biology research. Topics include comparative methods and basic and multivariate statistics.

ANTH 6491. Topics in Biological Anthropology. 3 Credits.
Topic announced in the Schedule of Classes. Instructors will be drawn from GW faculty and Smithsonian Institution staff. May be repeated for credit if topic varies.

ANTH 6501. Gender and Sexuality. 3 Credits.
Study of new theoretical and methodological approaches developed in the anthropology of gender. Topics include postcolonialism, sexuality, and literary representations of gender. Same as WSTU 6257.

ANTH 6505. Medical Anthropology. 3 Credits.
Concepts and theories in contemporary medical anthropology, including "critical" versus "conventional" medical anthropology, changes in approaches since the mid-twentieth century; structural and cultural construction of illness and suffering; ethnographic and epidemiological perspectives.

ANTH 6506. Topics in Medical Anthropology. 3 Credits.
Topic announced in the Schedule of Classes. May be repeated for credit if the topic varies.

ANTH 6507. Nationalism and Ethnicity. 3 Credits.
Major theoretical and ethnographic issues in the study of nationalism worldwide. Explores how ethnic groups emerge in colonial and contemporary plural societies and how states attempt to integrate ethnic groups into nations.

ANTH 6508. Ethics and Cultural Property. 3 Credits.
Survey of ethical issues in anthropology, focusing on cultural property and repatriation; the epistemological, ethical, and political dilemmas of excavating, collecting, and owning cultural artifacts.

ANTH 6509. Anthropology of Art, Aesthetics, and Symbolism. 3 Credits.
Anthropological approaches to aesthetic problems and theories of symbolism in the context of ethnographic materials.

ANTH 6531. Methods in Sociocultural Anthropology. 3 Credits.
Epistemology; the definition of research problems; selection of research subjects and sites; techniques of data collection (e.g., surveys, interviews); data management and organization; ethical protocols; issues of safety; grant writing and funding.

ANTH 6561. American Folklife. 3 Credits.
The materials of American folk culture, concentrating on folk architecture, crafts, and art. Major organizing themes are regionalism and the use of objects as indicators of cultural intention. Same as AMST 6561.

ANTH 6562. Folklore Theory. 3 Credits.
An intellectual history of American folklore research; analysis of particular theories and methods. Same as AMST 6562.

ANTH 6591. Topics in Sociocultural Anthropology. 3 Credits.
Topic announced in the Schedule of Classes. May be repeated for credit if the topic varies.

ANTH 6691. Topics in Linguistic Anthropology. 3 Credits.
Topic announced in the Schedule of Classes. May be repeated for credit if the topic varies.

ANTH 6702. Issues in Latin American Anthropology. 3 Credits.
Intensive study of a selected topic in the anthropology of Central and/or South America. Topic to be announced.

ANTH 6707. Issues in Middle East Anthropology. 3 Credits.
Selected topics in the anthropology of the Middle East. Topic to be announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

ANTH 6801. Paleolithic Archaeology. 3 Credits.
Current problems relating to materials from the Old World.

ANTH 6802. Problems in Eurasian and African Archaeology. 3 Credits.
Topic announced in the Schedule of Classes. Topics may include Bronze Age conflict, the Celts, etc. May be repeated for credit.

ANTH 6803. Problems in New World Archaeology. 3 Credits.
Current archaeological problems relating to the origin and development of aboriginal cultures. Specific topic to be announced in the Schedule of Classes. May be repeated for credit.

ANTH 6804. Problems in Mesoamerican Archaeology. 3 Credits.
Topics range from specific civilizations, such as the Olmec, to pan-Mesoamerican topics, such as religion and exchange. May be repeated for credit.

ANTH 6806. Technology. 3 Credits.
Cross-cultural examination of the form, function, meaning, and use of material culture (such as ceramics or stone tools) and the behavior patterns involved in its production. Topic vary by semester. Consult the Schedule of Classes for more details.

ANTH 6807. Public Archaeology. 3 Credits.
The use and creation of the past and the relationship between archaeologists and different publics.

ANTH 6832. Paleoanthropological Field Program. 0-4 Credits.
Intensive course on field research in paleoanthropology, including excavation methods, identification and analysis of materials, paleoecology, archaeology, and human anatomy. Conducted at selected sites in Eurasia, Africa, or Australia. Visits to comparative sites and collections in the region.

ANTH 6835. Historical Archaeology Field Program. 3-6 Credits.
Practical experience with a variety of excavation and laboratory techniques in historical archaeology; specific site and topics announced in the Schedule of Classes. Same as AMST 6835.

ANTH 6838. Archaeological Theory. 3 Credits.
Overview of major theories and positions in American archaeology; examination of new issues and directions in which the field appears to be moving.

ANTH 6839. Lab Research Methods in Archaeology. 3,4 Credits.
Research methods and techniques used by archaeologists. Emphasis on hands-on experience in one or more techniques. Laboratory fee.

ANTH 6891. Topics in Archaeology. 3 Credits.
Major issues related to the theory and practice of archaeology. Topic announced in the Schedule of Classes.

ANTH 6995. Research. 1-12 Credits.
May be repeated for credit.

ANTH 6998. Thesis Research. 3 Credits.

ANTH 6999. Thesis Research. 3 Credits.

ANTH 8695. Linguistic Field Methods. 3 Credits.
The relationship between language and thought in dialogue with the study of a particular foreign language. Ethnographic study of language and cognition and the application of linguistic theory and method to anthropological research. Methods of elicitation and textual analysis, and technologies used for storing and analyzing linguistic data. Restricted to graduate students.

ANTH 8998. Advanced Reading & Research. 1-12 Credits.
Limited to students preparing for the Doctor of Philosophy general examination. May be repeated for credit.

ANTH 8999. Dissertation Research. 1-12 Credits.
Limited to Doctor of Philosophy candidates. May be repeated for credit.

APPLIED SCIENCE (APSC)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

The below listed departments manage the following APSC courses:

- SEAS Dean's Office - 1001, 3098, 6215, 6216
- Civil and Environmental Engineering - 2057, 2113, 6211, 6214
- Mechanical and Aerospace Engineering - 2058, 6212, 6213
- Electrical and Computer Engineering - 2114

APSC 1001. Introduction to Engineering for Undeclared Majors. 0-1 Credits.
As an introduction to disciplines within SEAS, potential solutions to problems are presented by practitioners of civil and environmental engineering; computer science; electrical, computer, and biomedical engineering; mechanical and aerospace engineering; and systems engineering.

APSC 2057. Analytical Mechanics I. 3 Credits.
First half of a one-year sequence. Concepts of statics: force systems, conditions of force and moment equilibrium, simple structures, distributed forces, centroids, internal forces, friction, moments of inertia. Prerequisites: PHYS 1021. (Fall and spring).

APSC 2058. Analytical Mechanics II. 3 Credits.
Second half of a one-year sequence. Concepts of dynamics: kinematics of particles, velocity and acceleration, translating and rotating reference frames, particle dynamics, motion under central and electromagnetic force, effect of Earth's rotation, vibrations, work, kinetic and potential energy, dynamics of systems of particles. Prerequisite: APSC 2057.

APSC 2113. Engineering Analysis I. 3 Credits.
Analytical methods for the solution of problems in engineering, the physical sciences, and applied mathematics: applications of ordinary differential equations, matrices and determinants, eigenvalues and eigenvectors, systems of ordinary linear differential equations, Bessel and Legendre functions. Prerequisite or concurrent registration: MATH 2233.

APSC 2114. Engineering Analysis II. 3 Credits.
Analytical methods for the solution of problems in engineering, the physical sciences, and applied mathematics: complex variables, Fourier series and integral, frequency filters, Laplace transforms, inversion and Duhamel integrals; partial differential equations. Prerequisite: MATH 2233.

APSC 3098. Variable Topics. 1-36 Credits.

APSC 3115. Engineering Analysis III. 3 Credits.
Analytical methods for the solution of problems in engineering using concepts from probability and statistics: probability modeling, random variables and their distributions, mathematical expectation, sampling, point and confidence interval estimation, hypothesis testing, correlation, regression, and engineering applications. (Fall, spring, and summer).

APSC 3116. Engineering Analysis IV. 3 Credits.
Analytical methods using advanced concepts from probability and statistics: multivariate distributions, expectation, generating functions, parametric families of distributions, sampling and sufficient statistics, estimation, hypothesis testing, and engineering applications. Prerequisite: ApSc 3115, Math 2233. May be taken for graduate credit. (Fall).

APSC 6211. Analytical Methods in Engineering I. 3 Credits.
Engineering applications of the theory of complex variables: contour integration, conformal mapping, inversion integral, and boundary–value problems. Prerequisite: approval of department.

APSC 6212. Analytical Methods in Engineering II. 3 Credits.
Algebraic methods appropriate to the solution of engineering computational problems: linear vector spaces, matrices, systems of linear equations, eigenvalues and eigenvectors, quadratic forms. Prerequisite: approval of department.

APSC 6213. Analytical Methods in Engineering III. 3 Credits.
Analytical techniques for solution of boundary–initial-value problems in engineering: wave propagation, diffusion processes, and potential distributions. Prerequisite: approval of department.

APSC 6214. Analytical Methods in Engineering IV. 3 Credits.
Introduction to variational methods in engineering: Ritz and Galerkin approximation methods of boundary–value problems, aspects of linear integral equations arising from engineering analysis. Prerequisite: approval of department.

APSC 6215. Analytical Methods in Engineering V. 3 Credits.
Advanced methods of solution of boundary–initial-value problems in engineering: characteristics, wave propagation, and Green's functions. Prerequisite: APSC 6213.

APSC 6216. Special Topics in Engineering Analysis. 3 Credits.
Selected topics, such as perturbation techniques applied to approximate solution of nonlinear boundary and initial-value problems in engineering; application of singular integral equations in problems of mechanics. Prerequisite: approval of department.

ARABIC (ARAB)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ARAB 1001. Beginning Arabic I. 4 Credits.
Fundamentals of grammar and pronunciation and development of speaking, listening, reading, and writing skills in culturally appropriate contexts.

ARAB 1002. Beginning Arabic II. 4 Credits.
Continuation of ARAB 1001. Fundamentals of speaking, listening, reading, and writing in culturally appropriate and proficiency-oriented contexts. Prerequisite: ARAB 1001.

ARAB 1201. Intensive Elementary Arabic I. 6 Credits.
Accelerated learning of fundamentals of speaking, listening, reading, and writing Arabic in culturally appropriate contexts for proficiency.

ARAB 1202. Intensive Elementary Arabic II. 6 Credits.
Continuation of ARAB 1201. Fundamentals of speaking, listening, reading, and writing of Arabic in culturally and linguistically appropriate contexts. Prerequisites: ARAB 1201.

ARAB 2001. Intermediate Arabic I. 4 Credits.
Continuation of ARAB 1002. Further development of speaking, listening, reading, and writing skills of Arabic in culturally appropriate, proficiency-oriented contexts. Prerequisites: ARAB 1002.

ARAB 2002. Intermediate Arabic II. 4 Credits.
Continuation of ARAB 2001. Further development of speaking, listening, reading, and writing skills of Arabic in culturally appropriate and proficiency-oriented contexts. Prerequisites: ARAB 2001 or ARAB 1202.

ARAB 2201. Intensive Intermediate Arabic I. 6 Credits.
Continuation of ARAB 1202. Prerequisite: ARAB 1202. Laboratory fee.

ARAB 3001. Advanced Arabic. 4 Credits.
Emphasis on development of speaking, listening, reading, and writing skills at the advanced level of proficiency in culturally appropriate contexts. Discussion of cultural and social issues based on a selection of contemporary written and audiovisual materials from Arab literary and media sources. Prerequisites: ARAB 2002.

ARAB 3105. Special Topics. 3 Credits.
Topic announced in the Schedule of Classes may be repeated for credit provided the topic differs.

ARAB 3201. Intensive Intermediate Arabic II. 6 Credits.
Continuation of ARAB 2201. Accelerated learning of Arabic skills in speaking, listening, reading, and writing at the intermediate/advanced level of proficiency in culturally appropriate contexts. Prerequisites: ARAB 2201.

ARAB 3301. Modern Arabic Literature. 3 Credits.
Short stories, short plays, poems, literary essays in Modern Standard Arabic, with attention to linguistic and literary stylistic aspects. Prerequisites: ARAB 3001 or ARAB 3201.

ARAB 3302. Media Arabic. 3 Credits.
Authentic scripted and audiovisual materials from various contemporary Arab media outlets including television and radio newscast and cultural programs, newspaper and magazine articles, and the Internet. Prerequisites: ARAB 3001 or ARAB 3301 or permission of instructor.

ARAB 3311. Business Arabic. 3 Credits.
General and specific business language skills used in a variety of business operations and settings, such as making presentations, researching opportunities, conducting interviews, and negotiating. Prerequisite: ARAB 3001.

ARAB 3501. Arabic and Arab Identity. 3 Credits.
History of the Arabic language from pre-Islamic times and its subsequent spread into contiguous regions. The role of the Arabic language in formulating the ideology of Arab nationalism and identity. Course is conducted in English.

ARAB 3502. Arab Film & Culture in English. 3 Credits.
Historical survey of Arab cinema and its expression of Arab culture. Course is conducted in English.

ARAB 3503. Fundamentals of Arabic Linguistics. 3 Credits.
Introduction to the structures, functions, and varieties of Arabic from a descriptive linguistics perspective. The history of the language, including contributions of major medieval Arabic grammarians. Analysis of standard and dialectal varieties of Arabic. Course is conducted in English.

ARAB 3901. Directed Projects. 1-3 Credits.
Individual advanced reading or research, to be arranged with a member of the faculty. May be repeated for credit. Enrollment by permission of the instructor and department.

ARAB 4001. Genres in Modern Arabic Literature. 3 Credits.
Historical development of short Arabic stories or short Arabic plays throughout the twentieth century. Prerequisite: ARAB 3301 or permission of instructor.

ARAB 4002. Arabic Narratives Through the Ages. 3 Credits.
Reading and discussion of narratives, such as those found in stories of The Thousand and One Nights, or travel adventures, such as those of Ibn Battuta and his successors. Prerequisite: ARAB 3301 or permission of instructor.

ARAB 4501. Arabic-English Translation. 3 Credits.
Theoretical background and practical applications of translation strategies from Arabic to English that are necessary for professional translation tasks. Prerequisite: ARAB 3301 or ARAB 3302.

ARAB 4502. Arabic-English Advanced Translation and Editing. 1-3 Credits.
The professional translation and editing of various types of material. Prerequisite: ARAB 4501.

ART HISTORY (AH)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

AH 1000. Dean's Seminar. 3 Credits.
The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the Schedule of Classes for more details. Restricted to First-year students in CCAS.

AH 1001. Summer Art History. 2 Credits.

AH 1031. Survey of Art and Architecture I. 3 Credits.
An introduction to the history of art through the study of major monuments, movements, and concepts. From the prehistoric period, through the Ancient Mediterranean cultures, including Greece and Rome, to the end of the Middle Ages.

AH 1032. Survey of Art and Architecture II. 3 Credits.
Continuation of AH 1031. An introduction to the history of art through the study of major monuments, movements, and concepts. From the early Renaissance through the Baroque and modern eras.

AH 1070. The American Cinema. 3 Credits.
History and criticism of American films. The course enables the student to recognize and evaluate cinema techniques, to express the evaluation clearly in writing, and to understand the role of films in the context of American culture. Laboratory fee. Same as AMST 1070.

AH 1135. Spanish Art: Prado/Thyssen Museums. 3 Credits.

AH 1136. Spanish Art:From Goya to Picasso. 3 Credits.

AH 2001. Special Topics. 3 Credits.

AH 2071. Introduction to the Arts in America. 3 Credits.
A survey of American art from the period of colonial exploration and settlement to the postmodern present. Political and social meanings of painting, sculpture, architecture, prints, and photographs. The relationship of art to religion and nationalism; issues of class, race, and gender. Same as AMST 2071.

AH 2109. Sem:Ancient Art & Architecture. 3 Credits.
For majors in art history; non-majors must have permission of instructor. May be repeated for credit provided the topic differs.

AH 2145. History of Decorative Arts: European Heritage. 3 Credits.
Changing styles of European furniture, textiles, ceramics, and glass in the context of general trends in art history and changing patterns in economic, technological, social, and cultural history. From antiquity to the modern age.

AH 2154. American Architecture I. 3 Credits.
Stylistic properties, form and type characteristics, technological developments, and urbanistic patterns are introduced as a means of interpretation of historic meaning. Buildings are analyzed both as artifacts and as signifiers of social, cultural, and economic tendencies. 1600–1860. Same as AMST 2520.

AH 2155. American Architecture II. 3 Credits.
Continuation of AH 2154. Stylistic properties, form and type characteristics, technological developments, and urbanistic patterns are introduced as a means of interpretation of historic meaning. Buildings are analyzed both as artifacts and as signifiers of social, cultural, and economic tendencies. 1860–present. Same as AMST 2521.

AH 2161. History of Decorative Arts: American Heritage. 3 Credits.
The decorative arts in America from the 17th century to the modern period. Consideration of changing visual characteristics in relation to the changing American experience.

AH 2162. History of Photography. 3 Credits.
The historical, social, aesthetic and technological developments of the photographic medium, including its relationship to modern art and modes of visual representation and the properties that inform our understanding of photographic meaning.

AH 2162W. History of Photography. 3 Credits.
The historical, social, aesthetic and technological developments of the photographic medium, including its relationship to modern art and modes of visual representation and the properties that inform our understanding of photographic meaning.

AH 2190. East Asian Art. 3 Credits.
Survey of the arts of China, Japan, and Korea.

AH 2191. South Asian Art. 3 Credits.
Survey of the arts of India, Pakistan, Sri Lanka, Nepal, and Tibet, from prehistoric times to circa 18th century.

AH 2192. The Art of Southeast Asia. 3 Credits.
The arts of Southeast Asia—Vietnam, Laos, Cambodia, Myanmar (former Burma), Thailand, and Indonesia, especially Java and Bali. The fusion of Indian and Chinese concepts with indigenous cultural traits.

AH 3101. Ancient Art of the Bronze Age and Greece. 3 Credits.
A survey of Greek art from the Minoans and Mycenaeans (c. 2000 B.C.) to the age of Alexander (c. 300 B.C.). Relationships among the arts of the different groups in the Aegean area and their impact on Western culture. The Theran volcanic eruption, the "Dorian Invasion," the portrayal of women, "heroic nudity," and the assumption of a stylistic chronology.

AH 3102. Ancient Art of the Roman Empire. 3 Credits.
A survey of Roman art from the successors of Alexander the Great (c. 300 B.C.) to the fall of the Roman Empire in the West (c. 300 A.D.). The impact of the Greek world on Roman art and culture; innovations and achievements of the Romans in architecture, portraiture, and historical narrative. Focus on the city of Rome and other areas of the Roman world such as North Africa and Asia.

AH 3103. Art and Archaeology of Egypt and the Near East. 3 Credits.
The great artistic tradition of the Nile Valley and the contemporary civilizations (c. 3000 B.C. to after 1000 B.C.) between the rivers Tigris and Euphrates (present day Iraq). The Pyramid Age, the temples at Karnak and Luxor, the tombs of the Valley of the Kings, and the artistic traditions of the Sumerians, Akkadians, Babylonians, Assyrians, and Persians.

AH 3104. Art and Archaeology of the Aegean Bronze Age. 3 Credits.
Excavational and multidisciplinary aspects of classical archaeology. Minoan and Mycenaean civilizations (1700–1200 B.C.). Same as ANTH 3806.

AH 3105. Topics in Ancient Art and Archaeology. 3 Credits.
May be repeated for credit provided the topic differs. Same as CLAS 3115.

AH 3106. Art and Archaeology of Israel and Neighboring Lands. 3 Credits.
The archaeology of Israel and adjacent areas (Syria, Jordan, Lebanon). Examination of many major sites and monuments. Significant problems and current debates. Same as ANTH 3805.

AH 3107. Ancient Mexican Civilizations. 3 Credits.
Culture history of pre-Columbian societies in Middle America; the emergence of Mesoamerican civilization from the earliest hunter–gatherers and first farmers to the Aztec Empire. Prerequisites: ANTH 1003. (Same as ANTH 3814).

AH 3111. Early Christian and Byzantine Art and Architecture. 3 Credits.
Art of the Mediterranean world following the collapse of Roman administration. Growth of the basilica and its decoration; the significance of small objects in medieval study. The rise and fall of the East Roman (Byzantine) Empire from Justinian to 1453.

AH 3112. Romanesque and Gothic Art and Architecture. 3 Credits.
The origin of Western art in the Hiberno-Saxon and Carolingian worlds, their relationship to the Ancient heritage and to the contemporary Byzantine art. Romanesque and Gothic architecture and its sculptural decoration as art historical and social phenomena.

AH 3113. Islamic Art and Architecture. 3 Credits.
Introduction to the visual culture of the Muslim world, from Spain to India, from the 7th century to the present. Examination of artworks in their historical, religious, and cultural contexts; key points in the field's historiography. (Same as AH 6213).

AH 3114. Art of the Book in the Medieval Muslim World. 3 Credits.
An advanced-level introduction to the visual culture of the Muslim world, from Spain to India, from the 7th century to the 17th century. Examination of artworks in their historical, religious, and cultural contexts; key points in the field's historiography. (Same as AH 6214).

AH 3116. The Aztec Empire. 3 Credits.
The Aztecs (or Mexica) of Mexico created a large empire, and while frequently the focus is on warfare and human sacrifice, they produced some of the most naturalistic art and reflective poetry that have survived the Spanish Conquest. Using archaeology, art, and ethnohistoric documents, this course focuses the importance of power in Aztec society and how the normalization of violence created a form of social cohesion central to the state. Prerequisites: ANTH 1003. (Same as ANTH 3812).

AH 3117. Special Topics in Precolumbian Art and Archaeology. 3 Credits.
Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 3120. Italian Art and Architecture of the 13th through 15th Centuries. 3 Credits.
Origins, development, and theoretical foundations of Renaissance painting, sculpture, and architecture (Giotto, Duccio, Masaccio, Donatello, Ghiberti, Brunelleschi, Mantegna, Bellini, Botticelli).

AH 3121. Italian Art and Architecture of the 16th Century. 3 Credits.
The development of the universal genius within the circle of Florence and Rome (Leonardo, Raphael, Michelangelo) and their counterparts in Venice (Giorgione, Titian, Tintoretto, Sansovino, Palladio).

AH 3122. Topics in Early Northern Renaissance Art and Architecture. 3 Credits.
Royal and ducal patronage and the Flemish and French masters of the 15th century, including van Eyck, Campin, van der Weyden, Fouquet, van der Goes, Memling, and Gerard David. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 3122W. Topics in Early Northern Renaissance Art and Architecture. 3 Credits.

AH 3123. Topics in Northern Renaissance Art and Architecture. 3 Credits.
Francis I and Fontainebleau Palace, Henry VIII and Hampton Court, Johann Friedrich of Saxony, and the Holy Roman Emperors Maximilian I and Charles V. François Clouet, Hans Holbein, Lucas Cranach, Albrecht Dürer, Pieter Brueghel, Bernard van Orley, and others. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 3123W. Topics in Northern Renaissance Art and Architecture. 3 Credits.

AH 3131. Italian Art and Architecture of the 17th Century. 3 Credits.
The Counter-Reformation and creation of the Baroque in painting, sculpture, and architecture in Rome (Carracci, Caravaggio, Bernini, Borromini, Pietro da Cortona), Turin (Guarini, Juvarra), and Venice (Longhena).

AH 3132. Topics in Northern European Art and Architecture of the 17th Century. 3 Credits.
Hapsburg Flanders and Brussels under the Spanish archdukes and their patronage of Rubens and his circle. The role of Dutch merchants commissioning secular themes in Utrecht, Haarlem, Delft, Leyden, and Amsterdam from Golden Age artists such as Rembrandt, Vermeer, and Hals. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 3134. Topics in Spanish and Portuguese Art through the 16th Century. 3 Credits.
The Kingdoms of the Iberian Peninsula from the Reconquest of Granada to the Renaissance Age of Exploration. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 3134W. Topics in Spanish and Portuguese Art through the 16th Century. 3 Credits.
The Kingdoms of the Iberian Peninsula from the Reconquest of Granada to the Renaissance Age of Exploration. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs. (Same as AH 3134).

AH 3135. Topics in 17th/18th Century Spanish and Portuguese Art. 3 Credits.
Secular and sacred art of the Baroque Golden Century or the Rococo Enlightenment. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 3140. European Art of the 18th Century. 3 Credits.
Painting, sculpture, and architecture in France, Great Britain, and Italy. Emphasis on Watteau, Chardin, David, Hogarth, Gainsborough, Reynolds, Canaletto, and Tiepolo.Painting, sculpture, and architecture in France, Great Britain, and Italy.

AH 3141. European Art of the Early 19th Century. 3 Credits.
Neoclassicism and Romanticism in the context of Western European political, social, and cultural developments. Emphasis on France, England, and Germany and the representative styles of David, Ingres, Delacroix, Turner, Constable, and Friedrich.

AH 3141W. European Art of the Early 19th Century. 3 Credits.
Neoclassicism and Romanticism in the context of Western European political, social, and cultural developments. Emphasis on France, England, and Germany and the representative styles of David, Ingres, Delacroix, Turner, Constable, and Friedrich.

AH 3142. European Art of the Late 19th Century. 3 Credits.
The revolution in style of Realism, Impressionism, and Post-Impressionism in the context of Western European political, social, and cultural developments. Emphasis on representative styles of Courbet, Manet, Monet, Morisot, Repin, Seurat, Cezanne, Van Gogh, and Gauguin.

AH 3142W. European Art of the Late 19th Century. 3 Credits.

AH 3143. Early Twentieth-Century Art. 3 Credits.
History and theory of early twentieth-century modernism in the visual arts, from origins in the late 19th century through Surrealism. The work of artists such as Matisse, Picasso, Kandinsky, Duchamp, and Mondrian. (Same as AH 3143W).

AH 3143W. Early Twentieth-Century Art. 3 Credits.
History and theory of early twentieth-century modernism in the visual arts, from origins in the late 19th century through Surrealism. The work of artists such as Matisse, Picasso, Kandinsky, Duchamp, and Mondrian. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Same as AH 3143).

AH 3146. Modern Architecture in Europe and America. 3 Credits.
Major developments in architecture and urbanism from the Industrial Revolution to the end of the 20th century.

AH 3146W. Modern Architecture in Europe and America. 3 Credits.

AH 3151. American Art in the Age of Revolution. 3 Credits.
American art during the 18th-century "consumer revolution," the American War for Independence, and the early republic. Emphasis on the socioeconomic and political purposes of art, with focus on Enlightenment symbolism and the visualization of national identity. (Same as AMST 3151).

AH 3152. American Art in the Era of National Expansion. 3 Credits.
American art from the opening of the Erie Canal in 1825 to the Spanish-American War in 1898. Emphasis on the role of art in the expansion of the United States, exploring issues of race, class, and gender; art, and religion.

AH 3153. American Art of the 20th Century. 3 Credits.
20th-century American painting and sculpture from the turn of the century to the beginnings of postmodernism, with focus on the avant garde. Artists of the Stieglitz circle and later modernist movements such as Abstract Expressionism, Pop, Op, Minimal, and Conceptual art. Theory and criticism.

AH 3160. Latin American Art and Architecture. 3 Credits.

AH 3165. Later Twentieth-Century Art. 3 Credits.
Artists, art, and critical concepts from the later twentieth century, focusing on key movements and issues, including Abstract Expressionism, Minimalism, Conceptual Art, feminism, identity politics, and the rise of globalization. Same as AH 3165W.

AH 3165W. Later Twentieth-Century Art. 3 Credits.
Artists, art, and critical concepts from the later twentieth century, focusing on key movements and issues, including Abstract Expressionism, Minimalism, Conceptual Art, feminism, identity politics, and the rise of globalization. Same as AH 3165.

AH 3170. Materials, Methods, and Techniques in Art History. 3 Credits.
Working hands-on in a workshop studio, students create panels, canvases, vehicles, mediums, pigments, drawings, and paintings from raw materials and are introduced to the materials, methods, and techniques of the fine arts through traditional practices and processes of manufacture in western cultures.

AH 3181. Special Topics in Asian Art. 3 Credits.
Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

AH 3182. Special Topics in South Asian Art. 3 Credits.
South Asian art, architecture, and visual and material culture from ancient to contemporary periods. Topics may include urban settlements of the Indus Valley Civilization; monumental and sculptural forms of early Buddhism, Jainism, and Hinduism; artistic production and patronage under Sultanate, Mughal, and Rajput rulers; and cross-cultural dimensions of art and architecture on the subcontinent.

AH 4109. Topics in Ancient Art and Archaeology. 3 Credits.
May be repeated for credit provided the topic differs. (Same as CLAS 3115).

AH 4119. Seminar in Medieval Art and Architecture. 3 Credits.
For majors in art history; non-majors must have permission of instructor. May be repeated for credit provided the topic differs.

AH 4129. Seminar in Renaissance Art and Architecture. 3 Credits.
For majors in art history; non-majors must have permission of instructor. May be repeated for credit provided the topic differs.

AH 4139. Seminar in Baroque Art and Architecture. 3 Credits.
For majors in art history; non-majors must have permission of instructor. May be repeated for credit provided the topic differs.

AH 4149. Seminar in Modern European Art and Architecture. 3 Credits.
For majors in art history; non-majors must have permission of instructor. May be repeated for credit provided the topic differs.

AH 4159. Seminar in American Art and Architecture. 3 Credits.
For majors in art history; non-majors must have permission of instructor. May be repeated for credit provided the topic differs.

AH 4159W. Seminar in American Art and Architecture. 3 Credits.
For majors in art history; non-majors must have permission of instructor. May be repeated for credit provided the topic differs.

AH 4169. Seminar in Contemporary Art. 3 Credits.
Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit if topic differs. Restricted to limited to juniors and seniors.

AH 4182. Special Topics in South Asian Art. 3 Credits.
Advanced undergraduate study of South Asian art, architecture, and visual and material culture. Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details. Restricted to art history majors or with permission of the instructor.

AH 4189. Seminar: Special Topics in Art History. 3 Credits.
For majors in art history; non-majors must have permission of instructor. May be repeated for credit provided the topic differs.

AH 4198. Independent Study. 1-3 Credits.
Directed research and study in a specific area of art history to be approved by a faculty member. May be repeated for credit.

AH 4199. Internship in Art History. 3 Credits.
Open to candidates for the B.A. in art history only and with the approval of advisor in art history. May not be repeated for credit toward the degree. May be taken P/NP only.

AH 6201. Proseminar in Ancient Art of the Bronze Age and Greece. 3 Credits.
Greek art from the Minoans and Mycenaeans (c. 2000 B.C.) to the age of Alexander (c. 300 B.C.). Relationships among the arts of the different groups in the Aegean area and their impact on Western culture. The Theran volcanic eruption, the "Dorian Invasion," the portrayal of women, "heroic nudity," and the assumption of a stylistic chronology.

AH 6202. Proseminar in Ancient Art of the Roman Empire. 3 Credits.
Roman art from the successors of Alexander the Great (c. 300 B.C.) to the fall of the Roman Empire in the West (c. 300 A.D.). The impact of the Greek world on Roman art and culture; innovations and achievements of the Romans in architecture, portraiture, and historical narrative. Focus on the city of Rome and other areas of the Roman world such as North Africa and Asia.

AH 6205. Ancient Art Seminar. 3 Credits.
Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6211. Proseminar in Early Christian and Byzantine Art and Architecture. 3 Credits.
Art of the Mediterranean world following the collapse of Roman administration. Growth of the basilica and its decoration; the significance of small objects in medieval study. The rise and fall of the East Roman (Byzantine) Empire from Justinian to 1453.

AH 6212. Proseminar in Romanesque and Gothic Art and Architecture. 3 Credits.
The origin of Western art from the Hiberno-Saxon and Carolingian worlds and their relationship to the Ancient heritage. Romanesque and Gothic architecture and its sculptural decoration as social phenomena.

AH 6213. Islamic Art and Architecture. 3 Credits.
Introduction to the visual culture of the Muslim world, from Spain to India, from the 7th century to the present. Examination of artworks in their historical, religious, and cultural contexts; key points in the field's historiography. (Same as AH 3113).

AH 6214. The Art of the Book in the Medieval Muslim World. 3 Credits.
An advanced-level introduction to the visual culture of the Muslim world, from Spain to India, from the 7th century to the 17th century. Examination of artworks in their historical, religious, and cultural contexts; key points in the field's historiography. (Same as AH 3114).

AH 6215. Seminar in Medieval Art and Architecture. 3 Credits.
Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6220. Proseminar in Italian Art and Architecture of the 13th through 15th Centuries. 3 Credits.
Origins, development, and theoretical foundations of Renaissance painting, sculpture, and architecture (Giotto, Duccio, Masaccio, Donatello, Ghiberti, Brunelleschi, Mantegna, Bellini, Botticelli).

AH 6221. Prosem:Ital Art&Arch 16th Cent. 3 Credits.
The development of the universal genius within the circle of Florence and Rome (Leonardo, Raphael, Michelangelo) and their counterparts in Venice (Giorgione, Titian, Tintoretto, Sansovino, Palladio).

AH 6222. Proseminar in Early Northern Renaissance Art and Architecture. 3 Credits.
Royal and ducal patronage and the Flemish and French masters of the 15th century, including van Eyck, Campin, van der Weyden, Fouquet, van der Goes, Memling, and Gerard David. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6223. Proseminar in Northern Renaissance Art and Architecture. 3 Credits.
Francis I and Fontainebleau Palace, Henry VIII and Hampton Court, Johann Friedrich of Saxony, and the Holy Roman Emperors Maximilian I and Charles V. François Clouet, Hans Holbein, Lucas Cranach, Albrecht Dürer, Pieter Brueghel, Bernard van Orley, and others.

AH 6225. Seminar in Renaissance Art. 3 Credits.
Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6231. Proseminar in Italian Art and Architecture of the 17th Century. 3 Credits.
The Counter-Reformation and creation of the Baroque in painting, sculpture, and architecture in Rome (Carracci, Caravaggio, Bernini, Borromini, Pietro da Cortona), Turin (Guarini, Juvarra), and Venice (Longhena).

AH 6232. Proseminar in Northern European Art and Architecture of the 17th Century. 3 Credits.
Hapsburg Flanders and Brussels under the Spanish archdukes and their patronage of Rubens and his circle. The role of Dutch merchants commissioning diverse secular themes in Utrecht, Haarlem, Delft, Leyden, and Amsterdam from "Golden Age" artists such as Rembrandt, Vermeer, and Hals. Specific topic announced in the Schedule of Classes.

AH 6234. Proseminar in Spanish and Portuguese Art through the 16th Century. 3 Credits.
The Kingdoms of the Iberian Peninsula from the Reconquest of Granada to the Renaissance Age of Exploration. Specific topic announced in the Schedule of Classes.

AH 6235. Seminar in Baroque Art. 3 Credits.
Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6240. Proseminar in European Art of the 18th Century. 3 Credits.
Painting, sculpture, and architecture in France, Great Britain, and Italy. Emphasis on Watteau, Chardin, David, Hogarth, Gainsborough, Reynolds, Canaletto, and Tiepolo.

AH 6245. Seminar in European Art of the 19th Century. 3 Credits.
Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6246. Proseminar in Modern Architecture in Europe and America. 3 Credits.
Major developments in architecture and urbanism from the Industrial Revolution to the end of the 20th century.

AH 6250. Seminar: Modern Art. 3 Credits.
Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6251. Proseminar in American Art in the Age of Revolution. 3 Credits.
American art during the 18th-century "consumer revolution," the American War for Independence, and the early republic. Emphasis on the socioeconomic and political purposes of art, with focus on Enlightenment symbolism and the visualization of national identity.

AH 6252. Proseminar in American Art in the Era of National Expansion. 3 Credits.
American art from the opening of the Erie Canal in 1825 to the Spanish-American War in 1898. Emphasis on the role of art in the expansion of the United States, exploring issues of race, class, and gender; art and religion.

AH 6254. Seminar in American Art before 1900. 3 Credits.
Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Same as AMST 6254.

AH 6255. Seminar: Studies in American Art and History. 3 Credits.
Selected problems and themes in American cultural history involving the use of artistic materials in different media; emphasis on methodology and analytic techniques. May be repeated for credit. Same as AMST 6730.

AH 6256. Seminar in American Art of the 20th Century. 3 Credits.
Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6257. Seminar in Photography. 3 Credits.
Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6258. Art Historiography. 3 Credits.
The development of art history as a discipline from the eighteenth century to the present. An investigation of different art historical methodologies, including formal analysis, iconological, feminist, Marxist, semiotic and deconstructivist approaches.

AH 6260. Seminar in African Art. 3 Credits.
Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

AH 6261. Seminar in Asian Art. 3 Credits.
Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

AH 6265. Seminar in Islamic Art and Architecture. 3 Credits.
Topic announced in Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6269. Seminar in Contemporary Art. 3 Credits.
Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

AH 6270. Special Topics in Art History. 3 Credits.

AH 6286. Preventive Conservation Concepts. 3 Credits.
Historical development of preventive conservation in museums, conservation ethics, team approaches to conservation, interactions of various materials with agents of deterioration. Basics of materials testing, preparation of condition reports, choosing museum storage and exhibition materials, and risk assessment. Same as ANTH 6203/ MSTD 6203.

AH 6287. Preventive Conservation Techniques. 3 Credits.
Practical applications of preventive conservation of materials, monitoring environmental conditions, conducting risk assessments, evaluation of exhibit and storage areas; developing plans, policies, and procedures for collections care; grant proposal preparation for collections care initiatives. Same as ANTH 6204/ MSTD 6204.

AH 6298. Independent Research in Art History. 3 Credits.

AH 6299. Museum Internship. 3-12 Credits.

ART THERAPY (ARTH)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ARTH 6201. Survey of Art Therapy. 3 Credits.
The use of the visual arts to enhance personal development and growth; illustrated lectures, readings, discussion, and studio work presented by experts in the field. Instruction is delivered online via Blackboard. No previous art experience is necessary.

ARTH 6205. History and Theory of Art Therapy. 2 Credits.
Art therapy history and theory, milestones and practitioners. The development of art therapy as a distinct therapeutic practice. Overview of psychotherapy theories relevant to art therapy. Open only to art therapy students.

ARTH 6206. Human Development and Art Therapy. 3 Credits.
Psychological and artistic development across the life span. Theories of personality development; cultural and environmental influences; and human behavior, including developmental crises, disability, exceptional behavior, and addictive behavior. Restricted to art therapy students.

ARTH 6210. Counseling/Art Therapy Process. 3 Credits.
Theoretical and clinical dimensions of counseling and art therapy explored through study of current research concerning the diverse elements affecting the therapeutic process. The goals of each phase of treatment; development of the therapeutic alliance; assessment of client readiness; therapeutic techniques and interventions as practiced in short- and long-term treatment.

ARTH 6211. Process of Counseling and Art Therapy: Theory. 3 Credits.
Major theories in counseling and art psychotherapy through the lens of the creative process and other aspects of clinical practice; the influence of multicultural issues, contemporary and evidence-based practices, and various settings on art-making and the therapeutic encounter. Restricted to students in an art therapy program; permission of the instructor may be substituted. Prerequisite: ARTH 6210.

ARTH 6221. Studio/Technique of Art Therapy. 3 Credits.
Direct experience of the therapeutic utility and psychological influence of art processes and materials. Identifying the effect of art-making leading to assessment and intervention strategies. Open only to art therapy students.

ARTH 6231. Child Art Therapy. 2 Credits.
Practical, theoretical, and ethical considerations involved in treating children in clinical and educational settings. Application of art therapy and counseling principles and practice for diverse child populations. Development of interventions for varied DSM–IV diagnoses.

ARTH 6232. Art Therapy with Adolescents. 2 Credits.
Practical, theoretical, and ethical considerations in treating adolescents in clinical and educational settings. Assessment and treatment issues integrating the use of art techniques specifically designed for this population. Application of art therapy and counseling principles and practice for diverse adolescent populations. Development of interventions for varied DSM–V diagnoses. Restricted to students in an art therapy program.

ARTH 6233. Marital and Family Art Therapy/Counseling. 3 Credits.
Principles of working with families and couples, including an overview of systems theories and stages of family life cycle development; art techniques for evaluating of family dynamics; intervention strategies and cultural and ethical considerations. Restricted to students in an art therapy program.

ARTH 6234. Group Process. 3 Credits.
Theoretical and experiential understanding of group art therapy and counseling methods and skills. Principles of group dynamics, therapeutic factors, member roles and behaviors, leadership styles and approaches, selection criteria, and short- and long-term group process.

ARTH 6235. Social and Cultural Diversity. 3 Credits.
Exploration of the therapist's heritage, expectations, worldview and values; racial/cultural identity development; skills for multicultural counseling. Stereotypes and biases that interfere with effective treatment of culturally different clients. The role of the art therapist or counselor in conflict resolution, advocacy, and social justice. May be repeated for credit if taken through the study abroad course option. Restricted to art therapy students.

ARTH 6241. Assessment Procedures. 3 Credits.
Instruments and procedures used in assessment of psychological health and psychopathology; diagnostic and developmental criteria as manifested in artwork and art-making; statistical concepts, including reliability and validity; selection and administration of assessment tools; treatment planning; report writing. Restricted to students in an art therapy program.

ARTH 6242. Psychopathology: Art and Diagnosis. 3 Credits.
Criteria of psychiatric diagnoses, such as the Diagnostic and Statistical Manual multiaxial system, theories of psychopathology, and relevant literature evaluation of potential indicators of functional and organic disorders in behavior and artwork of clients; ethical issues; cultural and environmental influences on diagnostic categorization; basic introduction to psychopharmacology. Restricted to students in an art therapy program; permission of the instructor may be substituted.

ARTH 6243. Substance Abuse and Addictions. 3 Credits.
Overview of substance abuse and addictions for art therapy and counseling, including theory and treatment applications. Screening and assessment tools; treatment models specific to the field of addictions. Art therapy techniques in the treatment of substance abuse for adolescents and adults in a variety of treatment settings. Restricted to ARTH majors only.

ARTH 6251. Research Methods. 3 Credits.
Planning, conducting, and evaluating relevant methodologies, including qualitative and quantitative approaches and basic statistics. The importance of research in the psychotherapy professions; ethical and legal considerations; and the use of research to assess effectiveness of mental health and art therapy services.

ARTH 6261. Ethics and Professionalism. 3 Credits.
Professional identity and the role of the therapist; the ethical practice of counseling and art therapy, including familiarity with ethical standards of various professional organizations; credentialing and licensure; public policy and advocacy for patients and for the profession.

ARTH 6262. Career Counseling and Art Therapy. 3 Credits.
The theoretical foundation and practical experience necessary to understand and support career development needs for diverse individual clients and groups. Career development over the lifespan; assessments, tools, and resources; occupational and labor market trends and resources. Specific art therapy techniques applicable to career counseling in educational and work settings. Restricted to ARTH majors only.

ARTH 6265. Advanced Issues in Psychotherapy and Art Therapy. 1-3 Credits.
Overview and application of one or more treatment models or theories to various mental and emotional disorders. Connections between the practice of art therapy and the techniques of other disciplines.

ARTH 6271. Art Psychotherapy and Trauma I: Theory and Approaches to Treatment. 0-3 Credits.
Introduction and overview of theory, practice, and treatment related to complex, trauma-related problems; psychobiology of traumatic stress, impact of traumatic stress on individuals, and specific treatment modalities in clinical setting; somatic (body-based) and nonverbal (art and image-based) treatment modalities. Supervised treatment or observation of treatment of clients with trauma histories. Restricted to students in an art therapy program.

ARTH 6272. Art Psychotherapy and Trauma II: Loss, Countertransference, and Resiliency. 3 Credits.
Multi-modal treatment of acute, serial, or complex trauma; theoretical, practical, moral, cross cultural, and personal aspects as seen through an art therapy and counseling lens. Supervised treatment or observation of treatment of clients with trauma histories. Restricted to students in an art therapy program. Prerequisite: ARTH 6271.

ARTH 6281. Practicum in Art Therapy. 1-2 Credits.
A total of 900 hours of clinical fieldwork in a professional setting. Supervised clinical experience with clients or patients in psychiatric, rehabilitation, and education settings with children, adolescents, and adults. On-site individual supervision by clinical instructors; on-campus group supervision by faculty. Open only to art therapy students.

ARTH 6292. Special Projects in Art Therapy. 1-12 Credits.
Individual work based on research. Empirical, clinical, and library research may be undertaken, as well as the development of new procedures. Details to be worked out with each student. May be repeated for credit with advisor's approval. Open only to art therapy students.

ARTH 6998. Thesis Research. 3 Credits.

ARTH 6999. Thesis Research. 3 Credits.

ASTRONOMY (ASTR)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ASTR 1000. Dean's Seminar. 3 Credits.
The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the schedule of classes for more details. Restricted to first-year students in CCAS.

ASTR 1001. Stars, Planets, and Life in the Universe. 4 Credits.
Primarily for non-science majors. An introduction to how our Universe is structured, including the basic principles underlying astronomical systems and observations. Topics include the known laws of nature, stars, and planetary systems and the conditions for extraterrestrial life and exploration. Prerequisite: high school algebra. Laboratory fee.

ASTR 1002. Origins of the Cosmos. 4 Credits.
Primarily for non-science majors. A description of the Universe, its origins and its evolution, based on known physical principles. Topics include galactic and stellar structure, black holes, origin of the elements, and big bang cosmology. Prerequisite: high school algebra. Laboratory fee.

ASTR 1003. Introduction to Astronomy. 2 Credits.

ASTR 1004. Introduction to Astronomy. 2 Credits.

ASTR 2121. Introduction to Modern Astrophysics. 3 Credits.
Introduction to the concepts and methods of modern astrophysics. Physical processes behind the origin, structure and evolution of stars and galaxies, based on physical principles and modern astronomical observations. Topics include the energy source of the Sun, the stellar life cycle, galaxies, and the structure and fate of the Universe. Prerequisites: PHYS 1012 or PHYS 1022.

ASTR 2131. Astrophysics Seminar. 3 Credits.
Course led each week by a different expert in the research on various astrophysical sources and phenomena. Topics may include the life and death of stars; most violent explosions in the universe; evolution of galaxies; and evolution of the universe on the largest scales. Prerequisite: PHYS 1012 or PHYS 1022.

ASTR 2141. Data Analysis in Astrophysics. 3 Credits.
Principles of data analysis in astrophysics; basic analysis of astronomical data from NASA satellites and ground-based telescopes; linking measurements from the data to physics concepts; observing programs and proposals; study of cosmic phenomena through practical experience with data. Students should have completed a programming course before enrolling. Prerequisites: PHYS 1012 or PHYS 1022. Recommended background: prior study in physics or astrophysics.

ASTR 3161. Space Astrophysics. 3 Credits.
Physical processes of celestial phenomena as determined from space-based instrumentation. While the entire electromagnetic spectrum is covered, the high-energy (X-ray and gamma ray) region is emphasized. Results from ground-based instrumentation (e.g., radio and optical) may be introduced. Prerequisites: PHYS 1022.

ASTR 3183. General Relativity. 3 Credits.
Einstein's general theory of relativity; special theory of relativity, the nature of space and time, the equivalence principle, Riemannian geometry, Einstein's proposal, tests of the theory, Schwarzschild and Kerr solutions, Hawking radiation, and cosmological models. Prerequisites: MATH 3342 and PHYS 2023.

ASTR 4195. Undergraduate Research in Astrophysics. 3 Credits.
Research on problems in astrophysics approved by the faculty. May be repeated once for credit.

BIOCHEMISTRY (BIOC)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

BIOC 3261. Introductory Medical Biochemistry. 4 Credits.
Introduction to structures of biological macromolecules, enzyme catalysis, cellular bioenergetics, and metabolism. Same as BISC 3261. Prerequisite CHEM 2151– CHEM 21 52. Credit toward the degree cannot be earned for this course and for CHEM 3165.

BIOC 3262. Biochemistry Laboratory. 2 Credits.
Study of common experimental techniques used in life science laboratories to separate and characterize biological macromolecules. Same as BISC 3262/ CHEM 3262. Prerequisite: BIOC 3261/ BISC 3261 . Laboratory fee.

BIOC 3263. Special Topics in Biochemistry. 2 Credits.
In-depth discussion of current biochemically relevant topics, including cancer and HIV chemotherapy, immune response, photosynthesis, signal transduction, hormone regulation and nutrition. Same as BISC 3263. Prerequisite: BIOC 3261/ BISC 3261 . Credit toward the degree cannot be earned for this course and for CHEM 3166.

BIOC 3263W. Special Topics in Biochemistry. 2 Credits.

BIOC 3560. Diet, Health, and Longevity. 3 Credits.
Biochemical and molecular explanations of how calorie intake affects health; scientific principles of dieting. Prerequisite: BIOC 3261 or BISC 1005 or EXSC 2114 or EXSC 2119.

BIOC 3564. Lipid Biotechnology. 0-2 Credits.
Same as BISC 3564/ CHEM 3564. Prerequisite: BIOC 3261/ BISC 3261 . Laboratory fee.

BIOC 3820. Bioinformatics and Computational Biochemistry. 2 Credits.
How biomedical researchers integrate information from molecular biology resources for analysis and testing of hypotheses. Prerequisite: BISC 1111; STAT 1127.

BIOC 3821. Projects in Biomed Informatics. 1-2 Credits.

BIOC 4195. Undergraduate Research. 1 Credit.
Research conducted under a mentor who is a member of the department. May be repeated for credit (only 1 credit may count toward the minor). Prerequisites: permission of the faculty member concerned.

BIOC 4701. Science and Medicine. 0-4 Credits.
A broad overview of several biomedical discoveries made in the 20th century and the often profound influence they have had on medical technology and on new directions in science and medicine, science administration, politics, ethics, and philosophy. (Same as HONR 2175).

BIOC 6201. Medical Biochemistry. 7 Credits.
Required for medical students. Lecture and laboratory; emphasis on basic principles and their relation to medicine.

BIOC 6209. Resch Elective in Medical BioC. 1-12 Credits.

BIOC 6211. Biochem-Health Sci Students. 3,4 Credits.
Basic concepts of biochemistry and their relation to health sciences.

BIOC 6221. Proteins, Pathways, and Human Health. 4 Credits.
A comprehensive course in general biochemistry for graduate students in biomedical sciences. Prerequisite: CHEM 2152, CHEM 2154.

BIOC 6222. Biochemical Genetics and Medicine. 3 Credits.
Continuation of BIOC 6221. A comprehensive course in general biochemistry for graduate students in biomedical sciences. Prerequisite: CHEM 2152, CHEM 2154.

BIOC 6223. Bioinformatics. 2 Credits.
The application of bioinformatics concepts and methods through the use of molecular biology databases and tools, covering molecular evolution, and protein sequence, structural, functional analysis. Recommended background: One undergraduate biochemistry course.

BIOC 6224. Molec biol and protein methods. 3 Credits.
Common laboratory techniques used in life science laboratories to separate and characterize proteins, including chromatography, gel electrophoresis, immunoassays, spectroscopy, and centrifugation. Corequisite: BIOC 6221. Laboratory fee.

BIOC 6227. Biochemistry Seminar. 1 Credit.
Current literature in biochemistry. Limited to graduate students in the department. May be repeated for credit.

BIOC 6234. Biochemical and Bioinformatic Approaches to Protein Structure and Function. 3 Credits.
